Commodity-wise Domestic, International Prices and Arrivals at Different Centers

Weekly Highlights-Domestic Market:

- **With favorable weather conditions, rabi pulses sowing is running smoothly. Farmers have planted 82.62 lakh ha area so far against normal of 144.89 lakh ha. Out of this, farmers have covered 57.44 lakh ha area under gram against normal of 92.77 lakh ha. , 9.76 lakh ha under lentils(normal 14.24 lakh ha),6.78 lakh ha under field pea (normal 8.78 lakh ha),2.14 lakh ha under urad(normal 8.93 lakh ha),0.43 lakh ha under moong(normal 9.86 lakh ha),1.95 lakh ha under other pulses(normal 4.14 lakh ha).Gram area is running ahead by 30 % from last year so far, field pea up by 28%, lentils up by 30 %,other pulses up by 34%. However, moong coverage is lower by 30.65 % so far. Farmers may increase sowing activities in coming weeks under moong and urad.**
- **Nafed has reserved 8 lakh MT chana as buffer stock. Out of total procurement of around 21 lakh MT, it has sold 6 lakhMT chana so far. So around 7 lakh MT chana is available for sale during ongoing season. New crop is expected after mid –Feb. So improvement in chana is expected in coming weeks. Sowing is running at a smooth pace despite a late start.It may affect yield negatively. Arrivals in major markets is likely to be poor this week but with improvement in prices in cash markets, arrivals too may increase.This year area under chana may improve and may cross 115 lakh ha.as prices are ruling higher than MSP. In Delhi market chana is being traded at Rs 5250-5350. It may move up to Rs 5350-4500 in coming weeks. India imported around 75500MT kabuli and desi chana in Oct-2020.**
- **Supply of imported tur from Mozambique and Myanmar is likely to increase in coming weeks. Market expects over 50,000 MT import in Nov while new crop is hardly one month away now. Nafed has started accepting bids at Rs 6300-6350 in Mh and Kar and offloading from central pool through Nafed is likely to continue. So fundamentals for tur remains weak now and it may trade lower by Rs 200 from current level. Stockists too have started offloading tur stocks. In Gulberga Tur is being traded at Rs 6300-6400. Demand from millers too has decreased after Diwali. So pressure may build up on price. As import time line has been extended till 31st Dec, import flow would continue to ease supply. Around 1.5 to 2 lakh MT import is expected in Nov and Dec-2020.**
- **Urad import is not taking place due to disparity and poor availability in Myanmar. Millers are unwilling to import at higher prices despite tight supply side and issuances of licenses.Shortage of dhoo daal,crop loss in Kar Mh during Oct and decreasing arrivals in markets too remains supportive at current level to some extent. If Nafed decides to sell in bulk volume, urad may come down by Rs 200-300 from current level, otherwise it will move in limited range till the new rabi crop hits the market. Quotes in Myanmar too decreased this week due to weak demand. FAQ and SQ are being quoted at \$900 and \$1035 per MT basis Indian ports. It is down by \$40 from last week. FAQ is being offered at Rs7200-7350 in Mumbai while SQ at Rs 8400-8450. Demand for dal has decreased after Diwali.**
- **Short supply, negligible import flow and restricted release by trades, farmers and Nafed will remain supportive for moong market in the short term. Loss in Kharif season too has helped market to sustain above MSP in various markets. However, demand got stuck at higher level. Now likely import flow after issuances of licenses, higher rabi area and weak ongoing demand may push price down slightly in coming weeks. Rabi area is expected to increase this year. Farmers have covered only 0.43 lakh ha so far against normal of 9.86 lakh ha. Pressure from rabi crop may be felt only in Feb-March-2021.**
- **Lentils cash market traded lower and pressure is likely to continue to masur market in coming weeks. Extended timeline for import till 31st Dec-2020 now would ease supply side as import flow at reduced duty would continue and volume may increase to 9 lakh MT during ongoing MY. Masur is being traded at Rs 5200-**

5300 in Mumbai market while it is quoted at Rs 5400 in Kanpur market. Masur area may increase this year by 5 %. Farmers have covered 3.70 lakh ha against normal of 14.25 lakh ha so far. Sideways movement may be seen in masur cash market. India imported 1.07lakh MT masur in Oct-2020.

- **Peas import remains halted as the DGFT has not allowed an additional import beyond 1.5 lakh Mt for the ongoing season.** Stock at ports is low while arrival too in domestic markets are decreasing. New crop is still 3-4 months away, so steady tone may prevail. Demand is weak at higher level. Consumers preferred to shift to other pulses

Global Market:

- **Global field peas market traded slightly up on the back of higher buying by exporters for meeting sales commitments.** Whole green and yellow peas prices are increasing in Canada and USA too as they paid farmers higher prices. Maximum stock in Canada has been sold out by farmers. It leads to higher prices of peas.
- **Field pea markets traded firm last week taking clue from good opening season export movement.** As per Canadian Grain Commission, exporters in Canada loaded 630,900 metric tons (MT) of peas for bulk export in September, up from 102,400 in August and 508,900 the same month last year.
- **Dry peas production in Canada is expected to increase by 3% to 4.4 million tonne due to higher yield in 2020-21.** The major producing states like Alberta and Saskatchewan may contribute 4.1 MMT.
- **Movement of field peas from Lithuania were up sharply from the previous month in September** as per data published by Eurostat. Shipments reached 18,207 metric tons (MT) in Sep against 8,086 MT in Aug-2020. This brings total to 102,288 during the calendar year till Sep, down 34% last year. Netherlands was top buyer, receiving 7,341 MT in the month. United Kingdom was the second most important buyer buying 5,099 MT, followed by Norway at 2,750 MT.
- **Global chickpeas market traded slightly up taking cue from a tight supply side and demand situation on physical markets.** However, supply side seems ample in the longer term as higher production is expected in Turkey and India this year. The biggest change can be seen in desi chickpea output. Harvesting is on in Australia. The last production estimates were released in September, at which time the crop was pegged at a record 1.18 million metric tons (MT) of desi and 58,500 MT of kabuli chickpeas.
- **Chickpeas harvesting in US is over now. Weather conditions remained dry and favorable** throughout the harvesting season. in most growing areas, suggesting this year's grades in the United States will be at the upper end of their historic range of average yield. By this time last year, the harvest was only 78% complete, while on average another 2% of the crop was left in fields. All field peas and lentils are now in the bin.
- **For 2020-21, the area seeded under chickpeas in Canada fell by 23.89% from 159 thousand ha in 2019-20 to 121 thousand ha** due to the lower farm gate prices received in the previous year. Saskatchewan accounts for most of the chickpea area, with the remainder in Alberta. Production is forecast by AAFC at 200 Kt, down 20.63% from the previous year.
- **Lentils production in Canada is expected to increase by 29% to 3.1 MMT in 2020-21** due to higher yield and coverage area. Out of total large green lentils may contribute 0.7 MMT while the share of red lentils may be 2.1 MMT, followed by other types at 0.3 MMT.
- **Lentils production in Australia is expected to decrease by 6.89% from 5.34 to 4.97 lakh tons in 2020-21.** It is due to lower coverage (6.11%) of area from last year. Victoria and South Australia are major producing regions that contribute 92% of total production.

Weekly Outlook: -Pulses are likely to trade mixed in coming weeks-2020.

Pulses-Wise Scenario:

Chana

Current Scenario:

Chana cash market is likely to recover slightly as stocks with NAFED has decreased to 75 % now. Free distribution of chana during last five months under PMGKY has eased burden of chana with NAFED to a manageable extent. Nafed continued to accept bids near Rs5100-5300 and may restrict selling now to support domestic market. New crop is expected to hit market only in mid- February-2021. So, Agriwatch expects slight recovery of Rs 150-200 from current level. At this level stockists may release stocks sensing that demand may decrease by the end of Nov. Sowing is on and area is expected to increase by 5 to 7 % this year to over 115 lakh ha. Weather condition is good so far and a good production prospects seems on the sight now. New crop is 3-4 months away and there is no import parity due to high duty (60%). At Rs 5100-5250, millers can buy it again. Overall inner tone seems slightly firm for Dec. Nafed selling strategy would be main price driving force in Dec now.

All India average price of chana increased by 0.25 % to 5174 against Rs 5161 previous week. However, Australian chana too decreased by 0.75 % to Rs 5235 per qtl in Mumbai market. As there is weak demand for dal, prices of chana is expected to trade range bound. Following graph illustrates chana price movement in different markets:

Market Outlook: Steady to slightly weak movement is expected in cash chana market this week. Nafed's current selling strategy would continue to determine price trend in coming weeks. As Nafed is accepting slightly lower bids, prices are expected to move sideways at current level. Besides, higher area coverage prospects may pressurize chana price to a certain extent. Indian importers have imported around 3.25 lakh MT chana during April to Oct 2020. Demand for besan mills and hotel industry has started increasing now.

However, distribution of 1 k.g. dal per family/ per ration card would continue to affect direct demand from cash market till Nov and it may be extended till March -2021. It would cap any unexpected spike in chana cash market. Overall outlook remains steady to slightly firm.

Chana Weekly Technical Analysis:

Technical Commentary:

- Increasing price & OI hint market will trade firm in the short term.
- RSI is steady in neutral region, hints caution to bulls.
- Prices closed above 9 and 18 days EMAs
- Candlestick chart hints firm momentum in the market.

Strategy: Buy on Dip

Supports & Resistances			S1	S2	PCP	R1	R2

- Do not carry forward stock for next week.

Peas (Matar):
Market Recap:

With negligible availability of field peas at ports, prices of yellow and green peas increased in the 3rd week of Nov as festive demand helped market to push up. Stockists who have stocks of peas, are now willing to sell it sensing weak demand in Dec and new arrival from Jan-2121 in domestic markets. Import is not taking place and the govt. is not in favor of allowing import above 1.5 lakh MT. As prices are lower in global market, Bangladesh and Nepal are buying more matar hoping for an arbitrage opportunity in selling to India. Demand is weak as other pulses are available comparatively at cheaper price. Matar in Kanpur market is being traded at Rs 7000-7100 per qtl. At port it is being quoted at Rs 6500-6600.

Despite improved demand for peas and daal, prices are expected to trade steady to slightly weak. Govt. is not in favor of additional import despite higher prevailing price in domestic market. As prices are higher, area may increase this year by 5 to 10 percent. Sowing starts from mid Oct. As of now farmers have covered 6.78 lakh ha against season's normal of 8.78 lakh ha. It is up by 27 % till date. Following chart shows price movement in various markets:

Current Market Dynamics & Outlook: Peas market traded up due to improved demand and low availability in the market. Stockists are now willing to sell at higher level. Kanpur market traded up by Rs 700 to Rs 7100- per qtl. Any major spike from here is unlikely due to stockists 's selling..Tight supply side may continue unless peas enters in India through Bangladesh and Nepal. Overall, all India average price was up by 10.50% to Rs 7100 per qtl. In Mumbai market, there was no quote for yellow peas as stock has been exhausted. Canadian yellow pea in Kolkata is being traded at Rs 6500-6600.No trade has been reported at this price this week.

Spread With Chana:

Spread between Chana and Peas, at Kanpur market remained in negative zone. Gap has increased considerably from Rs 1150 to Rs 1850 due to increased peas price. Spread is expected to remain in the negative zone in Dec too on relative movement in Chana prices. Overall outlook seems steady to slightly firm this week too.

Market Outlook: Steady to slightly weak tone may prevail.

Lentils (Masoor):

Market Recap:

Masur market traded slightly weak during the review month, due to slashed import duty from 30 to 10 % and extended import time line from 31st Oct- to 31 Dec, 2020 now. Demand for daal is weak too. Around 3.85 lakh MT was imported in Aug, Sep and Oct-2020 at the lower duty and around 2 to 2.25 lakh MT is expected in Nov and Dec. So supply side would be at comfortable level in these months too. It would not allow market to move up despite it being a lean season. Import volume would be higher in Nov-Dec too, so prices are unlikely to move up beyond a certain level (Rs5100-5400). Stock at ports is said to be around 1.0 lakh MT. Despite the higher import, prices are not likely to decrease below Rs5000 as stockists are unwilling to sell it below 5000 even in producing centres. It may help retaining acreages. Farmers have covered 9.76 lakh ha so far. Higher MSP for masur from Rs4800 to Rs5100 for MY 2020-21 would encourage farmers to plant more this year.

At Mumbai ports importers are selling masur at Rs 5100-5500. As prices are ruling higher than MSP in domestic market, Nafed would sell its stocks until sowing gets over. Old stock with Nafed is around 21,000 MT. Supply side would be at comfortable level as import flow would continue till Dec-2020.

Current Scenario:

Stock at ports has started decreasing now as offtake increased from various parts of the country. At Mumbai ports importers are selling masur at Rs 5100-5150. Nafed may start releasing stock to keep price under check.

It has around 21,000 MT old stock while new stock is only 4500Mt. Any spike in masur market is unlikely. Demand is weak, so price may trade in limited range this week too. Higher import flow would also cap market.

Market Outlook: Prices may trade steady to weak due to higher supply prospects from imported stock in the near to medium term. Sluggish demand from mills and commencement of offloading by stockists remains unsupportive to cash market right now. Overall tone in masur market remains weak in Nov too.

Pigeon Pea (Tur/Toor):

Market Recap:

Extended time line for import till 31st Dec-2020 and likely higher import volume in Oct, Nov and Dec amid normal crop condition in major growing region would not allow tur market to move up beyond a certain level. Right now it is being traded at Rs 6300-6400 in Gulberga market and may move down to Rs 6000-6100 in coming weeks. Supply side would increase while Nafed continues to sell tur through auction accepting bids near Rs 6200-6300. New crop is hardly two months away and Nafed still has around 3.5 lakh MT tur stock. So, higher import and release by Nafed may cap tur cash market.

Old lemon tur too are being quoted at Rs 6300-6350 per qtl. Arrivals have decreased in major centers like Jalgaon, Akola and Amravati line. Local tur in Gulberga too moved down to Rs 6400-6500 and it may move down further by Rs 200 to 300 under prevailing market fundamentals. Crop condition is good so far. Indian farmers have covered 48.49 lakh ha against 45.88 lakh ha last year. As per Agriwatch estimate India may harvest 38.15 lakh Mt crop this year. Weather condition in next two months is very crucial for driving price up and down in Nov-2020.

Current Market Dynamics & Outlook:

Recent rains in Karnataka and MH have affected standing tur crop and experts fear that yield may decrease to a certain extent. However, likely higher supply through import may cap any upward momentum. Arrival from new crop may be delayed by 15 days due to delayed sowing and high moisture level in the field.. Stake holders should start releasing stock as soon as market improves. Higher import quantity is expected in Nov and Dec. The production share of tur in total kharif pulses production is 34.8 % and farmers have covered around 109.5 % (48.49lakh ha) area of normal (45.53 lakh ha). Planting is over.

In the 3rd week of Nov-2020, average price in Gulberga market was down by Rs 150 to Rs 6100-6200 due to higher import expectation and new arrival from end- Dec. It may continue to pressurize prices in coming weeks. Apart from this likely selling by Nafed may cap upward momentum to some extent in coming weeks. Import volumes (G to G basis) are likely to increase in Nov-Dec due to issuance of import licenses for private millers and extended time limit for import. Tur price is likely to trade steady to slightly weak this week too.

Black Matpe (Urad):

Slight downward correction was seen in urad market during third week under review as govt has allowed 1.5 lakh Mt urad import. As kharif arrivals are low and private buyers are active, any major dip is unlikely in urad cash market right now. Farmers too are restricting release of the crop sensing strong inner tone.. Apart from it, the news of some crop loss too helped market to push up by Rs 100-200 during Oct. DGFT has not allowed release of old stocks lying at ports as these stocks have been imported without proper documents or presenting wrong information about mills/ capacity. Quotes for FAQ urad stay down at \$890 per MT while SQ moved down by \$50 to \$1015 per MT basis Indian port. Prices in domestic market moved down to Rs 7300-7350- for FAQ and Rs 8100-8200 for SQ at week end. If demand improves and new arrival is delayed, prices would increase against normal expectation. Arrival pressure from kharif crop is decreasing now. Demand at higher level may decrease. Farmers are engaged in preparing fields for rabi sowing. Sowing has already started in south Indian states.

Stock position of urad in Myanmar is said to be around 1.50 to 2 lakh MT. New crop is expected to hit market in mid-March-2021. By then Myanmar may export around 1.25 lakh MT under quota system before new crop hits the market and would consume 50,000 MT for domestic consumption. As India has allowed only 1.5 lakh Mt import, pressure on price in Myanmar might be seen. Under prevailing market fundamental market may trade steady to slightly weak in Nov.

Current Market Dynamics & Outlook:

The production share of urad in total kharif pulses production is 27.95 % and farmers have covered around 110 % (38.96 lakh ha) area of normal so far. Normal area of urad is 35.53 lakh ha. Planting is almost over now. Area in M.P.,MH & Kar has increased while it is down in Raj,U.P. & Telangana. However, overall area is higher so far. Due to heavy rains around 10000-15000 ha area is said to be inundated. However it would not affect the final size of the crop. Overall, planted area is higher by 44,000 ha from last year.

Market Outlook: Urad Prices are likely to show steady to slightly weak momentum.

Green Gram (Moong):

Market Recap:

Downward trend in moong cash market continued as other pulses like chana, tur, urad and peas traded down too in the third week of Nov. Procurement of moong has started in states like Karnataka, Maharashtra and Rajasthan. As prices are higher in some regions, procurement pace remains slow so far. As rains have affected quality of moong, so price range is wider this year. It is being traded at Rs 5800-7600, depending on quality of the crop. If demand improves, slight recovery might be seen for a shorter time. There is a parity for import as moong price is ruling higher than Myanmar right now. Stockists are preferring to sell now as import possibility has increased now. So, overall trend seems weak in the medium term despite minor loss in Karnataka (3500 ha) and Telangana (750 ha) by flooding.

Rabi sowing has already started now and farmers have planted 0.43 thousand ha so far against normal of 9.86 lakh ha. Farmers had planted 35.84 lakh ha in kharif season. Kharif arrival is on. As kharif production is lower than expected earlier, price would not decrease more from current level. Moong would continue to trade in the range of Rs 5800 to 7500 in Nov against MSP of Rs 7196 per qtl.

Market Outlook: Moong prices are likely to trade steady to slightly weak in the near term.

Rabi Pulses Sowing as on 20.11.2020:

Rabi Pulses Progressive Sowing As On 20.11.2020(Lakh ha)
