Commodity-wise Domestic, International Prices and Arrivals at Different Centers

Highlights-Domestic Market:

- **Kharif pulses sowing has entered in the last phase now. Indian farmers have covered 138.61 lakh ha so far against 132.34 lakh ha last year as on 18th Sep-2020. It is almost 4.74 % higher than last year and around 107.54 % of normal (128.89 lakh ha) till date. Tur area is up by 6.12 % to 48.24 lakh ha. Urad area too is higher by 1.03 % to 38.63 lakh ha so far against 38.03 lakh ha last year. Normal area is 35.53lakh ha. Indian farmers have showed more interest in moong farming and they have shown 35.79 lakh ha so far against 30.75 lakh ha last year. It is higher by 16.39 % from last year and higher by 17 % of normal as on 18th Sep-2020. Kulthi sowing is down by 30 % at 0.34 lakh ha so far. Farmers have covered 15.61 lakh ha area under other pulses against 17.61 lakh ha last year. See details at page no -15-16**
- **Govt. has increased MSP for chana from Rs 4875 to Rs 5100 and masur from Rs 4800 to 5100 for MY 2020-21. Higher MSP would encourage farmers to cover more area under chana and masur in the rabi season, starting from –Oct. MSP for other rabi crops too has been increased.**
- **Active buying by millers and improved demand in cash market pushed up tur price by Rs 200-250 to 6300-6350 per qtl. during the week under review. Lemon tur stock at ports like Chennai, Mumbai and Kolkata is depleting fast. Import volume remains limited due to non-issuance of import licenses as of now. Arrivals in local markets too are being seen at negligible level. So, stockists have increased its price by Rs 200-250 in last three –four days. Old lemon tur too are being quoted at Rs 6200 per qtl. Arrival has decrease in Jalgaon, Akola and Amravati line. Local tur in Gulberga too moved up to Rs 6700-6750 and it may move up further by Rs200 under prevailing market fundamentals. New crop is still two and a half month away from now. Farmers have covered 48.24 lakh ha so far.**
- **Chana cash market traded volatile during the week under review. It traded at around Rs5000-5250 in Delhi market and closed at Rs 5100. Even chana dal traded up by Rs100 to Rs6200-6250. Demand is improving while arrival in local markets is decreasing. Arrival in major markets in M.P. too have ended now. Arrival in major chana markets like Nohar, Bhadra, Sawai Madhopur and Shardulpur line (Raj) has decreased by 50 to 60 % at this point of time. Besides, govt has increased MSP for chana from Rs4875 to Rs 5100 for MY2020-21. Even import parity is not in favor of local market due to 60% duty. Nafed is not accepting bids below Rs5000, so chana market may move up again with likely demand for seed. Chana may continue to rule at Rs5000-5400 in Sep.**
- **Uncertainty over urad import quota permit and competitive buying in the markets of Uttar Pradesh and Maharashtra pushed urad price up by Rs200-300 per qtl. during last one week. Delay in arrival from kharif crop also pushed urad price up. Stockists have restricted selling in local market sensing uncertainty over import permit. If import permit is not issued, urad price may increase by Rs 200 more from current level. Arrival pressure from new crop is expected from Oct. Urad FAQ is being traded at Rs6600-6650 in Mumbai market while it is ruling at Rs 6650-6700 in Chennai market. Demand is good. Now decision over issuance of import permit is very crucial for price direction. Crop condition is good, except some pockets of M.P. & MH and area is almost similar to last year at 38.63 lakh ha.**
- **As stock of old and summer moong is said to be available in sufficient quantity in major moong markets of Rajasthan and M.P., prices increased due to sudden firmness in urad markets. However, arrival pressure from kharif moong would build up in coming weeks, inner tone remains weak in moong cash market. Moong is being traded at Rs 5800-6500 in Delhi market, depending on its quality. Big crop is almost ready to be harvested in Kekri, Kishanganj, Shekhavati, Merta and Dausa line of Rajasthan. Crop condition is excellent to good, barring some pockets of Gujarat, U.P. and Karnataka. Farmers have covered 35.79 lakh ha so far. So overall sentiment seems weak for moong cash market.**
- **Masur market traded steady to slightly weak during the review week due to revised duty again (30 to 10 % for 52 days till 31st Oct-2020. Around 5 lakh MT import in July and Aug-2020 at lower duty has increased availability of masur in domestic market. Import volume would be higher in Oct too, so prices are unlikely to move up beyond a certain level (Rs5200-5600). Demand is weak and stock at ports is said to be around 4.5 lakh MT. Despite higher import, prices would not decrease below Rs5000 as sowing would start from mid Oct. Besides, govt has increased MSP for masur from Rs4800 to Rs5100 for MY 2020-21. Steady to slightly weak tone may prevail in cash market this week.**
- **Stock of peas at ports is weak and arrivals in local markets too have decreased to a negligible level. Stockists who have stock, are unwilling to sell it sensing shortage of peas in domestic markets. Import is not taking place and the govt. is not in favor of allowing import above 1.5 lakh MT. As prices are lower in global market, B, desh and Nepal would buy more**

matar as arbitrage opportunity is there with India. Demand is weak as other pulses are available comparatively at cheaper price. Matar in Kanpur market is being traded at Rs6600-6700 per qtl. At port it has already crossed Rs7200 per qtl.

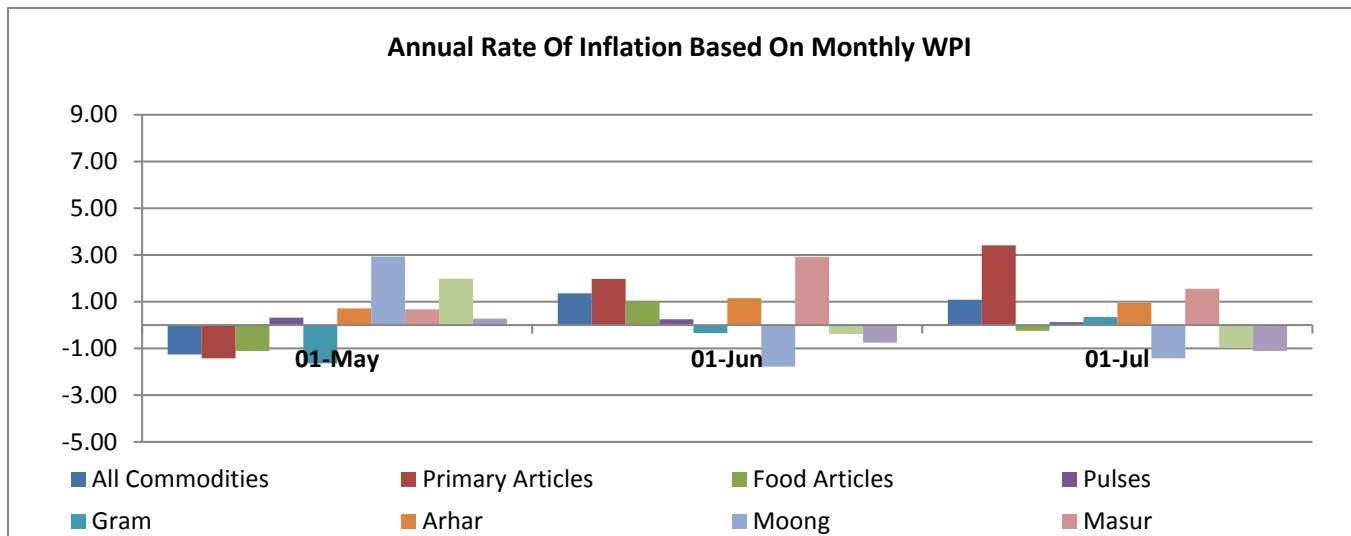

International Market Update:

- **Global lentil markets traded firm on expectations of good demand from India. Notably, India has again reduced duty from 30 to 10 %, applicable till 31st Oct-2020 now.** The government is hoping additional imports will help lower the retail price of masoor dal or split red lentils. Between March and mid Sep, the average price in India rose 15% from U.S. \$900 to \$1025 per metric ton (MT). Now price is expected to come down to \$875 to 880 in Sep-2020.
- **As per Turkish Statistical Institute (TURKSTAT), Turkey imported 40,774 metric tons (MT) in July-2020** against 89,693 MT in June-2020. Despite lower volume of import in July total imports so far increased to 408,932 MT during the ongoing calendar year. The biggest exporter during the month was Canada, supplying 36,674 MT. Syria was the second most important export origin shipping 2,000 MT, followed by United States at 1,049 MT.
- **Private participants are expecting a larger lentils crop in Canada and the United States this year against last year.** However, official estimates have not been revised as yet. They expect lower crop size this year against last year in Australia. Abares too has not revised crop estimate as yet. Private participants/experts expect 497,000 metric tonnes production this year against 543,000 metric tonnes last year in Australia. The USDA expects this year's harvest to reach 295,000 MT, compared to 244,000 last year. Statistics Canada will release its second production estimate soon. But, farmers are reporting higher average yields in Saskatchewan.
- **For 2020-21, Canadian lentil seeded area rose by 11.96 % to 1.72 Mha, due to good forecasted returns** compared to other crops. It was 1.53Mha in 2019-20. By province, Saskatchewan accounts for 90% of the lentil area, with the remainder seeded in Alberta and Manitoba. Production is forecast to increase to 2.47 MMT (2.16MMT last year), with supply lower due to smaller carry-in stocks. Exports are forecast to be lower at 2.1 MMT. Carry-out stocks are forecast to rise to nearly 0.175 MMT. The average price for all grades and types are forecast to rise from 2019-20, with higher prices from large green and red types. It may rule in the range of \$500-530 per metric tonne throughout the year. There is an expectation that import demand in the Indian subcontinent will continue to be similar or slighter higher in 2020-21 according to the latest update from Agriculture & Agri food Canada.
- **For 2020-21, the area seeded under chickpeas in Canada fell by 23.89% from 159 thousand ha in 2019-20 to 121 thousand ha** due to the lower farm gate prices received in the previous year. Saskatchewan accounts for most of the chickpea area, with the remainder in Alberta. Production is forecast by AAFC at 200 Kt, down 20.63% from the previous year, due to lower seeded area despite higher expected yields. Supply is forecast to rise to 410Kt. Exports are forecast to rise from 105 to 125Kt and carry-out stocks are forecast to fall from 160 to 150Kt in 2020-21. The average price is forecast to fall marginally due to a larger world supply, with the expectation of an average grade distribution. It may hover in the range of \$455 to \$485 per tonne.
- **Chickpeas production in Australia is likely to increase by 3.5 lakh MT to 6 lakh MT in 2020-21, The new crop would hit market in End Oct.** As demand from India is weak, sentiments remain weak in Sep too. As chickpeas attracts 60% import duty, import volume is negligible from Australia. However, from other African countries, import continues on zero duty. India has imported 2.38 lakh MT from Zambia, Mozambique, Tanzania and Malawi.
- **As per latest updates by NASS, dry pea acreage may be down by 12-13% this year in US** peas producing regions. Farmers may plant 971,000 acres against 11,03,000 acres last year. Intended plantings are down from a year ago in Idaho, Montana, Nebraska, North Dakota, and South Dakota. However, area in Washington may increase by 19% this year.
- **Chickpeas area in the US is likely to decrease by 32% from last year. Small chickpea acreage shows a decline of only 5%, while large chickpea acreage is expected to decrease by 41%.** It is really a big surprise this year.
- **Stock position of urad in Myanmar is said to be around 2.75 to 3 lakh MT. New crop is expected to hit market in mid - March-2021.** By then Myanmar may export around 1 lakh MT under quota system before the new crop hits the market and retain 50,000 MT for domestic consumption. If India extends the time line for import, prices in Myanmar may move up by \$100 per MT from current level. Myanmar is offering urad FAQ and SQ at \$720 and \$825 per MT respectively right

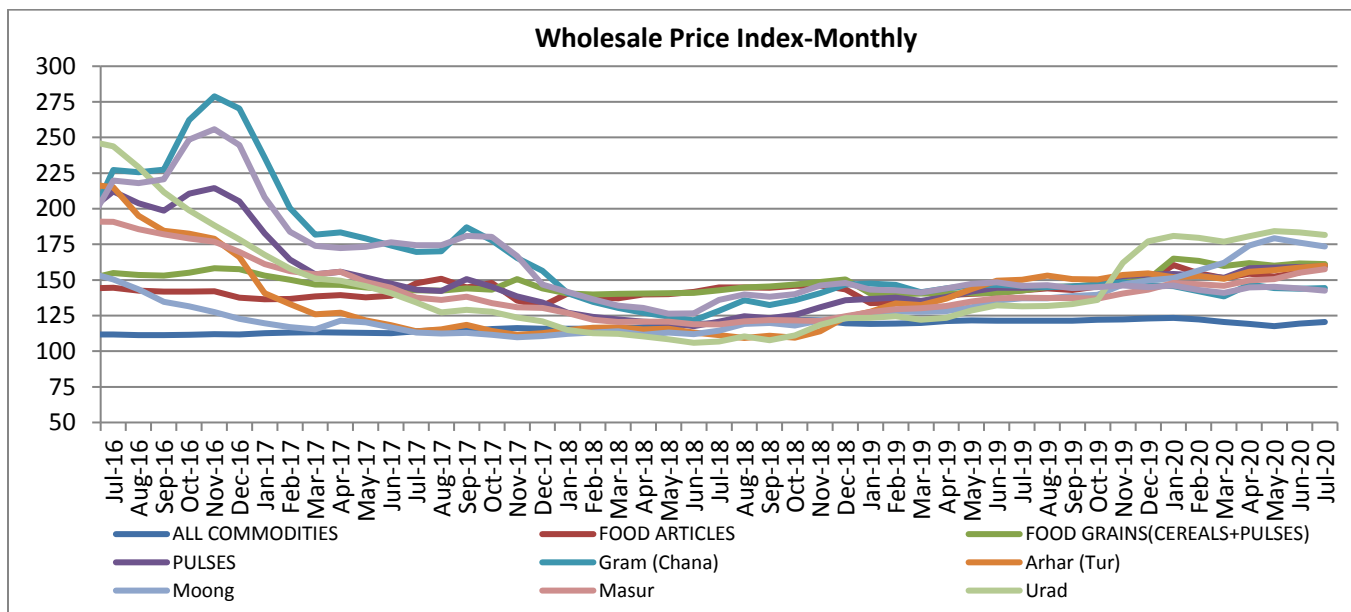

now and the price movements will depend on the Indian import time line. India govt may open import after assessing the kharif crop size and any losses of the crop that is, heading towards maturity and harvesting of which should commence in Sep.

Monthly Outlook: -Pulses are likely to trade steady to slightly firm.

Pulses WPI Index:

Index Numbers of Wholesale Price in India (Base: 2011-12=100)

Pulses WPI increased by 2 points from 159.2 in June to 159.4 in July-2020

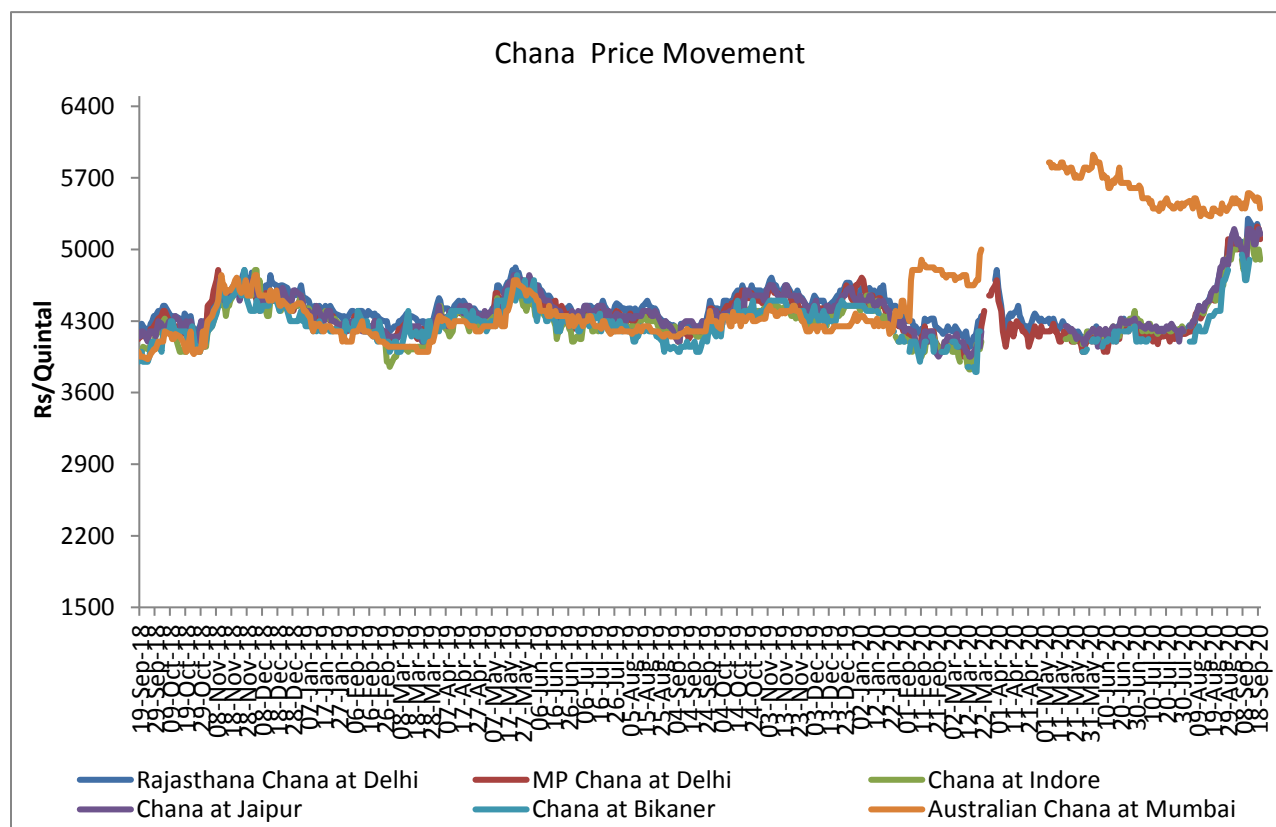

Pulses-Wise Scenario:

Chana

Current Scenario:Chana cash market traded un-steady during the week under review.Nafed restricted sale above Rs 5000 and decreasing arrivals in major markets of Raj,MH and M.P. continued to support market at current level.Chana

traded Rs5050 to 5225 in Delhi market. If demand continue to improve and farmers start purchasing for seed purpose, market may move up by Rs 200 to 300. At this point Nafed may play a crucial role by decreasing or increasing supply in the market to regulate chana price. As sowing starts from mid-Oct, govt. would prefer to see chana at current level, so that area under chana could be maintained at last year's level during sowing time. Chana is being traded at Rs 5100-5200 in Delhi market. Import would be limited even from African countries, as availability is said to be lower (1.75 lakh Mt). India imported around 27,000 MT in July from these countries while from April to July around 2.38 lakh MT has been imported. The fig is expected to be 25,000 Mt in Aug too. Import data for Aug is awaited. Under prevailing condition chana market is expected to trade steady to slightly firm. In Delhi It may trade at Rs 5000-5400 in Sep.

All India average price for Chana increased by 0.35 % percent to 5035 per qtl. during review week. Even Australian Chana (imported) price increased by 0.81% to Rs 5510 per 100kg due to decreased supply through Nafed in domestic market. Following graph illustrates chana price movement in different markets:

Market Outlook: Slight downward correction is expected in cash chana market in coming days. Nafed's current selling strategy would enhance supply and may cap one way firm momentum in domestic market. Indian importers have imported around 2.38 lakh MT chana during April to July 2020. Demand for besan mills and hotel industry has started increasing now. However, distribution of 1 k.g. dal per family/ per ration card would continue to affect direct demand from cash market till Nov. It would cap any unexpected spike in chana cash market.

Chana Weekly Technical Analysis:

--

Technical Commentary:

- Increasing price & OI hint market to trade firm in the medium term.
- RSI is moving up in neutral region, hints caution to bears.
- Prices closed above 9 and 18 days EMAs
- Candlestick chart hints indecision in the market.

Strategy: Sell on rise

Supports & Resistances			S1	S2	PCP	R1	R2
Chana	NCDEX	Oct	5050	5000	5112	5230	5300
Weekly Trade Call*			Call	Entry	T1	T2	SL
Chana	NCDEX	Oct	Sell below	5185	5075	5050	5235

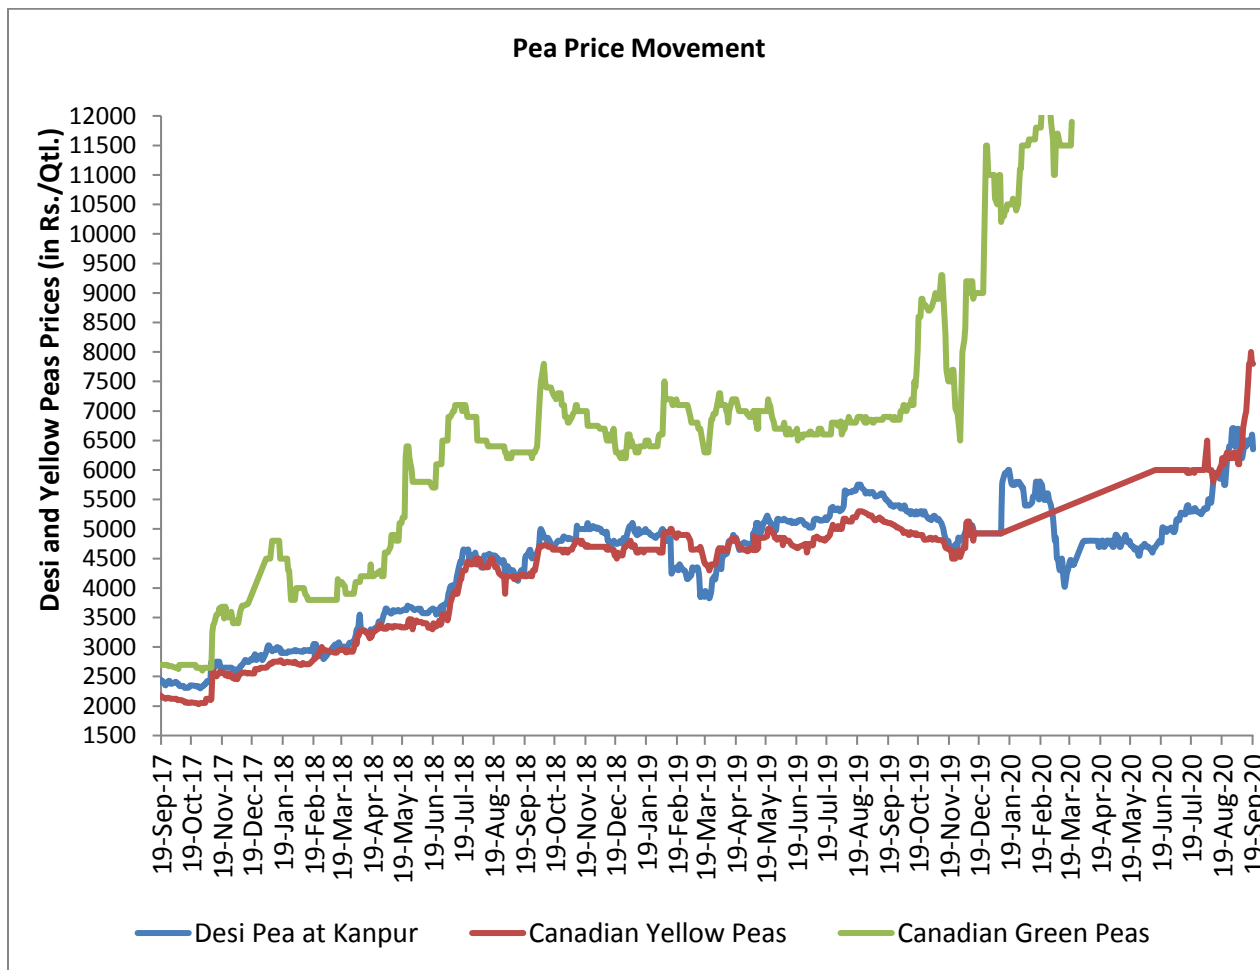

- Do not carry forward stock for next week.

Peas (Matar):
Market Recap:

Availability of peas at ports is very poor and arrival in domestic market is decreasing fast. The stockists who have stock, are unwilling to sell it at lower prices. However, consumption too is weak as prices are higher in domestic market. Govt.

would not allow import as other pulses are available easily at affordable prices. Even The DGFT has not allowed port authority to release stock lying at ports. The stock is said to be 1.25 lakhMt, as it exceeds quota limit of 1.5 lakhMt per year. Demand is weak as prices are Rs7300 per qtl. higher than chana. So, prices may rule steady in domestic market. Peas in Kanpur market also traded up at Rs 6700-6800 due to halted arrivals in domestic market, lower availability at ports and almost no import during last four months. Stockists too are unwilling to release old stock because of lower production this year. It may continue to lend support to peas in Kanpur market.

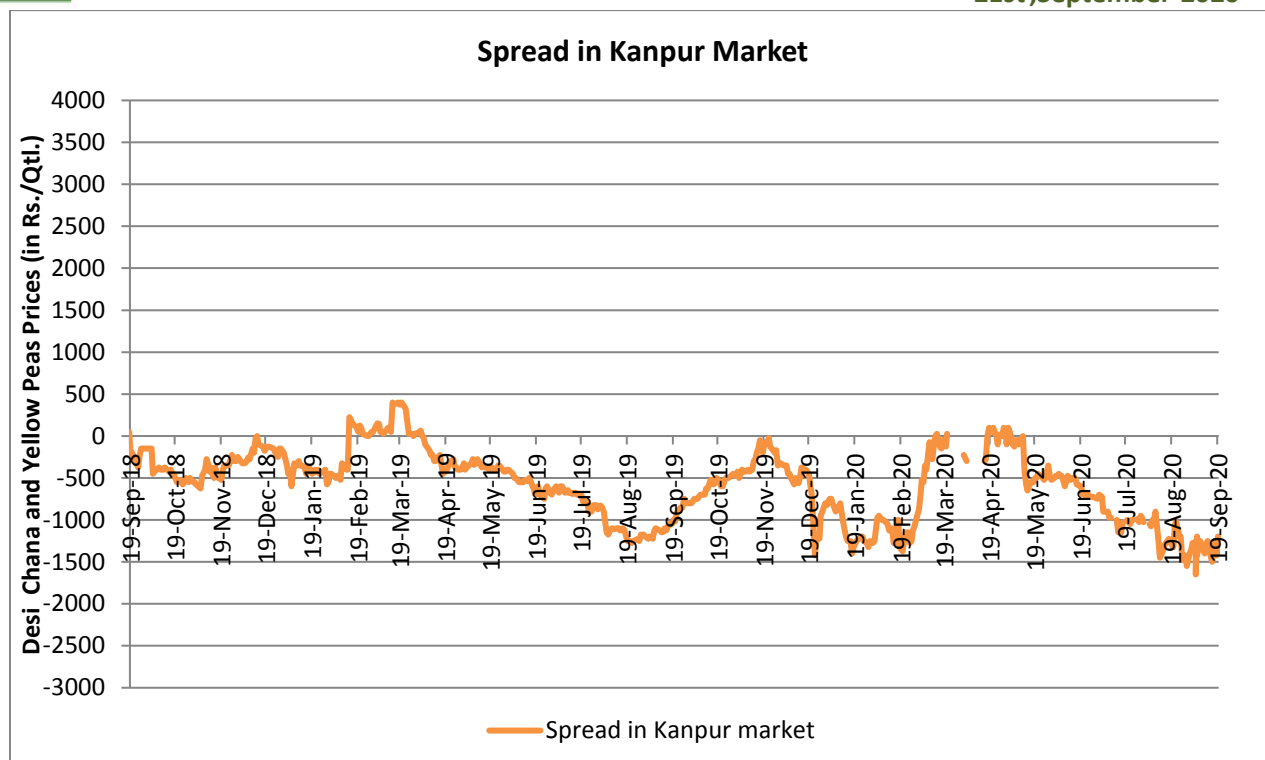

At the global level, Canada is unable to export peas in bulk volume as major buyers like India are out of the market. Demand from other consuming countries too is weak due to disturbed market activities everywhere. B'desh and Nepal may buy higher quantity in Oct-Nov due to lower prices in the global market and sell it in India as there is an arbitrage opportunity for them..

Current Market Dynamics & Outlook: Peas market traded firm due to decreasing availability in domestic market, at ports and firming chana price. Kanpur market traded up by Rs200 to Rs 6600-6800 per qtl. Any major spike is unlikely now. Tight supply side is expected unless peas enters in India through B'desh and Nepal illegally. Overall, all India average price was up by 4.50% to Rs 6600-6800 per qtl. In Mumbai market, there was no quote for yellow peas as stock was exhausted. Canadian yellow pea in Kolkata is being traded at Rs 710-7200.

Spread With Chana:

Spread between Chana and Peas, at Kanpur market remained in negative zone. Gap has decreased slightly from Rs 1275 to Rs 1200 due to increased pea price. Spread is expected to remain in the negative zone in Sep too on relative movement in Chana prices. Overall outlook seems steady to slightly firm this week too.

Market Outlook: Firm tone may prevail.

Lentils (Masoor):

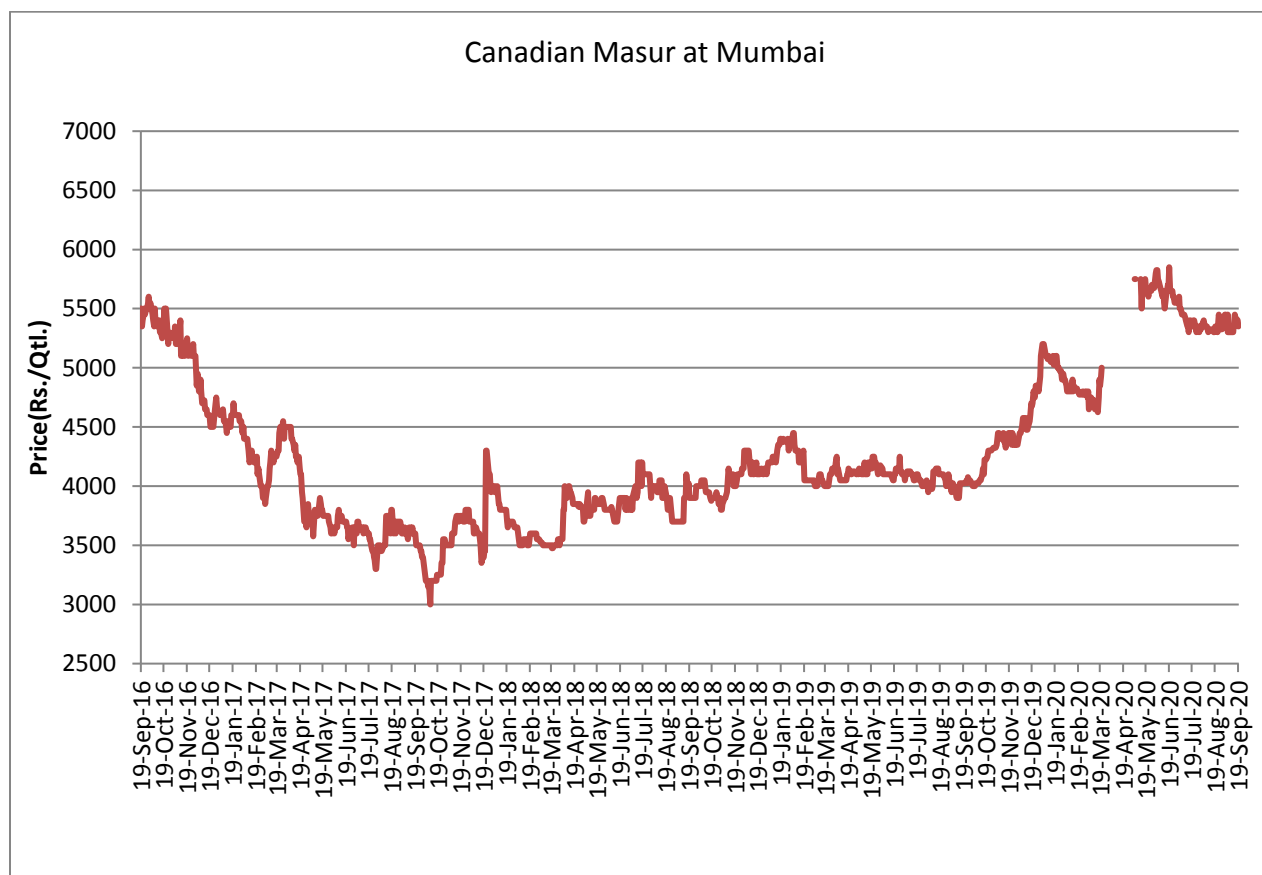

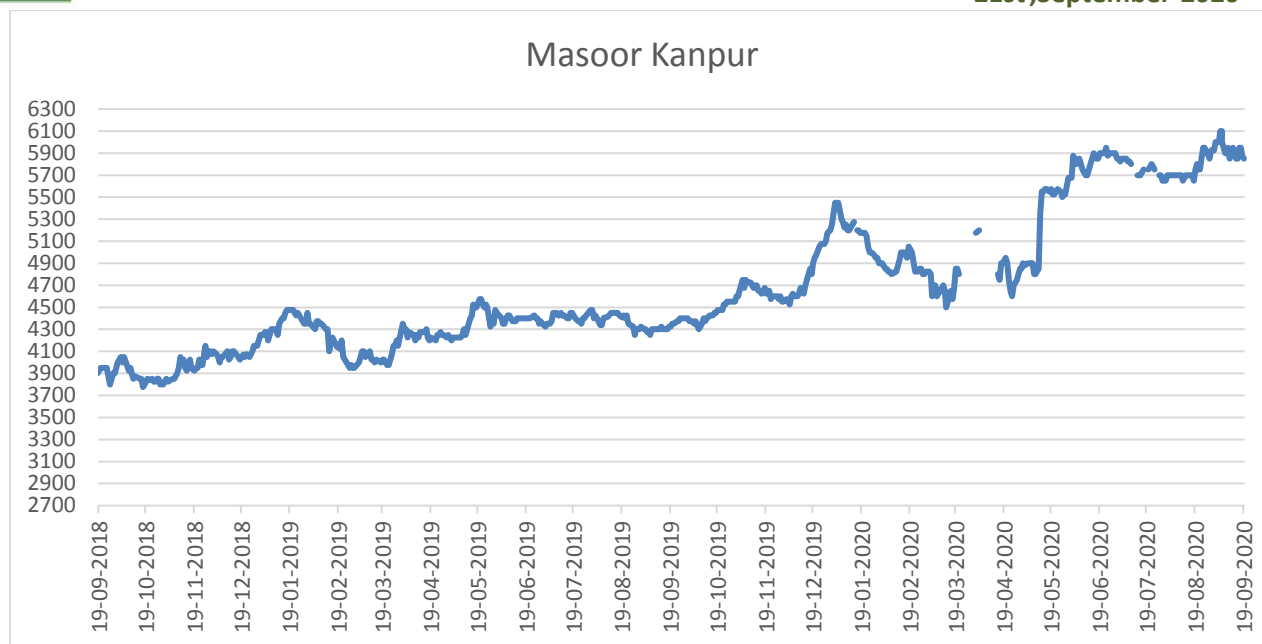

Market Recap:

Importers imported higher quantity (around 5.0 lakh Mt) of masur during July and Aug, taking advantage of the lower import duty. Now 80% imported consignment is lying at ports as demand in domestic market is weak at this point of time. So, prices did not increase in the market despite enhanced duty from 10% to 30% from 1st Sep-2020. Now again import duty has been reduced from 30 to 10 % till 31st Oct-2020. It means higher import volume in Oct too. So supply would increase and price may trade in the limited range. Demand for daal too is weak. Masur was quoted at Rs 5350-5500 in Kolkata while in Mumbai it was traded at 5300-5350. Price of Australian containers was quoted at Rs 5400.

Price of Masur in Australia and Canada may increase again as demand from Asian countries is expected to increase. Apart from this lentils production in Australia may decrease by 7%. It may push up price. If demand increases in India, Importers can strike bulk deals at reduced duty again.

Current Scenario:

Stock at ports has started increasing now. At Mumbai ports importers are selling masur at Rs 5350-5400. Nafed may start releasing stock to keep price under check. It has around 21,000 MT old stock while new stock is only 4500Mt. Any spike in masur market is unlikely. Demand is weak, so price may trade range bound this week.

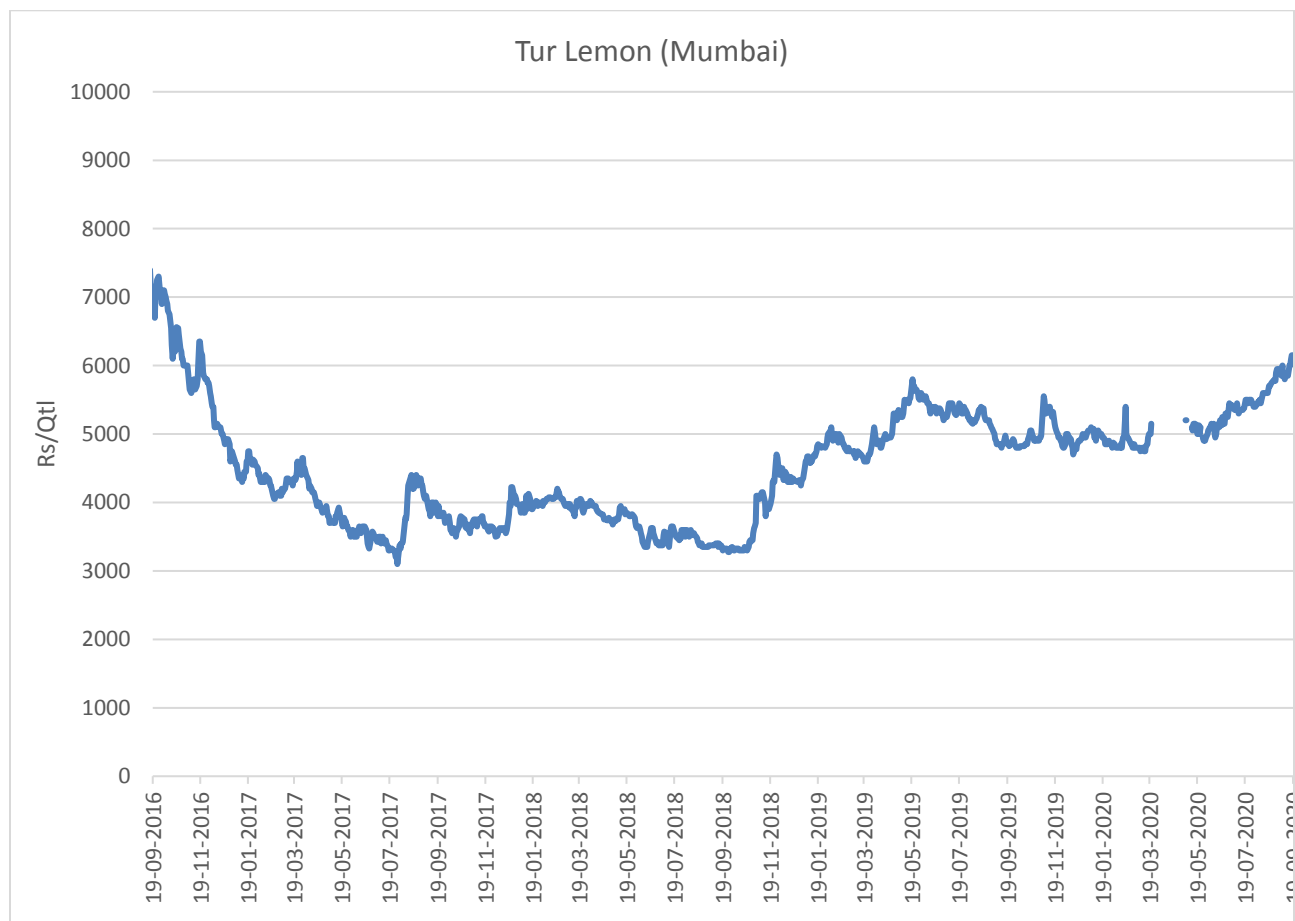

Market Outlook: Prices may trade range bound due to higher supply prospects from imported stock in the near to medium term. Sluggish demand from mills and commencement of offloading by stockists remains unsupportive to cash market right now. Overall tone in masur market remains weak in Sep.

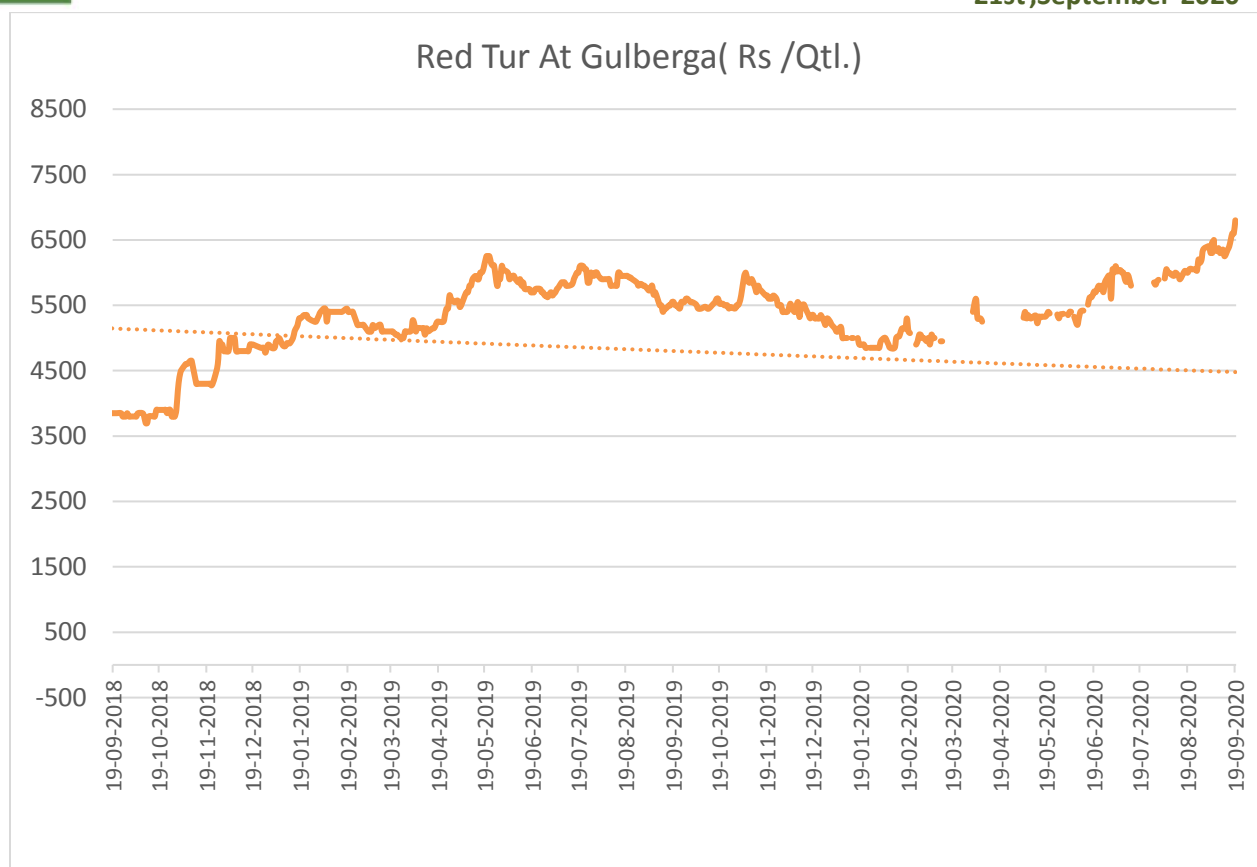

Pigeon Pea (Tur/Toor):
Market Recap:

Stocks at ports are said to be lower at this point of time. Import licenses have not been issued to importers yet, so millers are buying tur from local markets. Arrivals in local market are decreasing. So market is moving up slowly. Relaxation from lock down in various states has increased demand for dal and millers have increased buying. Tur was quoted at Rs6400-6550 in Mumbai market. It is being traded at Rs 6700-6850 in Gulberga market. Overall sentiment seems firm. Importers are active in Myanmar, so it hints that govt may issue licenses soon, by end Sep or first week of Oct. Under prevailing conditions tur price may move further up by Rs200-300- from current levels.

Current Market Dynamics & Outlook:

The production share of tur in total kharif pulses production is 34.5 % and farmers have covered around 109 % (48.24lakh ha) area of normal (45.53 lakh ha). Planting is almost over and area may end at 48.50 lakh ha. Higher offtake from mills and improved demand for tur dal amid lower pace of import have helped market to trade up by Rs 250-350 in various markets, despite good planting and crop condition so far. Apart from renewed demand, arrivals in major markets are decreasing now amid restricted sales by Nafed and private trade. It would continue to support tur cash market this week too. Demand for tur dal may increase further in the coming weeks due to festive season. As import licenses are yet to be issued, volume of imports from allocated quota of 4 lakh MT is expected to be lower in Sep, even if licences are issued at the end of the month.

In the third week of Sep-2020, average price in Gulberga market was up by Rs 400 to Rs 6750-6850 due to slower pace of import, improvement in demand for dal and improved buying by private traders. However, increasing kharif area and likely selling by Nafed may cap upward momentum in coming weeks. Import volumes (G to G basis) are likely to increase in Aug-Sep, while import licenses could be issued soon for private millers. Tur price is likely to trade firm in Sep.

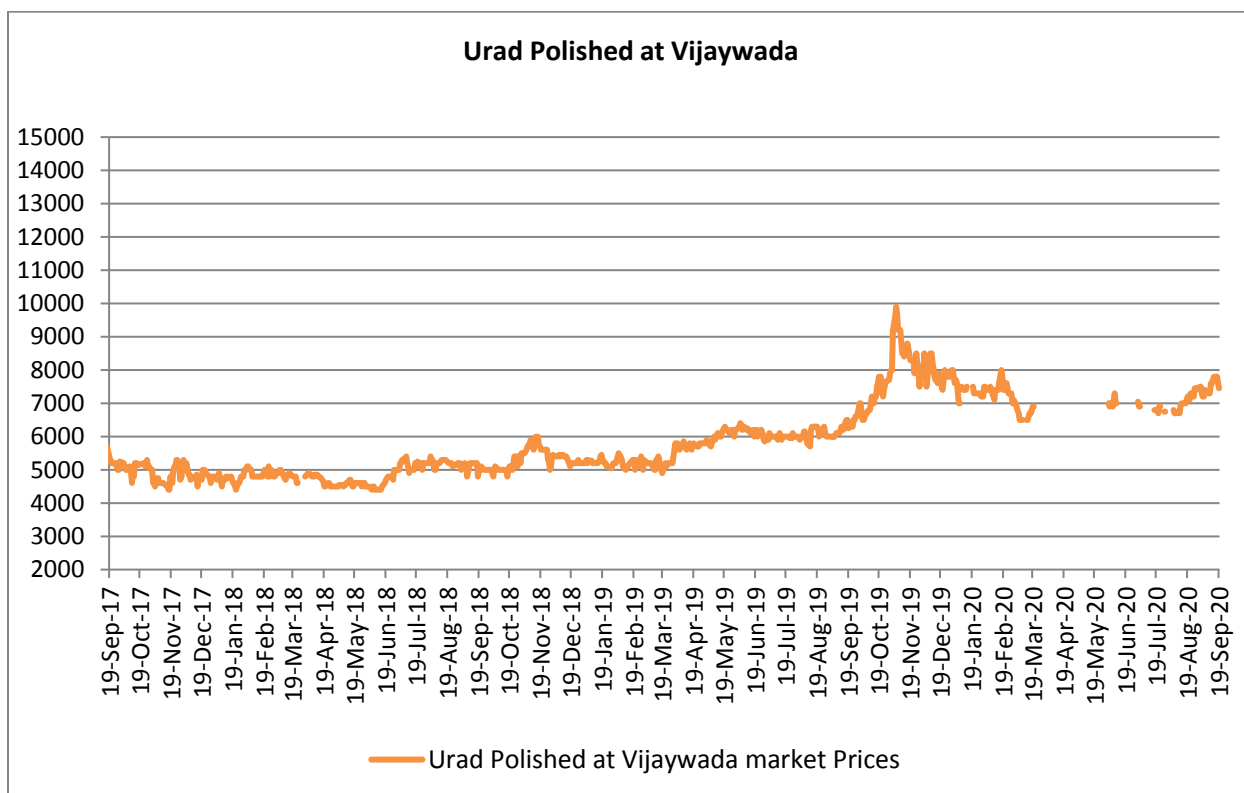

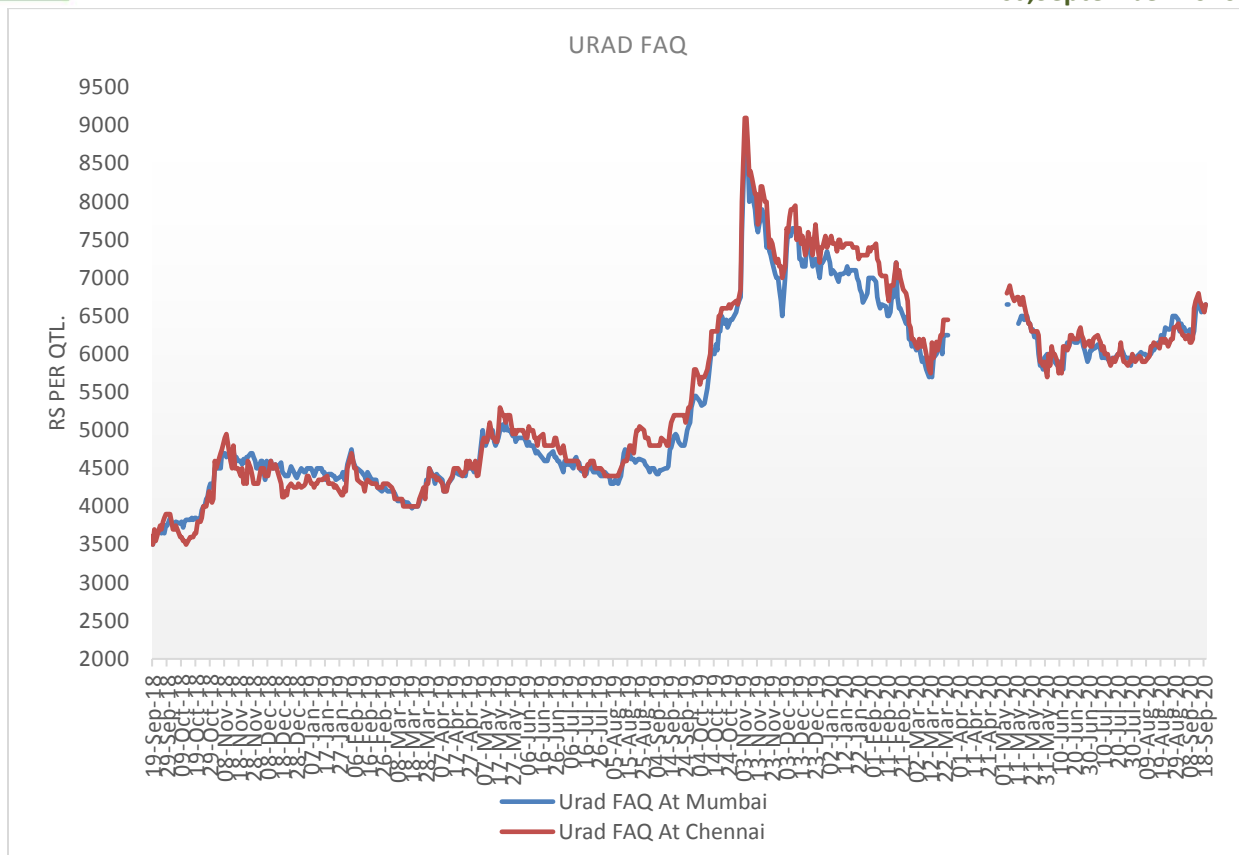

Black Matpe (Urad):

Prices continued to move up as stockists restricted selling sensing uncertainty over timing of import permit and likely delay in arrival from kharif crop. Apart from it, the new crop loss too helped market to push up by Rs 200-300. Even the DGFT has not allowed to release old stock lying at ports as these stocks have been imported without proper documents or presenting wrong information about mills/its capacity. So, there is an artificial short supply in the market and prices are moving up. If import permit is not allowed soon, prices may move up again by Rs 300-400 before pressure from new crop starts. Quotes for FAQ urad moved up by \$70 to \$830 per MT while SQ moved up by \$80 to \$950 per MT basis Indian port. Prices in domestic market moved up slightly to Rs 6650 for FAQ and Rs 7200 for SQ at week end because of non-extension of the import time line. If demand improves and new arrival is delayed, prices would increase against normal expectation. Arrival pressure from kharif crop is expected by the end of Sep.

Current Market Dynamics & Outlook:

The production share of urad in total kharif pulses production is 27.5 % and farmers have covered around 109 % (38.63 lakh ha) area of normal so far. Normal area of urad is 35.53 lakh ha. Planting is almost over now. Area in M.P., MH & Kar has increased while it is down in Raj, U.p. & Telangana. However, overall area is higher so far. Due to heavy rains around 10000 ha area is said to be inundated. However it would not affect the final size of the crop. Overall, planted area is higher by 60,000 ha from last year.

Market Outlook: *Urad Prices are likely to show steady to slightly firm momentum.*

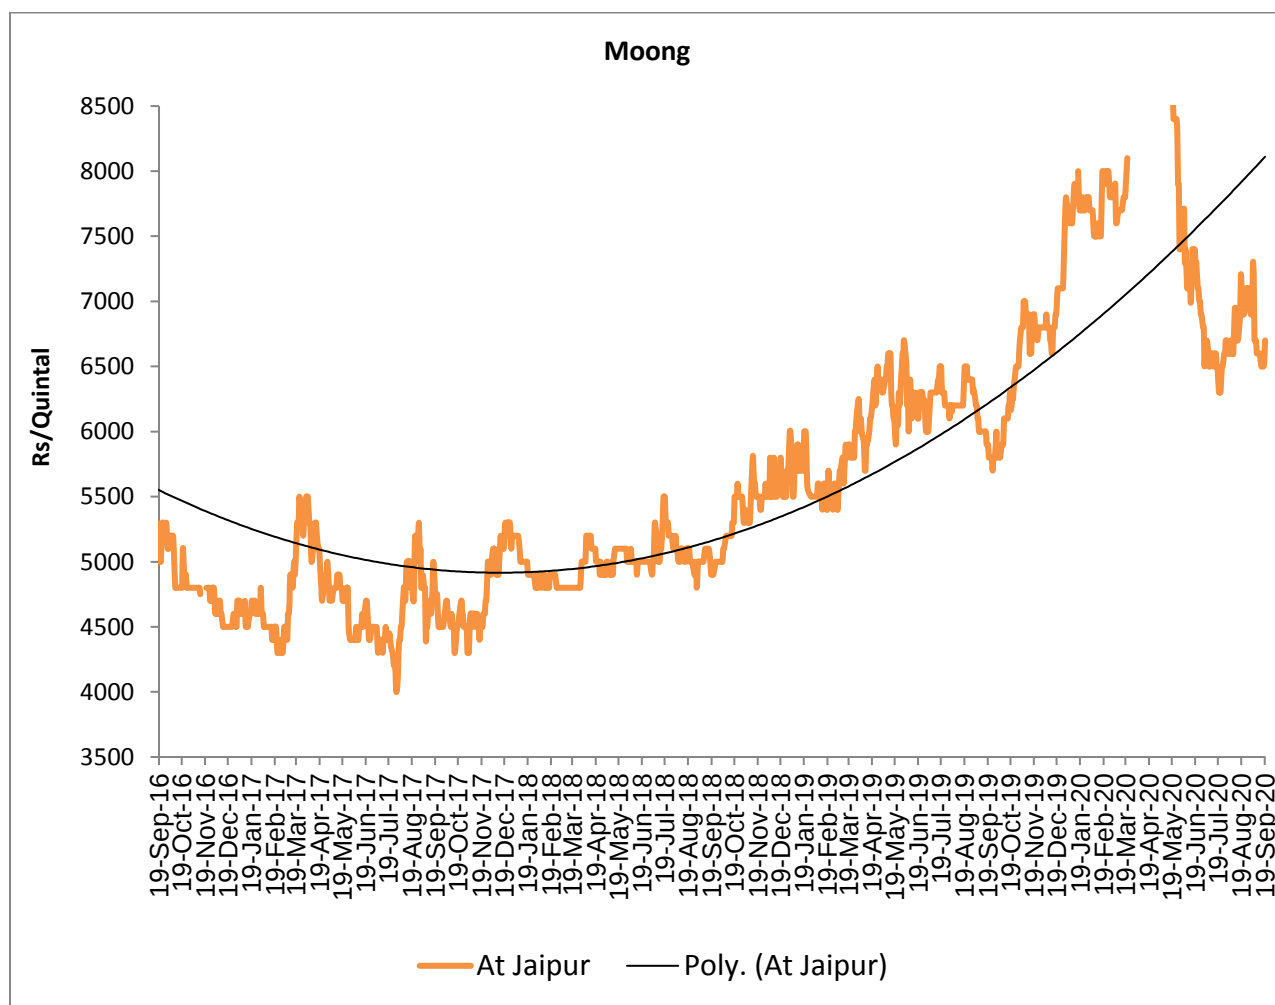

Green Gram (Moong):

Market Recap:

Prices are mostly steady but pressure should begin by end of the month, as arrivals from new kharif season has started from Karnataka, Gujarat and MH. Besides, higher area coverage and good crop condition so far would not allow market to move up from current level. Arrival from MP is expected now, followed by Telangana and Raj. Arrival from summer crop is over now. If demand improves, slight recovery might be seen this week. There is no parity for import as moong price is ruling lower than Myanmar right now. Expecting a huge crop from Rajasthan, stockists prefer to sell now So, overall trend seems weak in the medium term despite minor loss in Karnataka (2500 ha) and Telangana (650 ha) by flooding.

.As demand is weak, prices may decrease by Rs300-400 from current level. Crop condition is good while some quality issues have been reported from those areas where heavy rains occurred during harvesting time. However, loss is minor when we consider higher area this year. Kharif production is expected to be in the range of 14.50-15.50 lakh Mt this year. In Jaipur market moong is being traded at Rs 6500-6600, may come down to Rs 6200-6300 by end Sep.

Market Outlook: Moong prices are likely to trade steady to slightly weak in the near term.
