Commodity-wise Domestic, International Prices and Arrivals at Different Centers

Weekly Highlights-Domestic Market:

- **The government has proposed to impose an agricultural infrastructure and development cess** of 20 per cent on lentil masoor, 30 per cent on Kabuli chana, 40 per cent on peas and 50 per cent on Bengal gram and chickpeas. However, its impact would be zero as it would be deducted from basic custom duty. Old basic custom duty for peas was 50%, now it would be 10% plus 40% cess. For lentils old basic custom duty was 30%, now it would be 10% plus 20% cess, for kabuli chana it was 40%, now it would be 10% basic and 30% cess, for Bengal gram it was 60%, now basic is 10% & 50% cess. So there is no overall impact on duty structure.
- **With favorable weather condition rabi pulses sowing is running smoothly. Farmers** have planted 167.38 lakh ha area so far against normal of 144.89 lakh ha. Out of total farmers have covered 112.00 lakh ha area under gram against normal of 92.77 lakh ha. Farmers have covered 16.54 lakh ha under lentils (normal 14.24 lakh ha), 10.69 lakh ha under field pea (normal 8.78 lakh ha), 8.09 lakh ha under urad (normal 8.93 lakh ha), 6.59 lakh ha under moong (normal 9.86 lakh ha), 6.44 lakh ha under other pulses (normal 6.04 lakh ha). Gram area is running ahead by 4.37 % from last year so far, field pea down by 2.55%, lentils up by 2.54 %, other pulses up by 11.79%. Moong coverage is down by 1.05 % so far. Farmers may increase sowing activities in coming weeks under moong and urad.
- **Nafed may restrict selling of tur in coming weeks for supporting cash market at the time of peak arrival season.** At the beginning of the new year Nafed had 134481MT tur stock in its go-downs. In the second and the third week of Jan-2021 it sold another 70,000 MT tur. This means Nafed has now 60,000 MT old stock. Generally, Nafed stops selling in states where procurement starts. It may support tur cash market to some extent. As prices are ruling around MSP and private trades are active amid slow pace of arrival, Nafed would not be able to procure 2 lakh MT tur this year. Right now supply demand side seems balanced and steady to slightly firm tone may prevail in cash market in coming weeks.
- **Availability of urad at various ports is low right now. Kharif crop size was lower than** normal expectation while size of rabi crop is low (6 to 7 lakh MT). So, prices continued to rule above MSP and may trade up by Rs200-300 in coming weeks too. Demand for south Indian states started increasing now. It drove urad price to \$865 and \$980 basis Indian ports. As rabi urad area is higher by 60,000 ha so far and crop condition is good so far, availability is expected to increase by mid -February. Urad FAQ is being traded at Rs7300 and new at Rs7400 at Mumbai port. Overall outlook seems firm.
- **New crop of desi chana is expected to hit market by mid Feb in south India, followed by M.P. & Karnataka & Mh in March.** Crop condition is good so far. However, stock is decreasing fast in producing regions. Private trades may start offloading while Nafed too is releasing stock at regular intervals. All these factors would not allow chana cash market to move up beyond a certain level. Chana in Delhi market traded at 4575-4625. Need based buyings are being seen by millers while demand for daal is yet to improve. Overall sentiment remains weak.
- **Lentils prices continue to cool down with easing supply side from import and** smooth sowing activities, supported by congenial weather condition in major producing states like Madhya Pradesh, Uttar Pradesh and Bihar. Agriwatch expects 13.25-13.50 lakh Mt production this year under normal weather condition. Major exporters like Australia and Canada are trying to sell as much as they can before duty revision from 10 to 30% from 1st Jan-2021. Pulses prices may be under pressure due to increasing rabi area and higher flow of import this year. Lentils price may decrease to Rs-4750-4800 by end Feb. New crop would hit market in Feb end. Overall tone is bearish. Current uptrend is unlikely to continue.

- **Moong cash market traded under pressure due to weak demand. Even import volume too is low.** New crop is expected to hit market from mid –February. Quality of new rabi crop is expected to be good. Crop in Orrisa is in very good. Sideways movement might be seen until new crop hits in. Moong may trade in the range of Rs 6000-7600 per qtl in Delhi, depending on quality.

Global Market:

- **Lentils production in US for 2020 has been pegged at 336,201 MT based on 514,000 acres.** Lentil production is up by 40% from last year with a USDA production estimate of 7.41 million cwt. Planted acreage was up 9% from 2019 with 528,000 acres in 2020, and harvested acreage was up even more, 21% at 514,000 acres. Average yield is estimated at 1,442 pounds per acre in the U.S., as per data release by the National Agricultural Statistics Service.
- **The USDA has released its final pulses production report of the year this Tuesday, Jan. 12, 2021** by the National Agricultural Statistics Service. As per new data dry peas are compiled by the National Agricultural Statistics Service. Dry peas production for 2020 has been pegged at 985,976 MT on 973,000 acres. Dry pea production as an average of all U.S. pea growing regions is down approximately 2% of last year, sitting at 21.7 million cwt in 2020, almost 986,000 MT, with planted acreage hitting 1 million acres. Harvested acreage hit 973,000 with an average yield of 2,234 pounds, an increase of 111 pounds an acre, the highest yield recorded since 2004. The drop in total production for dry peas from 2019 reflects the decline in planted and harvested acres of 9% and 7% respectively.
- **For 2020-21, chickpeas production in Canada is likely to decrease by 15 % from last year to 214 Kt** due to lower harvested area. Supply would be higher by 16% due to higher carryout. Production of desi types is expected to be higher while Kabuli type would decrease slightly. Despite lower production size total supply would increase from 439 to 539Kt this year. Export may stay steady at 105Kt while average price for the year may be \$560 per MT.
- **Lentils production in Canada is expected to increase by 29 % to 2.9 MMT in 2020-21** due to higher yield and coverage area. Out of total production of red lentils would increase to 2.1Mt while large green lentils production may decrease to 0.6 MMT, followed by other types at 0.2 MMT. Export may increase slightly from 2861 to 2900 Kt. Average price for the ear may rule at \$625 per MT.
- **Dry peas production in Canada is expected to increase by 8 % to 4.6 million tonne due to 10 % higher yield** in major growing states in 2020-21. The major producing states like Alberta and Saskatchewan may contribute 4.1 MMT. Out of total production yellow peas would contribute 3.5 MMT. Average price may rule near \$295 per MT. Canada may export 3.8 million MT in 2021.
- **Global field peas market traded slightly up on the back of higher buying by exporters** for meeting sales commitments. Whole green and yellow peas prices are increasing in Canada and USA too as they paid farmers higher prices. Maximum stock in Canada has been sold out by farmers. It leads to higher prices of peas.
- **Lentils production in Australia is expected to decrease by 6.89% from 5.34 to 4.97 lakh tons** in 2020-21. It is due to lower coverage (6.11%) of area from last year. Victoria and South Australia are major producing regions that contribute 92% of total production.

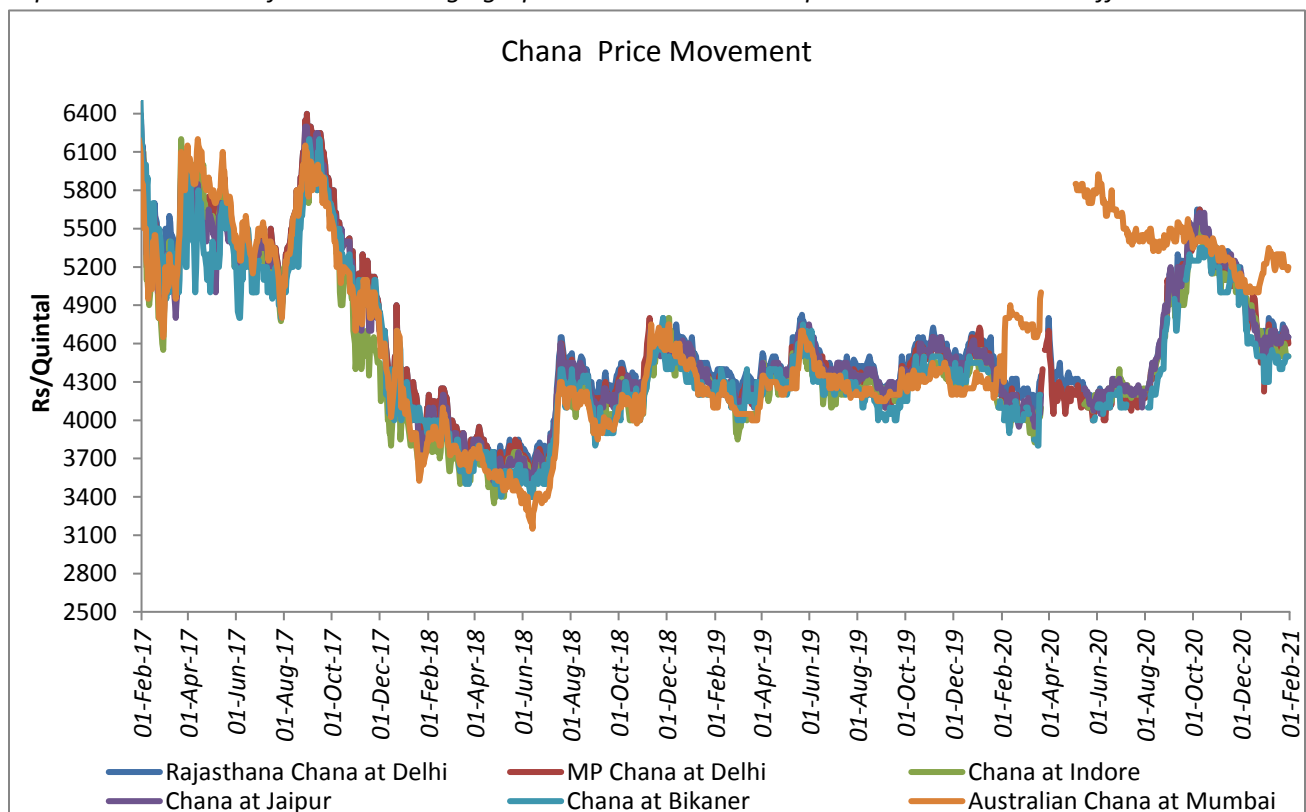

Weekly Outlook: -Pulses are likely to trade mixed in coming weeks.

Pulses-Wise Scenario:

Chana

Current Scenario:

Chana cash market is likely to improve in the weeks ahead as Nafed has indicated that it will sell chana not below 4875 from its stock despite higher area coverage and good crop condition. Area is up by 4.37 % so far and may touch 113 lakh ha this year against 110 lakh ha last year. Weather is favorable barring some parts of south India. Cash market is expected to trade firm and may improve by 100-150 in coming weeks. New crop is expected to hit market only in mid- February-2021. So, Agriwatch expects steady to slightly firm tone in the weeks ahead. Sensing firm price momentum stockists too may restrict releasing stocks till mid Feb. Sowing is almost over now and weather condition is good so far and a good production prospects seems on the sight now. There is no import parity due to high duty (60%). However, import continues from LDC at zero duty. Nafed selling strategy and weather condition in March would be main price driving force in Feb. Nafed has offered discount of maximum of 5 to 10 % over MSP of Rs4875 for sale of Gram PSS Rabi 2020. The discount percentage will depend on the location of the stock. Nafed reserves the right of revise the above without piror notice. All India average price of chana increased by 0.50 % to 4596 against Rs 4573 previous week. Australian chana traded down at Rs 5195 per qtl in Mumbai market. As there is demand for dal at current price, chana is expected to move firm. Following graph illustrates chana price movement in different markets:

Market Outlook: Steady to slightly firm movement is expected in cash chana market this week. Nafed's current selling strategy would continue to determine price trend in coming weeks. Indian importers have imported around 4.0 lakh MT chana during April to Nov 2020.

Chana Weekly Technical Analysis:

Technical Commentary:

- Decreasing price & OI hint weak sentiments in futures market in the short term.
- RSI is steady in neutral region, hints caution to bulls.
- Prices closed below 9 and 18 days EMAs
- Candlestick chart hints weak momentum in the market.

Strategy: Buy on Dip

Weekly Trade Call*			Call	Entry	T1	T2	SL
Chana	NCDEX	Mar	Buy on dip	4447	4525	4555	4425

- Do not carry forward stock for next week.

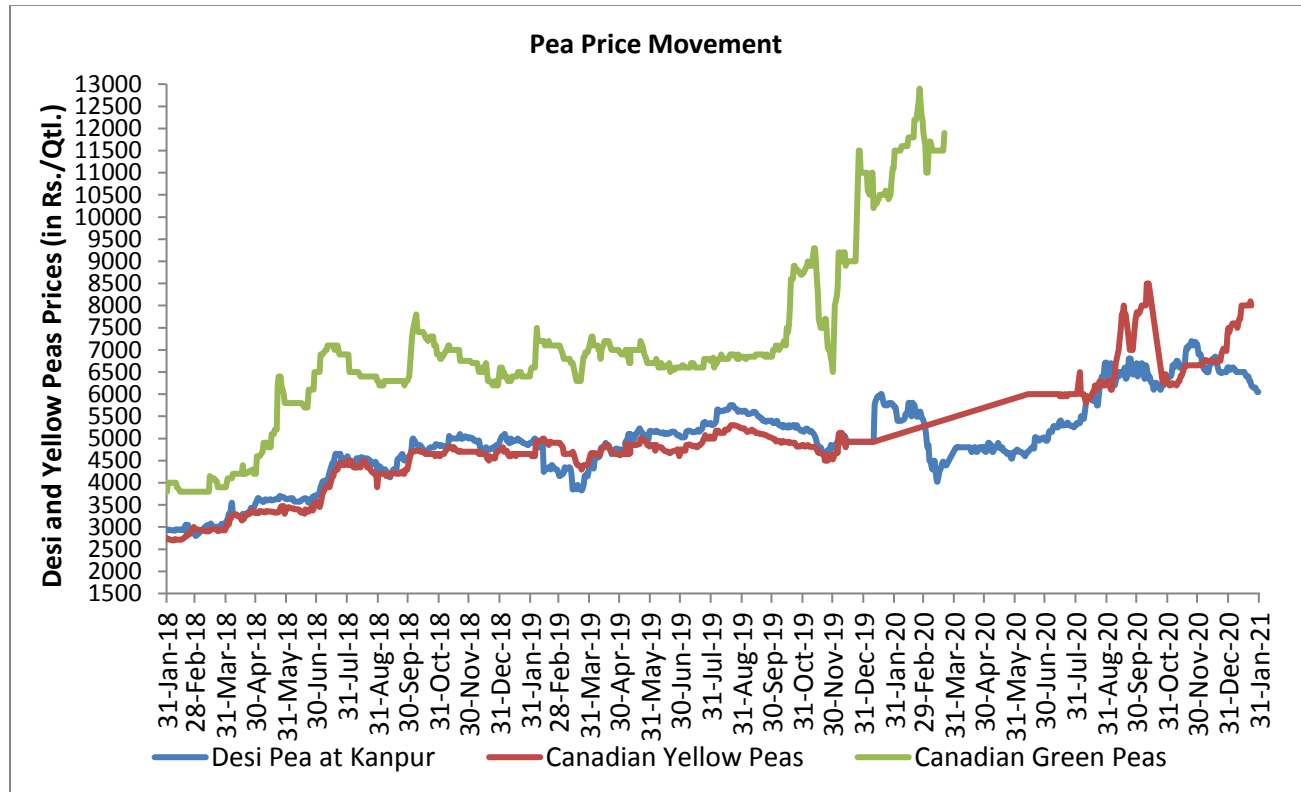

Peas (Matar):

Market Recap:

Despite negligible availability of field peas at ports, prices of yellow and green peas are likely to decrease due to new arrivals of green in various markets. As arrival of green peas would increase in coming weeks, pressure on price might be seen. Arrival from new crop is expected to increase from mid Feb-2021, so stockists

who have stocks of peas, are now selling it. Import is not taking place and the govt. is not in favor of allowing import above 1.5 lakh MT. As prices are lower in global market, Bangladesh and Nepal are buying more matar hoping for an arbitrage opportunity in selling to India. Demand is weak as other pulses are available comparatively at cheaper price. Matar in Kanpur market is being traded at Rs 6000-6050 per qtl. At port there is no quote due to nil stock.

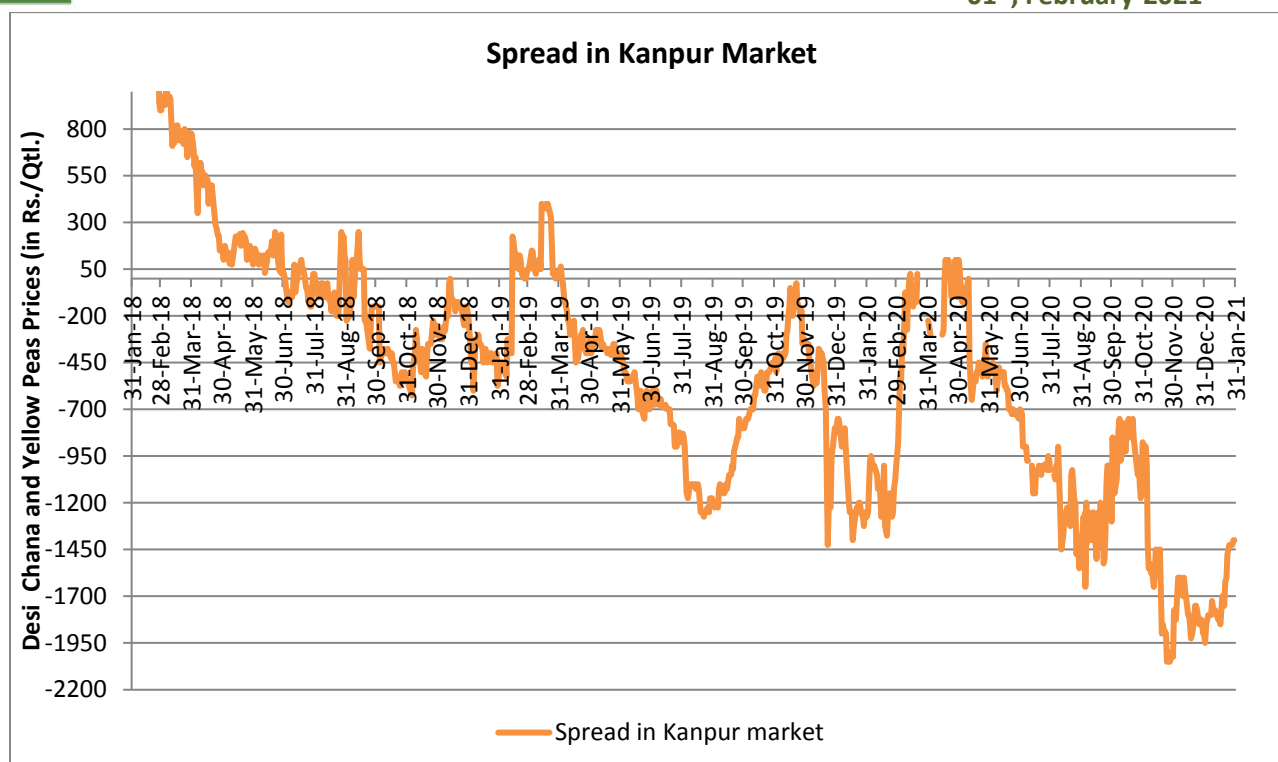

Despite improved demand for peas and daal, prices are expected to trade steady to slightly weak. Govt. is not in favor of additional import despite higher prevailing price in domestic market. As prices are higher, area may increase this year by 3 to 5 percent. Sowing is over now.. As of now farmers have covered 10.69 lakh ha against season's normal of 8.78 lakh ha. It is down by 2.55 % till date. Following chart shows price movement in various markets:

Current Market Dynamics & Outlook: Peas market traded slightly down due new arrivals. Stockists are now willing to sell before pressure from new arrival builds up.. In Kanpur market it was quoted at Rs 6000-6050 per qtl. Overall, all India average price was down by 9% to Rs 6050 per qtl. In Mumbai market, there was no quote for yellow peas as stock has been exhausted. Canadian yellow pea in Kolkata is being traded at Rs 6700-6850. No trade has been reported at this price this week too.

Spread With Chana:

Spread between Chana and Peas, at Kanpur market remained in negative zone. Gap has decreased considerably from Rs 1750 to Rs 1400 due to decreased peas price. Spread is expected to remain in the negative zone in Feb too on relative movement in Chana prices. Overall outlook seems steady to slightly weak this week too.

MarketOutlook: Steady to slightly weak tone may prevail.

Lentils (Masoor):

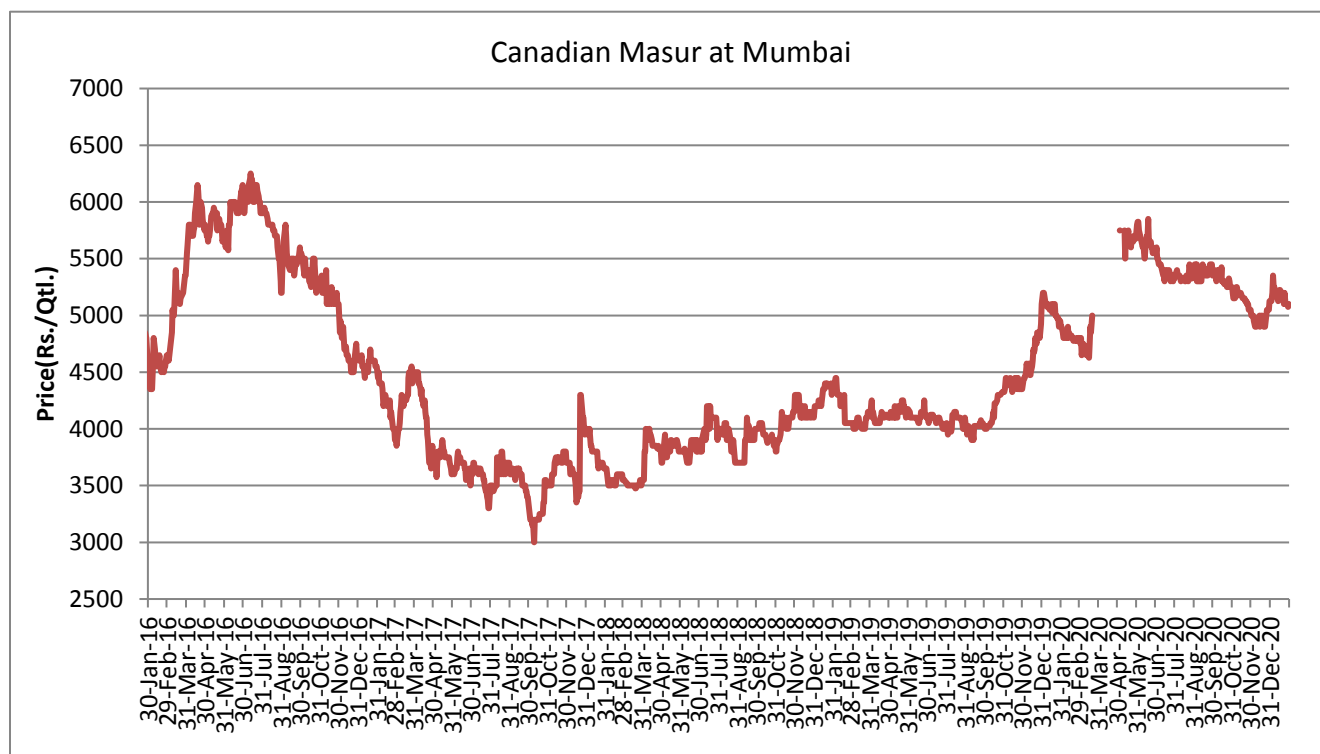

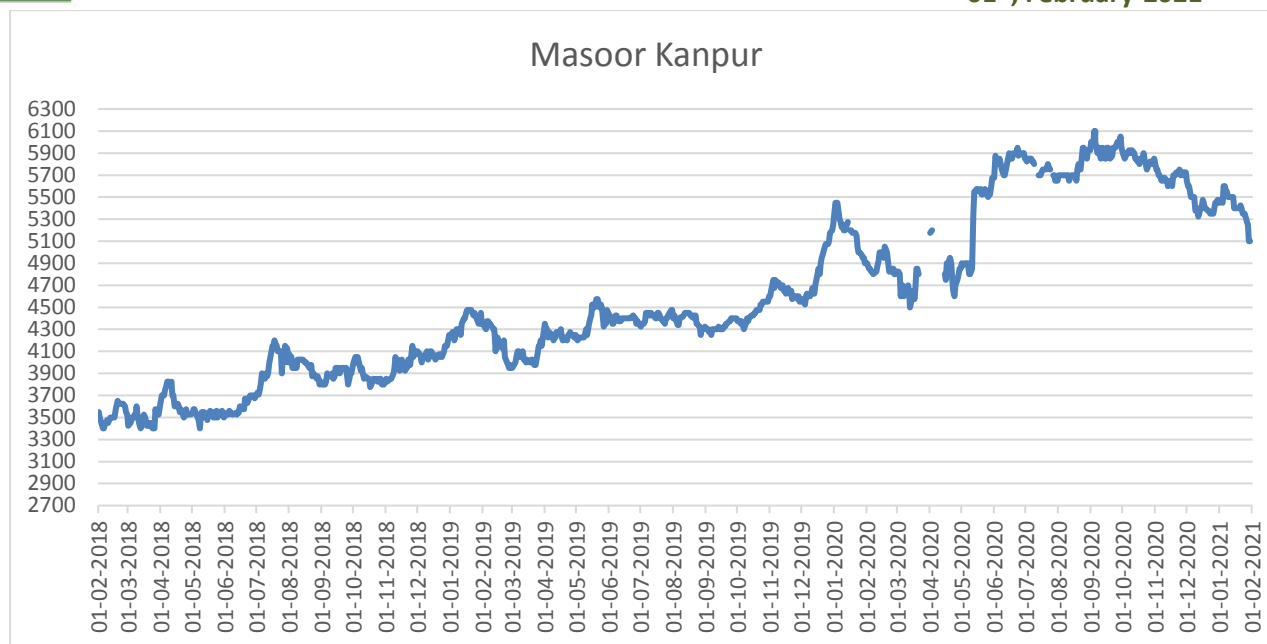

Market Recap:

Weak tone was seen in Masur market during the review week. More downward movement is expected as new crop is nearing maturity stage now. Demand for daal is weak too. Around 3.85 lakh MT was imported in Aug, Sep and Oct-2020 at the lower duty and around 2 to 2.25 lakh MT is expected in Nov and Dec. So supply side would be at comfortable level in these months too. It would not allow market to move up despite it being a lean season. Imported stock is accumulated at ports, so prices are unlikely to move up beyond a certain level (Rs4800-5200). Stock at ports is said to be around 1.50 lakh MT. Farmers have covered 16.54 lakh ha so far. Higher MSP for masur from Rs4800 to Rs5100 for MY 2020-21 has encouraged farmers to plant more this year.

At Mumbai ports importers are selling masur at Rs 5100-5150. As prices are ruling near MSP in domestic market, Nafed would not sell its stocks until price moves up again. Old stock with Nafed is around 21,000 MT. Supply side would be at comfortable level as import flow would continue till Dec-2020. In Feb, it may move down slightly and rule in the range of Rs 4700-5000.

Current Scenario:

Ample stock is available at ports. At Mumbai ports importers are selling masur at Rs 5100-5150. Any spike in masur market is unlikely. Demand is stable, so price may trade in limited range this week too. Higher import flow would also cap market.

Market Outlook: Prices may trade steady to slightly weak due to new arrival from last week of Feb. Overall tone in masur market remains weak in the first week of Feb-2021..

Pigeon Pea (Tur/Toor):

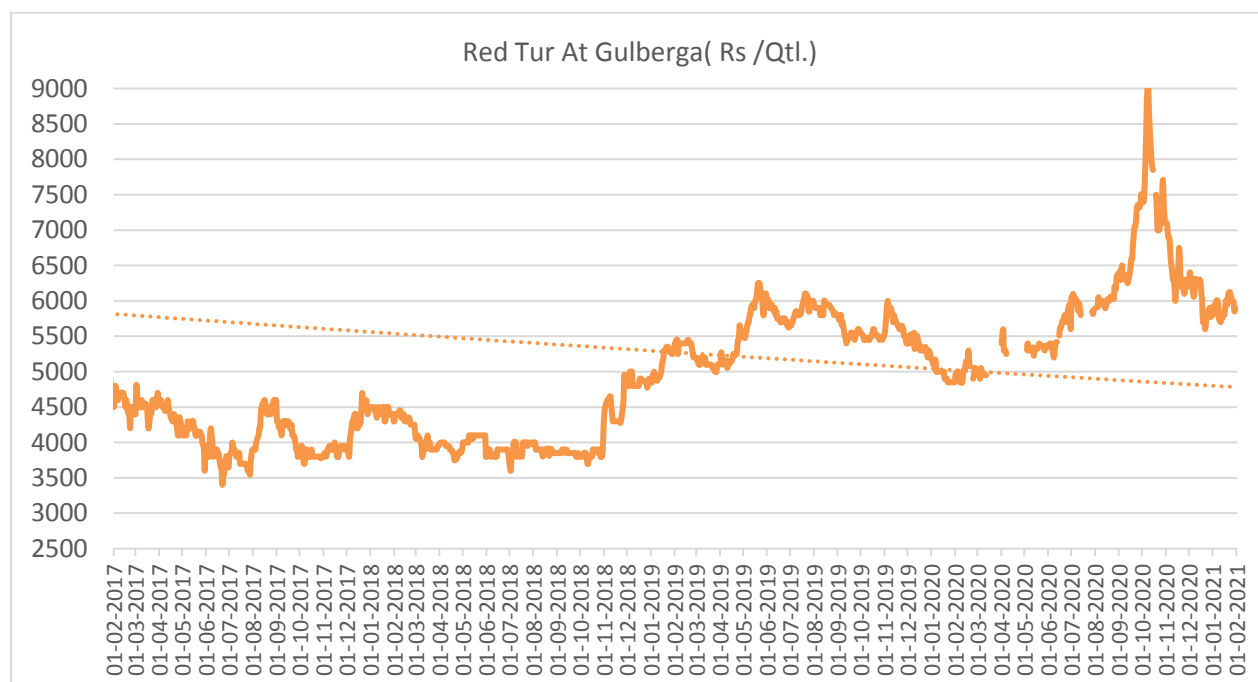

Market Recap:

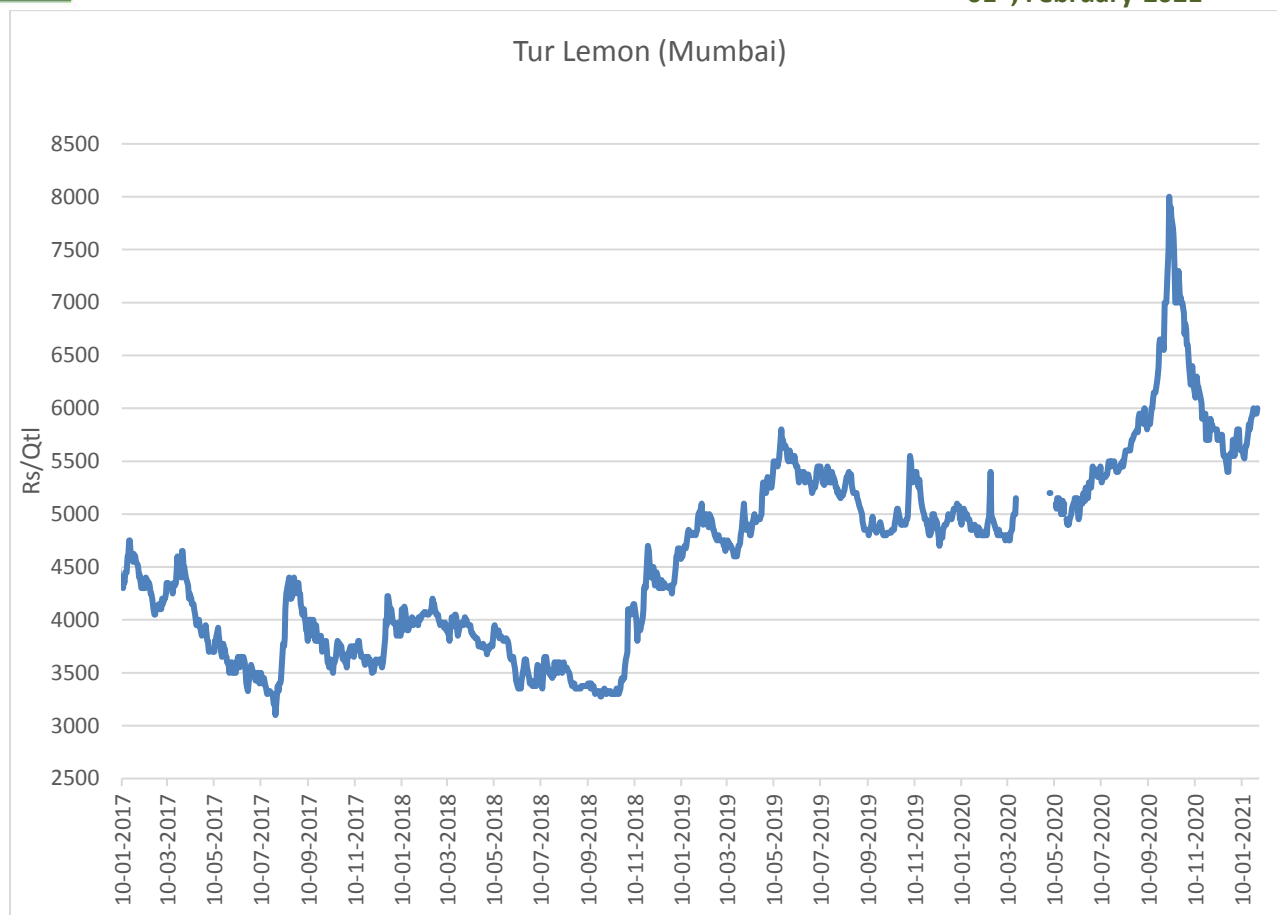

Nafed may restrict selling of tur in coming weeks for supporting cash market at the time of peak arrival season. At the beginning of the new year Nafed had 134481MT tur stock in its go-downs. In the second and the third week of Jan-2021 it sold another 70,000 MT tur. This means Nafed has now 60,000 MT old stock. Generally, Nafed stops selling in states where procurement starts. It may support tur cash market to some extent. As prices are ruling around MSP and private trades are active amid slow pace of arrival, Nafed would not be able to procure 2 lakh MT tur this year. Right now supply demand side seems balanced and steady to slightly firm tone may prevail in cash market in coming weeks. Tur in Gulberga market is being traded at Rs 6000-6150 and may move up by Rs200 more as private buyers are active. Arrival too has not been up to the mark so far. Crop condition is good so far. Indian farmers had covered 48.49 lakh ha against 45.88 lakh ha last year. As per Agriwatch estimate India may harvest 38.15 lakh Mt crop this year. Weather condition in next one month is very crucial for driving price up and down in Feb-2021. Overall tone is firm.

Current Market Dynamics & Outlook:

As crop size seems lower than normal expectation, price should move up. Import flow would beslow as availability of stock in global market is low. Apart from it emergency in Myanmar may disturb export flow from there. The production share of tur in total kharif pulses production is 34.8 % and farmers have covered around 109.5 % (48.49lakh ha) area of normal (45.53 lakh ha). Under prevailing market fundamentals market may move up.

Nafed has procured 6985MT Tur In January-2021 at minimum support price of Rs 6000. The maximum (6185 MT) tur has been procured in Karnataka, followed by Mh at 801MT. As prices are ruling above MSP, Procurement quantity would be much than than normal expectation. Arrival is lower at this point of time. Farmers are hlding stock in anticipation of higher prices in coming weeks. Private trades are active and it shows prices to move up further if arrival stay ssteady.

In the last week of Jan-2021, average price in Gulberga market was up by Rs 150 to Rs 6150 due to commencement of procurement and slower release by farmers. It may continue to support prices in coming weeks. Apart from this likely restricted selling by Nafed may support market in coming weeks.

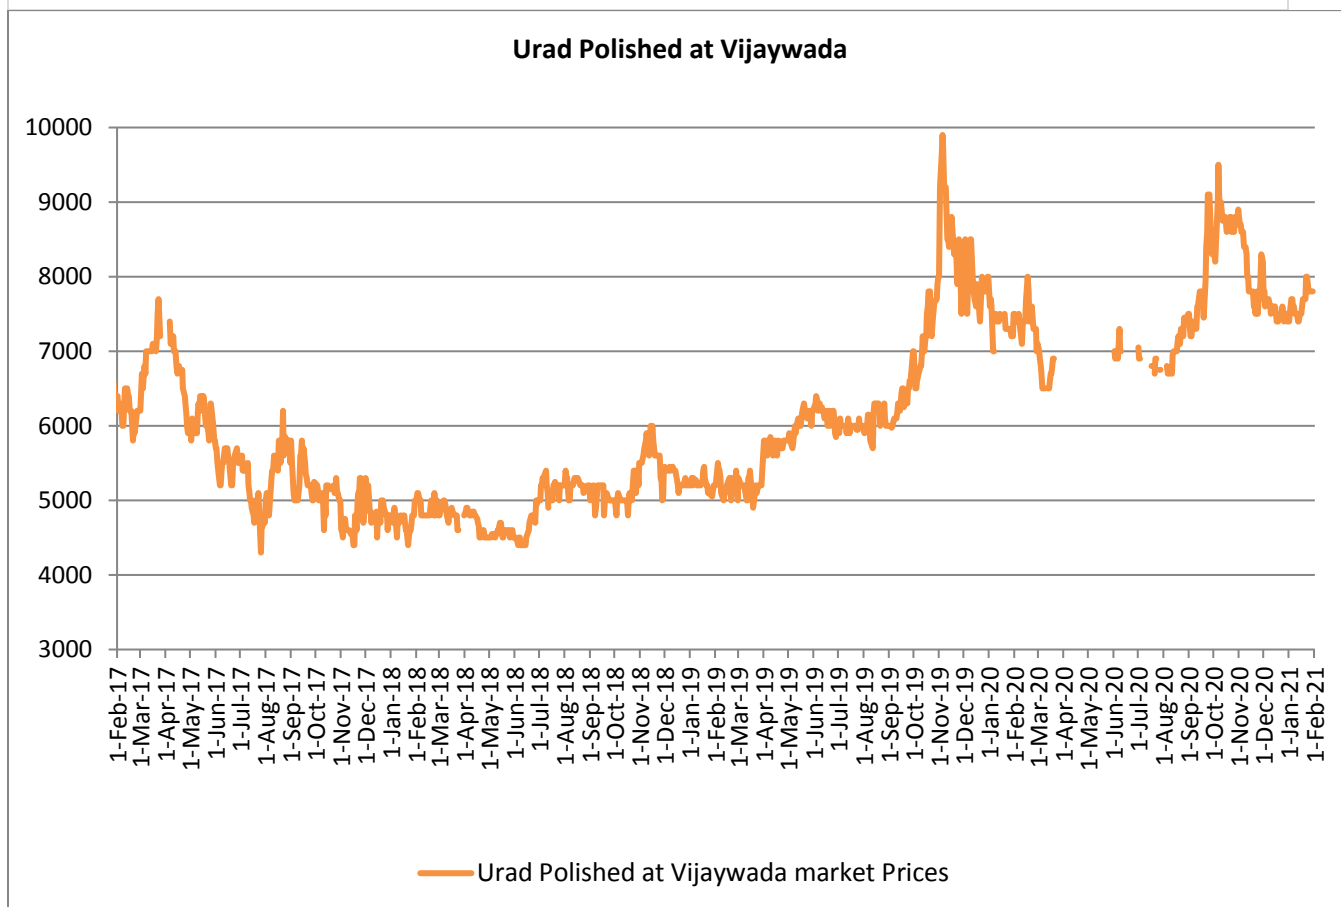

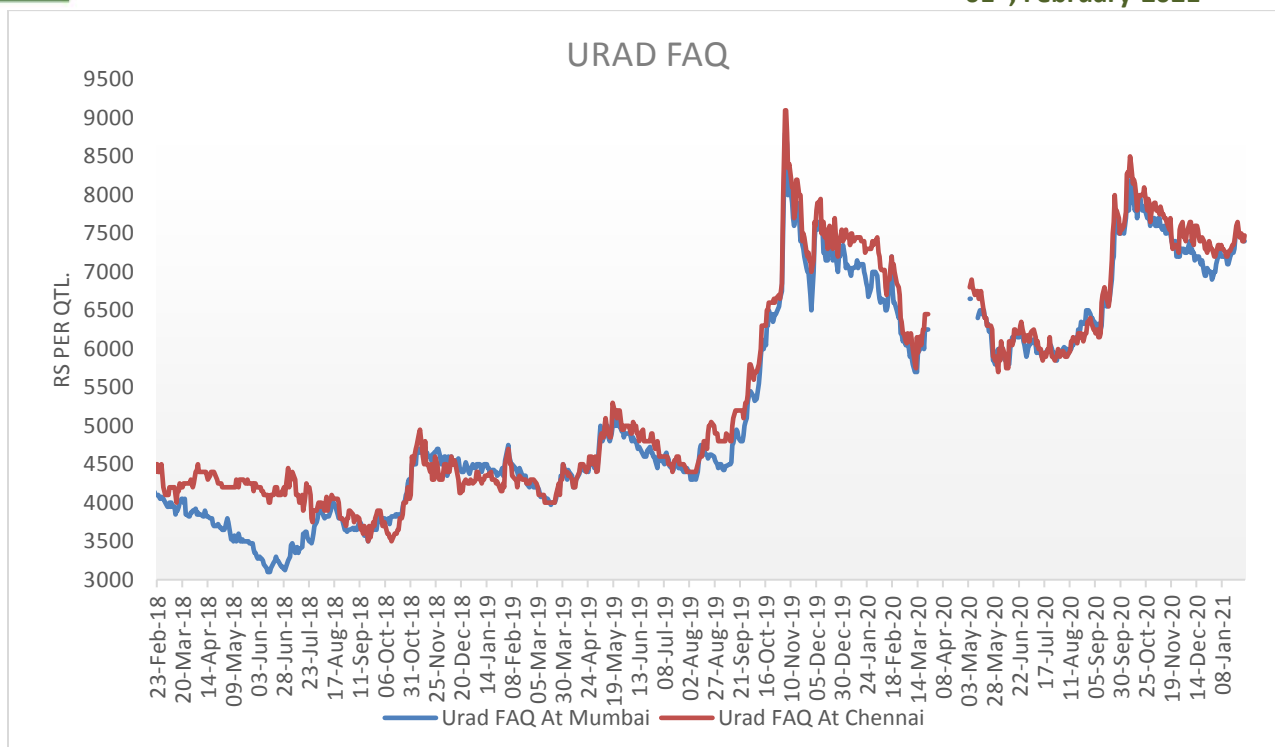

Black Matpe (Urad):

Availability of urad at various ports is low right now. Kharif crop size was lower than normal expectation while size of rabi crop is low (6 to 7 lakh MT). So, prices continued to rule above MSP and may trade up by Rs200-300 in coming weeks too. Demand for south Indian states started increasing now. It drove urad price to \$865 and \$980 basis Indian ports. As rabi urad area is higher by 60,000 ha so far and crop condition is good so far, availability is expected to increase by mid -February. Urad FAQ is being traded at Rs7300 and new at Rs7400 at Mumbai port. Overall outlook seems firm. Import flow may disturb due to emergency imposed in Myanmar. Political instability may disturb normal trade flow. In coming months.

Current Market Dynamics & Outlook:

The production share of urad in total kharif pulses production is 27.95 % and farmers have covered around 110 % (38.96 lakh ha) area of normal so far. Normal area of urad is 35.53 lakh ha. Planting is almost over now. Area in M.P., MH & Kar has increased while it is down in Raj, U.P. & Telangana. However, overall area is higher so far. Due to heavy rains around 10000-15000 ha area is said to be inundated. However it would not affect the final size of the crop. Overall, planted area is higher by 44,000 ha from last year. Under rabi season farmers have covered 8.09 lakh ha so far.

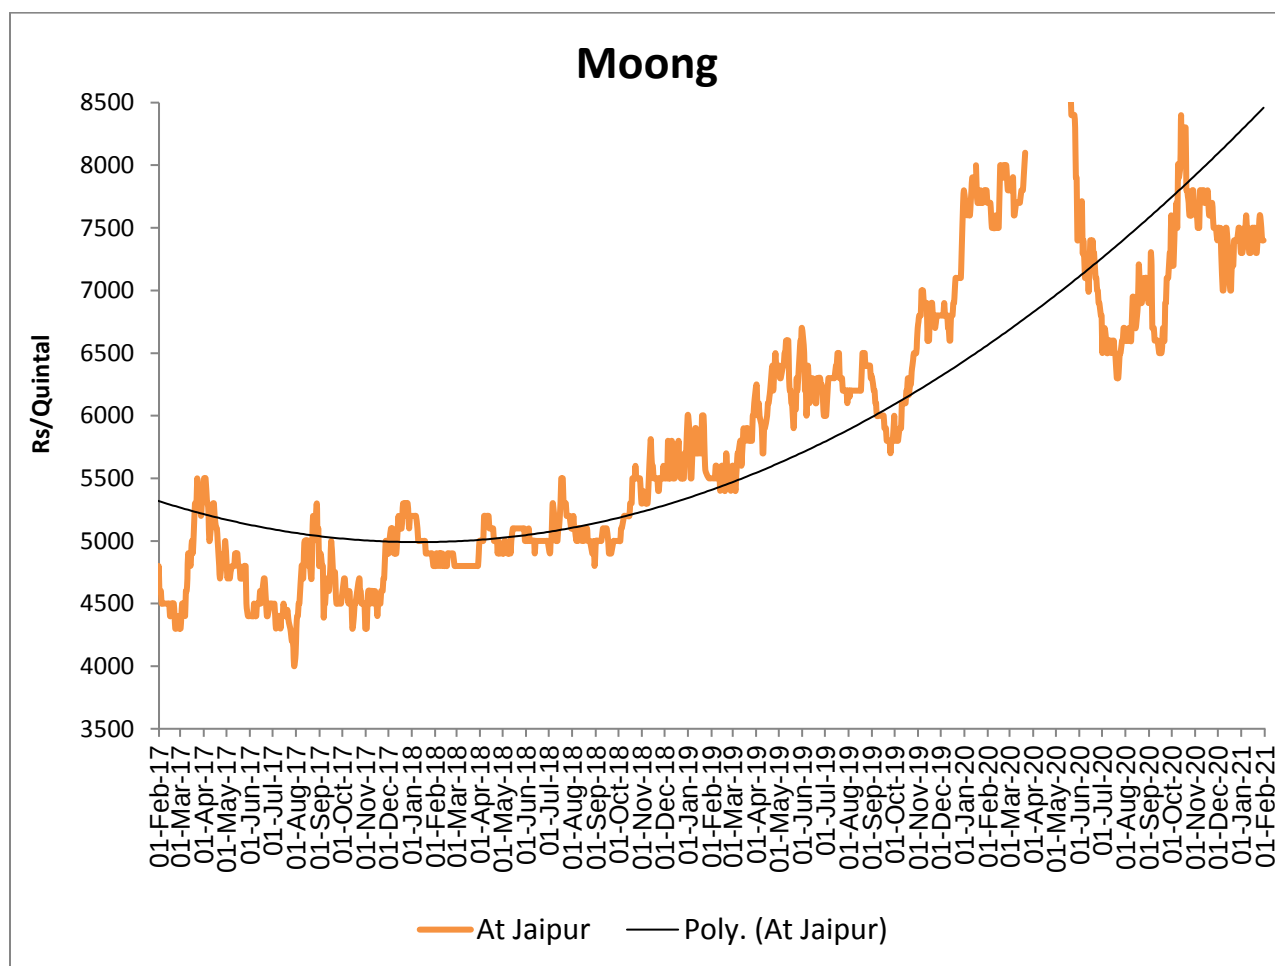

Market Outlook: *Urad Prices are likely to show side ways movement.*

Green Gram (Moong):
Market Recap:

Moong cash market traded under pressure due to weak demand. Even import volume too is low. New crop is expected to hit market from mid –February. Quality of new rabi crop is expected to be good. Crop in Orrisa is in very good. Sideways movement might be seen until new crop hits in. Moong may trade in the range of Rs 6000-7600 per qtl in Delhi, depending on quality.

Rabi sowing has already started now and farmers have planted 6.59 lakh ha so far against normal of 9.86 lakh ha .Farmers had planted 35.84 lakh ha in kharif season.Kharif arrival is on . As kharif production is lower than expected earlier, price would not decrease more from current level. Moong would continue to trade in the range of Rs 5500 to 7500 in Feb-2021 against MSP of Rs 7196 per qtl.

Market Outlook: Moong prices are likely to trade steady to slightly weak in the near term.

Progressive Rabi Planting as on 29th Jan-2021 :
