Weekly Highlights-Domestic Market:

Pulses Sector-Highlights

- **With favorable weather condition rabi pulses sowing is running smoothly. Farmers** have planted 167.38 lakh ha area so far against normal of 144.89 lakh ha. Out of total farmers have covered 112.00 lakh ha area under gram against normal of 92.77 lakh ha. Farmers have covered 16.54 lakh ha under lentils (normal 14.24 lakh ha), 10.69 lakh ha under field pea (normal 8.78 lakh ha), 8.09 lakh ha under urad (normal 8.93 lakh ha), 6.59 lakh ha under moong (normal 9.86 lakh ha), 6.44 lakh ha under other pulses (normal 6.04 lakh ha). Gram area is running ahead by 4.37 % from last year so far, field pea down by 2.55%, lentils up by 2.54 %, other pulses up by 11.79%. Moong coverage is down by 1.05 % so far. Farmers may increase sowing activities in coming weeks under moong and urad.
- **Cash chana market traded under pressure in the first half of January and recovered** slightly in the second half on the back of confusion over cess for least developed countries. Apart from it expected delay in arrivals too played an important role to push market up. Nafed's decision to sell stock not below 4875 helped market to move up by Rs100-200. However, 4.37% higher area coverage (112 lakh ha) from last year, good crop condition and likely 11MMT production would not allow chana market to move up beyond a certain extent despite Nafed's intention to buy around 2 MMT chana on MSP. New arrival starts in Gujarat and south Indian states in limited quantity and arrivals may increase by the end of this month. So inner tone in chana cash market remains weak. The new season is likely to start with 2.1 MMT carry in. So, Supply seems at comfortable level throughout the year.
- **Comparatively lower production estimates for tur, ranging from 3.7 to 3.95 MMT in MY 2020-21,** poor availability in Mozambique, Tanzania and Myanmar, low arrivals in Karnataka and Maharashtra and decreasing stock with Nafed are driving tur price up in the local market. Even stockists are active at higher price. Farmers too are releasing limited stock sensing uptrend to continue. So, there is strong inner tone in the market. Under prevailing condition market may move up by 300 to 500 more from current level and touch Rs70,00 again. Fresh arrival from UP, Bihar and MP is expected from end March –April, so market is unlikely to see any respite in Feb month. In Gulberga market tur is being sold at Rs 6500-6600 loose mandi price.
- **Urad cash market traded firm as supply side is tight right now amid lower import** flow and poor arrivals from early shown rabi crop. Demand for daal has increased while farmers/stockists are not releasing stock. Bulk arrival is expected only in March from local crop. So overall tone seems firm and market may move up by Rs 100-200 from current level. Procurement by Nafed is rather slow as prices are ruling above MSP right now and may continue to rule at higher level. Big kharif crop is around 6th month away, so any major decline is unlikely in coming weeks. Rabi crop size is smaller and it consumes locally in south India. If demand decreases at higher level, slight downward correction is possible at the end of this month.
- **Moong cash market is likely to trade range bound as supply demand side is almost** balanced. Pressure might be felt when new crop would start hitting market from Odisha. Crop condition of moong is good in AP, Tamil Nadu, Orisha from rabi season in March end. Import flow would remain restricted from as there is no parity at current level. Apart from it availability in Myanmar is low this year. Prices in the market like Gannavaram traded down at 7600-7700 during the week. In north and central India, prices have decreased below MSP for low quality crop.. Sideways movement is expected in Feb in Moong market. Arrival from Rabi crop is expected from end Mar from south India too.
- Current uptrend in masur market is unlikely to continue as new crop is at hand and importers would prefer to offload imported stock before new crop hits in March. Crop condition is good and Agriwatch expects 13.00-13.50 lakh Mt production this year under normal weather condition. Ample availability of imported stock and

likely new arrivals soon may push down lentils prices in domestic markets. Lentils price may decrease to Rs-4750-4800 by end Feb/March. New crop would hit market in Feb end/March. Overall tone seems bearish. Current uptrend is unlikely to continue in Feb and March.

- **Peas import remains halted as the DGFT has not allowed an additional import beyond 1.5 lakh Mt for the ongoing season.** Arrivals in domestic markets are increasing and it may push prices down in coming weeks despite poor stock at ports. Demand too is weak at higher level. Consumers preferred to shift to other pulses as prices are higher.

Global Market:

- **Available supplies of lentils decreased considerably on December 31, with Statistics Canada reporting there were 1.848 million metric tons (MT) remaining in commercial positions and on farms.** Apart from this the previous year, stocks totalled 2.41 million MT. On farm stocks sank from 2.229 to 1.683 million MT, while commercial inventories slipped from 181,000 to 165,000. A considerable increase in export movement between August and December was the primary reason for the change. Shipments to all destinations jumped from around 810,500 to just under 1.2 million MT, lifting inferred usage from 828,000 to 1.27 million MT as per stat pub .com
- **Lentils production in US for 2020 has been pegged at 336,201 MT based on 514,000 acres.** Lentils production is up by 40% from last year with a USDA production estimate of 7.41 million cwt. Planted acreage was up 9% from 2019 with 528,000 acres in 2020, and harvested acreage was up even more, 21% at 514,000 acres. Average yield is estimated at 1,442 pounds per acre in the U.S., as per data release by the National Agricultural Statistics Service.
- **The USDA has released its final pulses production report of the year this Tuesday, Jan. 12, 2021 by the National Agricultural Statistics Service.** As per new data dry peas are compiled by the National Agricultural Statistics Service. Dry peas production for 2020 has been pegged at 985,976 MT on 973,000 acres. Dry pea production as an average of all U.S. pea growing regions is down approximately 2% of last year, sitting at 21.7 million cwt in 2020, almost 986,000 MT, with planted acreage hitting 1 million acres. Harvested acreage hit 973,000 with an average yield of 2,234 pounds, an increase of 111 pounds an acre, the highest yield recorded since 2004. The drop in total production for dry peas from 2019 reflects the decline in planted and harvested acres of 9% and 7% respectively.
- **Lentils production in Canada is expected to increase by 29 % to 2.9 MMT in 2020-21** due to higher yield and coverage area. Out of total production of red lentils would increase to 2.1Mt while large green lentils production may decrease to 0.6 MMT, followed by other types at 0.2 MMT. Export may increase slightly from 2861 to 2900 Kt. Average price for the ear may rule at \$625 per MT.
- **Dry peas production in Canada is expected to increase by 8 % to 4.6 million tonne due to 10 % higher yield** in major growing states in 2020-21. The major producing states like Alberta and Saskatchewan may contribute 4.1 MMT. Out of total production yellow peas would contribute 3.5 MMT. Average price may rule near \$295 per MT. Canada may export 3.8 million MT in 2021.
- **Global field peas market traded slightly up on the back of higher buying by exporters** for meeting sales commitments. Whole green and yellow peas prices are increasing in Canada and USA too as they paid farmers higher prices. Maximum stock in Canada has been sold out by farmers. It leads to higher prices of peas.
- **Lentils production in Australia is expected to decrease by 6.89% from 5.34 to 4.97 lakh tons in 2020-21.** It is due to lower coverage (6.11%) of area from last year. Victoria and South Australia are major producing regions that contribute 92% of total production.

Pulses-Wise Scenario:

Chana

Current Scenario:

Cash chana market traded down in January by 3.83% to 4592 in January-2021 in comparison to Dec-2020. Higher carryout stock and likely bumper production would continue to pressurize market in February despite Nafed intension to buy 20 lakhMT chana in 2021. Nafed is not selling old chana below Rs 4875 per qtl. At this level offtake from Nafed is rather slow. As crop size is expected to be around 11 MMT, so availability would remain at comfortable level throughout the year. Chana in peak arrival season may hover in the range of Rs 4400-4600 per qtl. against MSP of Rs 5100 for new season. crop condition is good so far and new arrival has started in Gujarat in limited quantity. Peak arrival season is March and April in India.

All India average price of chana decreased by 3.83% to 4592 in Jan-2021 against Rs 4775 in Dec-2020. However, Australian chana too increased by 4.14 % to Rs5256 % per qtl in Mumbai market MoM basis. As there is normal demand for dal, prices of chana is unlikely to improve much from current level. Following graph illustrates chana price movement in different markets:

Market Outlook: Steady to slightly firm movement is expected in cash chana market this week. Nafed's current selling strategy would continue to determine price trend in coming weeks. Indian importers have imported around 4.87 lakh MT chana during April to Dec 2020.

Chana Weekly Technical Analysis:

Technical Commentary:

- Increasing price & OI hint weak sentiments in futures market in the short term.
- RSI is moving up in neutral region, hints caution to bears.
- Prices closed below 9 and 18 days EMAs
- Candlestick chart hints firm momentum in the market.

Strategy: Buy on Dip

Supports & Resistances			S1	S2	PCP	R1	R2

Weekly Trade Call*			Call	Entry	T1	T2	SL
Chana	NCDEX	Mar	Buy on dip	4600	4675	4725	4582

- Do not carry forward stock for next week.

Peas (Matar):
Market Recap:

Despite negligible availability of field peas at ports, prices of yellow and green peas have decreased with increasing flow of new arrivals of green peas in various markets. As arrival of green peas would increase in coming weeks, pressure on price might be seen. Arrival from new crop is expected to increase from mid Feb-2021, so stockists who have stocks of peas, are now selling it. Import is not taking place and the govt. is not in favor of allowing import above 1.5 lakh MT. As prices are lower in global market, Bangladesh and Nepal are buying more matar hoping for an arbitrage opportunity in selling to India. Demand is weak as other pulses are available comparatively at cheaper price. Matar in Kanpur market is being traded at Rs6400-6500 per qtl.

Despite stable demand for peas and daal, prices are expected to trade steady to slightly weak. Govt. is not in favor of additional import despite higher prevailing price in domestic market. As prices are higher, area may increase this year by 3 to 5 percent. As of now farmers have covered 10.69 lakh ha against season's normal of 8.78 lakh ha. It is down by 2,55 % at the end of Jan-2021. Following chart shows price movement in various markets:

Current Market Dynamics & Outlook: Peas market traded slightly down due to new arrivals. Stockists are now willing to sell before pressure from new arrival builds up.. In Kanpur market it was quoted at Rs 6100-6200 per qtl. Overall, all India average weekly price was up by 2% to Rs 6200 per qtl. In Mumbai market, there was no quote for yellow peas as stock has been exhausted. Canadian yellow pea in Kolkata is being traded at Rs 6700-6850. No trade has been reported at this price this week too.

Spread With Chana:

Spread between Chana and Peas, at Kanpur market remained in negative zone. Gap has decreased considerably from Rs 1750 to Rs 1400 due to decreased peas price. Spread is expected to remain in the negative zone in Feb too on relative movement in Chana prices. Overall outlook seems steady to slightly weak this week too.

Gap has increased from Rs 1700 to Rs 1400 in last one month, based on monthly average of the price. Spread is expected to remain at negative zone in Feb too on relative movement in Chana prices.

Market Outlook For Feb: Weak movement is expected in Feb-2021.

Market Outlook: Steady to slightly weak tone may prevail.

Lentils (Masoor):
Market Recap:

Lentils prices may cool down with easing supply side from import and smooth sowing activities, supported by congenial weather condition in major producing states like Madhya Pradesh, Uttar Pradesh and Bihar. Agriwatch expects 13.25-13.50 lakh Mt production this year under normal weather condition. Major exporters like Australia and Canada are trying to sell as much as they can before duty revision from 10 to 30% from 1st Jan-2021. Pulses prices may be under pressure due to increasing rabi area and higher flow of import this year. Lentils price may decrease to Rs-4750-4800 by end Feb. New crop would hit market in Feb end. Overall tone is bearish. Current uptrend is unlikely to continue.

At Mumbai ports importers are selling masur at Rs 5100-5150. As prices are ruling near MSP in domestic market, Nafed would not sell its stocks until price moves up again. Old stock with Nafed is around 21,000 MT. Supply side would be at comfortable level as import flow would continue till Dec-2020. In Feb, it may move down slightly and rule in the range of Rs 4700-5000.

Current Scenario:

Ample stock is available at ports .At Mumbai ports importers are selling masur at Rs 5100-5150. Any spike in masur market is unlikely. Demand is stable, so price may trade in limited range this week too. Higher import flow would also cap market.Current upward momentum is unlikely to continue.

Market Outlook: Prices may trade steady to slightly weak due to new arrival from last week of Feb. Overall tone in masur market remains weak in the first week of Feb-2021..

Pigeon Pea (Tur/Toor):

Market Recap:

Tur cash market may move further up as pace of arrival is comparatively lower at this point of time. Private trades are active and buying at increased price .Cash market has crossed MSP and are moving toward Rs7000-

7500 against MSP of Rs 6000. Even farmers are unwilling to sell at prevailing price as they expect market to go up further. New crop is coming into markets of Karnataka and Maharashtra and is expected from U.P., Bihar & M.P. from end March –April. So any downward correction is unlikely immediately. Even import from overseas market would not exceed above 4 lakh MT due to low availability. Nafed would have to face difficulty to get bulk quantity at MSP this year. It may hardly procure 1 to 1.25 lakh MT this year. In brief, overall outlook remains firm. Market may move up to Rs 7500 but not before a correction of Rs 400.

Crop condition is good so far. Indian farmers had covered 48.49 lakh ha against 45.88 lakh ha last year. As per Agriwatch estimate India may harvest 38.15 lakh Mt crop this year. Weather condition in next one month is very crucial for driving price up and down in Feb-2021. Overall tone is firm.

Current Market Dynamics & Outlook:

India imported around 1.28 lakh MT tur in Dec-20, the first month of the MY-20-2021 for tur. India imported around 4.25 lakh MT tur (Dec-2019 to Nov-2020 last year). This year the volume may decrease below 4 lakh MT. It would affect total availability in the market. Stockists and traders may try to push up market by holding crop till June –July-2021. If monsoon starts with good rainfall, area may increase and good sowing may help market to cool down. But second quarter is very tricky at price point of view. Nafed may release stock to cool down price but not before procurement ends in April. So, market may continue to trade firm. Some correction might be seen at Rs 7000 as profit booking might be seen by private trades at higher level. Tur in Gulberga market traded at Rs 6600-6800 per qtl and may cross Rs 7000 soon. If yield loss is seen in U.P. crop too, prices may move further up.

Nafed has procured 6985 MT Tur in January-2021 at minimum support price of Rs 6000. The maximum (6185 MT) tur has been procured in Karnataka, followed by Mh at 801 MT. As prices are ruling above MSP, procurement quantity would be much less than normal expectation. Arrival is lower at this point of time. Farmers are holding stock in anticipation of higher prices in coming weeks. Private trades are active and it shows prices to move up further if arrival stays steady.

In the first week of Feb-2021, average price in Gulberga market was up by Rs 350 to Rs 6450-6550 due to commencement of procurement and slower release by farmers. It may continue to support prices in coming weeks. Apart from this likely restricted selling by Nafed may support market in coming weeks.

Black Matpe (Urad):

Urad cash market traded firm as supply side is tight right now amid lower import flow and poor arrivals from early shown rabi crop. Demand for daal has increased while farmers/stockists are not releasing stock. Bulk arrival is expected only in March from local crop. So overall tone seems firm and market may move up by Rs 100-200 from current level. Procurement by Nafed is rather slow as prices are ruling above MSP right now and may continue to rule at higher level. Big kharif crop is sixth month away, so any major decline is unlikely in coming weeks.

Current Market Dynamics & Outlook:

Arrival from rabi crop is about to start. However crop size is lower and it would be consumed locally in Andhra Pradesh and Tamil Nadu. From states, crop would hit market in April. So, any major decline in urad market is unlikely at this point of time. Major urad crop comes in kharif season. As availability in Myanmar too is low and price up, bulk volume import is not possible in Feb and Mar-2021 too. India imported around 38,000 MT urad in Dec-2020. The volume may increase to 40-45,000 MT in Feb. From April to Dec-India imported only 1.38 lakh MT urad. Urad may trade range bound in Feb, as demand at higher level may be disrupted.

Market Outlook: *Urad Prices are likely to show side ways movement.*

Green Gram (Moong):

Market Recap:

Moong cash market is likely to trade range bound as supply demand side is almost balanced. Pressure might be felt when new crop would start hitting market from Odisha. Crop condition of moong is good in AP, Tamil Nadu, Orisha. Import flow would remain restricted as there is no parity at current level. Apart from it availability in Myanmar is weak this year. Prices in the market like Gannavaram traded down at 7600-7700 during the week. In north and central India, prices have decreased below MSP for low quality crop.. Sideways movement is expected this week in Moong market. . Arrival from Rabi crop is expected from end Mar.

Rabi area is expected to increase this year. Farmers have covered only 6.59 lakh has so far against the normal of 9.86 lakh ha. Pressure from the Rabi crop may be felt only in March 2021. Farmers in AP have covered 0.70 lakh ha against the normal of 1.29 lakh ha. Rabi's normal area is 9.86 lakh ha. Agriwatch expects 14.95 lakh MT kharif production as per revised estimates after discounting the flood and higher rains generated loss. Total production including Rabi is expected to move up by 2.39 lakh Mt to 21.45 lakh Mt this year.

Rabi area is expected to increase this year. Farmers have covered only 6.59 lakh has so far against the normal of 9.86 lakh ha. Pressure from the Rabi crop may be felt only in March 2021. Farmers in AP have covered 0.70 lakh ha against the normal of 1.29 lakh ha. Rabi's normal area is 9.86 lakh ha. Agriwatch expects 14.95 lakh MT kharif production as per revised estimates after discounting the flood and higher rains generated loss. Total production including Rabi is expected to move up by 2.39 lakh Mt to 21.45 lakh Mt this year.

Market Outlook: Moong prices are likely to trade steady to slightly weak in the near term.
