Commodity-wise Domestic, International Prices and Arrivals at Different Centers

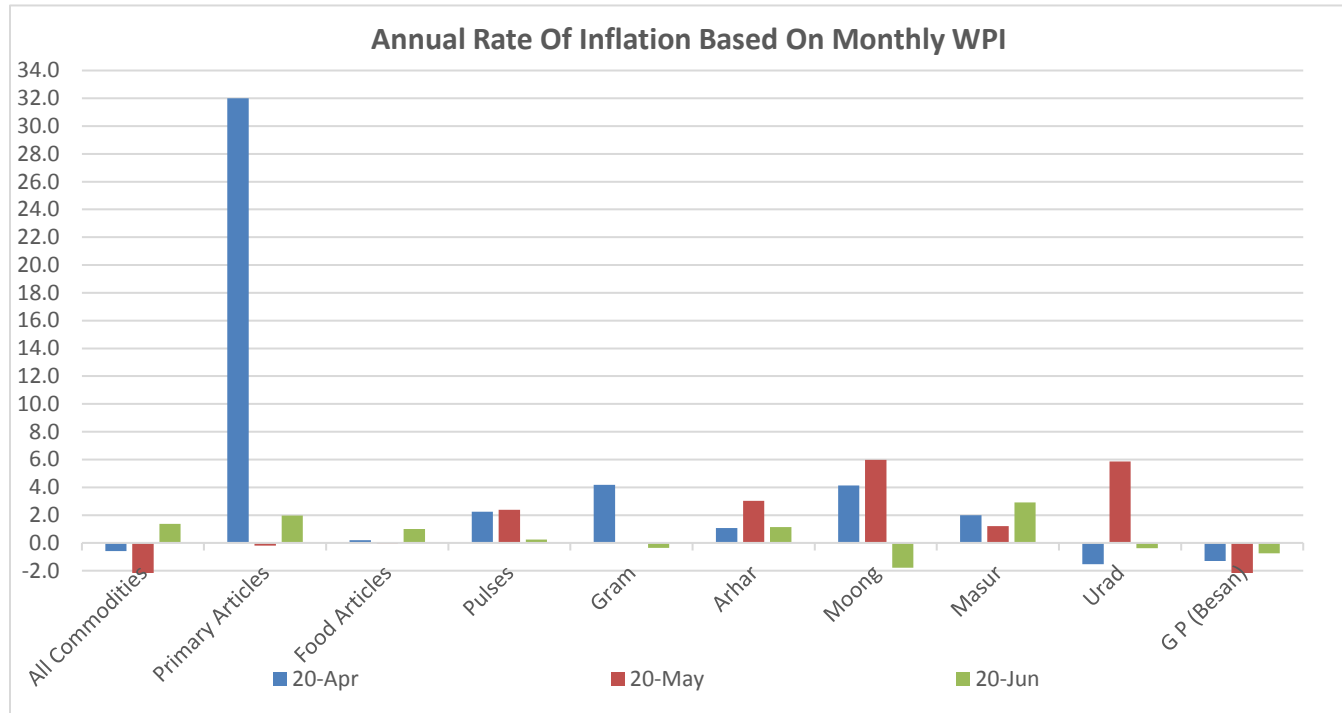

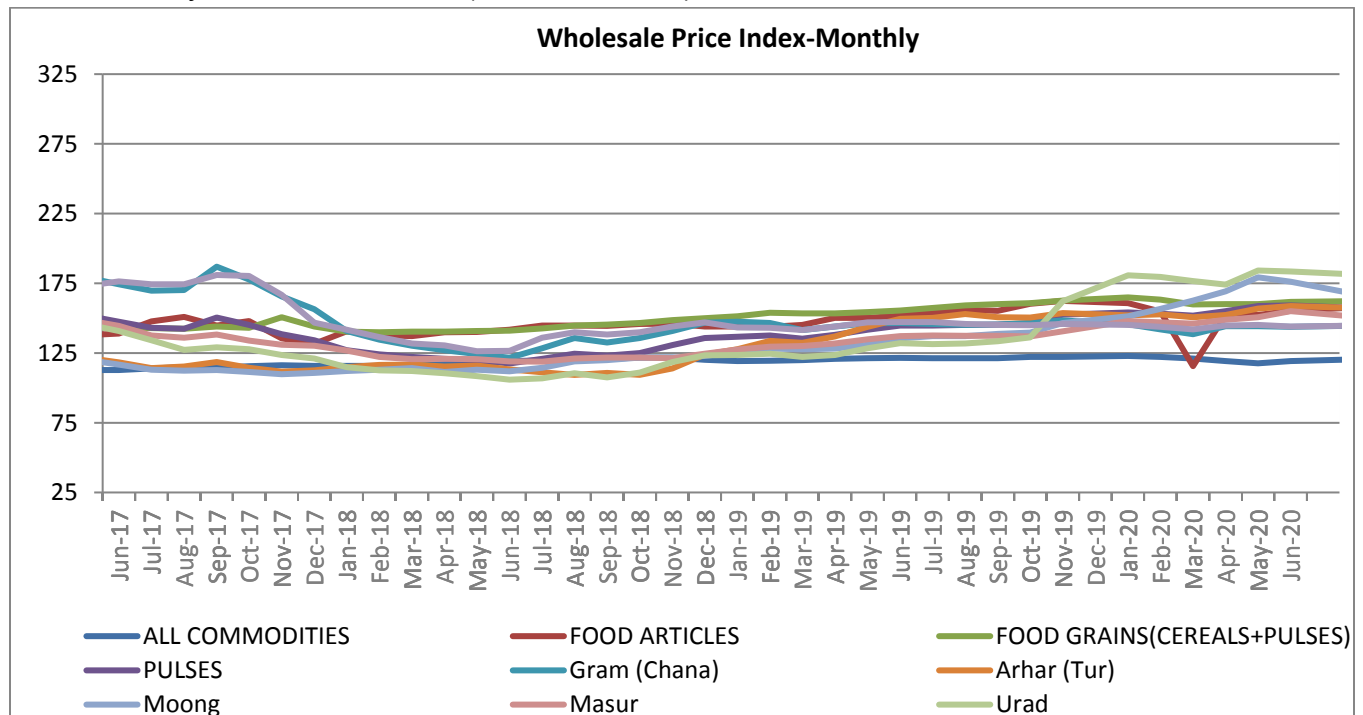

Highlights-Domestic Market:

- **Kharif pulses sowing has entered in the last phase now. Indian farmers have covered 124.01 lakh ha so far against 121.5lakh ha last year as on 14th Aug-2020..** It is almost 2 % higher than last year and 96% of normal (128.88 lakh ha) till date. Tur area is up by 3.10% to 43.63 lakh ha. Urad area too is higher by 5.57 % to 35.62 lakh ha so far against 33.74lakh ha last year. Normal area is 35.53lakh ha . Indian farmers have showed more interest in moong farming and they have shown 32.92 lakh ha so far against 29.03 lakh ha last year. It is higher by 13 % from last year and higher by 8% of normal as on 14th Aug-2020.Kulthi sowing is up by 14 % at 0.08 lakh ha so far .Farmers have covered 11.76 lakh ha area under other pulses against 16.34 lakh ha last year. See details at page no -14.
- **Fresh demand for tur and tur dal during review week helped market to trade up by Rs 50-100 in various markets.** Apart from fresh demand, arrivals in major markets are also decreasing now. This may support tur cash market further this week to a certain extent. Ample rains in major growing states like Karnataka and UP are supportive for standing crop while lower rains in producing region of MH, may disturb normal growth of plant. Stock at port is lower. So, lemon tur prices increased to Rs 5650 at Mumbai port while it is being traded at Rs 5950-6000 in Gulberga and at Rs5500- 5600 In south Indian markets. The short term sentiment seems firm.
- **Import flow of urad remains slow in August as margin for import is decreasing with declining prices in the domestic market and with prospects of good kharif crop this year.** The allocated 4 lakh MT urad imports is not possible by 31st Aug, given the current pace of imports. So, if the time line is not extended beyond Aug, prices of urad may move up again. Quotes for FAQ urad moved up by \$15 to \$775 per MT while SQ moved up to \$875 per MT basis Indian port. Prices in domestic market too improved by Rs 100 to Rs 6000 for FAQ and Rs 6800 for SQ. If demand improves and govt. maintains status quo for import deadline, prices would increase if the yields of the new crop go down. So both the govt. decision and the standing crop remain crucial for price trend in coming weeks.
- **Demand for moong and arrivals are normal in the market at this point of time. Prices are currently steady but pressure might start, as arrivals from new kharif season has started in Karnataka.** Besides, higher area coverage and good crop condition so far, would not allow market to move up from current levels. Arrival from MH is expected in the last week of Aug, followed by MP and Gujarat. Arrivals from summer crop is almost over now. If demand improves, slight recovery might be seen this week. There is no parity for import as moong price is ruling lower than Myanmar right now. Expecting a huge crop from Rajasthan, stockists are preferring to sell now. So, overall trend seems weak in the medium term.
- **Improved demand for chana dal and decreasing arrival in major markets have helped chana market to move up by Rs 100 in last one week.** Artificial difference between demand and supply is being created by punters/brokers which remains supportive for cash chana market right now. However, it is unlikely to sustain for a longer period as govt. has ample stocks and Nafed would continue to sell through auction at improved price. It would cap market beyond Rs4500. Chana is being traded at Rs 4350-4400 in Delhi market. It may move up to Rs 4500. At this level selling by private trades would start and price will come down again. So overall sentiment seems weak.
- **Masur import at reduced duty is likely to cross 4.5 lakh MT by the end of this month. Vessels are on the way to Indian ports from Canada and Australia.** Maximum quantity (around 80%) has been purchased from Canada while the rest 20% from other countries including Australia. Bad weather conditions during growing stages reduced yield in India and it decreased by 8 to 10 percent to 12.70 lakh MT against normal consumption of 20 lakh MT. As import remained restricted at 30% duty, prices of masur started increasing in the market. After reduction in import duty, imports in July and Aug combined may cross 4.5 lakhMT.Import touched 1.67 lakhMT in July alone. This would pressurize prices in coming weeks. If govt. extends import timeline with reduced duty (though very unlikely), prices of masur may begin decreasing. Masur is being traded at Rs5400-5450 in domestic market while imported masur is being quoted at Rs 5250-5350.
- **No major movement was seen in domestic Peas market despite negligible import and lower stock . Bumper chana crop and its ample availability are restricting upward momentum.** So any spike is unlikely. Green peas would continue to trade firm as stock in pipe line is almost nil.

International Market Update:

- **North American field pea markets traded weak during review week due to likely arrivals from new crop soon** in the spot markets in both Canada and the United States. Around 1.62 lakh MT stock said to be in Western Canada while 2.92 lakh MT is expected to be in the United States. Agri experts are on the view that field pea crop may be slightly higher than projected estimates in the both countries.
- **Chickpeas traded flat with limited trading activity during the review week.** Canada's harvest has yet to begin, while it started last week in the U.S. Pacific northwest and Montana. Production in Russia is expected to increase this year while production in Argentina may decrease by 50%. Production in Australia may increase considerably; its variety is desi type which may not compete with North American and Russian crops.
- **For 2020-21, Canadian lentil seeded area rose by 11.96 % to 1.72 Mha, due to good forecasted returns** compared to other crops. It was 1.53 Mha in 2019-20. By province, Saskatchewan accounts for 90% of the lentil area, with the remainder seeded in Alberta and Manitoba. Production is forecast to increase to 2.47 MMT (2.16 MMT last year), with supply lower due to smaller carry-in stocks. Exports are forecast to be lower at 2.1 MMT. Carry-out stocks are forecast to rise to nearly 0.175 MMT. The average price for all grades and types are forecast to rise from 2019-20, with higher prices from large green and red types. It may rule in the range of \$500-530 per metric tonne throughout the year. There is an expectation that import demand in the Indian subcontinent will continue to be similar or slightly higher in 2020-21. The data has been taken from the latest update from Agriculture & Agri food Canada.
- **For 2020-21, the area seeded under chickpeas in Canada fell by 23.89% from 159 thousand ha in 2019-20 to 121 thousand ha** due to the lower farm gate prices received in the previous year. Saskatchewan accounts for the majority of the chickpea area, with the remainder in Alberta. Production is forecast by AAFC at 200 Kt, down 20.63% from the previous year, due to lower seeded area despite higher expected yields. Supply is forecast to rise to 410 Kt. Exports are forecast to rise from 105 to 125 Kt and carry-out stocks are forecast to fall from 160 to 150 Kt in 2020-21. The average price is forecast to fall marginally due to a larger world supply, with the expectation of an average grade distribution. It may hover in the range of \$455 to \$485 per tonne.
- **As per the latest update from Agriculture & Agri food Canada (AAFC) seeded area under dry peas** is expected to decrease slightly by 1.76 % to 1722 thousand ha in 2020-21. Despite lower coverage area production is expected to increase from 4.23 to 4.25 MMT in 2020-21 due to higher yield of 2.51 tonne per ha. Export volume too may decrease from 3.7 to 3.4 MMT in 2020-21. Despite higher domestic usage carryout is expected to increase from 250 to 450 Kt in 2020-21 due to lower export volume this year. Prices are expected to hover in the range of \$250 to 280 per metric tonne.
- **Australia is going to plant its biggest chickpeas crop in comparison to last three years.** Planting continues in Queensland and NSW. As moisture level in the field is good, farmers are increasing area under chickpeas. As top level soil moisture is lower, farmers are using wheat land for chickpeas planting. Forward delivery for October onward has been heard at \$ 630 per MT. New chickpeas crop may attract higher value. Value of new crop may be affected by any further hiccups caused by COVID-19. It may pressurize Chickpeas price.
- **Lentils stock in Australia is decreasing fast as bulk shipment to B'desh continues with a three months forward deal** underway. Old crop of lentils would not be available by the beginning of the new season. Forward quotes have been heard at \$700-800 per MT, but only limited quantity are likely to be available. B'desh has been buying 20,000 MT red small lentils per month. It may continue next three months. Australia exported 80,000 MT lentils in March and big volume export continued in April and May too. So old stock is depleting fast. As prices are moving up, area under lentils may increase by 10% this year. New lentils quotes are \$650-700.
- **As per latest updates by NASS, dry pea acreage may be down by 12-13% this year in US** peas producing regions. Farmers may plant 971,000 acres against 11,03,000 acres last year. Intended plantings are down from a year ago in Idaho, Montana, Nebraska, North Dakota, and South Dakota. However, area in Washington may increase by 19% this year.
- **Chickpeas area in the US is likely to decrease by 32% from last year.** Small chickpea acreage shows a decline of only 5%, while large chickpea acreage is expected to decrease by 41%. It is really a big surprise this year.

Monthly Outlook: -Pulses are likely to trade steady to slightly firm.

Pulses WPI Index:

Index Numbers of Wholesale Price in India (Base: 2011-12=100)

Pulses WPI increased by 4 points from 158.8 in May to 159.2 in June-2020

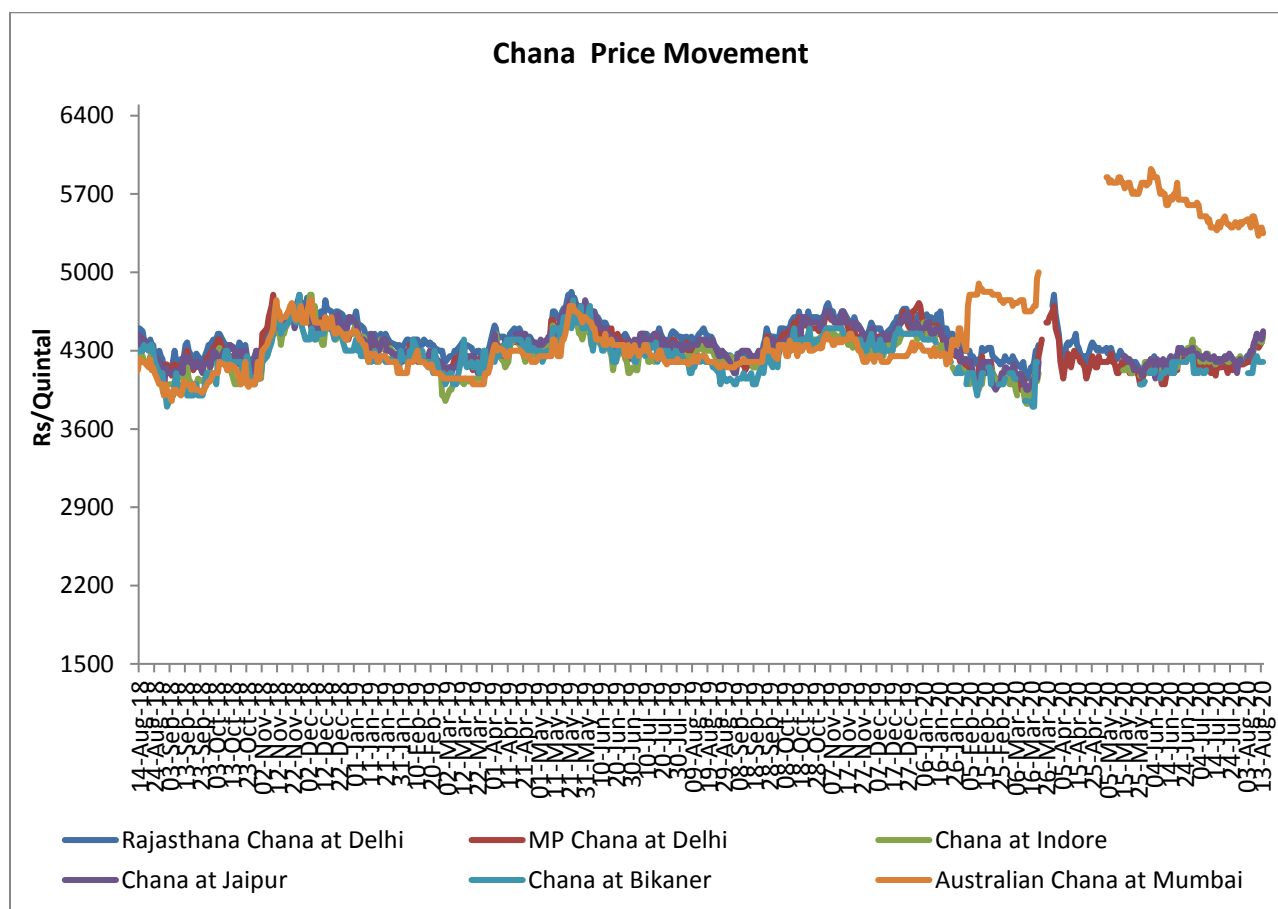

Pulses-Wise Scenario:

Chana

Current Scenario:

Chana cash market is unlikely to maintain its firm momentum despite firm futures and improvement in dal demand. Nafed has procured around 21.55 lakh MT chana so far against the target of 22.5 lakh MT this season. Procurement is almost over now and Nafed has 3.3 MMT chana stock, including old stocks. Nafed Karnataka has rejected all chana bids below 4470. It may push up price by Rs 100 in coming days. In Delhi, Chana is being traded at Rs 4350-4400 and may move up more by Rs 100 from current levels. Demand for chana is expected to improve now and help market to recover to a certain extent, even beyond MSP levels if import from LDC countries remains restricted. However, overall medium term sentiments seem weak for chana cash market as demand would decrease at higher level. In Delhi It may trade at Rs 4400-4500 in Aug.

All India average price for Chana increased by 1.5% percent from Rs 4240 to 4305 per qtl. during review week. Even Australian Chana (imported) price increased by 0.2% to Rs 5470 per 100kg due to firm futures in domestic market. Following graph illustrates chana price movement in different markets:

Market Outlook: Firm tone may continue in chana cash market this week too due to rejection of chana bids by Nafed below 4470 in Karnataka. Improvement for dal demand too remains supportive for cash market. However, restricted offtake from mills in other consuming states amid higher import from LDC countries may cap upward momentum in the weeks ahead. Indian importers have imported around 3 lakh MT chana during April to July 2020 from LDC without tax.. Demand for besan mills and hotel industry is still awaited.. Apart from this free distribution of pulses is affecting market

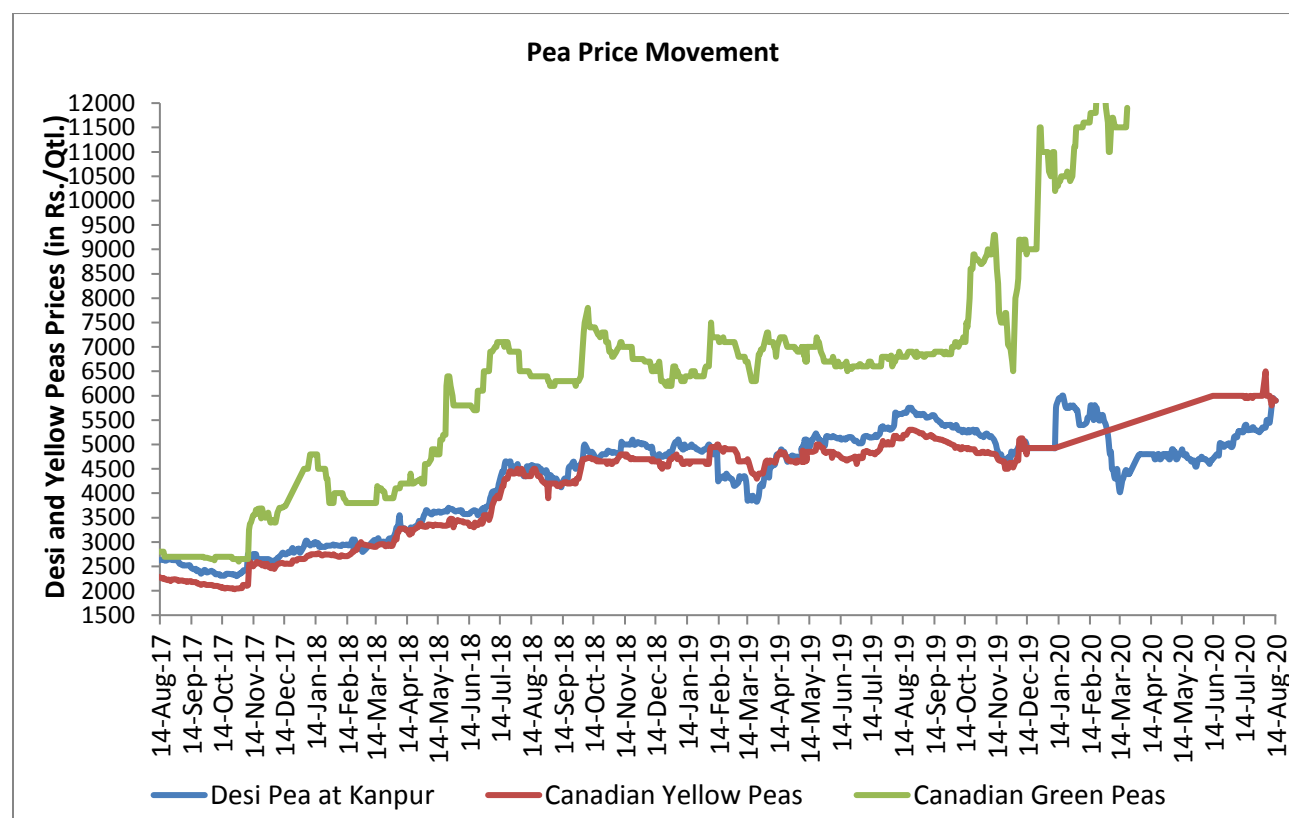

sentiments. Distribution of 1 k.g. dal per family/ per ration card would continue to affect direct demand from cash market till Nov.

Peas (Matar):

Market Recap:

Peas cash market traded firm and may continue to trade firm this week too. Stocks at port are dwindling and availability is decreasing continuously in major markets like Kanpur, MH, Kolkatta and Indore. However, demand at higher level may get disrupted and price may decrease again. No import is taking place right now as import limit of 1.5 lakh MT has already been exhausted. With changed status from the free to restricted category and hefty levy imposed on peas, no import is likely in the coming months too. The commerce ministry issued a separate harmonized system(HS code) for all peas (including yellow, green dun and kaspas) and changed its status in the third week of Dec. Now import deals are not taking place given these changes aimed at increasing consumption of chana which is abundantly available in domestic market. Under prevailing conditions govt. is unlikely to allow green peas import. So price of yellow peas will also stay steady at current levels or decrease slightly.

Peas in Kanpur market traded flat at Rs 5450-5500 due to halted arrivals in domestic market and almost no import during last three months. Stockists too are unwilling to release old stock because of lower production this year. It has lent support to peas in Kanpur market. As supply side is tight, it would continue to trade firm. Demand for green pea is normal.

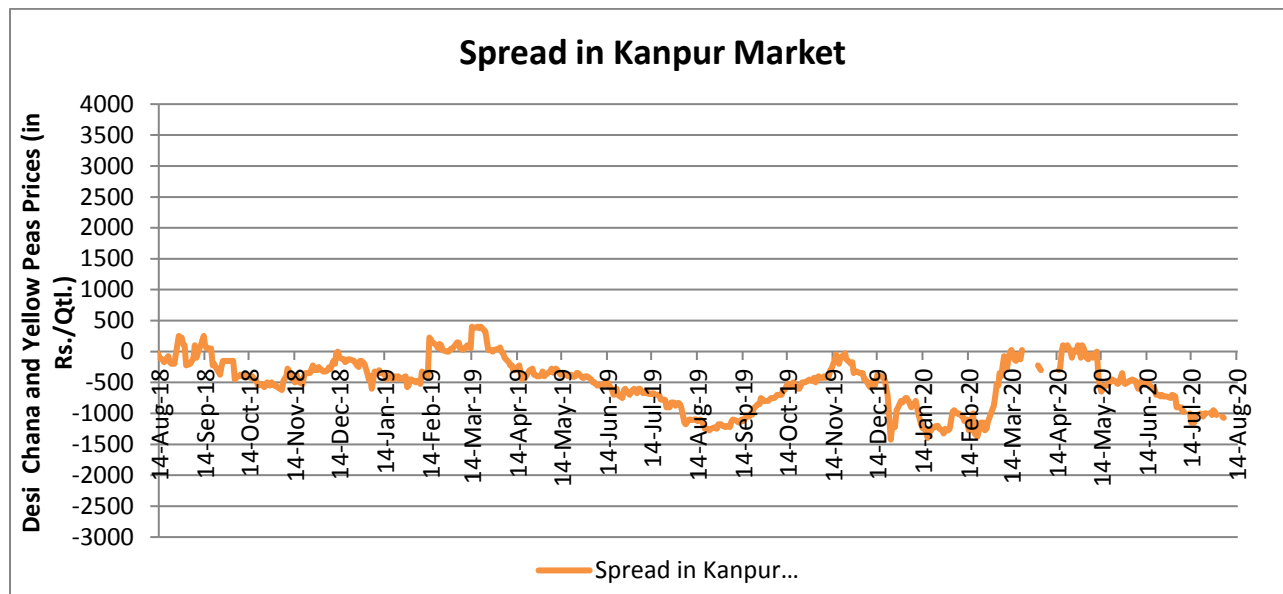

Current Market Dynamics & Outlook:

Peas market traded firm due to decreasing availability in domestic market and firming chana price. Kanpur market traded up by Rs100 to Rs 5450 per qtl. Any major spike is unlikely now. Overall, all India average price was up by 1.25% to Rs 5400-5450 per qtl. In Mumbai market, there was no quote for yellow peas as stock was exhausted. Demand and supply side is balanced right now.

Spread With Chana:

Spread between Chana and Peas, at Kanpur market remained in negative zone. Gap has increased from Rs 1075 to Rs 1175 due to increased chana price. Spread is expected to remain in the negative zone in August too on relative movement in Chana prices. Overall outlook seems steady to slightly firm this week.

MarketOutlook: Outlook remains steady to slightly firm in the short to term.

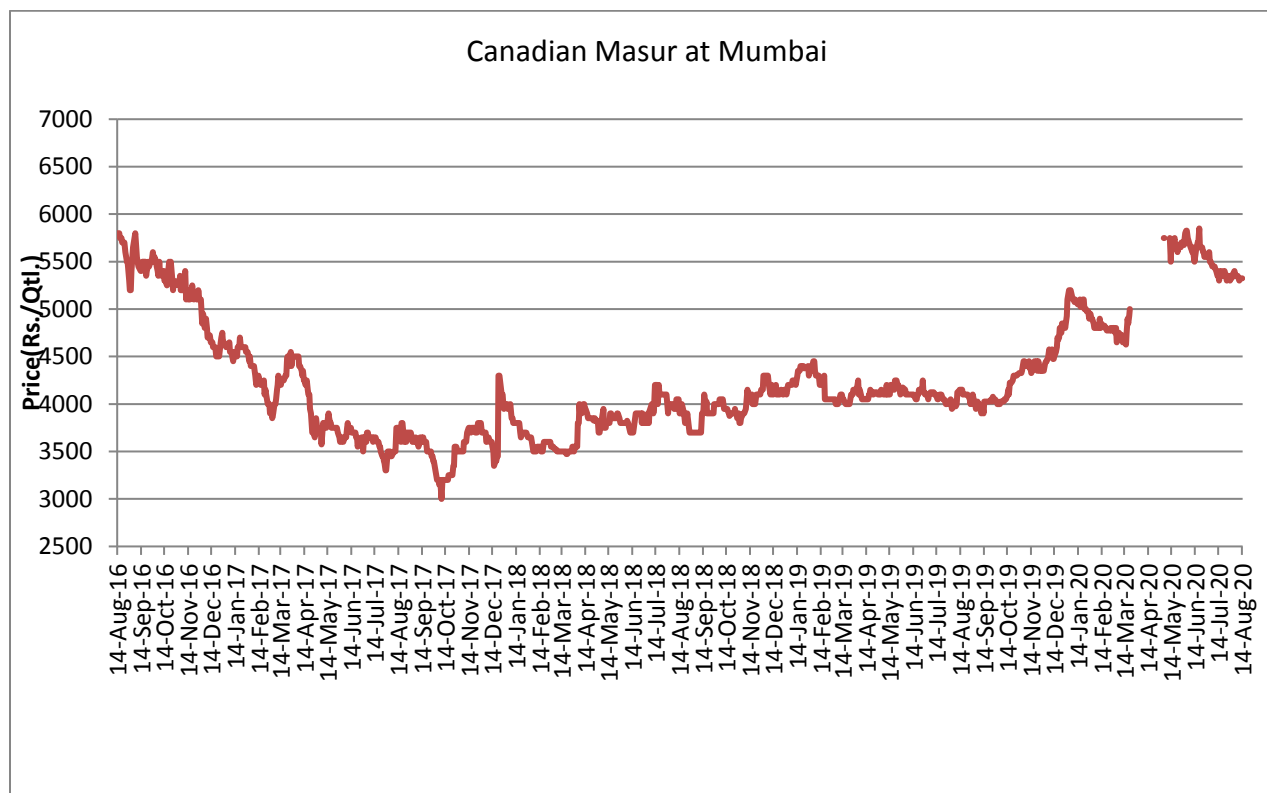

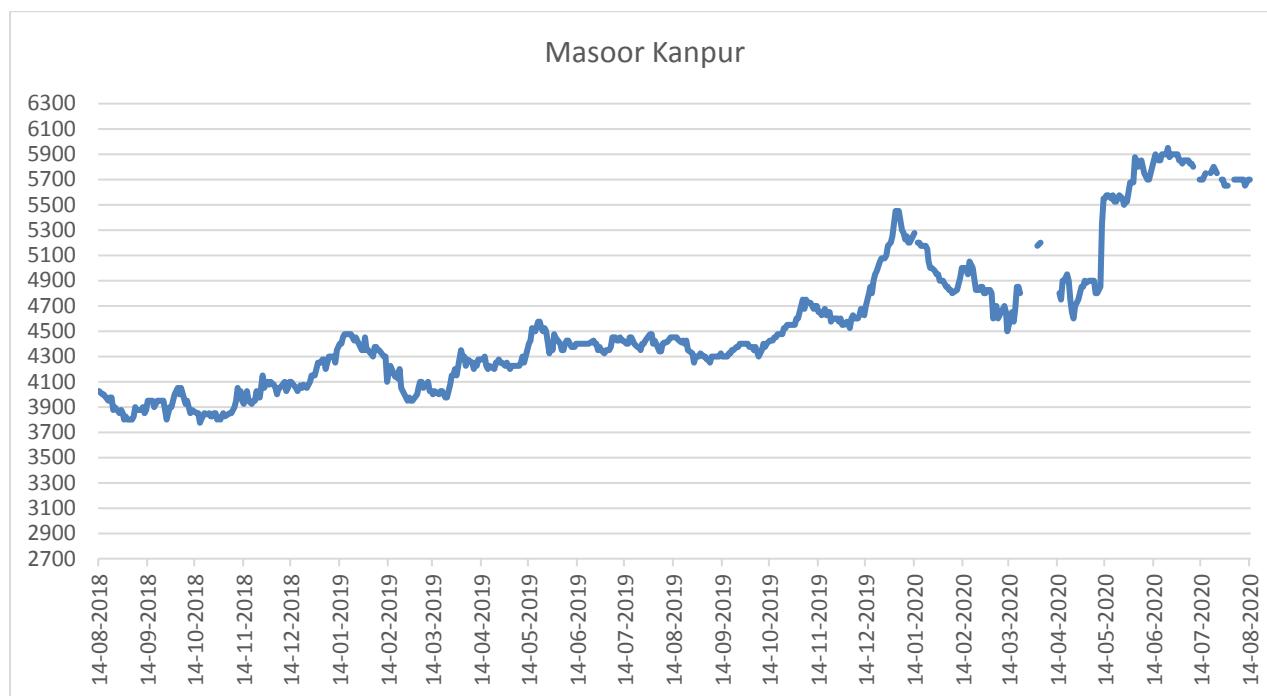

Lentils (Masoor):

Market Recap:

Increasing import flow of masur from Canada and Australia may put pressure on cash masur market. In July and Aug around 4.5 lakh Mt was expected to hit Indian ports. Out of this 1.67 lakh Mt has been imported in July. It is going to impact price directly. One vessel having 57400 Mt masur landed at Mundra ports on 4th August and three more vessels having 2 lakh Mt are expected by the end of this month. Its impact is being seen on masur price in domestic market. If prices decrease below Rs5000, govt would not extend lower duty time line beyond August-2020. In that case, some recovery is expected again in masur market. So it would be interesting to see the govt's action in the last week of August. It would decide the future trend of price. Notably, govt. had slashed the import duty on masur from effective 30 % to 10 % till 31st August-2020 to cool down prices in domestic market on the beginning of June. Stockists are holding stock and waiting for govt.'s decision.

Current Scenario:

Stock at ports has started increasing now. At Mumbai ports importers are selling masur at Rs 5300-5350. As prices are ruling higher than MSP in domestic market, govt.s agencies are unable to procure 1.21 lakh MT, set target for the year. As of now, only 4200 Mt has been procured on MSP (Rs4800). Old stock with Nafed is around 21,000 MT. future course of price depends on govt's decision on import timeline with reduced duty or with previous duty, applicable 30% after August.

Market Outlook: Prices may trade lower due to higher supply prospects from import in coming weeks. Sluggish demand from mills and commencement of offloading by stockists remains unsupportive to cash market in the medium term.

Nafed may start selling old crop too. It has 21,000 MT old stock. Import is likely to continue at 10% duty till August. If duty structure is changed again at previous level (30%) for sep-2020, price may move up again. Overall tone in masur market remains weak in August.

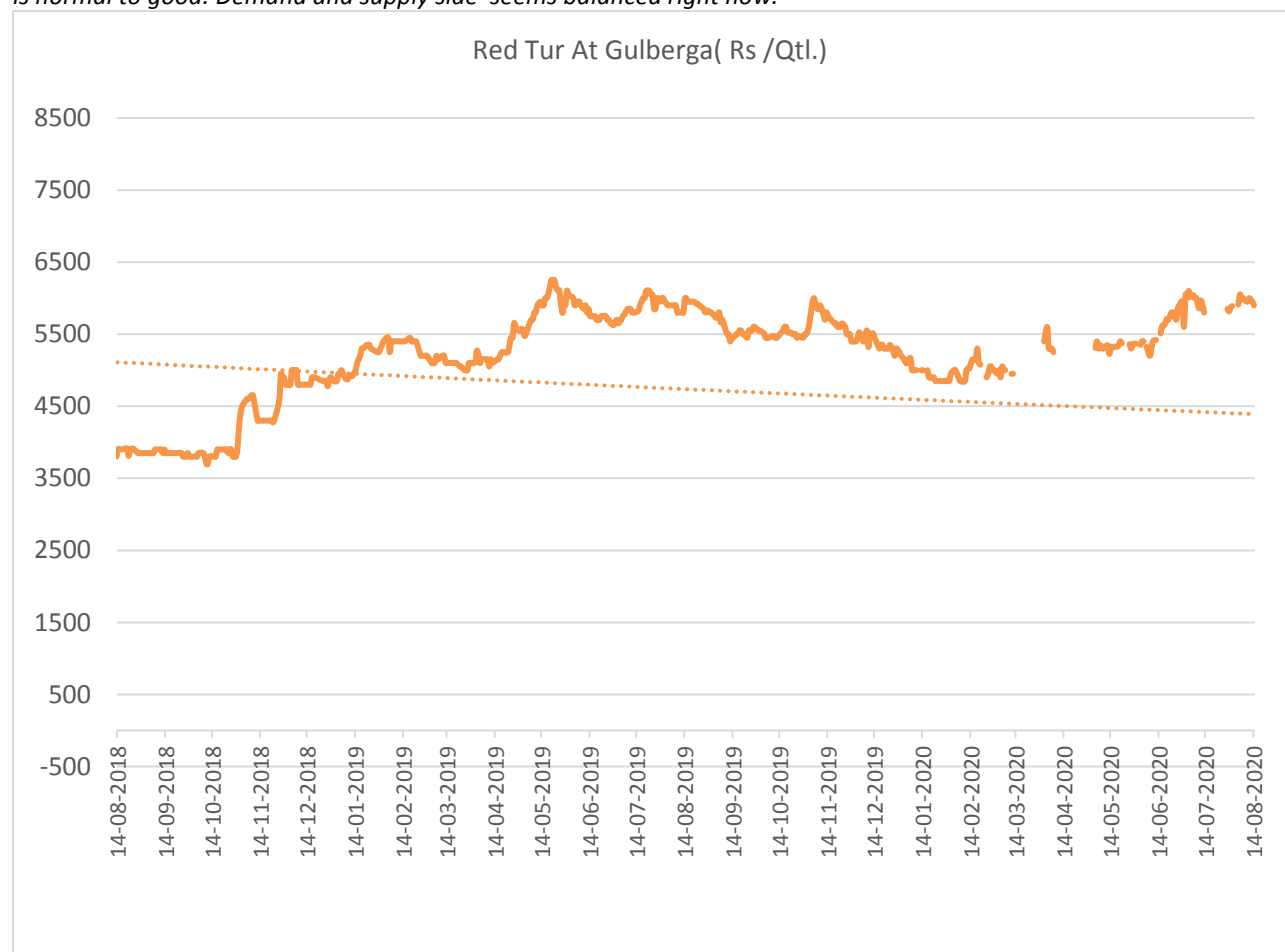

Pigeon Pea (Tur/Toor):

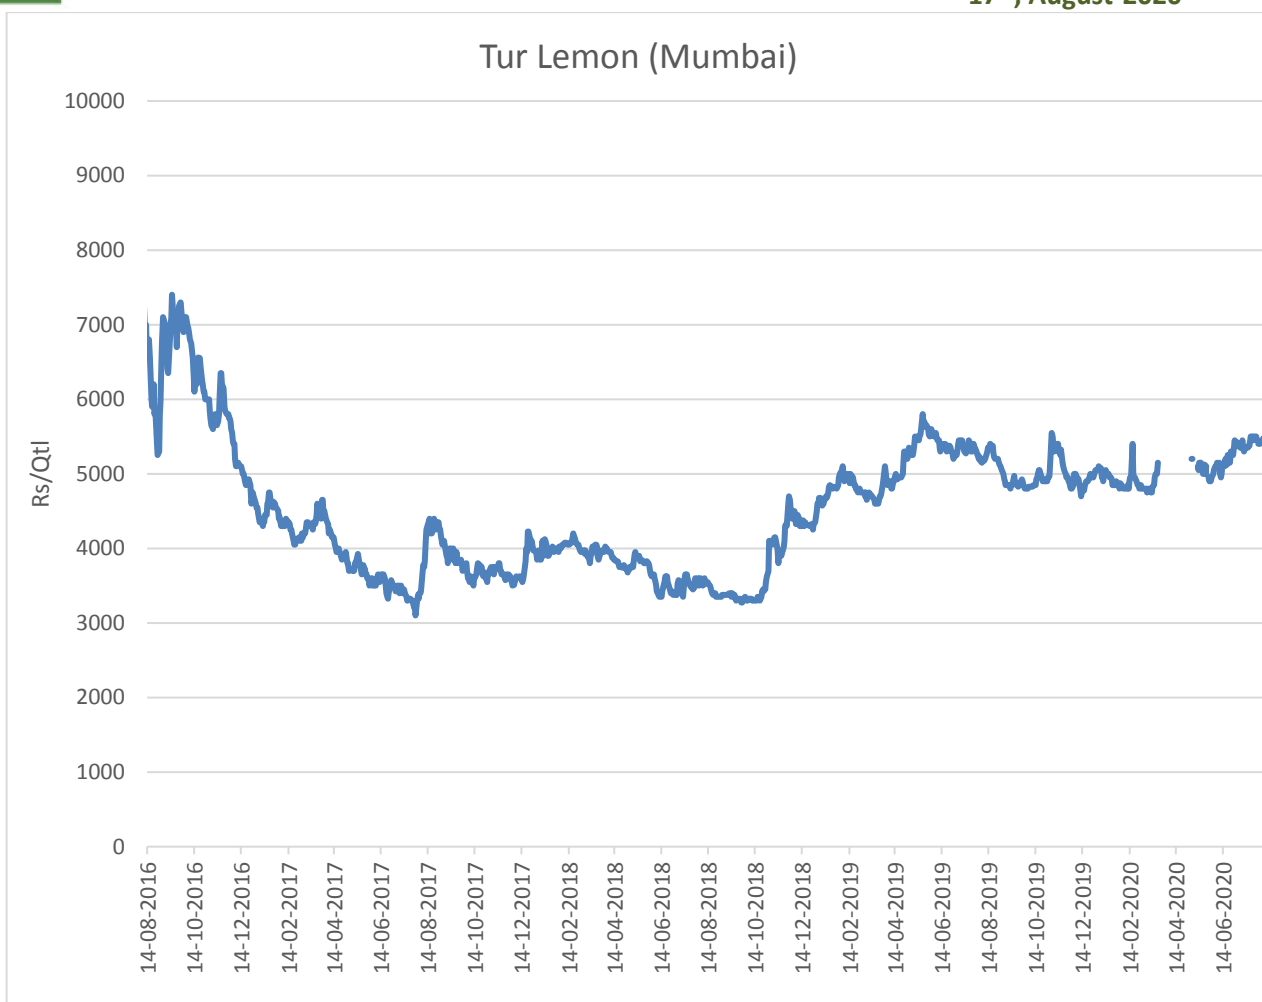

Market Recap:

Stock at port is said to be lower than normal at this point of time. Import licenses have not been given to importers as yet, so millers are buying tur from local markets. Arrival in local market is decreasing so market is moving up slowly. Relaxation from lock down in various states has increased demand for dal and millers have increased buying. Tur was quoted at Rs5600-5650 in Mumbai market. Tur is being traded at Rs 5900-5950 in Gulberga market. Overall sentiment seems firm. As importers may start buying in Myanmar, tur price has moved up there at \$ 675 per MT basis Indian ports for new crop and \$650 per MT for old crop. Tur price may move further up by Rs100- from current levels. Right now in Gulberga market it is trading at Rs 5900-5950.

Current Market Dynamics & Outlook:

The production share of tur in total kharif pulses production is 34.5 % and farmers have covered around 98 % (43.63 lakh ha) area of normal (44.29 lakh ha). Planting has entered in last phase now. Agriwatch's preliminary production estimate for 2020-21 is over 1 lakh MT higher at 38.39 lakh MT. It was 37.19 lakh MT in 2019-20. Production may increase more if area continues to move up and weather remains favourable throughout the growing season. As of now crop condition is normal to good. Demand and supply side seems balanced right now.

In the second week of Aug-2020, average price in Gulberga market was up by Rs 50 to Rs 5950-6000 due to slower pace of import, improvement in demand for the new crop and improved buying by private traders. However, increasing kharif area and likely selling by Nafed may cap upward momentum in coming weeks. Import volumes (G to G basis) are likely to increase in Aug. Tur price is likely to trade range bound.

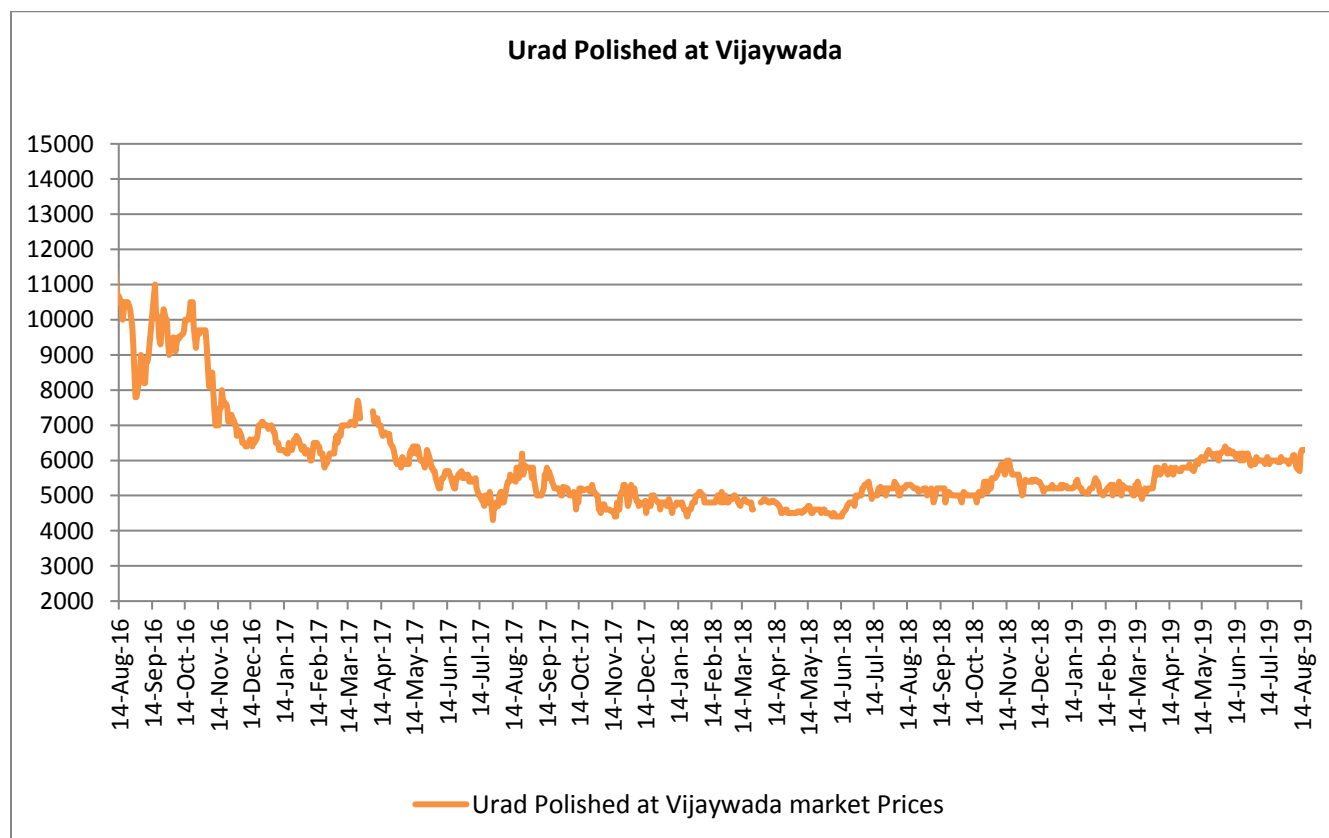

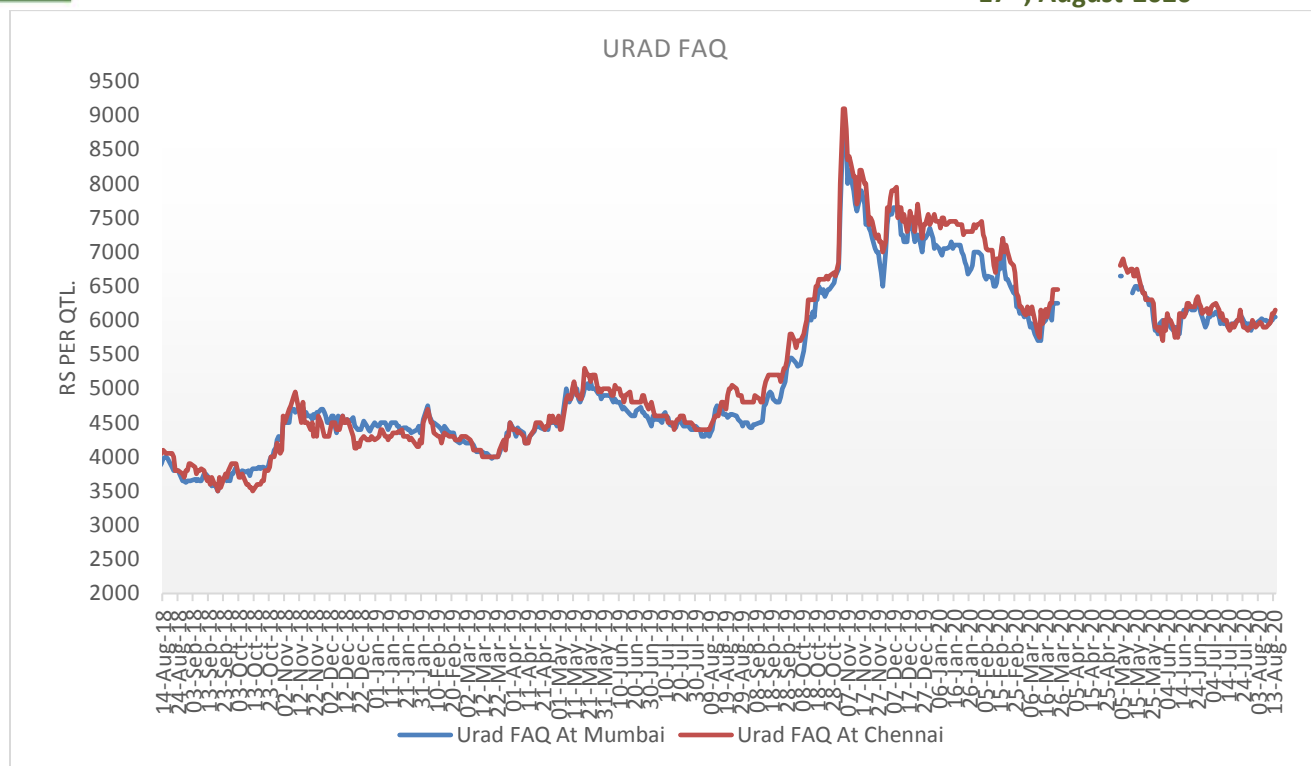

Black Matpe (Urad):

Possibility of higher import in July and Aug, higher area coverage, good crop condition and new arrival expected by the end of this month would continue to pressurize urad cash market in coming months. The DGFT had decreased the time line for 4 lakh MT urad import quota from 31st March-2021 to 31August-2020. It would impact market sentiments and urad price may decrease by Rs200-300 from current level. Current firmness would not sustain as arrival from new crop is expected by the ned of this month. Demand is normal and mills are waiting for imported urad that are comparatively lower by Rs300-400 per qtl. from local crop

Current Market Dynamics & Outlook:

Supply side should be adequate in coming weeks. Urad in Mumbai market is being traded at Rs 6200-6350 and may increase to Rs 6400-6500. In Chennai market it is being offered at Rs 6200-6400 and SQ at Rs6800-6900 per qtl. Overall trend remains firm in the short term..

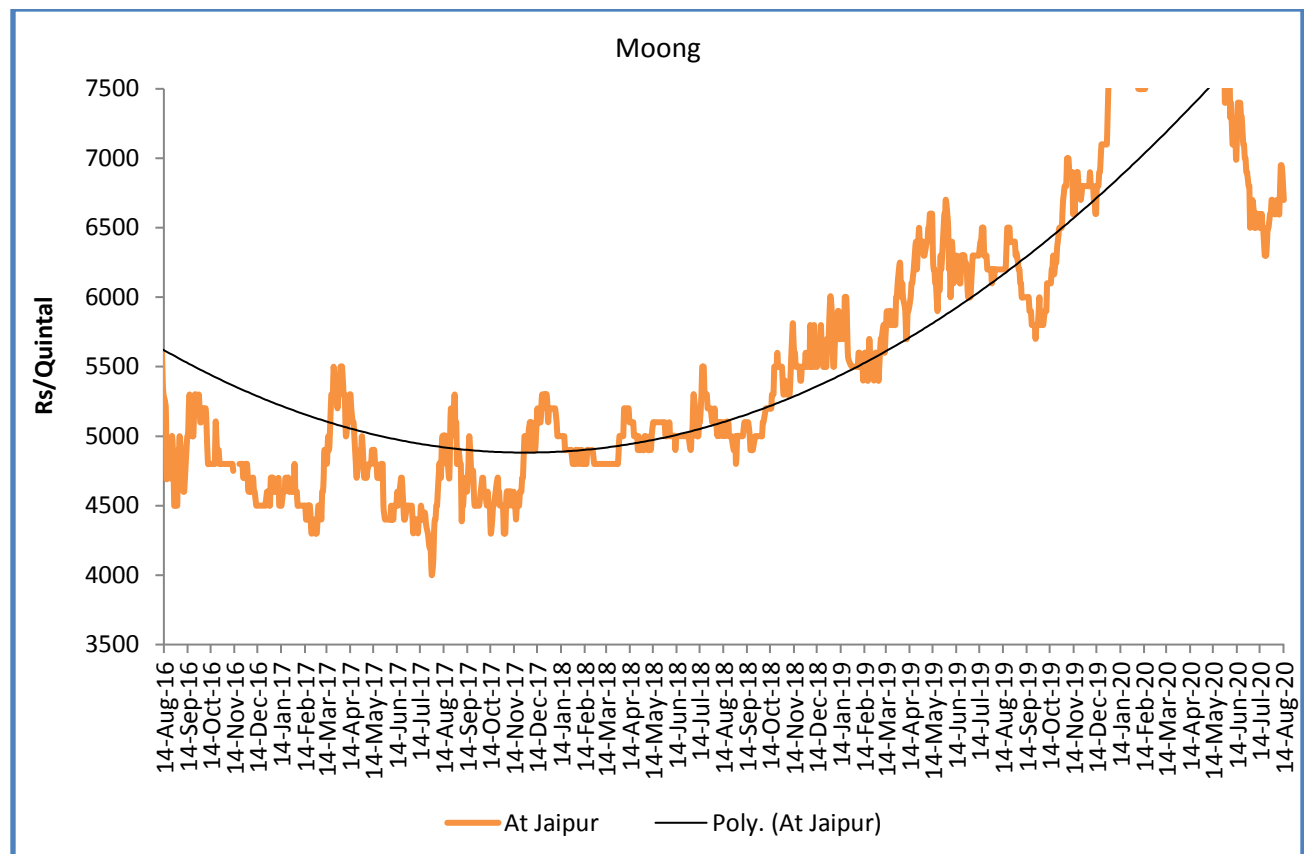

Market Outlook: *Urad Prices are likely to show steady to slightly firm momentum.*

Green Gram (Moong):
Market Recap:

Arrival of summer moong is decreasing in various markets now. Stockists have started buying moong at decreased prices and it has helped market to recover again. New Kharif crop in Karnataka began arriving in limited quantities. There is a report of quality loss in some areas of Karnataka due to heavy rains. It would depress price for quality moong, should quality of moong get affected in other states too. There is no scope for import as prices in Myanmar are ruling higher at this point of time. Moong (FAQ) is being traded at Rs 5800-6800 in Indian market. It may stay steady until arrival from kharif crop increase from other states too..

Apart from this, kharif moong area may cross 33 lakh ha against normal of 30.49 lakh ha. Before this, maximum area was covered in 2016- 17, when over 35 lakh ha was sown. Weather conditions are favourable for moong crop in all states except Karnataka. Since the proposed MSP of moong is higher at Rs 7196 for 2020-21 against Rs 7050 for ongoing season, it would encourage farmers to cover more area under kharif moong. Under normal conditions, Agriwatch expects 14.25 to 14.50 lakh MT kharif production as per preliminary estimates.

Market Outlook: Moong prices are likely to trade steady in the near term.
