Commodity-wise Domestic, International Prices and Arrivals at Different Centers

Weekly Highlights-Domestic Market:

- **The central govt. may extend the time line for free distribution of grains under Pradhan Mantri Garib Kalyan Yojana (PMGKY), till March-2021.** The fresh measures would be a mix of demand stimulus and social safety measures. Under this Yojna Government provides 5 kg rice or wheat per person to 81 crore beneficiaries and 1 kg (chana) to 19.4 households free of cost under the National Food Security Act. It may continue to affect rice and wheat price in domestic market.
- **Tur crop in Myanmar is expected to hit local market by Dec end.** Arrival gap between India and Myanmar is 15 to 20 days. Full-fledged arrival in India is expected in Jan-2021. Expert say that Myanmar may harvest 2 to 2.25 lakh MT tur this year. Old stock in Myanmar is said to be 1 to 1.5 lakh MT as per market sources. So, availability in Myanmar is lower than Indian requirement. So CiF quote is bound to increase in Myanmar.
- **The Director General of Foreign Trade (DGFT) has extended the import time line for tur import from 15th Nov to 31st Dec-2020.** The notification regarding this has been issue on 26th Oct-2020. Notably, the quota of 4 lakh MT of tur was allocated equally, or for the quantity applied, whichever is lower, only amongst the eligible and verified applicants and validity of the license issued for import of tur was uptill 15th Nov-2020.
- **Despite demand of slashing duty on chana, govt. is unwilling to decrease it at a time when planting is on.** Change in duty can give negative signal to farmers.
- **Rabi sowing commences and area under Chana, Masur, Urad and Moong is expected to increase in the range of 5 to 10 %** due to higher prevailing prices in cash market.
- **Area of Urad and Moong would increase by 10% in AP and Tamil Nadu this year,** while chana area in Rajasthan, M.P. and MH may increase by 5 %. Masur area in U.P. & M.P. may increase 5 to 8% this year. Farmers would cut wheat area in these states.
- **There are no stocks of peas at ports right now and prices in domestic market is ruling near 7600-7800.** Supply side in domestic market is tight.
- **Release of peas lying at ports suspended again for the reason unknown.**
- **Around 85,000MT tur was put on auction in Karnataka in various districts.** Bis approval is awaited.

Weekly International Market Update:

- **Global chickpeas market traded slightly up taking clue from a tight supply side and demand situation on physical markets.** However, supply side seems ample in the longer term as higher production is expected in Turkey and India this year. The biggest change can be seen in desi chickpea output. Harvesting is on in Australia. The last production estimates were released in September, at which time the crop was pegged at a record 1.18 million metric tons (MT) of desi and 58,500 MT of kabuli chickpeas.
- **Global field peas market traded slightly up on the back of higher buying by exporters for meeting sales commitments.** Whole green and yellow peas prices are increasing in Canada and USA too as they paid farmers higher prices. maximum stock in Canada has been sold out by farmers. It leads to higher prices of peas.

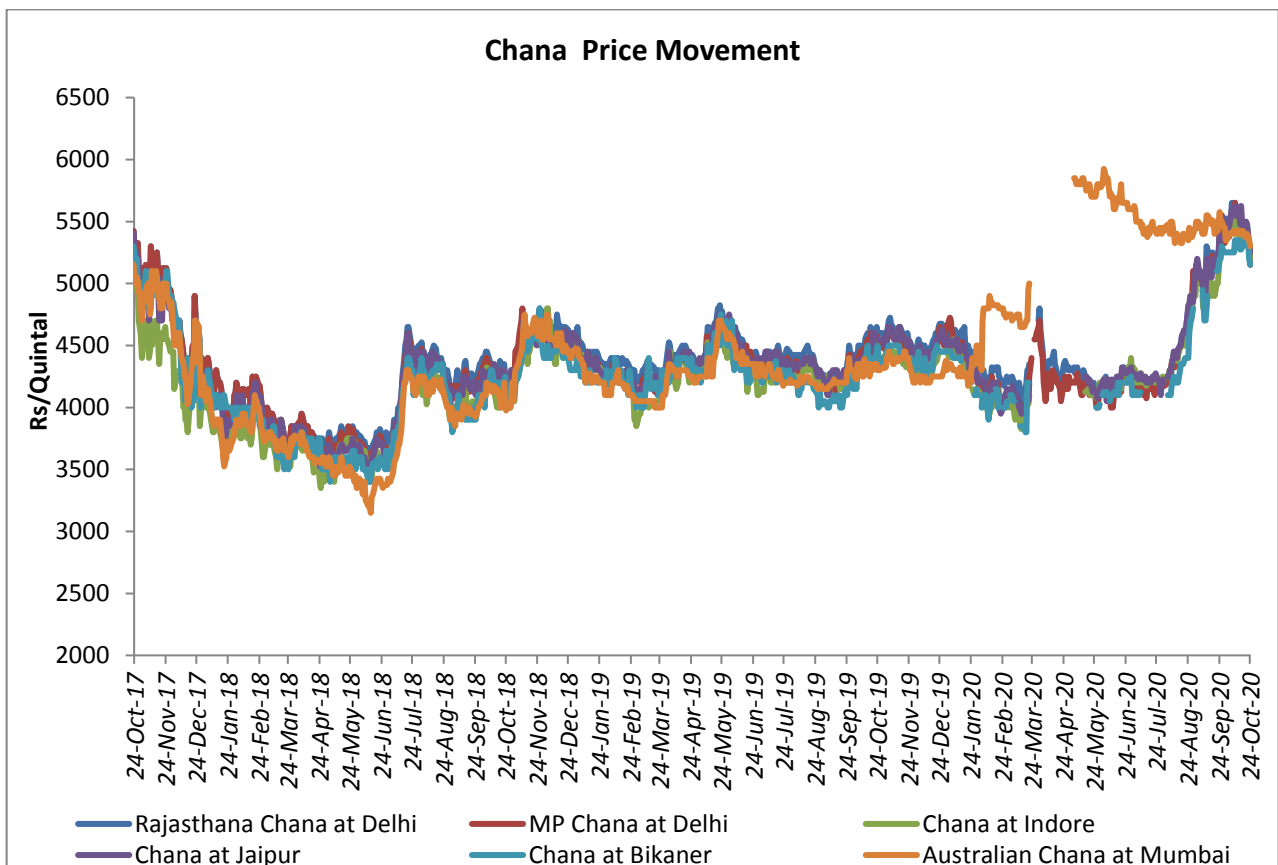

- **Peas Import by Spain recorded an improvement in August against July. Imports in Aug reached 70,297 metric tons (MT), up from 7,101 MT the previous month. This lifted imports so far during the calendar year to 99,244, down 9% last year. Ukraine was the biggest exporter, supplying 35,926 MT. Russia was the second most important shipper supplying 24,025 MT, followed by Romania at 7,040 MT.**
- **Field pea markets traded firm last week taking clue from good opening season export movement. As per Canadian Grain Commission, exporters in Canada loaded 630,900 metric tons (MT) of peas for bulk export in September, up from 102,400 in August and 508,900 the same month last year.**
- **Private participants/experts expect 497,000 metric tonnes lentils production this year against 543,000 metric tonnes last year in Australia. The USDA expects this year's harvest to reach 295,000 MT, compared to 244,000 last year. Statistics Canada will release its second production estimate soon. But, farmers are reporting higher average yields in Saskatchewan.**
- **For 2020-21, the area seeded under chickpeas in Canada fell by 23.89% from 159 thousand ha in 2019-20 to 121 thousand ha due to the lower farm gate prices received in the previous year. Saskatchewan accounts for most of the chickpea area, with the remainder in Alberta. Production is forecast by AAFC at 200 Kt, down 20.63% from the previous year.**
- **Quotes in Myanmar increased by \$50 to 75 during last two weeks as Indian buyers are active for buying urad and tur. tur is being offered at \$810 while Urad FAQ and SQ at \$ 975 & 1180 per MT basis Indian port. Around 1 lakh MT tur and 20000 MT urad is Expected to hit Indian ports in Nov 1st Week.**
- **Weekly Outlook: -Pulses are likely to trade mixed this week.**

Chana

Current Scenario:

Chana futures traded firm taking clue from restricted sale by Nafed/ stockists and improved demand at higher level, after trading downside last week. Govt is unlikely to slash duty at a time when sowing is beginning, even though the trade was hoping for one. So, Agriwatch expects market to move up again in the medium term. This year chana area may cross previous record level as prices are higher than MSP at the time of sowing. This year, it may increase by 5 to 10 % from last year. It was 110-111 lakh ha last year

All India average price for Chana decreased by 1.76 % percent to 5344 per qtl. during review week. Even Australian Chana too, taking clue from weak domestic market(imported), decreased by 1 % to Rs 5362 per 100kg due to improved supply side in domestic market. Following graph illustrates chana price movement in different markets:

Market Outlook: Improvement is expected in cash chana market this week. Nafed's current selling strategy would determine price trend in coming weeks. As Nafed is accepting higher bids, prices are expected to move up by Rs200-300 from current level. However, release of higher volume at lower price may pressurize chana price to a certain extent. Indian importers have imported around 2.56 lakh MT chana during April to Sep 2020. Demand for besan mills and hotel industry has started increasing now. However, distribution of 1 k.g. dal per family/ per ration card would continue to affect direct demand from cash market till Nov. It would cap any unexpected spike in chana cash market. Overall outlook remains steady to slightly firm.

Chana Weekly Technical Analysis:

Technical Commentary:

- Decreasing price & OI hint market to trade weak in the short term.
- RSI is moving down in neutral region, hints caution to bulls.
- Prices closed above 9 and 18 days EMAs
- Candlestick chart hints weak momentum in the market.

Strategy: Sell on rise

Supports & Resistances			S1	S2	PCP	R1	R2
Chana	NCDEX	Nov	5163	5137	5264	5365	5452
Weekly Trade Call*			Call	Entry	T1	T2	SL
Chana	NCDEX	Nov	Sell Below	5300	5200	5150	5360

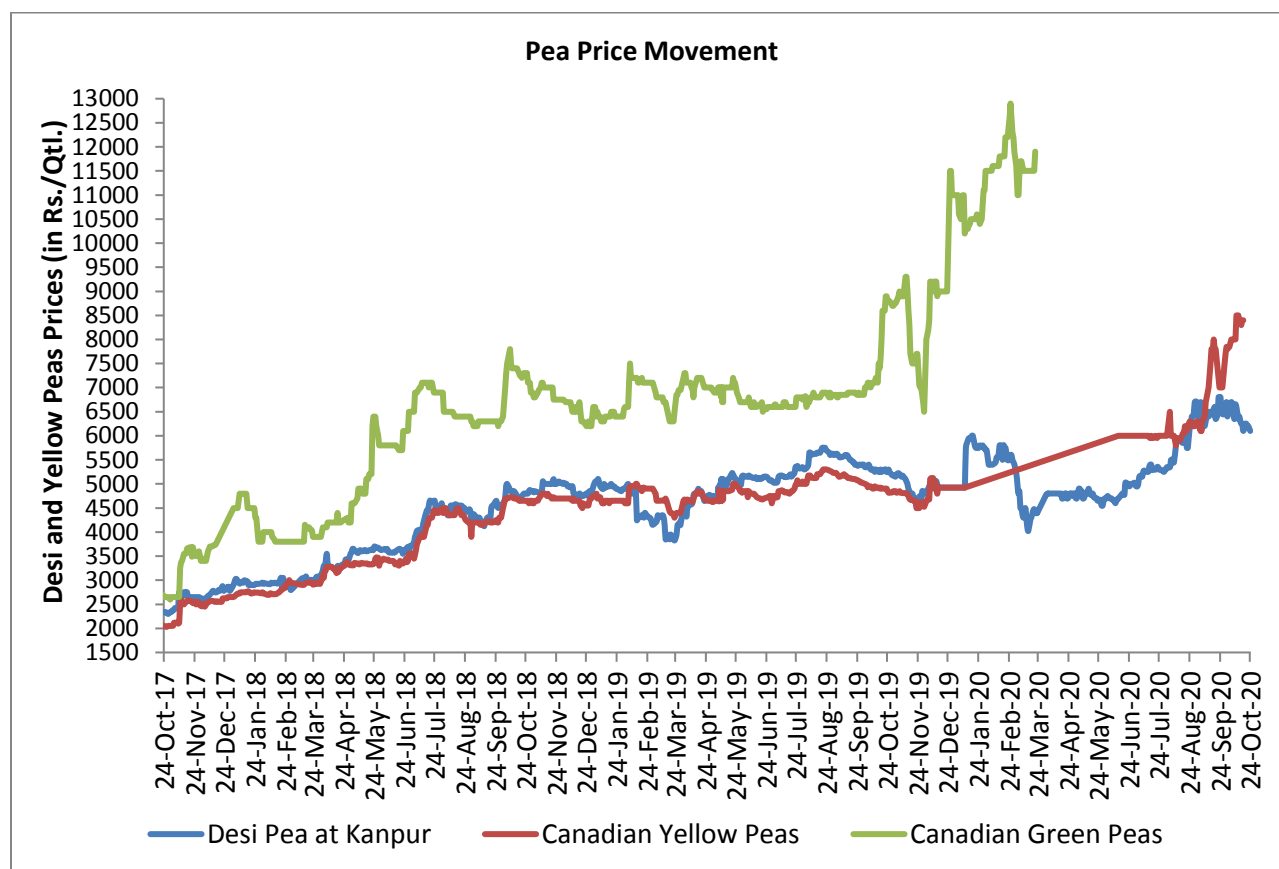

- Do not carry forward stock for next week.

Peas (Matar):

Market Recap:

Availability of peas at ports is almost negligible and arrivals in domestic market is decreasing fast. The stockists who have stock, are unwilling to sell it at current prices. However, consumption too is weak as prices are higher in domestic market. Govt. would not allow import as other pulses are available easily at affordable prices. DGFT has in fact, not allowed port authority to release the approximately 1.25 lakh Mt stock lying at ports as it exceeds quota limit of 1.5 lakh Mt of the year. Demand is weak as prices are Rs8000 per qtl. at port, reasonably higher than chana. So, range bound movement might be seen in domestic market. Peas in Kanpur market also traded up at Rs 6200-6400 due to halted arrivals in domestic market, lower availability at ports and almost no import during last five months. Stockists too are unwilling to release old stock because of lower production this year. It may continue to lend support to peas in Kanpur market at current level. Sowing has just started and area is expected to increase this year by 5%.

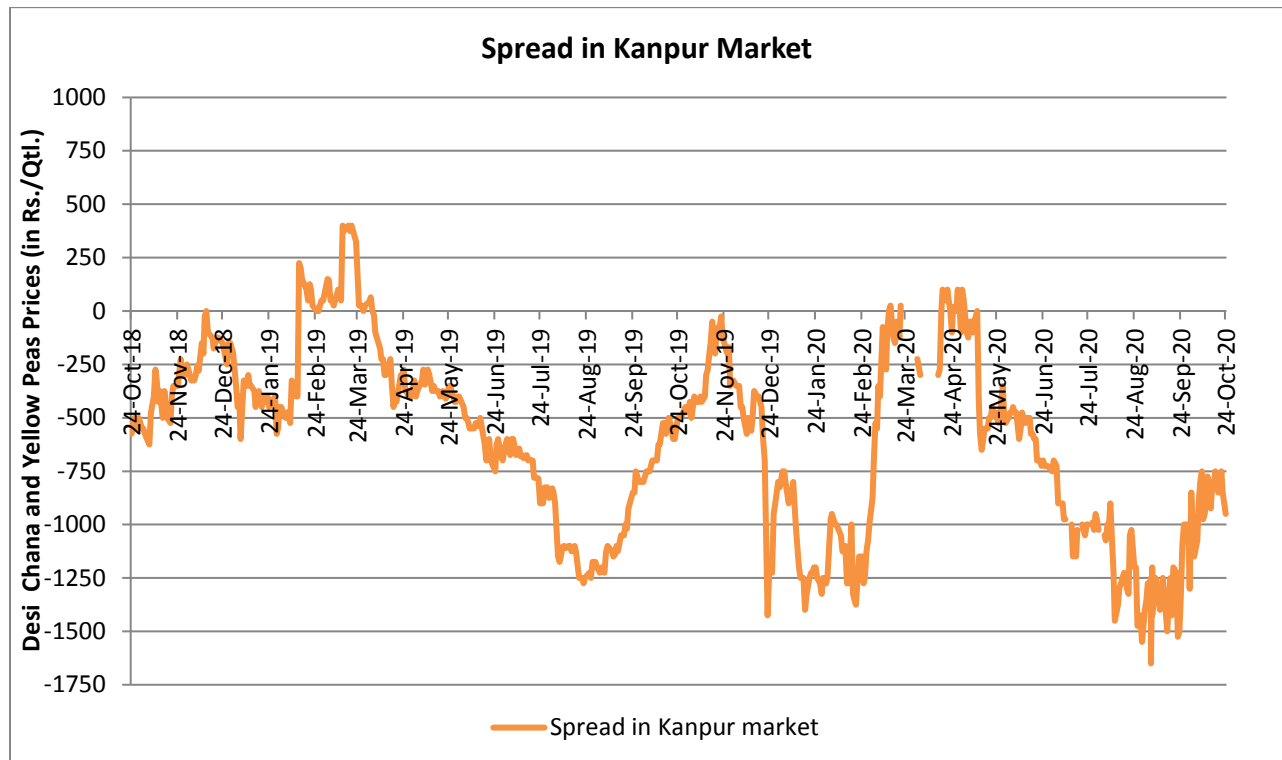

At the global level, Canada is exporting higher volume of peas as current buyers like EU, Pak, Sri- Lanka and Bangladesh have increased buying, taking advantage of lower price in global market.. Bangladesh and Nepal may buy higher quantity in Oct-Nov due to lower prices in the global market and sell it in India as there is good arbitrage opportunity for them.

Current Market Dynamics & Outlook: Peas market traded up due to tight supply side in the cash market. Availability in domestic market is decreasing while stockists are unwilling to sell sensing tight supply side. Kanpur market traded up by Rs100 to Rs 6400-6550 per qtl. Any major spike is unlikely now. Tight supply side is expected unless peas enters in India through Bangladesh and Nepal. Overall, all India average price was up by 6.50% to Rs 6500 per qtl. In Mumbai market, there was no quote for yellow peas as stock has been exhausted. Canadian yellow pea in Kolkata is being traded at Rs 7900-8000. No trade has been reported at this price this week.

Spread With Chana:

Spread between Chana and Peas, at Kanpur market remained in negative zone. Gap has increased slightly from Rs 750 to Rs 1000 due to increased chana price. Spread is expected to remain in the negative zone in Oct too on relative movement in Chana prices. Overall outlook seems steady to slightly firm this week too.

MarketOutlook: Steady to slightly weak tone may prevail.

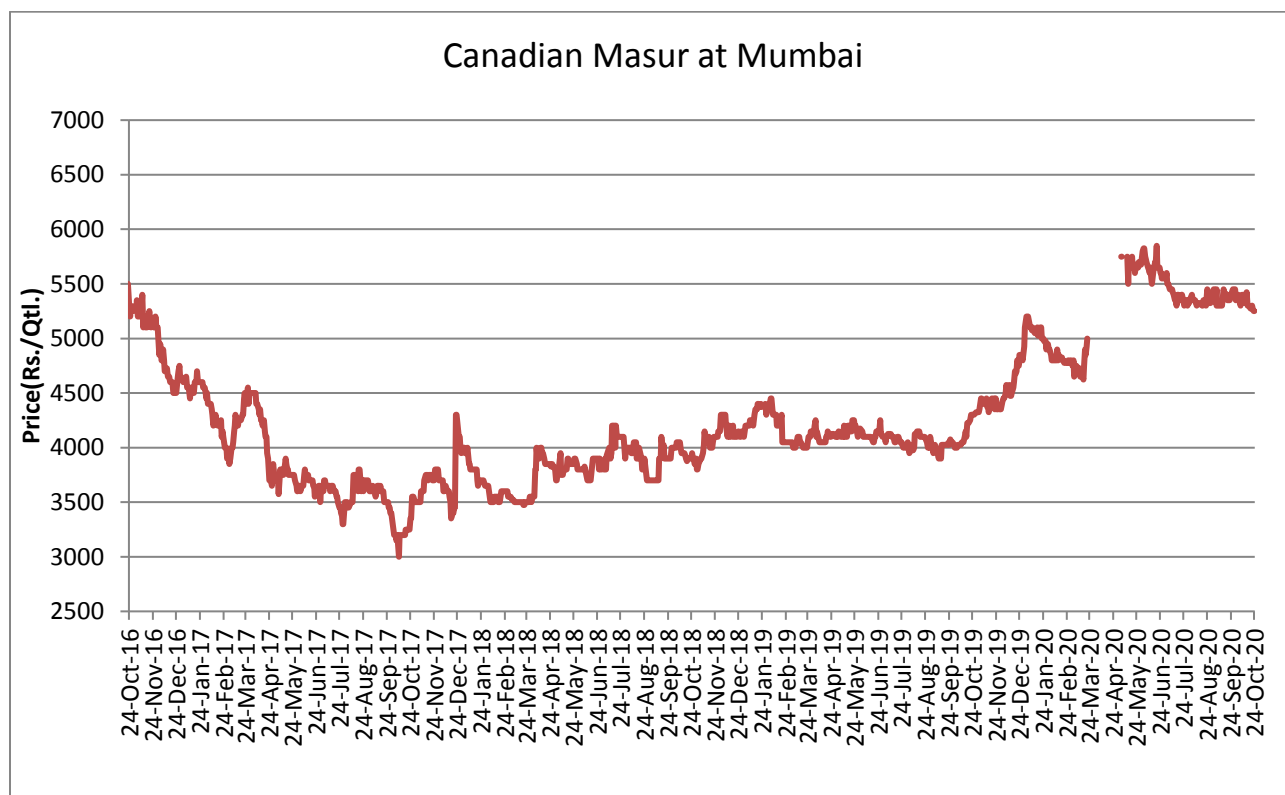

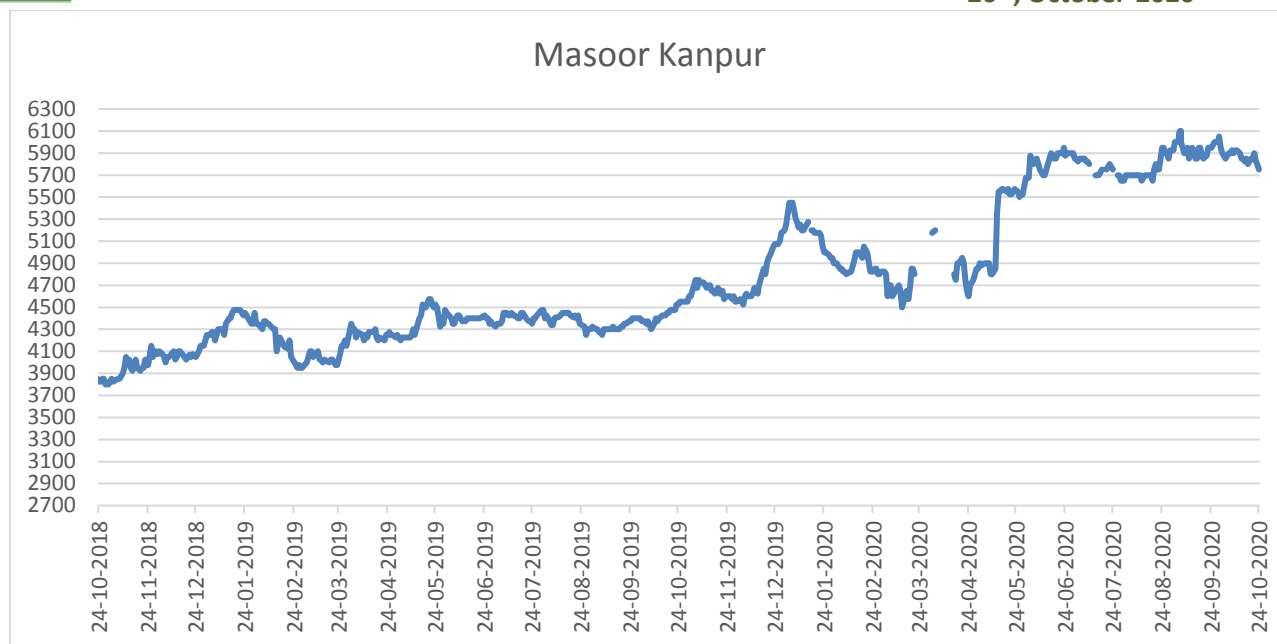

Lentils (Masoor):
Market Recap:

Lentils cash market continued to move sideways with changing import duty structures during last four months. The government had reduced import duty on lentils in the beginning of June (2nd June-2020) from 30 to 10 percent for three months till August 31. The import duty again reverted to its previous level of 30 percent on September 1. Sensing a short supply and higher prevailing prices, import duty was reduced again to 10% and it would be effective till 31st Oct-2020. Lower duty would increase import flow till Oct-2020 and keep prices under check during lean and sowing season. Agriwatch expects range bound movement in Oct under prevailing market fundamentals. Masur was quoted at Rs 5450-5500 in Kolkata while in Mumbai it was traded at 5350-5400. Price of Australian containers was quoted at Rs 5400.

Price of Masur in Australia and Canada may increase again as demand from Asian countries is expected to increase. Apart from this lentils production in Australia may decrease by 7%. It may push up price. If demand increases in India, Importers can strike bulk deals at reduced duty again. Supply side is at comfortable level right now. Sowing is about to start in India.

Current Scenario:

Stock at ports has started decreasing now as offtake increased from various parts of the country. At Mumbai ports importers are selling masur at Rs 5450-5500. Nafed may start releasing stock to keep price under check. It has around 21,000 MT old stock while new stock is only 4500Mt. Any spike in masur market is unlikely. Demand is weak, so price may trade in limited range this week too.

Market Outlook: Prices may trade range bound due to higher supply prospects from imported stock in the near to medium term. Sluggish demand from mills and commencement of offloading by stockists remains unsupportive to cash market right now. Overall tone in masur market remains weak in Oct too.

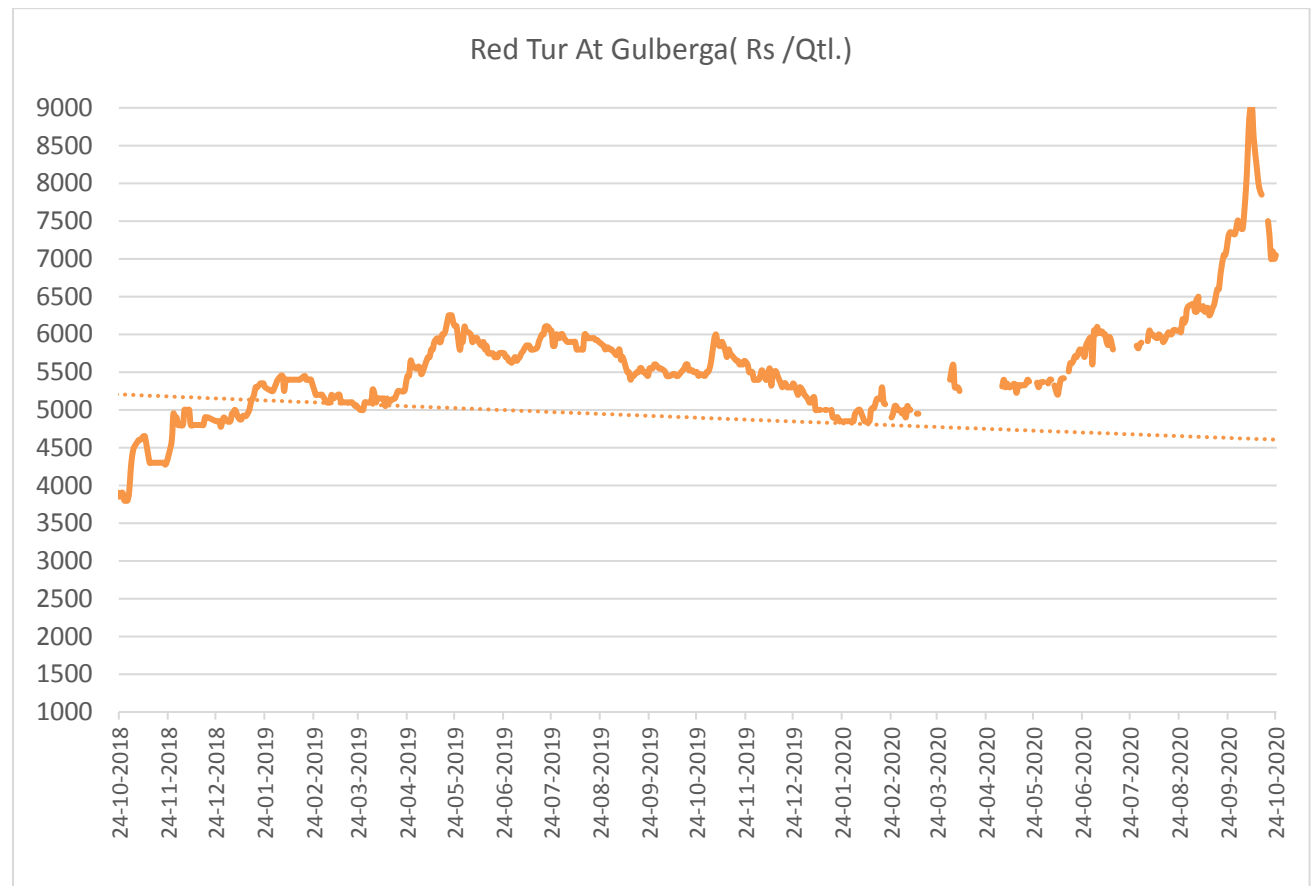

Pigeon Pea (Tur/Toor):

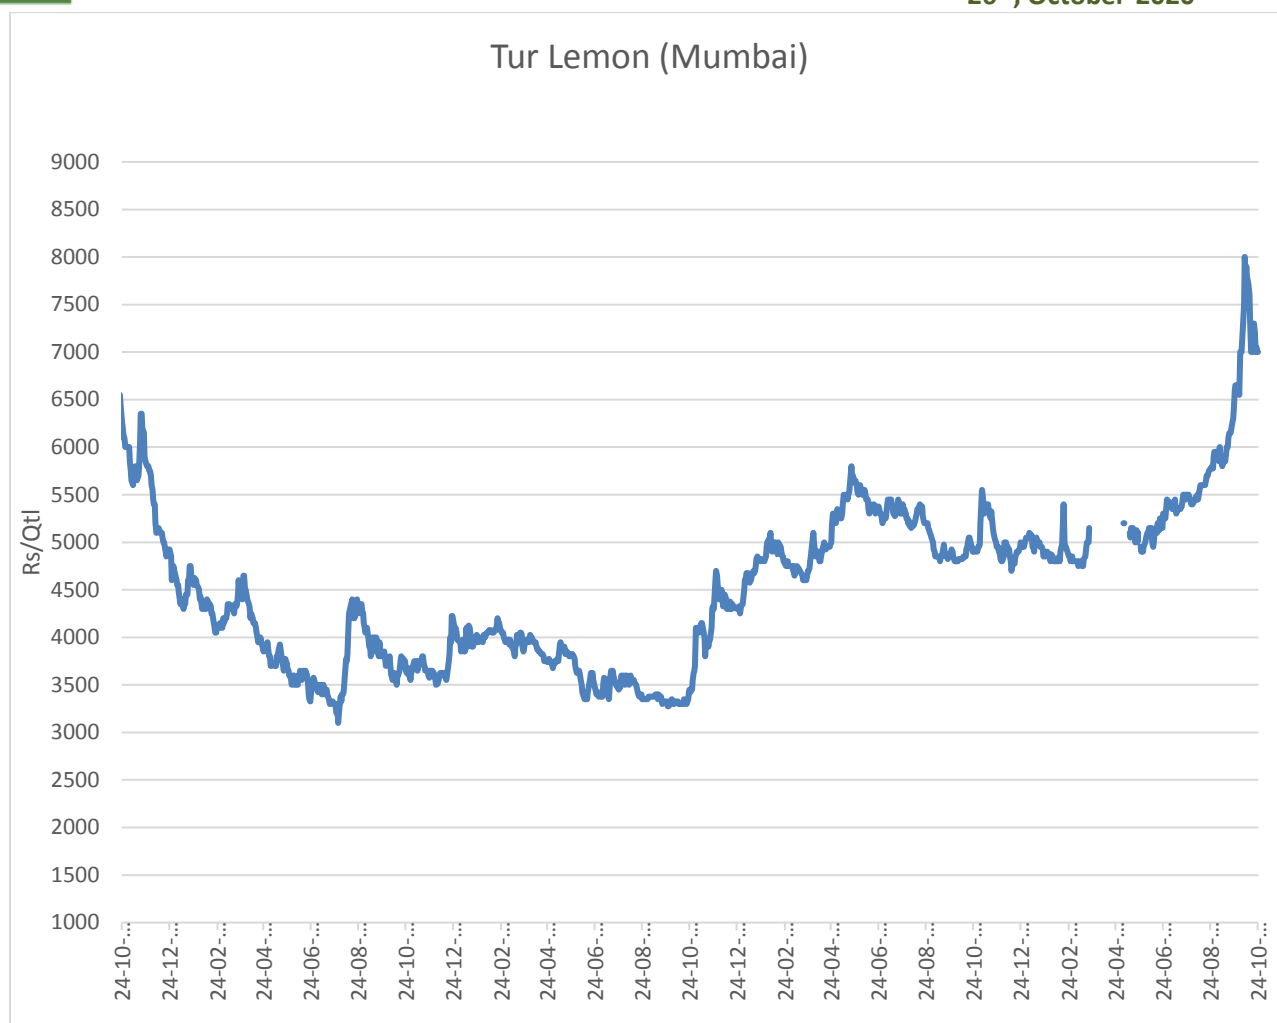

Market Recap:

Green signal to 4 lakh Mt tur import this week with time limit 31st Dec-2020 had a cooling impact on cash tur market. Buyers restricted buying and prices of lemon tur in Mumbai decreased by Rs 100 to Rs 7000-7100 per qtl. It may decrease more if stockists decide to offload stock now. New crop is only two months away and crop condition is good so far. Besides, Nafed has around 3.5 tur stock in its godowns. Agriwatch expects 3 to 3.5 lakh Mt import till 15th Nov-2020. If it happens so, prices of tur would continue to decrease and at arrival season it may come near MSP (Rs 6000). Supply side would increase in physical market now. Heavy rains in Karnataka and MH may impact standing crop. If rains continue, it may affect tur yield in both states.

Current Market Dynamics & Outlook:

Recent rains in Karnataka and MH have affected standing tur crop too and experts fear that yield may decrease to a certain extent. It may support market once again. Even arrival may be delayed by 15 days due to delayed sowing. Stake holders should start releasing stock as soon as market improves. Higher import quantity is expected in Nov. The production share of tur in total kharif pulses production is 34.8 % and farmers have covered around 109.5 % (48.49 lakh ha) area of normal (45.53 lakh ha). Planting is almost over and area may end at 48.50 lakh ha.

In the 4th week of Oct-2020, average price in Gulberga market was down by Rs 600 to Rs 7050-7150 due to higher import expectation and new arrival in Dec. It may affect increasing prices in coming weeks. Apart from this likely selling by Nafed may cap upward momentum to some extent in coming weeks. Import volumes (G to G basis) are likely to increase in Oct-Nov due to issuance of import licenses for private millers. Tur price is likely to trade steady to slightly weak this week.

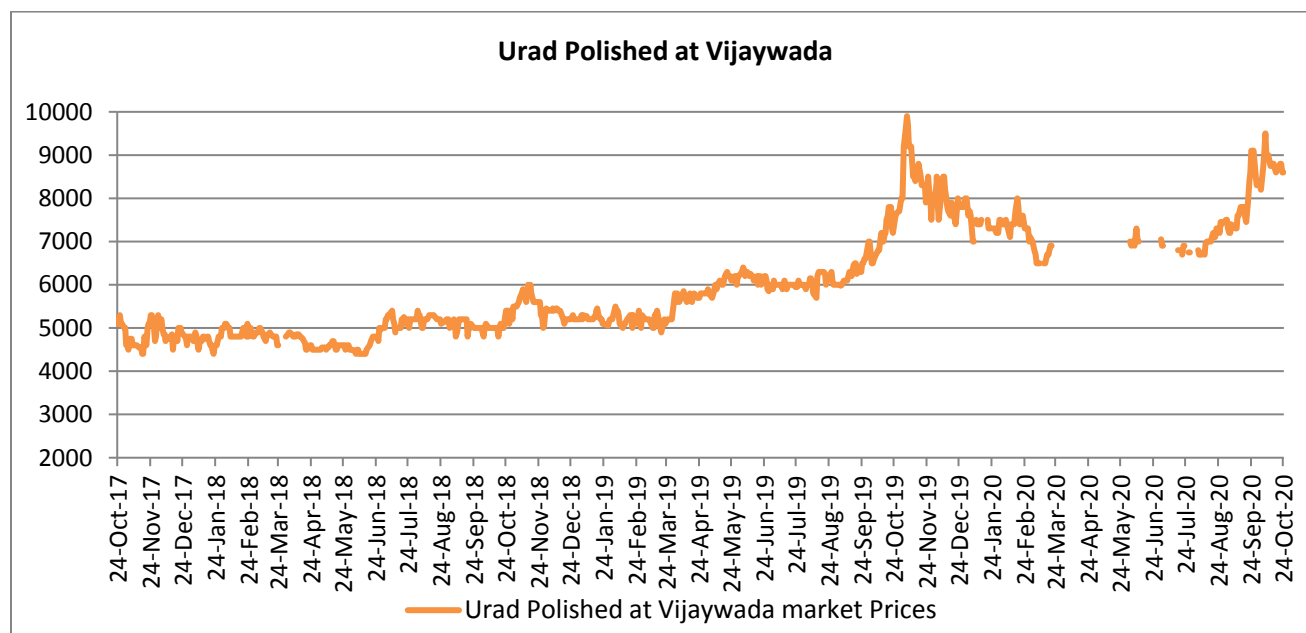

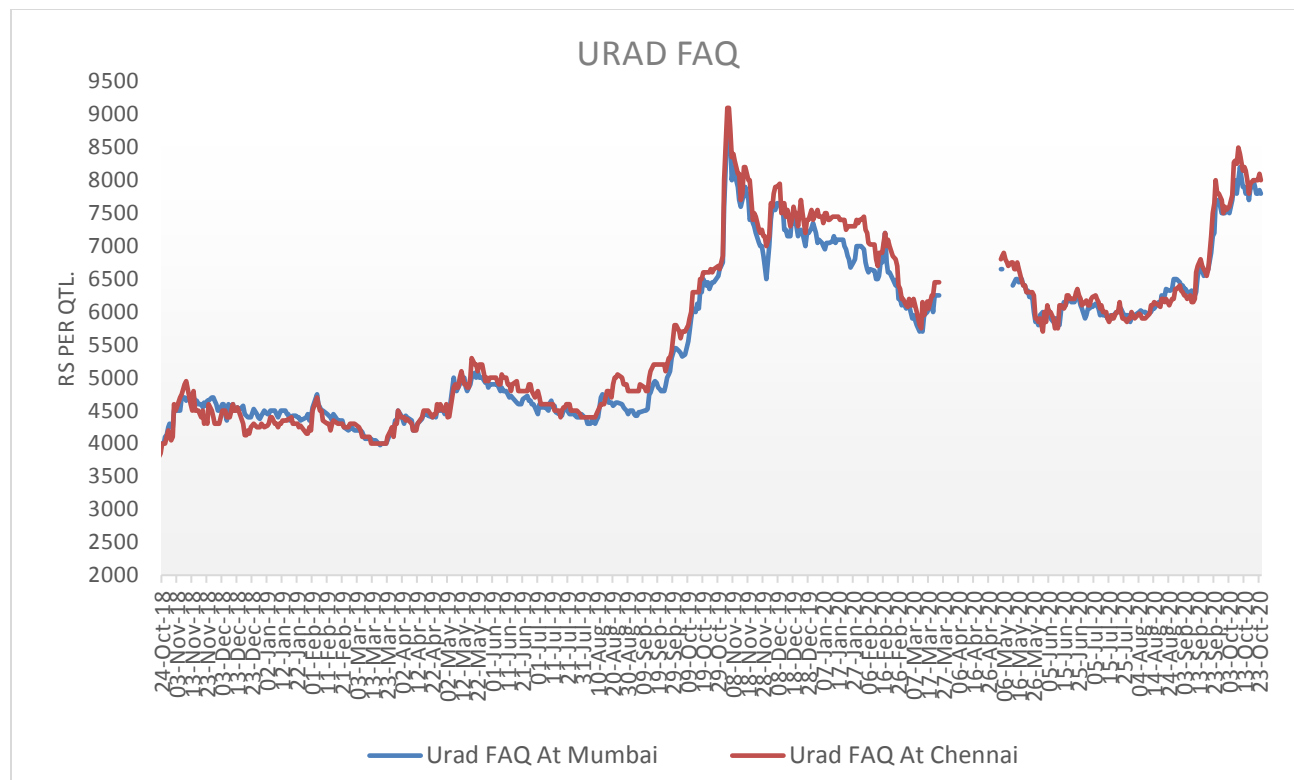

Black Matpe (Urad):

Slight downward correction was seen in urad market during week under review as govt has allowed 1.5 lakh Mt urad import. As kharif arrivals are low and private buyers are active, any major dip is unlikely in urad cash market right now. Farmers too are restricting release of the crop sensing strong inner tone..Apart from it, the news of some crop loss too helped market to push up by Rs 100-200. DGFT has not allowed release of old stocks lying at ports as these stocks have been imported without proper documents or presenting wrong information about mills/ capacity. Quotes for FAQ urad moved up by \$75 to \$975 per MT while SQ moved up by \$60 to \$1150 per MT basis Indian port. Prices in domestic market moved up to Rs 7700-7800- for FAQ and Rs 8600-8800 for SQ at week end. If demand improves and new arrival is delayed, prices would increase against normal expectation. Arrival pressure from kharif crop is expected now Demand at higher level may decrease.

Current Market Dynamics & Outlook:

The production share of urad in total kharif pulses production is 27.95 % and farmers have covered around 110 % (38.96 lakh ha) area of normal so far. Normal area of urad is 35.53 lakh ha. Planting is almost over now. Area in M.P., MH & Kar has increased while it is down in Raj, U.P. & Telangana. However, overall area is higher so far. Due to heavy rains around 10000-15000 ha area is said to be inundated. However it would not affect the final size of the crop. Overall, planted area is higher by 44,000 ha from last year.

Market Outlook: Urad Prices are likely to show steady to slightly weak momentum.

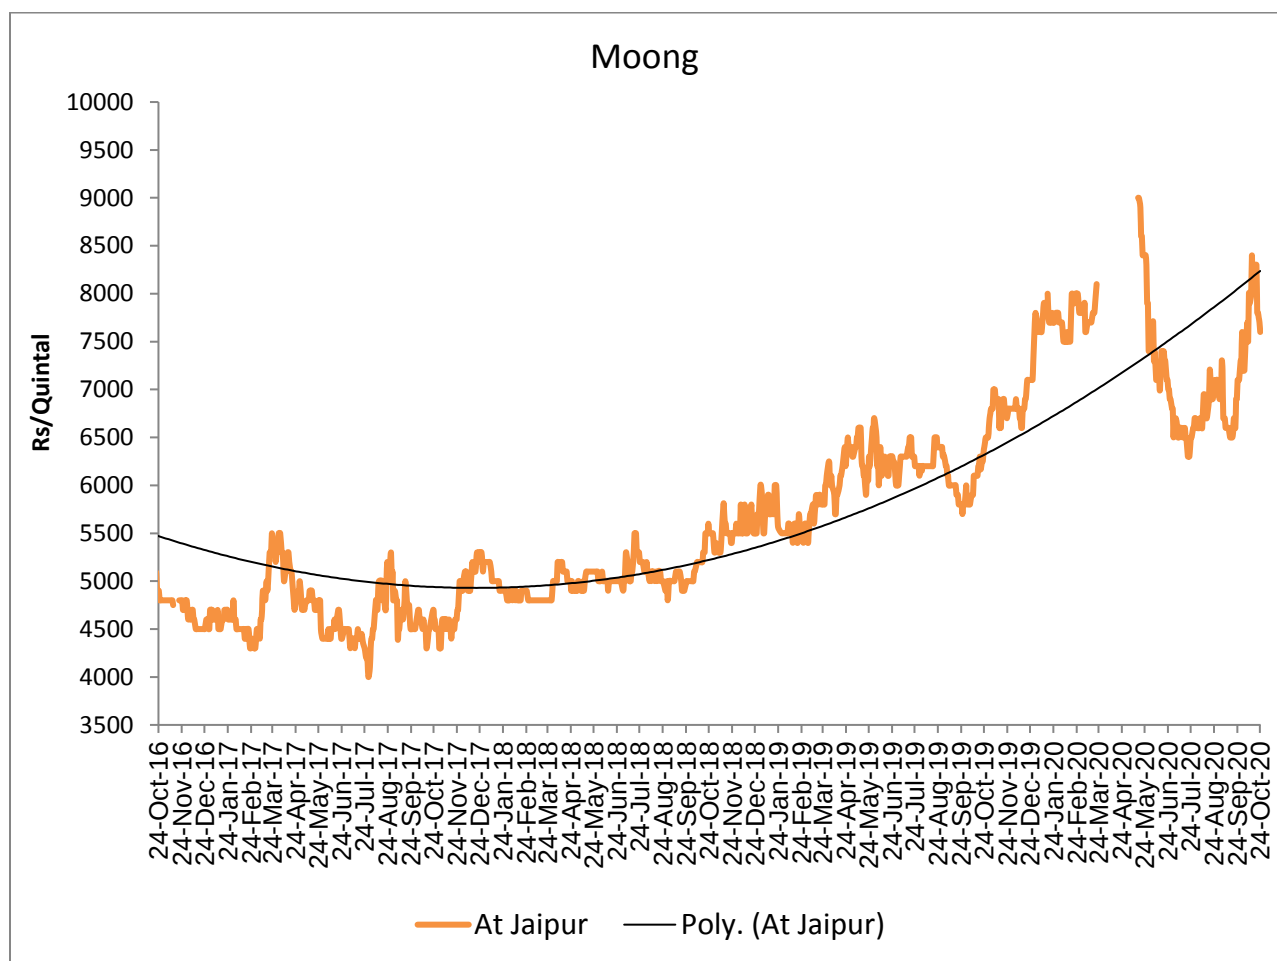

Green Gram (Moong):

Market Recap:

Kharif moong harvesting has entered in last phase. Arrival is lower than normal expectation as prices continue to rule above MSP in Sep. Despite 15 % higher area coverage, yield realization was much lower than expectation due to unseasonal rains at maturity stages in Aug and Sep-2020. As demand is weak, prices are expected to decrease from current level. Farmers may increase rabi area this year, as they have received good price through price support scheme in M.P., MH, Karnataka, A.P. & Telangana. Under prevailing condition inner tone seems weak in cash moong market. Nafed and FCI are selling moong now to keep supply side at ease and cool down price. Moong Chamki in Jaipur market is being traded at Rs 8200. Prices are now expected to decrease as stockists may prefer to release stock in parts for taking advantage of higher price.

Rains and flood have affected not only area but yield too in major growing states. Heavy rains/flooding in Sep have washed out around 50,000 ha area in total. So planted area decreased from 35.99 to 35.52 lakh ha. Major area loss was recorded in Orisha (4%), M.P. & Guj 3% each, Chh and Kar 2 % each while Raj and others 1% each. At yield loss front, Chh, MH, Kar, AP and Odisha recorded 2% loss each while others 1% from 2018-19 yield.

Market Outlook: Moong prices are likely to trade steady to slightly weak in the near term.
