### **Weekly Highlights-Domestic Market:**

- **With favorable weather conditions, rabi pulses sowing is running smoothly. Farmers have planted 116.56 lakh ha area so far against normal of 144.89 lakh ha as on 04<sup>th</sup> Dec-2020. Out of this, farmers have covered 82.18 lakh ha area under gram against normal of 92.77 lakh ha. , 13.11 lakh ha under lentils(normal 14.24 lakh ha),8.22 lakh ha under field pea (normal 8.78 lakh ha),3.39 lakh ha under urad(normal 8.93 lakh ha),0.88 lakh ha under moong(normal 9.86 lakh ha),3.26 lakh ha under other pulses(normal 4.14 lakh ha).Gram area is running ahead by 16 % from last year so far, field pea up by 15%, lentils up by 8 % ,other pulses up by 26%. However, urad and moong coverage is lower by 3&1 % respectively so far. Farmers may increase sowing activities in coming weeks under moong and urad. See details on page no.13.**
- **Lentils prices continue to cool down with easing supply side from import and smooth sowing activities, supported by congenial weather condition in major producing states like Madhya Pradesh, Uttar Pradesh and Bihar. Agriwatch expects 13.50-14.00 lakh Mt production this year under normal weather condition. Major exporters like Australia and Canada are trying to sell as much as they can before duty revision from 10 to 30% from 1st Jan-2021.Pulses prices may be under pressure due to increasing rabi area and higher flow of import this year. Lentils price may decrease to Rs-4750-4800 by end Dec. New crop would hit market in Feb end. Overall tone is bearish.**
- **Steady tone was seen in urad cash market on continued demand, fear of crop loss in AP and restricted sale by private trades. Crop is in maturity stages in Kurnool and Nellore and is likely to be harvested within 10 days from now. There is a chance of weather disturbance again and if rains occur, quality of urad may be affected in these region. Stock is weak and the south Indian markets/Mills may depend on imported urad from Myanmar. Overall, sentiment seems firm at this point of time. FAQ urad is being traded at Rs 7300-7350 in Mumbai while Rs 7500-7520 in Chennai. Burma is offering FAQ urad at \$ 860 and SQ at \$965 per MT basis Indian port.**
- **Tur price reeled under pressure during review week as import flow continues from South African countries & Myanmar. Crop condition is good so far. No major loss of Tur crop has been reported from south India from recent rains and swift wind. Recent rains are said to be beneficial for the standing crops including tur in central and north India. There is good moisture level in the field and it may delay harvesting at least by 10 days. Market is expecting arrival from new crop in the second fortnight of Dec. Import volume in Nov is expected to be around 60 to 70 thousand MT, while 50,000 MT is expected in Dec. As new crop is round the corner now, any spike in tur market is unlikely. There is an increasing possibility of downward trend and market may dip below MSP by mid-Dec.**
- **Pressure continues on chana market as demand is weak and supply from Nafed is likely to continue through auction and other chennels too. Area is bound to increase by 5 to 7 % this year and weather is congenial to sowing everywhere except south Indian states. Chana in Delhi market is being traded at Rs 4950-5000.It may decrease by Rs100 more from current level. With improvement in demand prices may recover once again to a certain extent. Dec futures declined below Rs 4760-4770 against all expectations. Millers have restricted buying sensing weak tone.Import from LDC (least developed countries) continues.Inner tone remains weak.**
- **Pressure on moong market continues despite decreasing arrivals and slower pace of rabi sowing.Prices are ruling above MSP for best quality crop.Medium grade has slipped below MSP at major centres.Demand is weak and stockists are preferring to offload stock sensing weak south Indian demands.As there is a parity,**

millers in south India have struck around 25,000-30,000 MT deal for Nov and Dec. Even arrival from rabi crop is expected by Jan end. So any improvement in moong price is unlikely at this point of time. Moong in various market is being traded at Rs 6500-7000 while best quality is ruling above MSP. Overall tone is weak.

- **Peas import remains halted as the DGFT has not allowed an additional import beyond 1.5 lakh Mt for the ongoing season.** Stock at ports is low while arrival too in domestic markets has decreased to a negligible level. New crop is still one month away, so steady tone may prevail. Demand is weak at higher level. Consumers preferred to shift to other pulses as prices are higher.

#### **Global Market:**

- **For 2020-21, chickpeas production in Canada is likely to decrease by 5 % from last year to 239 Kt** as area seeded was 24% lower from 2019-20. Production of desi types is expected to be higher while Kabuli type would decrease slightly. Despite lower production size total supply would increase from 439 to 539Kt this year. Export may stay steady at 105Kt while average price for the year may be \$560 per MT.
- **Lentils production in Canada is expected to increase by 29 % to 3.06 MMT in 2020-21** due to higher yield and coverage area. Out of total production of red lentils would increase to 2.1Mt while large green lentils production may decrease to 0.7 MMT, followed by other types at 0.3 MMT. Export may increase slightly from 2861 to 2900 Kt. Average price for the year may rule at \$625 per MT.
- **Dry peas production in Canada is expected to increase by 2% to 4.36 million tonne due to higher yield in 2020-21.** The major producing states like Alberta and Saskatchewan may contribute 4.1 MMT. Out of total production yellow peas would contribute 3.5 MMT. Average price may rule near \$295 per MT.
- **Movement of field peas for Lithuania were up sharply from the previous month in September** as per data published by Eurostat. Shipment reached 18,207 metric tons (MT) in Sep against 8,086 MT in Aug-2020. This brings total to 102,288 during the calendar year till Sep, down 34% last year. Netherlands was top buyer, receiving 7,341 MT in the month. United Kingdom was the second most important buyer buying 5,099 MT, followed by Norway at 2,750 MT.
- **Global Chickpeas market traded almost flat last week. However desi chickpeas traded slightly weak** due to higher production in Australia. Harvesting activities are on in parts of Australia. Australian exporters are hoping that India may reduce import duties on chickpeas in an effort to reduce food prices to urban consumers. Export in Sep was recorded up at 27,310 MT, up from 19,812 MT Aug-2020. This boosted shipments so far during the marketing year to 310,730, down 4% last year. Bangladesh brought 11,243 MT and Pakistan taking 5,971 MT, followed by United Arab Emirates at 3,592 MT.
- **Global field peas market traded slightly up on the back of higher buying by exporters** for meeting sales commitments. Whole green and yellow peas prices are increasing in Canada and USA too as they paid farmers higher prices. Maximum stock in Canada has been sold out by farmers. It leads to higher prices of peas.
- **Chickpeas harvesting in US is over now. Weather conditions remained dry and favorable** throughout the harvesting season. In most growing areas, suggesting this year's grades in the United States will be at the upper end of their historic range of average yield. By this time last year, the harvest was only 78% complete, while on average another 2% of the crop was left in fields. All field peas and lentils are now in the bin.
- **Lentils production in Australia is expected to decrease by 6.89% from 5.34 to 4.97 lakh tons in 2020-21.** It is due to lower coverage (6.11%) of area from last year. Victoria and South Australia are major producing regions that contribute 92% of total production.

**Weekly Outlook:** -Pulses are likely to trade weak in coming weeks-2020.

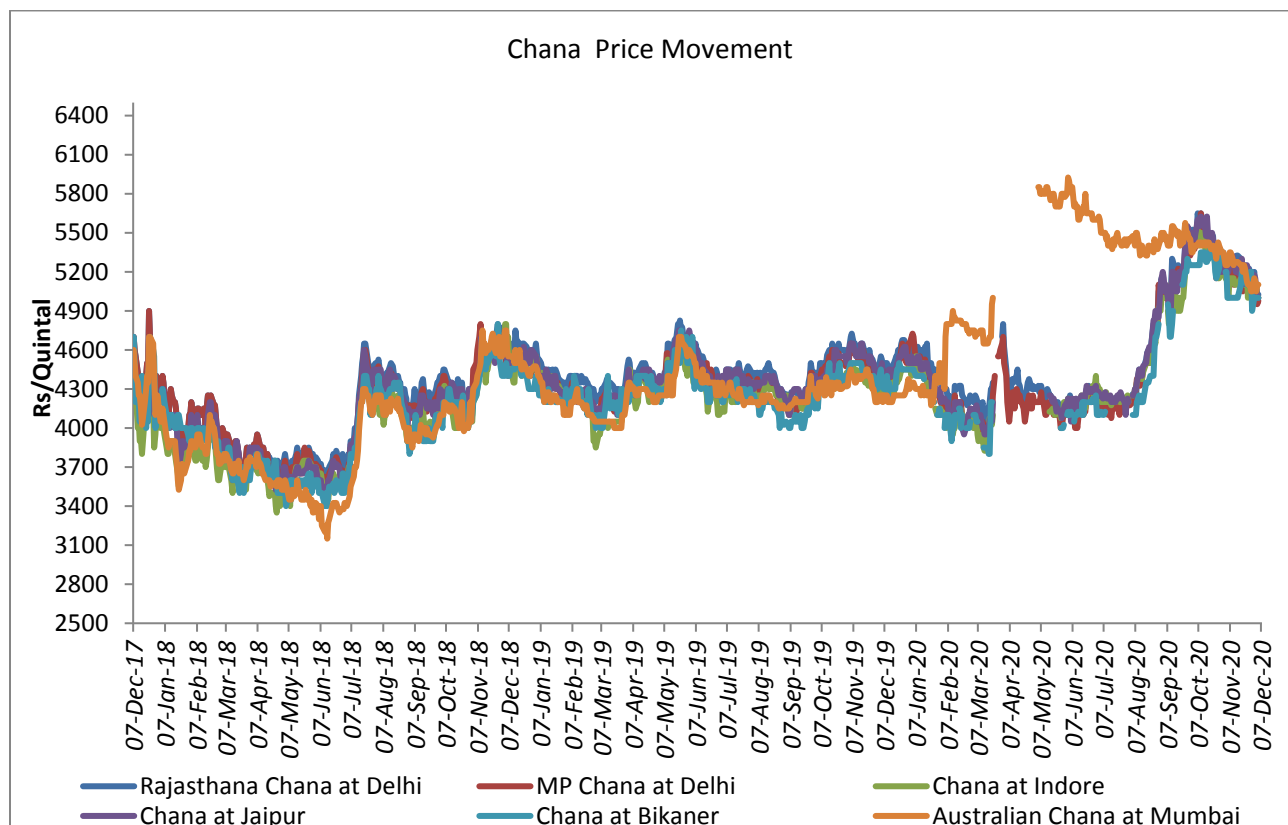

**Pulses-Wise Scenario:**

**Chana**

**Current Scenario:**

Pressure on cash chana market continued with easing supply side and weak demand after Diwali. Area is up by 16 % so far and may cross 115 lakh ha this year against 111 lakh ha last year. weather is favorable barring some parts of south India. Apart from it Nafed has decided to sell chana in all states without having any reserve price for chana. As prices have decreased below MSP, Nafed may restrict selling for some time to support market. New crop is expected to hit market only in mid- February-2021. So, Agriwatch expects steady to slightly weak tone this week too. Sensing weak tone stockists too may start releasing stocks in Dec and Jan. Sowing is on and weather condition is good so far and a good production prospects seems on the sight now. There is no import parity due to high duty (60%). However, import continues from LDC at zero duty. At Rs 4700-4850, millers can buy it again. Overall inner tone seems slightly weak right now. Nafed selling strategy would be main price driving force in Dec now.

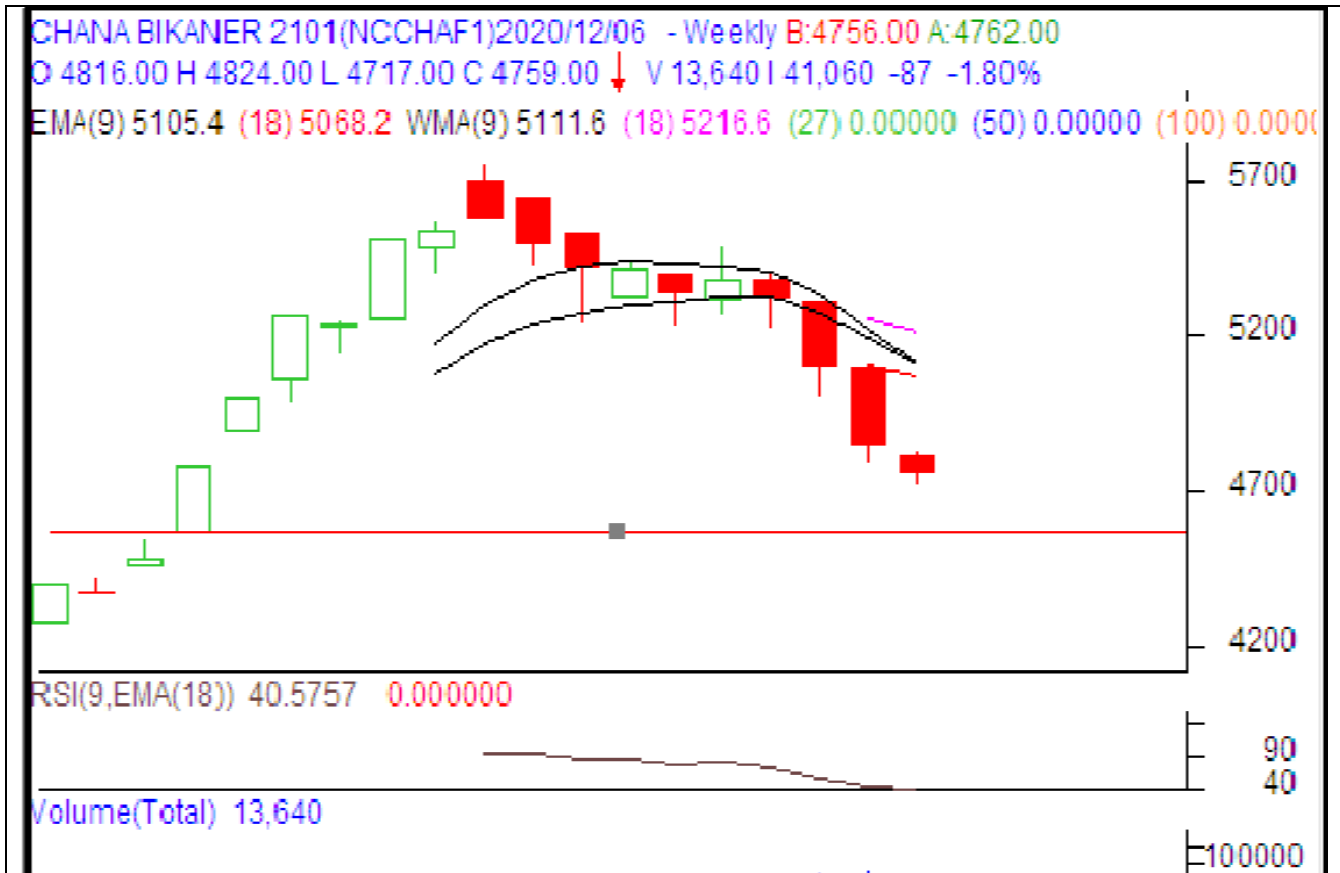

All India average price of chana decreased by 1.63 % to 5045 against Rs 5129 previous week. Australian chana too decreased by 3.44 % to Rs 5105 per qtl in Mumbai market. As there is weak demand for dal, prices of chana is expected to trade range bound. Following graph illustrates chana price movement in different markets:

**Market Outlook:** Steady to slightly weak movement is expected in cash chana market this week too. Nafed's current selling strategy would continue to determine price trend in coming weeks. As Nafed is accepting bids without having reserve price, pressure on price may continue until demand improves. Besides, higher area coverage prospects may pressurize chana price to a certain extent. Indian importers have imported around

3.25 lakh MT chana during April to Oct 2020. Demand for besan mills and hotel industry has started increasing now. However, distribution of 1 k.g. dal per family/ per ration card has affected direct demand from cash market till Nov and its extension is due, but decision is pending. Overall outlook remains steady to slightly weak.

**Chana Weekly Technical Analysis:**

**Technical Commentary:**

- Decreasing price & OI hint weak sentiments in futures market in the short term.
- RSI is steady in neutral region, hints caution to bulls.
- Prices closed below 9 and 18 days EMAs
- Candlestick chart hints weak momentum in the market.

**Strategy: Sell On Rise**

Supports & Resistances			S1	S2	PCP	R1	R2
Chana	NCDEX	Jan	4674	4650	4759	4850	4975
Weekly Trade Call*			Call	Entry	T1	T2	SL
Chana	NCDEX	Jan	Sell Below	4780	4700	4675	4815

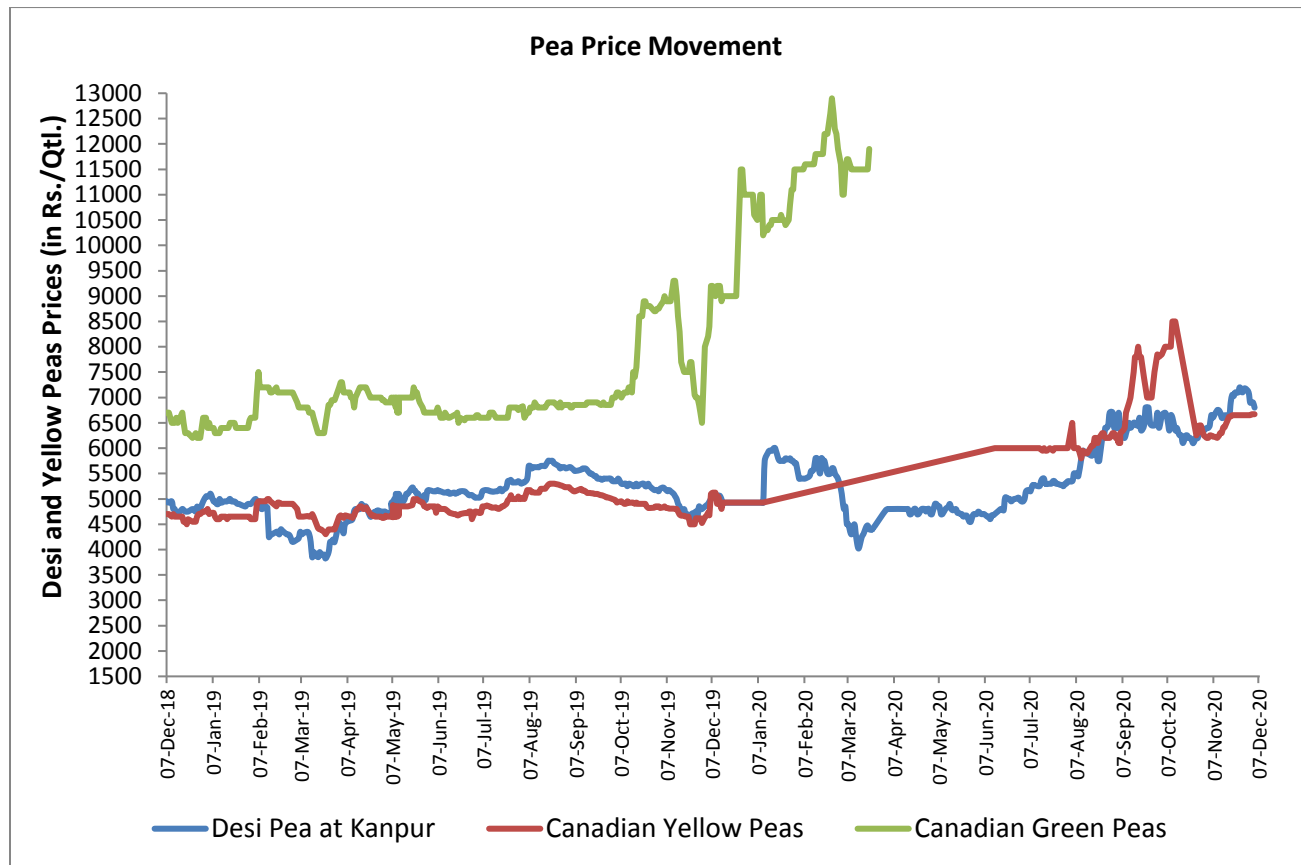

- Do not carry forward stock for next week.

**Peas (Matar):**

**Market Recap:**

Despite negligible availability of field peas at ports, prices of yellow and green peas started decreasing as new arrivals of green peas started in various markets. As arrival of green peas would increase in coming weeks, pressure on price would continue. No pressure from new crop is expected in Jan-2021, so stockists who have stocks of peas, are now selling it. Import is not taking place and the govt. is not in favor of allowing import above 1.5 lakh MT. As prices are lower in global market, Bangladesh and Nepal are buying more matar hoping for an arbitrage opportunity in selling to India. Demand is weak as other pulses are available comparatively at cheaper price. Matar in Kanpur market is being traded at Rs 6800 per qtl. At port it is being quoted at Rs 6500-6600.

Despite improved demand for peas and daal, prices are expected to trade steady to slightly weak. Govt. is not in favor of additional import despite higher prevailing price in domestic market. As prices are higher, area may increase this year by 5 to 10 percent. Sowing starts from mid Oct. As of now farmers have covered 8.22 lakh ha against season's normal of 8.78 lakh ha. It is up by 14 % till date. Following chart shows price movement in various markets:

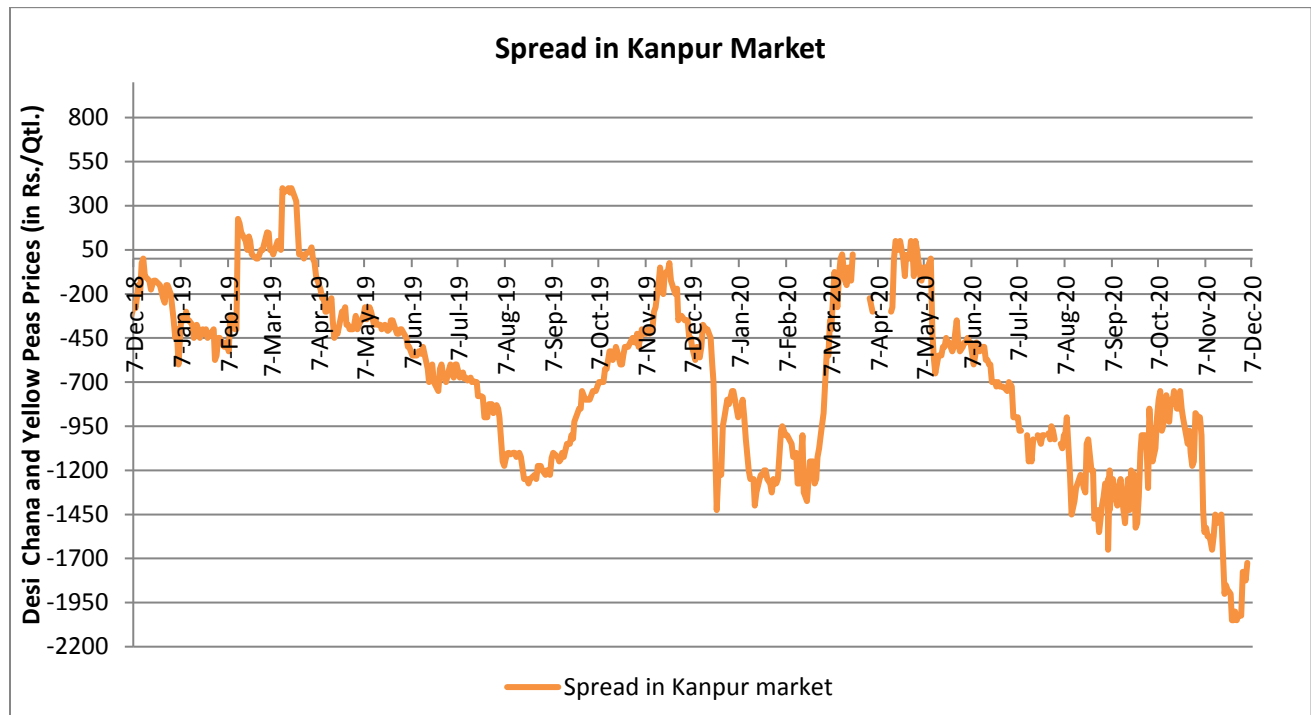

**Current Market Dynamics & Outlook:** Peas market traded slightly down due to weak demand at higher price and likely arrival in Jan-2021 despite low availability in the market. Stockists are now willing to sell at higher level. Kanpur market decreased by Rs 200 to Rs 6800 per qtl. Any major spike from here is unlikely due to stockists's selling and expected new arrival soon. Overall, all India average price was down by 0.52% to Rs 6800 per qtl. In Mumbai market, there was no quote for yellow peas as stock has been exhausted. Canadian yellow pea in Kolkata is being traded at Rs 6500-6600. No trade has been reported at this price this week too.

**Spread With Chana:**

Spread between Chana and Peas, at Kanpur market remained in negative zone. Gap has decreased considerably from Rs 2000 to Rs 1700 due to decreased peas price. Spread is expected to remain in the negative zone in Dec too on relative movement in Chana prices. Overall outlook seems steady to slightly weak this week too.

**Market Outlook:** Steady to slightly weak tone may prevail.

**Lentils (Masoor):**

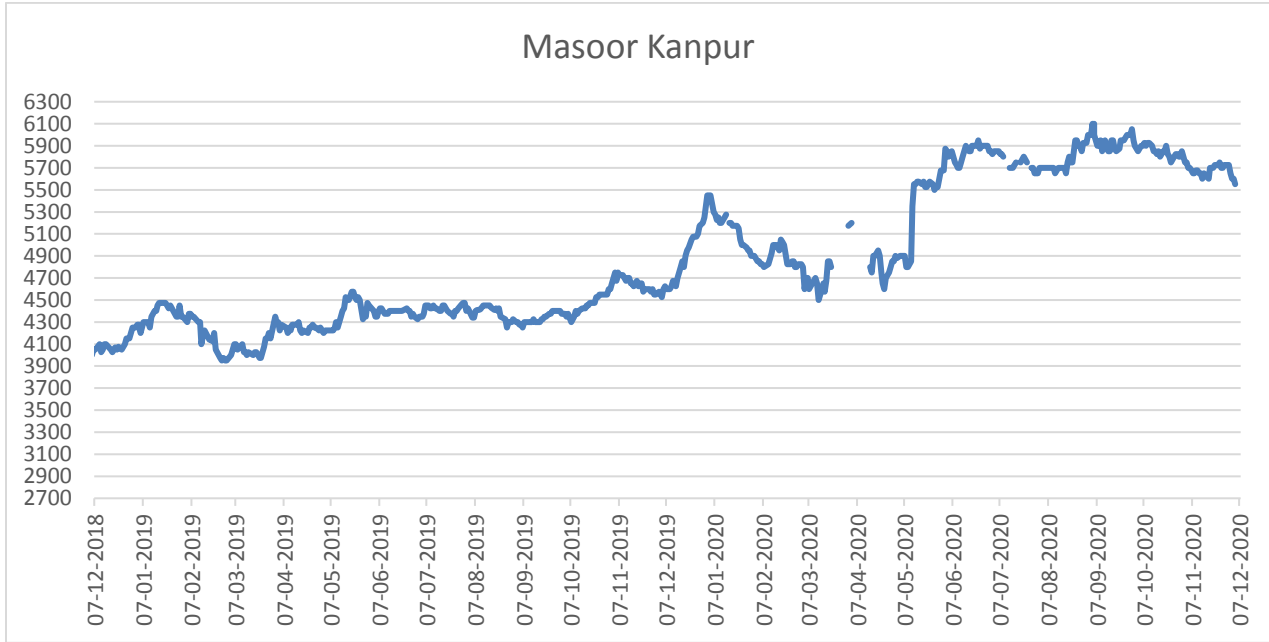

**Market Recap:**

Masur market traded slightly under pressure during the review week due to slashed import duty from 30 to 10 % and extended import time line from 31st Oct- to 31 Dec,2020 now. Demand for daal is weak too. Around 3.85 lakh MT was imported in Aug, Sep and Oct-2020 at the lower duty and around 2 to 2.25 lakh MT is expected in Nov and Dec. So supply side would be at comfortable level in these months too. It would not allow market to move up despite it being a lean season. Import volume would be higher in Nov-Dec too, so prices are unlikely to move up beyond a certain level (Rs4900-5300). Stock at ports is said to be around 1.25 lakh MT. Despite the higher import, prices are not likely to decrease below Rs4900 as stockists are unwilling to sell it below 4900 even in producing centres. It may help retaining acreages. Farmers have covered 13.11 lakh ha so far. Higher MSP for masur from Rs4800 to Rs5100 for MY 2020-21 has encouraged farmers to plant more this year.

At Mumbai ports importers are selling masur at Rs 4900-4950. As prices are ruling near MSP in domestic market, Nafed would not sell its stocks until price moves up again. Old stock with Nafed is around 21,000 MT. Supply side would be at comfortable level as import flow would continue till Dec-2020.

**Current Scenario:**

Stock at ports too is building up due to weak demand after Diwali. At Mumbai ports importers are selling masur at Rs 4900-4950. Any spike in masur market is unlikely. Demand is weak, so price may trade in limited range this week too. Higher import flow would also cap market.

**Market Outlook:** Prices may trade steady to weak due to higher supply prospects from imported stock in the near to medium term. Sluggish demand from mills and commencement of offloading by stockists remains unsupportive to cash market right now. Overall tone in masur market remains weak in Dec too

**Pigeon Pea (Tur/Toor):**

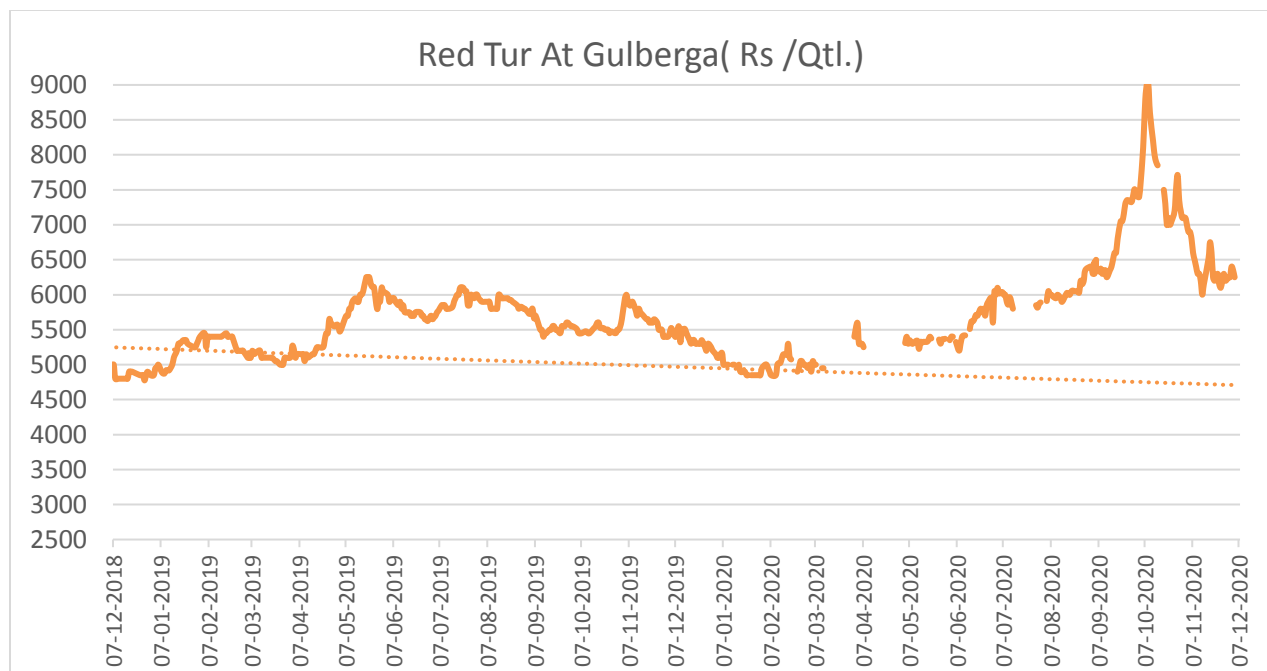

**Market Recap:**

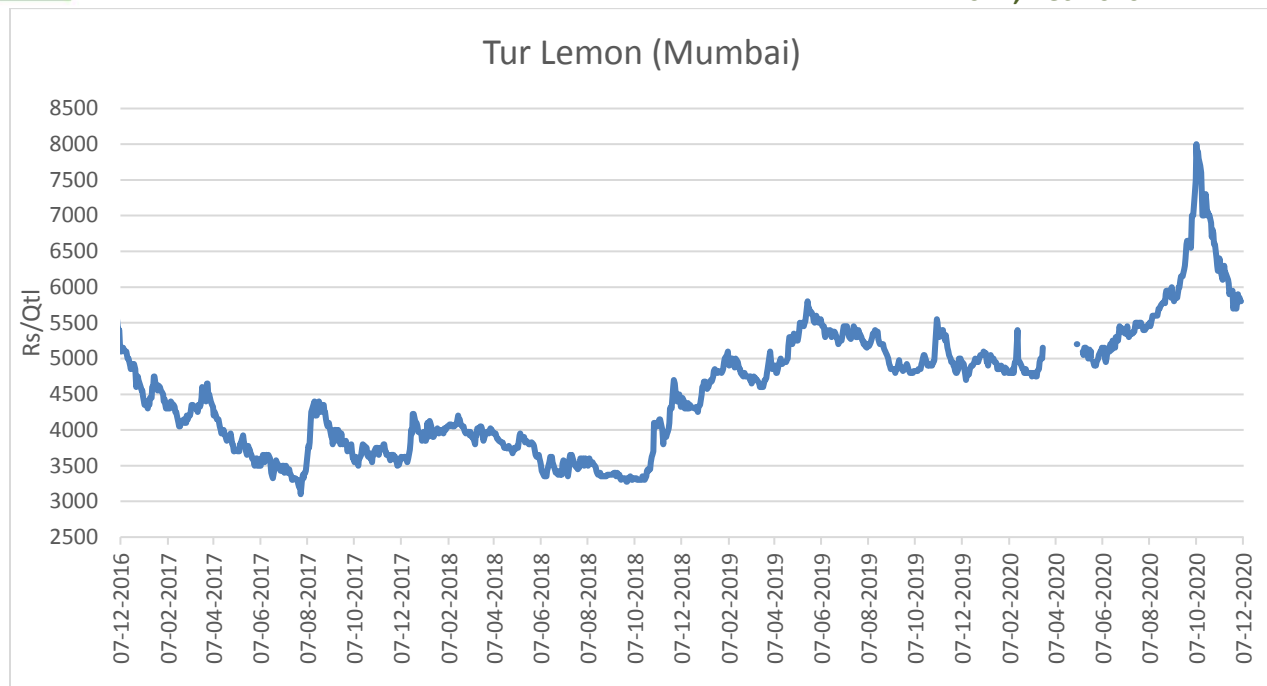

Extended time line for import till 31st Dec-2020 and likely higher import volume in Nov and Dec amid normal crop condition in major growing region would not allow tur market to move up beyond a certain level. Right now it is being traded at Rs 6000-6100 in Gulberga market and may move down to Rs 5800-6000 in coming weeks. Supply side would increase while Nafed continues to sell tur through auction accepting bids near Rs 6100-6200. New crop is hardly 15days away and Nafed still has around 3.5 lakh MT tur stock. So, higher import and release by Nafed may cap tur cash market.

Old lemon tur too are being quoted at Rs 5800 per qtl in Mumbai market. Arrivals have decreased in major centers like Jalgaon, Akola and Amravati line. Local tur in Gulberga too moved down to Rs 6000-6000 and it may move down further by Rs 200 to 300 under prevailing market fundamentals. Crop condition is good so far. Indian farmers have covered 48.49 lakh ha against 45.88 lakh ha last year. As per Agriwatch estimate India may harvest 38.15 lakh Mt crop this year. Weather condition in next one months is very crucial for driving price up and down in Dec-2020.

**Current Market Dynamics & Outlook:**

Recent rains in Andhra Pradesh, Tamil Nadu and Karnataka have affected standing tur crop and harvesting may be delayed by couple of weeks. Some losses have been reported in south India, however, these losses may be compensated by higher expected yield in Kar and Mharashtra. Arrival from new crop may be delayed by 15 days due to delayed sowing and high moisture level in the field.. Stake holders should start releasing stock as soon as market improves. Higher import quantity is expected in Nov and Dec. The production share of tur in total kharif pulses production is 34.8 % and farmers have covered around 109.5 % (48.49lakh ha) area of normal (45.53 lakh ha).

In the 1st week of Dec-2020, average price in Gulberga market was down by Rs 100 to Rs 6000-6100 due to higher import expectation and new arrival from mid- Dec. It may continue to pressurize prices in coming weeks. Apart from this likely selling by Nafed may cap upward momentum to some extent in coming weeks. Import volumes (G to G basis) are likely to increase in Nov-Dec due to issuance of import licenses for private millers and extended time limit for import. Tur price is likely to trade steady to slightly weak this week too.

**Black Matpe (Urad):**

Slight recovery was seen in urad market during 1<sup>st</sup> week of Dec due to tight supply side and fear of loss in Rabi season too. However, poor demand at higher level continued to cap market. Import volume may increase as govt has allowed 1.5 lakh Mt urad import. As kharif arrivals are low and rabi arrival is expected by end Dec any major dip is unlikely at this point of time. Farmers too are restricting release of the crop sensing strong inner tone. Apart from it, the news of some crop loss too helped market to push up by Rs 200-300 during Nov. DGFT has not allowed release of old stocks lying at ports as these stocks have been imported without proper documents or presenting wrong information about mills/ capacity. Quotes for FAQ urad stay down at \$845 per MT while SQ moved down by \$50 to \$965 per MT basis Indian port. Prices in domestic market moved up to Rs 7300-7350- for FAQ and Rs 8150-8300 for SQ at week end. If demand improves and new arrival is delayed, prices would increase against normal expectation. Demand at higher level may decrease. Rabi sowing is on and may continue till Dec.

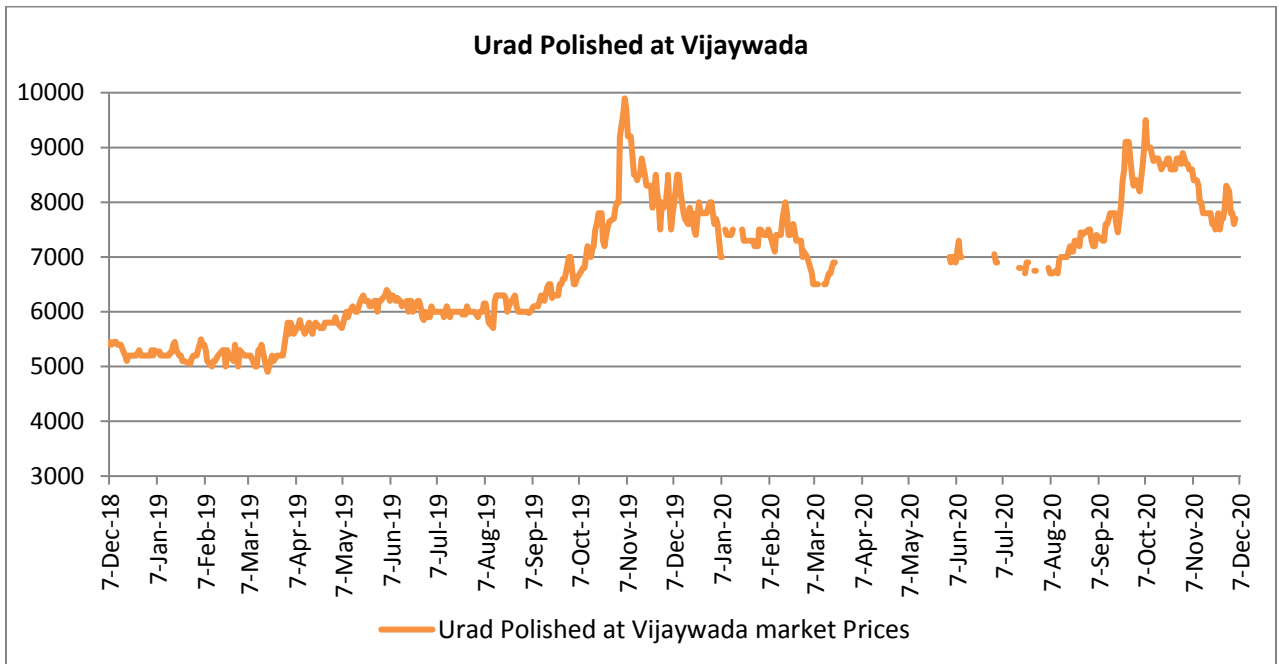

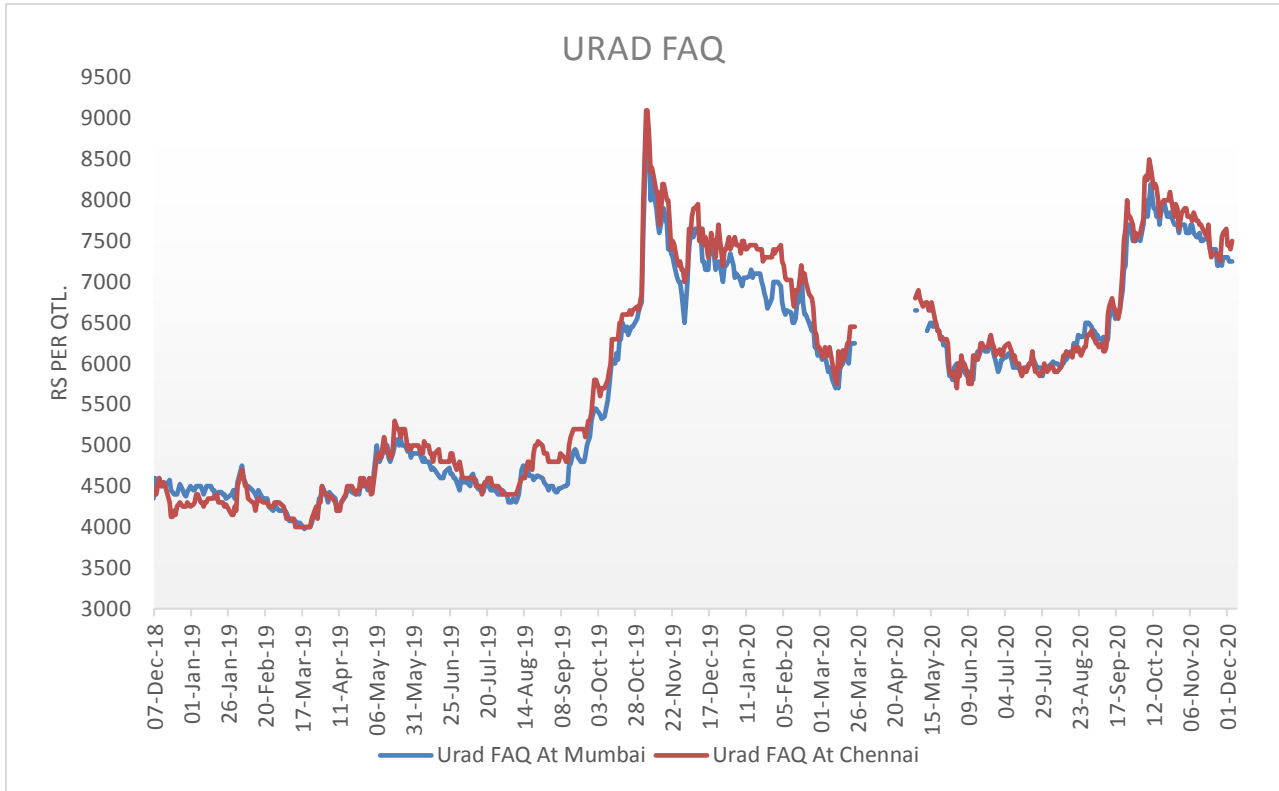

Stock position of urad in Myanmar is said to be around 1.12 to 1.75 lakh MT. New crop is expected to hit market in mid -March-2021. By then Myanmar may export around 1.25 lakh MT under quota system before new crop hits the market and would consume 50,000 MT for domestic consumption. As India has allowed only 1.5 lakh Mt import, pressure on price in Myanmar might be seen. Under prevailing market fundamental market may trade steady to slightly firm in Dec.

**Current Market Dynamics & Outlook:**

The production share of urad in total kharif pulses production is 27.95 % and farmers have covered around 110 % (38.96 lakh ha) area of normal so far. Normal area of urad is 35.53 lakh ha. Planting is almost over now. Area in M.P., MH & Kar has increased while it is down in Raj, U.P. & Telangana. However, overall area is

higher so far. Due to heavy rains around 10000-15000 ha area is said to be inundated. However it would not affect the final size of the crop. Overall, planted area is higher by 44,000 ha from last year. Under rabi season farmers have covered 2.60 lakh ha so far.

**Market Outlook:** Urad Prices are likely to show steady to slightly firm momentum.

**Green Gram (Moong):**
**Market Recap:**

Downward trend in moong cash market continued as other pulses like chana, tur, urad and peas traded down too in the 1st week of Dec. Procurement of moongis on in states like Karnataka, Maharashtra and Rajasthan. As prices are higher in some regions, procurement pace remains slow so far. As rains have affected quality of moong, so price range is wider this year. It is being traded at Rs 5500-7500, depending on quality of the crop. If demand improves, slight recovery might be seen for a shorter time. There is a parity for import as moong price is ruling higher than Myanmar right now. Stockists are preferring to sell now as import possibility has increased now. So, overall trend seems weak in the medium term despite minor loss in Karnataka (3500 ha) and Telangana (750 ha) by flooding.

Rabi sowing has already started now and farmers have planted 0.88 thousand ha so far against normal of 9.86 lakh ha .Farmers had planted 35.84 lakh ha in kharif season.Kharif arrival is on . As kharif production is lower than expected earlier, price would not decrease more from current level. Moong would continue to trade in the range of Rs 5500 to 7500 inDec against MSP of Rs 7196 per qtl.

**Market Outlook:** Moong prices are likely to trade steady to slightly weak in the near term.

**Rabi Pulses Sowing as on 04.12.2020:**

Rabi Pulses Progressive Sowing As On 04.12.2020( Lakh ha)					
Kharif Pulses Crops	Normal Area(DES)	Area sown		Increase(+)/Decrease(-) over
