Commodity-wise Domestic, International Prices and Arrivals at Different Centers

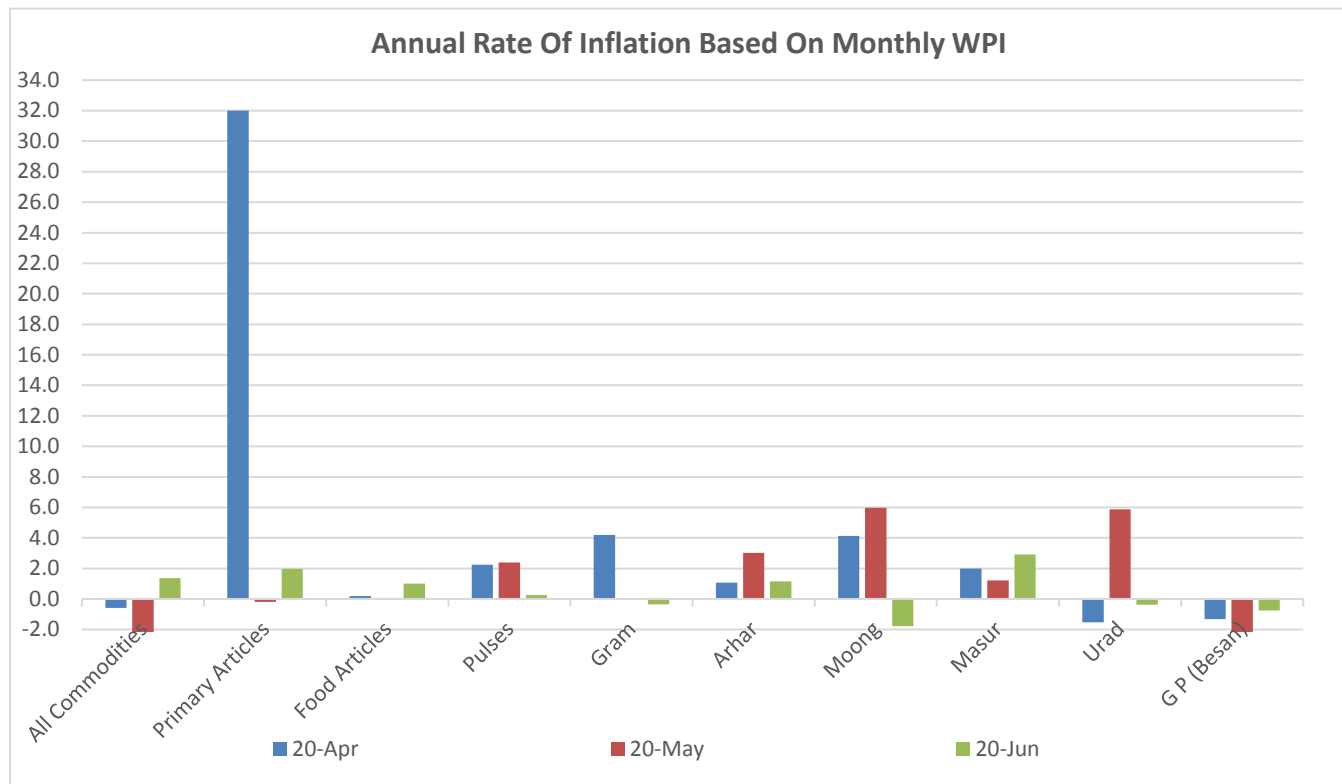

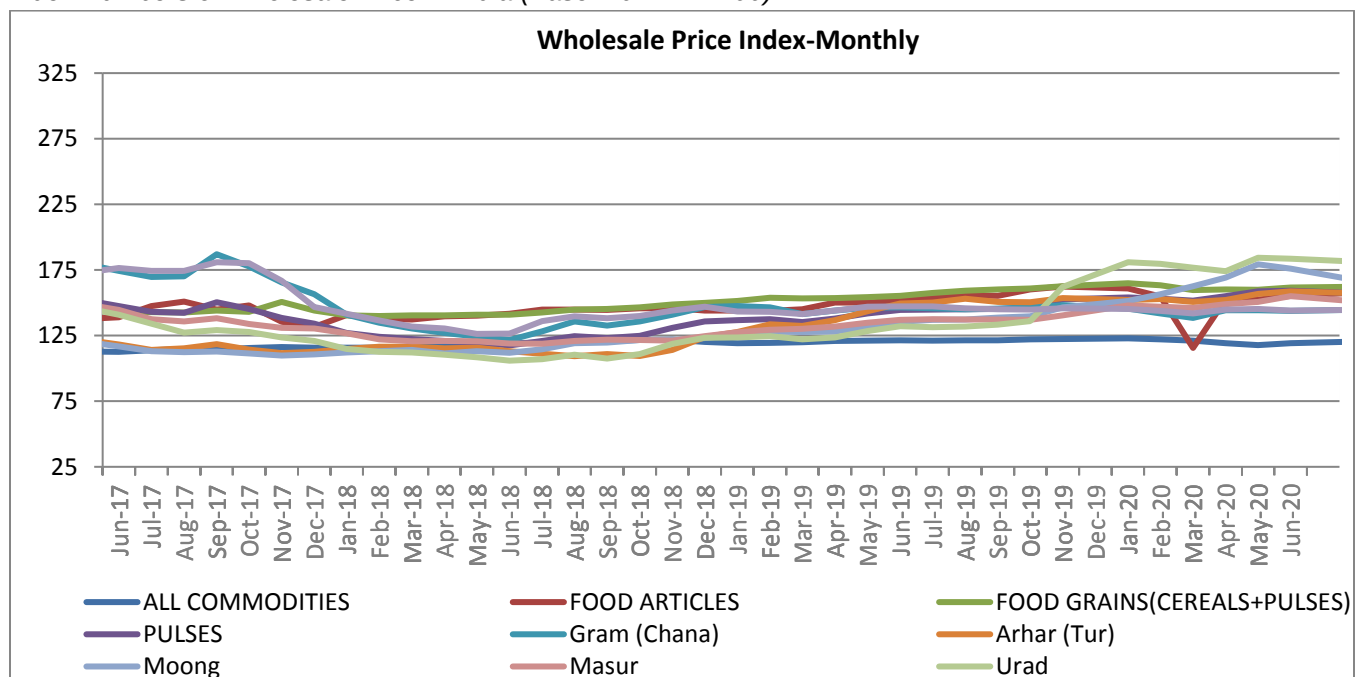

Highlights-Domestic Market:

- Kharif pulses sowing has entered in last phase now. Indian farmers have covered 42.5 lakh ha so far against 40.23 lakh ha last year till date. It is almost 6 % higher than last year and 96% of normal as on 7th, Aug 2020. Urad area too is higher by 6.64 % to 34.55 lakh ha so far against 32.4 lakh ha last year. It is higher by 97 % of normal. Indian farmers have showed more interest in moong farming and they have shown 32.13 lakh ha so far against 27.54 lakh ha last year. It is higher by 16.67 % from last year and higher by 5% of normal as on 7th Aug-2020. Kulthi sowing is down by 16 % at 0.06 lakh ha so far. Farmers have covered 10.36 lakh ha area under other pulses against 14.53 lakh ha last year. Total area under kharif pulses is higher by 4.21% to 119.59 lakh ha. Farmers have planted kharif pulses in 92% area of season's normal so far. Normal area is 128.88 lakh ha. See details at page no -14.**
- Recovery in cash chana market seems temporary as there is no support from demand. Firmness may continue if dal demand improves. As of now demand remains flat and mills are buying based on immediate needs. Under prevailing condition chana may trade up 100-150 for shorter period and then will decrease again due to lack of demand support. If Nafed starts selling chana near 4200-4300, cash market would not cross Rs4500. Kharif crop would start hitting the market by end August and Nafed would have to procure again. So, requirements of storage space would not allow Nafed to hold stock for longer time. Under prevailing condition chana may trade at Rs4300-4400 in Delhi market and may move up to 4500 if demand for dal improves due to commencement of festive season.**
- Masur import at reduced duty is likely to cross 4.5 lakh MT by the end of this month. Vessels are on the way to Indian ports from Canada and Australia. Maximum quantity (around 80%) has been purchased from Canada while the rest 20% from other countries including Australia. Bad weather condition during growing stages reduced yield in India and it decreased by 8 to 10 percent to 12.70 lakh MT against normal consumption of 20 lakh MT. As import remained restricted at 30% duty, prices of masur started increasing in the market. After reduction in import duty import flow has started increasing and import volume in July and Aug combined may cross 4.5 lakh MT. It would pressurize prices in coming weeks. If govt. extends import time with reduced duty (unlikely), prices of masur may decrease considerably. Masur is being traded at Rs5600-5700 in domestic market while imported masur is being quoted at Rs 5400-5450.**
- Higher area coverage so far for tur this year and poor offtake in cash market have affected normal sentiments. Despite lower arrival and ongoing festive season bulk buyers are unwilling to buy at this point of time. Imported tur (lemon) was quoted at \$660 per MT at Mumbai. Traders have quoted new tur price at Rs5400 while old at Rs5200 per qtl. Importers are still waiting for import license. Agriwatch expects improvement in demand in coming weeks and slight recovery in tur price. If govt. issues license by end Aug, imported tur would hit market in Sept. Farmers have covered around 6 percent higher area this year. Around 97 percent area of normal has been covered. It may end at 44 to 45 lakh ha under prevailing weather condition. Crop condition of tur is good so far.**
- Moong sowing is running smoothly and farmers have covered around 105% of normal area so far. Normal kharif moong area is 30.49 lakh ha. As pace of sowing is higher moong area may cross 33 lakh ha this year. Agriwatch preliminary estimate for kharif moong is production is 14.25 lakh MT. If we add estimated rabi production of 5.57 lakh MT, it brings total to 19.81 lakh MT. It was 19.06 lakh MT last year. However, if kharif area moves up by 33 lakh ha (Agriwatch estimate), kharif production would increase accordingly with increase ratio of area. As crop condition is very good, pressure on moong is likely to continue in Aug too. Moong in cash market is being traded at Rs 5600-6600 per qtl, lower by around Rs 1200-1500 from new set MSP (Rs7196).**
- With favorable weather condition kharif urad area has increased by 6.64% from last year. Farmers have covered 34.55 lakh ha so far against 32.4 lakh ha last year. Normal kharif area for urad is 35.50 lakh ha. Sowing has entered in last phase now. Under normal condition Agriwatch's preliminary production estimate for kharif season is 18.60 lakh ha. With estimated production of 6.26 lakh MT in rabi season, it brings total to 24.86 lakh MT. The new season started with 4.44 lakh MT carryin.. So total supply seems at comfortable level with 4 lakh MT allowed import for the year. Expected higher import in July and Aug and good crop condition would pressurize cash market in coming weeks.**
- Peas market traded steady despite negligible import and lower stock in domestic market. Bumper chana crop are restricting upward momentum.. So any firm momentum is unlikely. Green peas would continue to trade firm as stock in pipe line is almost nil.**

International Market Update:

- **For 2020-21, Canadian lentil seeded area rose by 12% to 1.7 Mha, due to good forecasted returns** compared to other crops. By province, Saskatchewan accounts for 90% of the lentil area, with the remainder seeded in Alberta and Manitoba. Production is forecast to increase to 2.48 Mt, with supply lower due to smaller carry-in stocks. Exports are forecast to be lower at 2.1 Mt. Carry-out stocks are forecast to rise to nearly 0.2 Mt. The average price for all grades and types is forecast to rise from 2019-20, with higher prices from large green and red types. There is an expectation that import demand in the Indian subcontinent will continue to be similar to higher in 2020-21.
- **Lentils area in Canada is expected to decline slightly from 1530 thousand ha to 1501 thousand ha** in 2020-21. the decline is nominal so production size is estimated to be similar as seen in 2019-20. Canada had produced 21.67 lakh MT lentils in 2019-20. the fig for 2020-21 has been pegged at 21.50 lakh MT. Yield is expected to be similar at 1.46 tonne per ha. though import and export may decline in 2020-21 from 85 to 50 and from 2200 to 2000 thousand MT respectively. Price is expected to hover in the range of \$500-530 per MT.
- **For 2020-21, the area seeded under chickpeas fell by 24% from 2019-20 due to the lower farm gate prices** received in the previous year. Saskatchewan is expected to account for the majority of the chickpea area, with the remainder in Alberta. Production is forecast by AAFC at 200 Kt, down 21% from the previous year, due to lower seeded area despite higher expected yields. Supply is forecast to rise from 2019-20. Exports are forecast to rise and carry-out stocks are forecast to fall. The average price is forecast to fall marginally due to a larger world supply, with the expectation of an average grade distribution.
- **Dry peas production in Canada increased from 35.81 lakh MT in 2018-19 to 42.37 lakh MT in 2019-20.** Based on preliminary area and yield estimate production in 2020-21 may increase slightly from 42.37 to 42.75 lakh MT. Seeded area in 2020-21 is 1732 thousand ha in 2020-21 against 1753 thousand ha in 2019-20. The yield of dry peas is expected to increase this year from 2.48 to 2.51 tonne per ha in 2020-21.
- **Australia is going to plant its biggest chickpeas crop in comparison to last three years.** Planting continues in Queensland and NSW. As moisture level in the field is good, farmers are increasing area under chickpeas. As top level soil moisture is lower, farmers are using wheat land for chickpeas planting. Forward delivery for October onward has been heard at \$ 630 per MT. New chickpeas crop may attract higher value. Value of new crop may be affected by any further hiccups caused by COVID-19. It may pressurize Chickpeas price.
- **Lentils stock in Australia is decreasing fast as bulk shipment to B, desh continues with next three months forward deal** was heard. Old crop of lentils would not be available by the beginning of the new season. Forward quotes have been heard at \$700-800 per MT, but limited quantity limits the deal too. B, desh has been buying 20,000 MT red small lentils per month. It may continue next three months. Australia exported 80,000 MT lentils in March and big volume export continues in April and May too. So old stock is depleting fast. As prices are moving up, area under lentils may increase by 10% this year. New lentils quotes are \$650-700.
- **As per latest update by NASS, dry pea acreage may be down by 12-13% this year in US** peas producing regions. Farmers may plant 971,000 acres against 11,03,000 acres last year. Intended plantings are down from a year ago in Idaho, Montana, Nebraska, North Dakota, and South Dakota. However, area in Washington may increase by 19% this year.
- **Chickpeas area in the US is likely to decrease by 32% from last year. Small chickpea acreage shows a decline of only 5%, while large chickpea acreage is expected to decrease by 41%.** It is really a big surprise this year.

Monthly Outlook: -Pulses are likely to trade range bound.

Pulses WPI Index:

Index Numbers of Wholesale Price in India (Base: 2011-12=100)

Pulses WPI increased by 4 points from 158.8 in May to 159.2 in June-2020

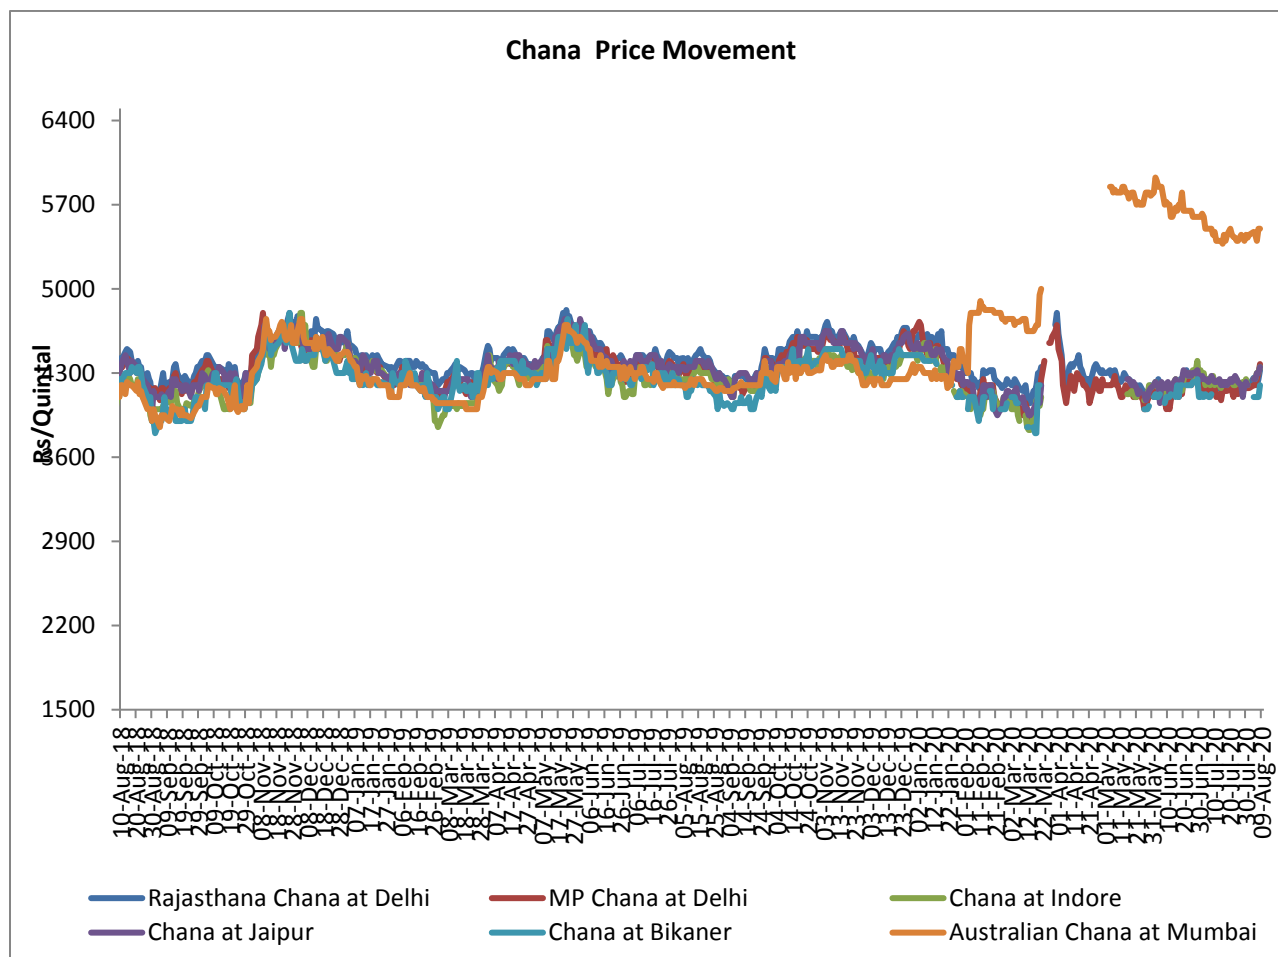

Pulses-Wise Scenario:

Chana

Current Scenario:

Chana cash market is unlikely to maintain its firm momentum despite firm futures and improvement for dal demand. Nafed has procured around 21.55 lakh MT chana so far against the target of 22.5 lakh MT this season. Procurement is almost over now and Nafed has 3.3 MMT chana stock, including old too. In Delhi, Chana is being traded at Rs 4250-4350 and may move up more by Rs 100-150 from current levels. Demand for chana is expected to improve from mid- Aug and it may help market to recover to a certain extent. Prices may move up beyond MSP level if import from LDC countries remains restricted and Nafed stops selling Aug and Sep. However, overall sentiments seems weak for chana cash market at demand would decrease at higher level. In Delhi It may trade at Rs 4400-4500 in Aug.

All India average price for Chana increased by 0.92 percent from Rs 4201 to 4240 per qtl. during review week. Even Australian Chana (imported) price increased by 0.7% to Rs 5462 per 100kg due to firm futures in domestic market. Following graph illustrates chana price movement in different markets:

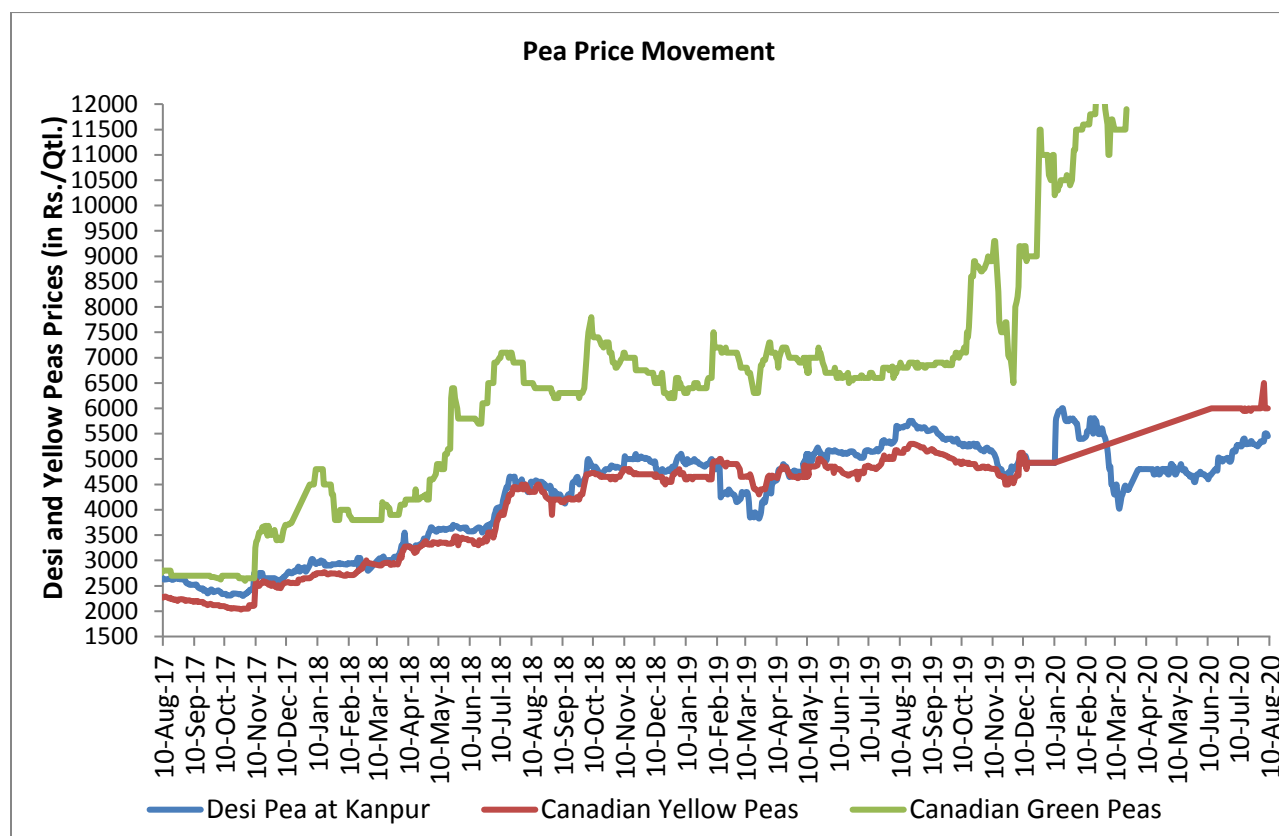

Market Outlook: Firm tone is unlikely to prevail in chana cash market this week due to commencement of selling by Nafed and restricted offtake from mills in consuming states amid higher import from LDC countries. Demand from besan and hotel industries is still awaited. Apart from this free distribution of pulses is affecting market sentiments. Distribution of 1 k.g. dal per family/ per ration card would continue to affect direct demand from cash market till Nov.

Peas (Matar):
Market Recap:

Peas cash market traded firm and may continue to trade firm this week too. Stock at port is dwindling and availability is decreasing continuously in major markets like Kanpur, MH, Kolkatta and Indore. However, demand at higher level may get disrupted and price may decrease again. No import is taking place right now as import limit of 1.5 lakh MT has already been exhausted. With changed status from the free to restricted category and hefty levy imposed on peas, no import is likely in the coming months too. The commerce ministry issued a separate harmonized system (HS code) for all peas (including yellow, green dun and kaspas) and changed its status in the third week of Dec. Now import deals are not taking place given these changes aimed at increasing consumption of chana which is abundantly available in domestic market. Under prevailing conditions govt. is unlikely to allow green peas import. So price of yellow peas will also stay steady at current levels or decrease slightly.

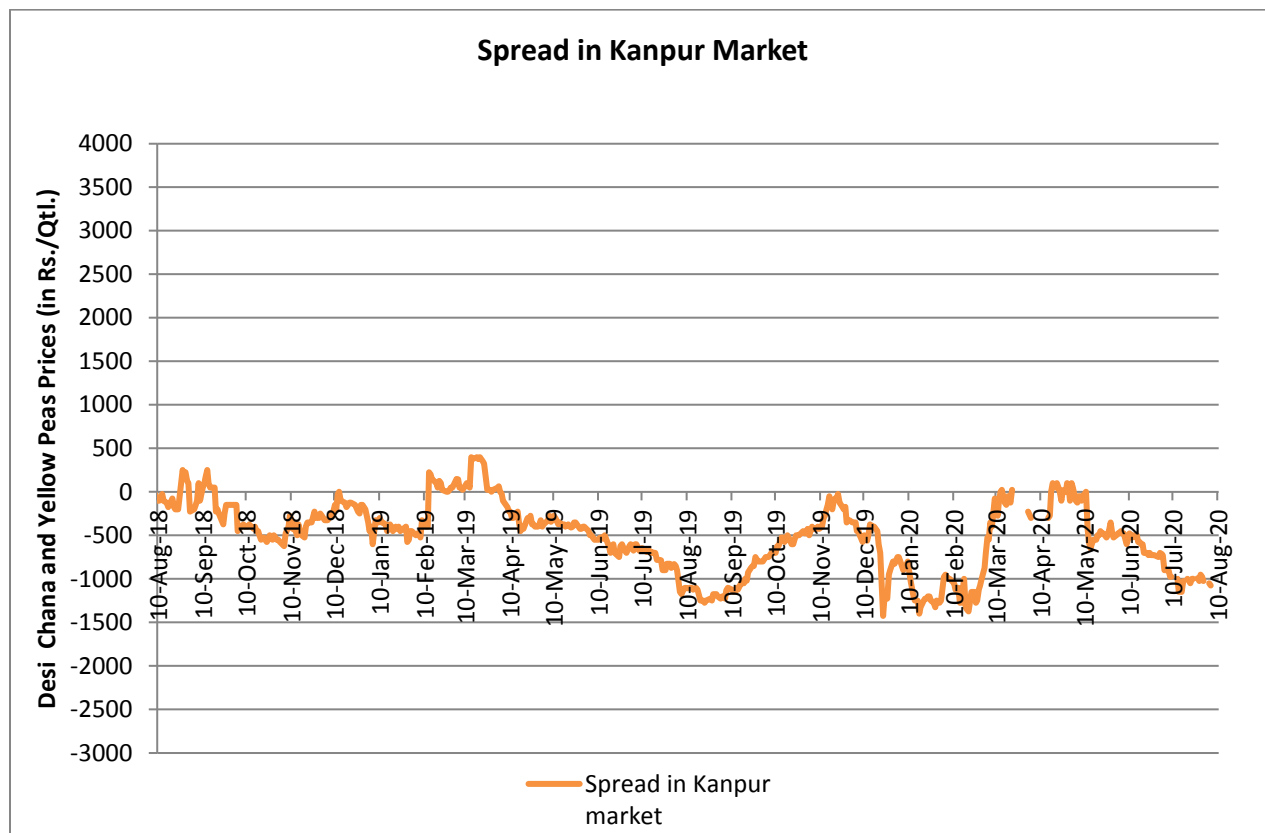

Peas in Kanpur market traded flat at Rs 5500 due to halted arrivals in domestic market and almost no import during last three months. Stockists too are unwilling to release old stock because of lower production this year. It has lent support to peas in Kanpur market. As supply side is tight, it would continue to trade firm. Demand for green pea is normal.

Current Market Dynamics & Outlook:

Peas market traded firm due to decreasing availability in domestic market and firming chana price. Kanpur market traded up by Rs100 to Rs 5500 per qtl. Any major spike is unlikely now. Overall, all India average price was up by 2.25% to Rs 5450-5500 per qtl. In Mumbai market, there was no quote for yellow peas as stock was exhausted. Demand and supply side is balanced right now.

Spread With Chana:

Spread between Chana and Peas, at Kanpur market remained in negative zone. Gap has increased from Rs 1000 to Rs 1075 due to increased chana price. Spread is expected to remain in the negative zone in August too on relative movement in Chana prices. Overall outlook seems steady to slightly firm this week.

Market Outlook: Outlook remains steady to slightly firm in the short to term.

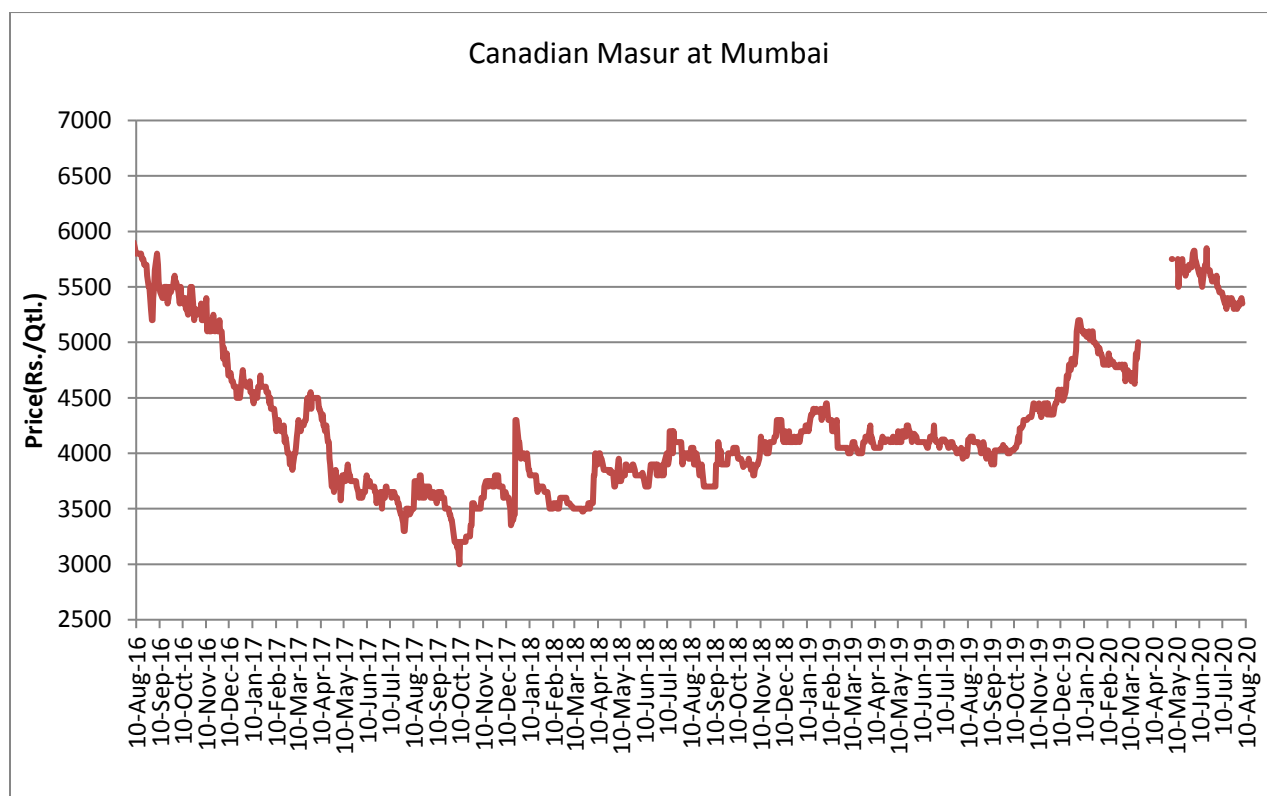

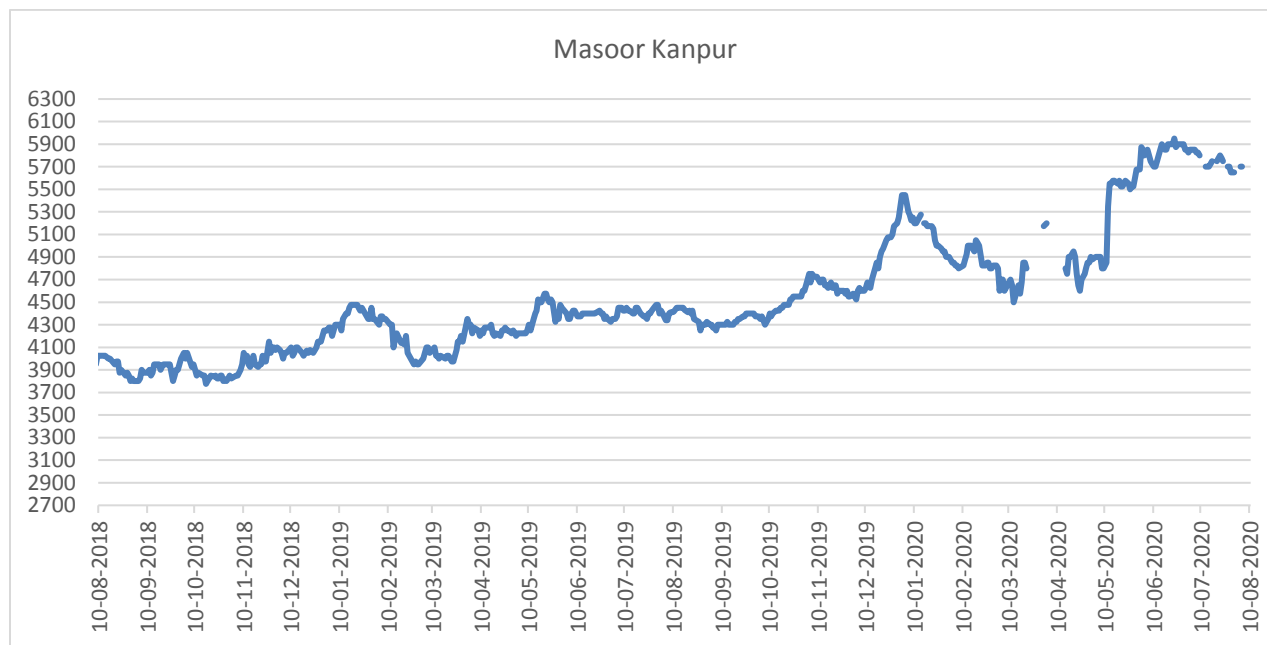

Lentils (Masoor):

Market Recap:

Increasing import flow of masur from Canada and Australia may put pressure on cash masur market. In July and Aug around 5.5 lakh Mt is expected to hit Indian ports and it would go to impact price directly. One vessel having 57400 Mt masur landed at Mundra ports on 4th August and three more vessels having 2 lakh Mt are expected by the end of this month. Its impact is being seen on masur price in domestic market. If prices decrease below Rs 5000, govt would not extend lower duty time line beyond August-2020. In that case some recovery is expected again in masur market. So it would be interesting to see the govt's action in the last week of August. It would decide the futuristic trend of price. Notably, govt. had slashed the import duty on masur from effective 30 % to 10 % till 31st August-2020 to cool down prices in domestic market on the beginning of June.

Current Scenario:

Stock at ports has started increasing now. At Mumbai ports importers are selling masur at Rs 5300. As prices are ruling higher than MSP in domestic market, govt's agencies are unable to procure 1.21 lakh MT, set target for the year. As of now, only 4000 Mt has been procured on MSP (Rs 4800). Old stock with Nafed is around 21,000 MT.

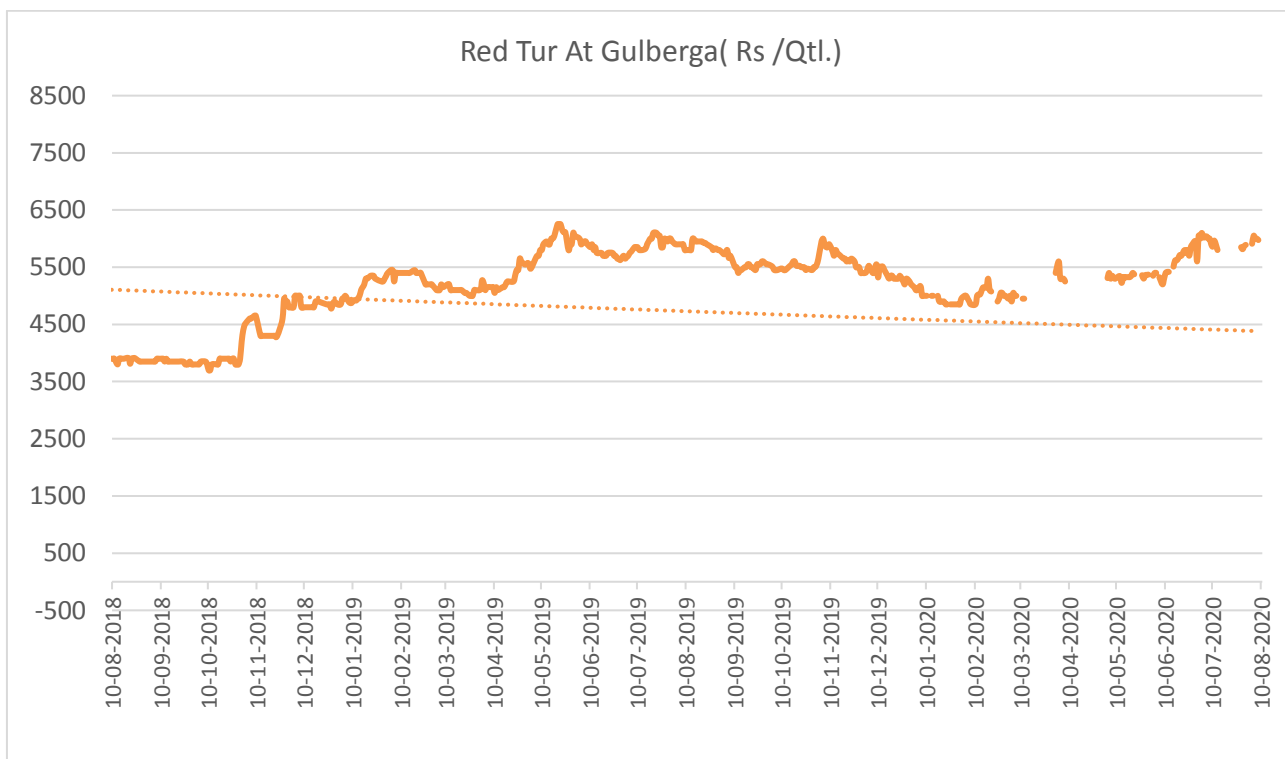

Market Outlook: Prices may trade lower due to higher supply prospects from import in coming weeks. Sluggish demand from mills and good pace of offloading by stockists remains unsupportive to cash market in the medium term. Nafed may start selling old crop too. It has 21,000 MT old stock. Import is likely to continue at 10% duty till August. If duty structure is changed again at previous level (30%) for Sep-2020, price may move up again. Overall tone in masur market remains weak in August..

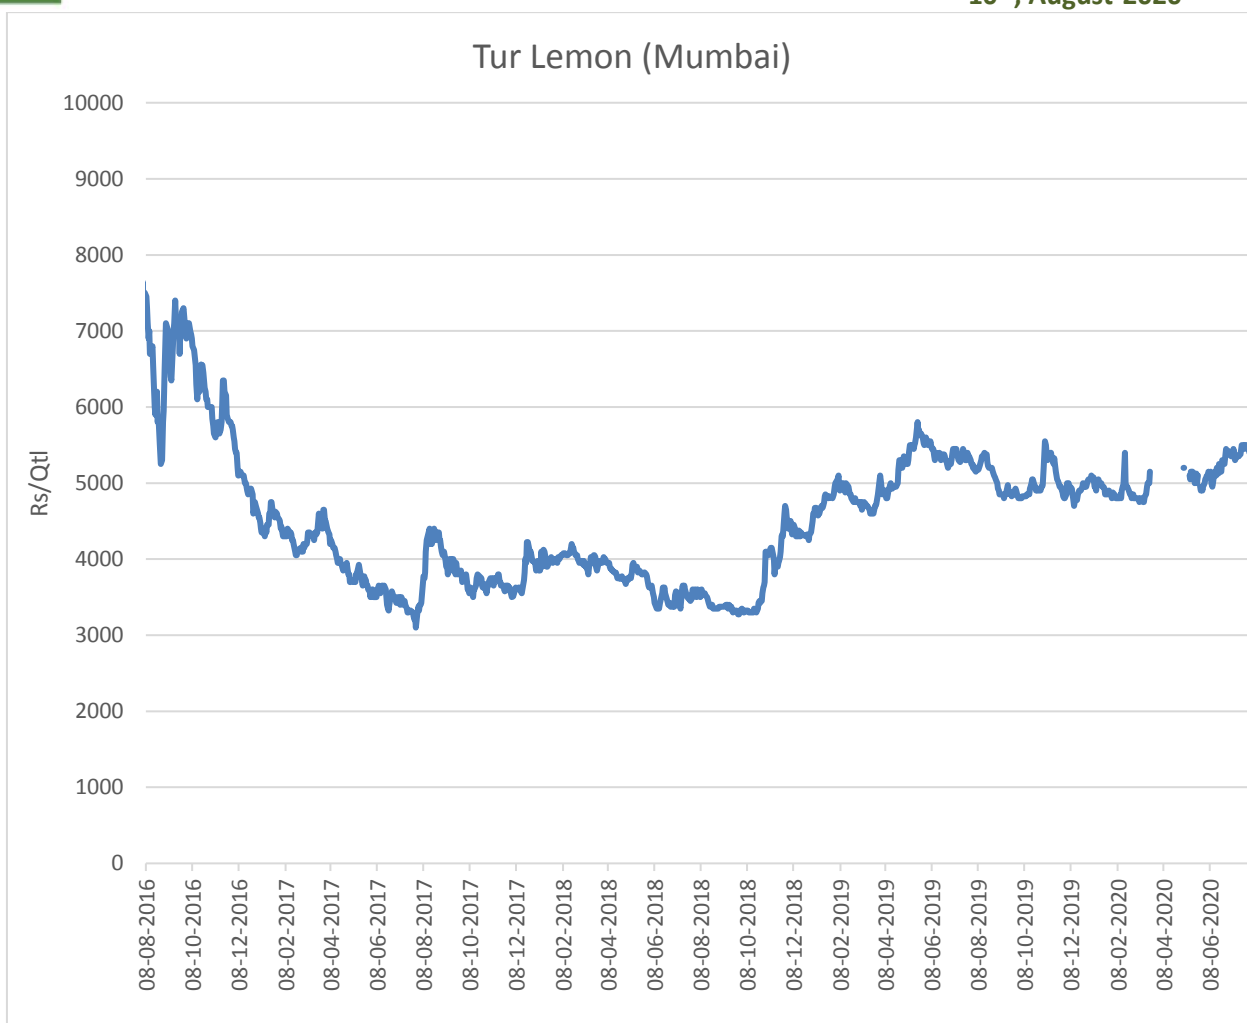

Pigeon Pea (Tur/Toor):
Market Recap:

Stock at port is said to be lower than normal at this point of time. Import licenses have not been given to importers as yet, so millers are buying tur from local markets. Arrival in local market is decreasing so market is moving up slowly. Relaxation from lock down in various states has increased demand for dal and millers have increased buying. Tur was quoted at Rs5500 in Mumbai market. Tur is being traded at Rs 5850-5950 in Gulberga market. Overall sentiment seems firm. As importers are not buying in Myanmar, tur price is steady there at \$ 660 per MT basis Indian ports for new crop and \$620 per MT for old crop. Tur price may move further up by Rs100- from current levels. Right now in Gulberga market it is trading at Rs 5900-5950.

Current Market Dynamics & Outlook:

The production share of tur in total kharif pulses production is 34.5 % and farmers have covered around 91 % (42.5 lakh ha) area of normal (44.29 lakh ha). Planting is likely to continue till mid Aug. Agriwatch's preliminary production estimate for 2020-21 is over 1 lakh MT higher at 38.39 lakh MT. It was 37.19 lakh MT in 2019-20. Production may increase more if area continues to move up and weather remains favourable throughout the growing season. As of now crop condition is normal to good. Demand and supply side seems balanced right now.

In the first week of Aug-2020, average price in Gulberga market was up by Rs 100 to Rs 5900-5950 due to slower pace of import, improvement in demand from new crop and improved buying by private trades. However, increasing kharif area and likely selling by Nafed may cap upward momentum in coming weeks. Import volume(G to G basis) are likely to increase in July-Aug. Tur price is likely to trade range bound.

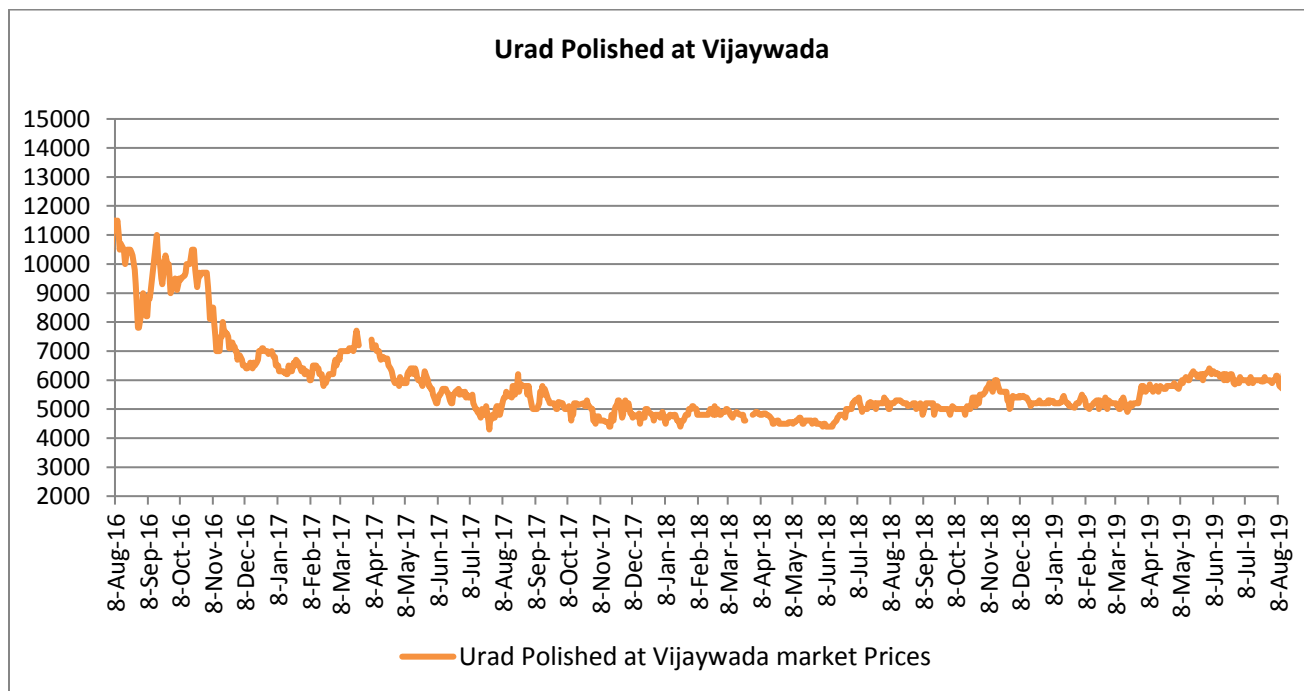

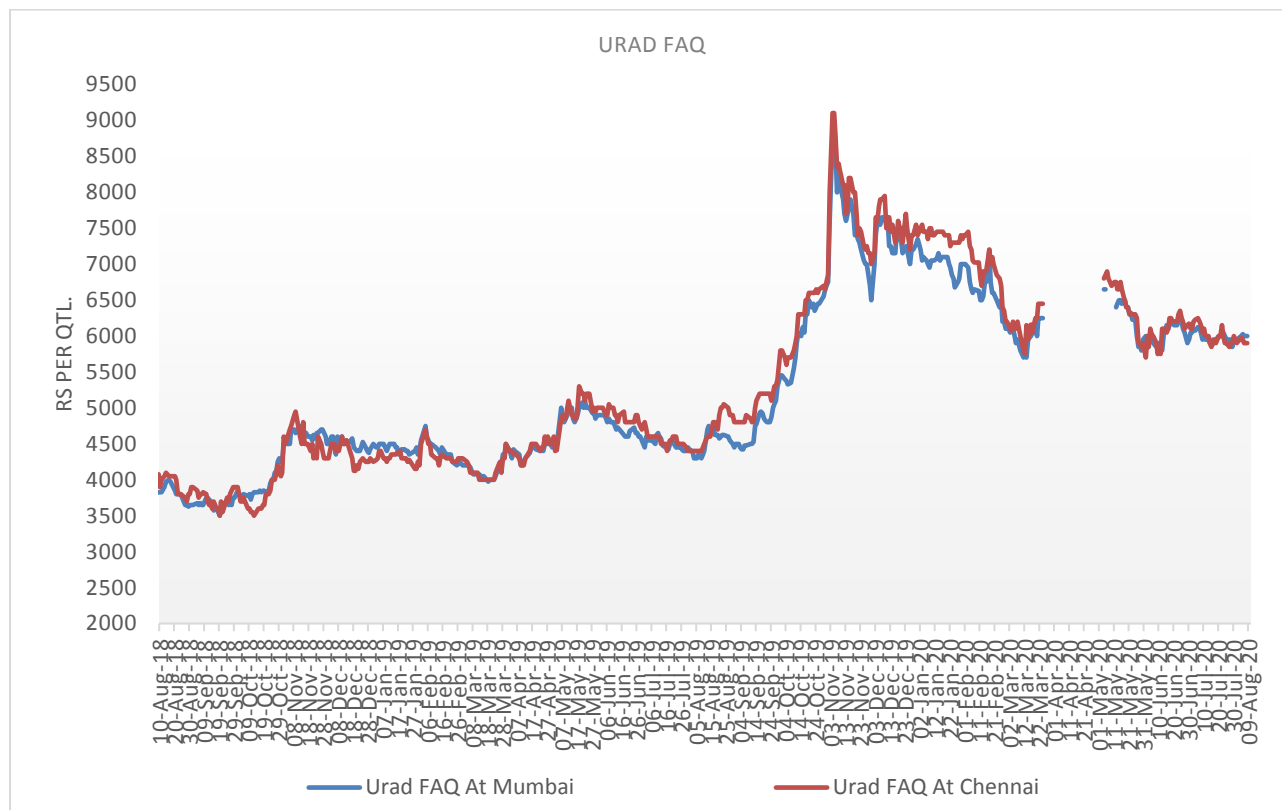

Black Matpe (Urad):

Possibility of higher import in July and Aug, higher area coverage, good crop condition and new arrival expected by the end of this month would continue to pressurize urad cash market in coming months. The DGFT had decreased the time line for 4 lakh MT urad import quota from 31st March-2021 to 31August-2020. It would impact market sentiments and urad price may decrease by Rs200-300 from current level. Demand is weak and mills are waiting for imported urad that are comparatively lower by Rs300-400 per qtl. from local crop

Current Market Dynamics & Outlook:

Even supply side would be adequate in coming weeks. Urad in Mumbai market is being traded at Rs 6000-6050 and may decrease to Rs 5700-5800. In Chennai market it is being offered at Rs 5900-5500 and SQ at Rs6600-6700 per qtl. Overall trend remains weak.

Market Outlook: Urad Prices are likely to show steady to weak momentum.

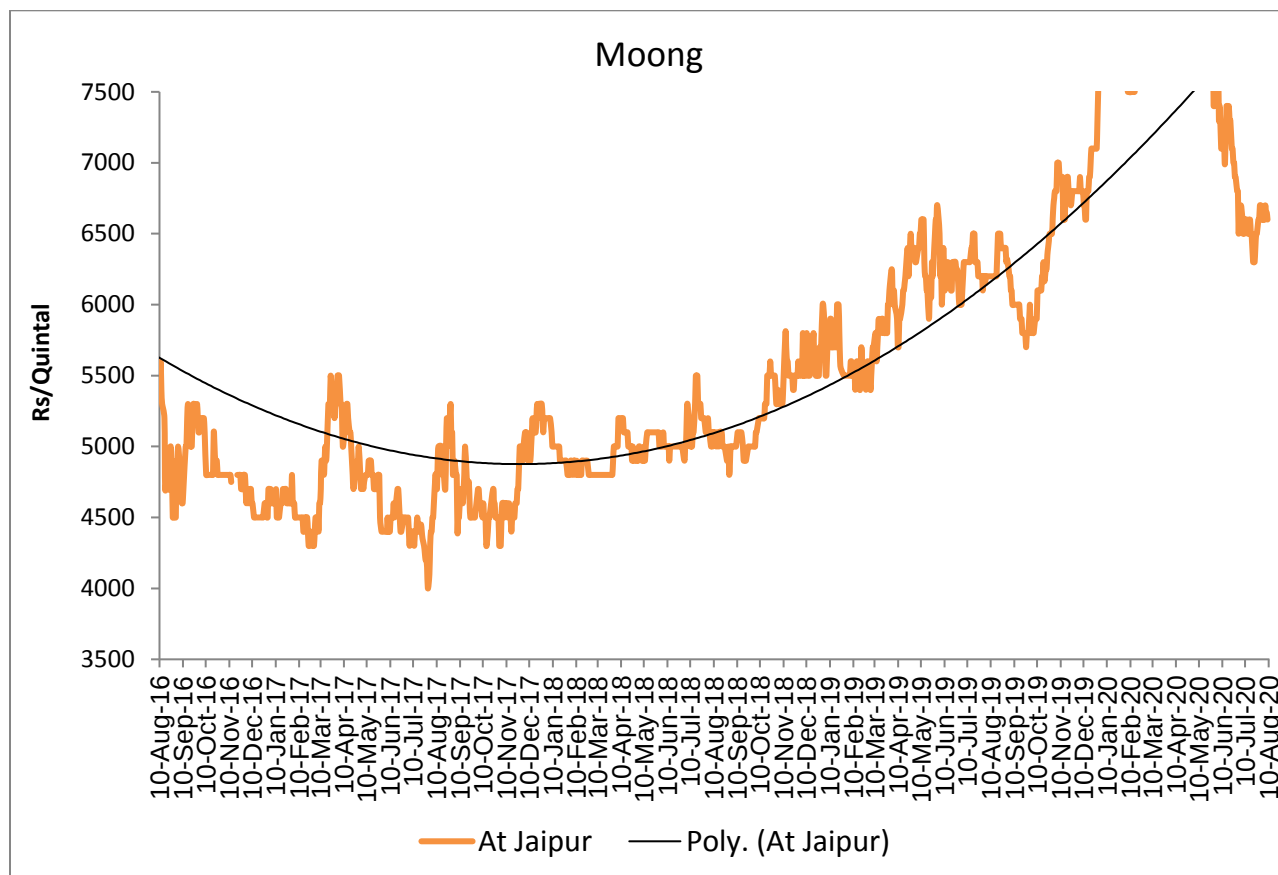

Green Gram (Moong):

Market Recap:

Arrival of summer moong is decreasing in various markets now. Stockists have started buying moong at decreased prices and it has helped market to stay at current levels. New Kharif crop in Karnataka began arriving in limited quantities. There is a report of quality loss in some area of Karnataka due to heavy rains. It would depress price for quality moong if quality of moong gets disturbed in other states too. There is no scope for import as prices in Myanmar is ruling higher at this point of time. Moong (FAQ) is being traded at Rs 5500-6500 in Indian market. It may stay steady until arrival from kharif crop increases.

Apart from this, kharif moong area may cross 33 lakh ha against normal of 30.49 lakh ha. Before this, maximum area was covered in 2016-17 when over 35 lakh ha was sown. Weather conditions are favourable for moong crop in all states except Karnataka. Since the proposed MSP of moong is higher at Rs 7196 for 2020-21 against Rs 7050 for ongoing season, it would encourage farmers to cover more area under kharif moong. Under normal conditions, Agriwatch expects 14.25 to 14.50 lakh MT kharif production as per preliminary estimates.

Market Outlook: Moong prices are likely to trade steady to slightly weak in the near term.
