Weekly Highlights-Domestic Market:
Pulses Sector-Highlights

- **Rabi pulses sowing, especially chana, lentils, peas and moong is over now and urad** sowing too has entered in the last phase now. In case of moong summer sowing is on and would end by mid March. Arrival of summer moong is expected in April and may continue in May too. Crop condition is good so far. However, weather condition in rest of February and March is very crucial for Chana, urad, moong and lentils. Arrival of new lentils in M.P. has already been started while tur arrival from UP and Bihar is expected in April. Right now tur is coming into markets of Maharashtra, Karnataka, A.P., M.P. and Gujarat. Crop is said to be similar to last year despite higher area coverage as size of the grain is said to be slightly small this year. In case of chana crop condition is normal. However, some doubts, regarding yield are emerging over Rajasthan's crop. New arrival started in Gujarat and A.P.
- **Tur production estimate has been revised down from 38.15 to 37.28 lakh MT for the ongoing season.** Area decreased from Maharashtra from 12.80 to 12.47 lakh ha. In case of yield Karnataka yield has been revised down to -5% from earlier -1%, Maharashtra from -8% to -10% and Madhya Pradesh from -3% to -5%. We have considered total All India acreage at 47.87 lakh ha from earlier 48.17 lakh ha. Under prevailing circumstances import fig has been reduced from 5 to 3.80 lakh MT. This leaves ending stock at 4.84 lakh MT (earlier 5 lakh MT) and stock to use ratio at 11.17% from earlier 15.69%. This adequately explains the current market prices. Market fundamentals seem firm.
- **Urad cash market traded slightly up despite weak demand for daal. Stocks are at strong hands** while it is low at ports. Maximum import (80 to 90 %) has been completed for ongoing financial year. So, there is negligible stock at mills located near ports. New arrival in AP and Tamil Nadu is expected to be consumed locally due to lower rabi crop size. So steady to firm tone may prevail in urad cash markets this month. As per market sources loading of 15600-16800 MT urad on BLPL BLESSING V in Myanmar stands cancelled due to unknown reasons. Now importers are considering optional vessels. It may delay import by 8 to 10 days from Myanmar. Trade disturbance in Myanmar may disrupt normal loading-unloading of Cargo. Under prevailing condition steady to firm tone may prevail.
- **Rabi sowing of moong is almost over and now farmers are engaged with summer sowing.** Summer sowing starts from end-Jan and ends in April and varies from one region to others. Right now Rajasthan has sufficient stock to cater the needs for moong industries. If demand improves, slight upward momentum might be seen in coming weeks. Prices may soften again when summer crops start hitting the market in end April. Thereafter, monsoon rains in June and July would be driving force for price. We expect good crop as M.P. has benefits of good rains and moisture in the field. Moong chamki in Jaipur market is being traded at Rs7200, near MSP. Sideways movement may prevail this week.
- **New arrivals of Chana start in Andhra Pradesh, Tamil Nadu and Maharashtra and grains are** said to be normal to good. Pressure is expected from mid-March. Crop condition in Rajasthan, M.P., & Karnataka is normal to good so far. Prices seem under pressure due to likely good crop size (11 MMT) and ample old stock (2.2 MMT public & private) this year. Govt.'s agency may procure over 2 MMT chana this year. If crop in Rajasthan fares well, availability would be ample throughout the year.
- **Arrival of new masur starts in MP while it is expected in Bihar by the end of the month.** Crop condition is good so far. Prices are ruling steady and is expected to decrease with increasing arrivals. Import flow is limited as

Canada is quoting high price due to lower carry in this year. Right now demand for masur daal is weak ahead of new crop. Landed price at Mumbai is Rs 5450 while it is being traded at Rs same price in Kanpur. Price may come down as arrival would increase in MP, followed by Bihar and West Bengal. Market may be stable near MSP at peak arrival season.

Global Market:

- **As per the latest Eurostat data import of field peas by Spain down by 40% to 8835 metric tons** in December. It was 14,744 Mt in Nov-2020. Thus total import from Jan to Dec-2020 was recorded at 176,175 MT. It was 190,534 Mt in 2019. Russia supplied 6255 MT, Luxembourg-1932 MT and France exported 373 MT in Spain in Dec-2020. Import volume is likely to decline in Jan -2021 too. Lithuania's shipments of field peas during December too declined in Dec to 3,597 metric tons, down 76% from the 15,218 MT exported the Nov. Shipments so far total 142,335 MT from Jan to Dec against 172,186 in the same period last year.
- **Lentils export from Australia increased sharply in Dec-2020 as per data released by Australia Bureau of Statistics.** Total movement in Dec increased to 101,148 MT up by 189% from the previous month's total of 34,974. So far export sales have totalled 136,121 MT, up from 135,053 in the same period the last marketing year. India purchased 42,154 MT, Bangladesh 15,256 MT & Sri Lanka 14,970 MT.
- **Chickpeas production in Australia is expected to increase from 2.81 to 7.55 lakh Mt in 2020-21.** Even field peas production would increase from 2.19 to 2.94 lakh MT in 2020-21. Even lentils production may increase from 5.34 to 6.34 lakh Mt in 2020-21.
- **Available supplies of lentils decreased considerably on December 31, with Statistics Canada reporting there were 1.848 million metric tons (MT) remaining in commercial positions and on farms.** Apart from this the previous year, stocks totalled 2.41 million MT. On farm stocks sank from 2.229 to 1.683 million MT, while commercial inventories slipped from 181,000 to 165,000. A considerable increase in export movement between August and December was the primary reason for the change. Shipments to all destinations jumped from around 810,500 to just under 1.2 million MT, lifting inferred usage from 828,000 to 1.27 million MT as per stat pub .com
- **Lentils production in US for 2020 has been pegged at 336,201 MT based on 514,000 acres.** Lentils production is up by 40% from last year with a USDA production estimate of 7.41 million cwt. Planted acreage was up 9% from 2019 with 528,000 acres in 2020, and harvested acreage was up even more, 21% at 514,000 acres. Average yield is estimated at 1,442 pounds per acre in the U.S., as per data release by the National Agricultural Statistics Service.
- **Lentils production in Canada is expected to increase by 29 % to 2.9 MMT in 2020-21** due to higher yield and coverage area. Out of total production of red lentils would increase to 2.1 Mt while large green lentils production may decrease to 0.6 MMT, followed by other types at 0.2 MMT. Export may increase slightly from 2861 to 2900 Kt. Average price for the ear may rule at \$625 per MT.
- **Dry peas production in Canada is expected to increase by 8 % to 4.6 million tonne due to 10 % higher yield** in major growing states in 2020-21. The major producing states like Alberta and Saskatchewan may contribute 4.1 MMT. Out of total production yellow peas would contribute 3.5 MMT. Average price may rule near \$295 per MT. Canada may export 3.8 million MT in 2021.
- **Lentils production in Australia is expected to decrease by 6.89% from 5.34 to 4.97 lakh tons** in 2020-21. It is due to lower coverage (6.11%) of area from last year. Victoria and South Australia are major producing regions that contribute 92% of total production.

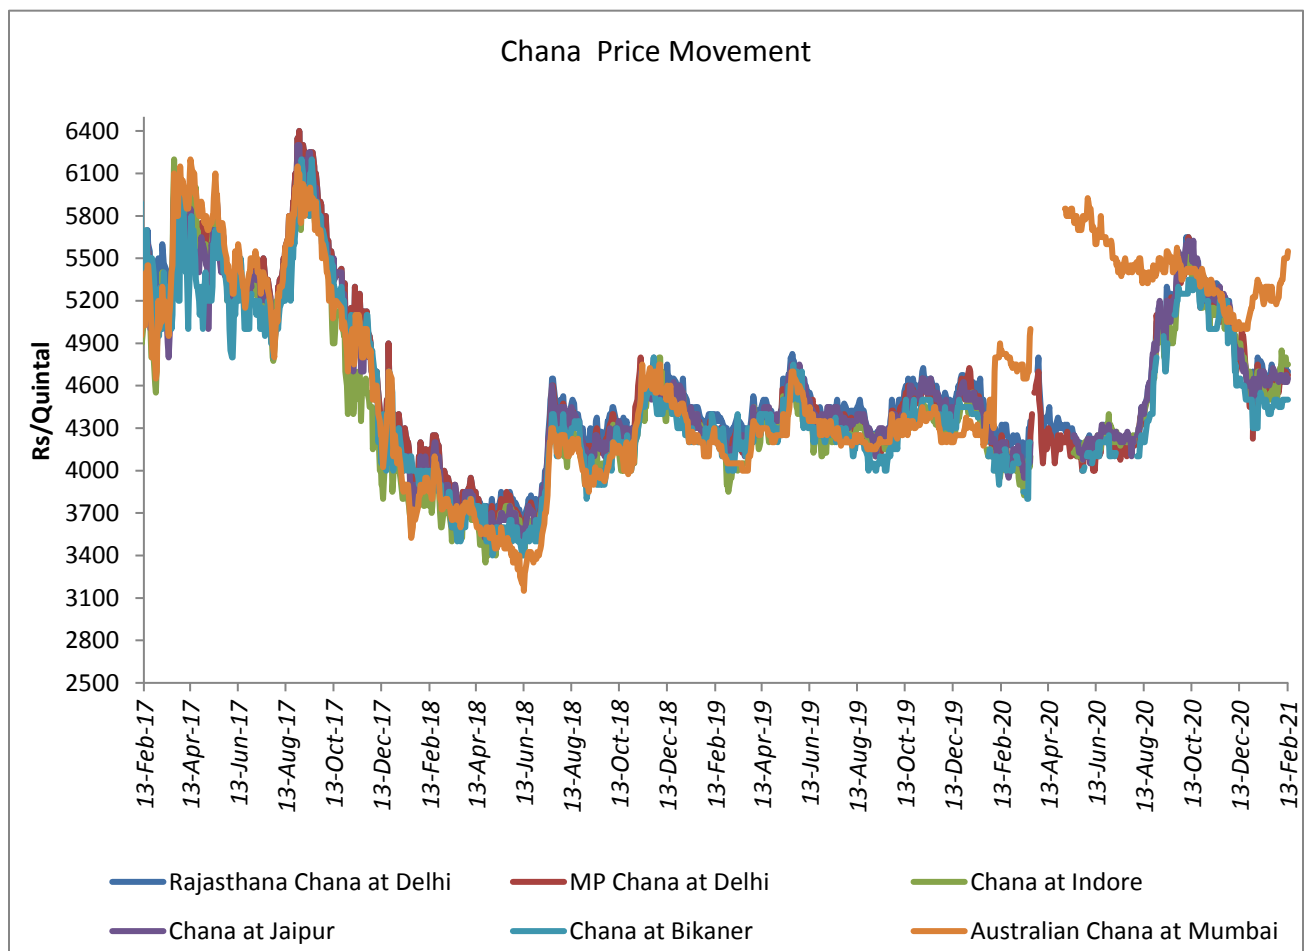

Pulses-Wise Scenario:

Chana

Current Scenario:

Cash chana market traded up by 0.53 % from Rs 4635 to Rs 4660 during the week under review. However, Australian chana gained smartly by 3.68 % to Rs 5508. New crop started in south Indian states like Andhra Pradesh, Tamil Nadu, followed by Gujarat and Maharashtra. Crop condition is good in all states except some doubts in Rajasthan, where yield may be lower than normal expectation due to lower rains during growth stages up to now. Moisture stress in the field may affect normal yield in Rajasthan. Despite increasing fear of lower yield in Rajasthan overall supply side would be at comfortable level throughout the year as the new season would start around 2 MMT carryin stock. Pressure might be seen on chana price despite nafed intension to buy over 2MMT chana this season.

As there is normal demand for dal, prices of chana is unlikely to improve much from current level. Following graph illustrates chana price movement in different markets:

Market Outlook: Sideways movement is expected in cash chana market this week. Nafed's current selling strategy would continue to determine price trend in coming weeks. New arrivals too may put pressure on price until procurement starts. Indian importers have imported around 4.87 lakh MT chana during April to Dec 2020.

Chana Weekly Technical Analysis:

Technical Commentary:

- Decreasing price & OI hint weak sentiments in futures market in the short term.
- RSI is steady in neutral region, hints sideways movement to continue.
- Prices closed below 9 and 18 days EMAs
- Candlestick chart hints weak momentum in the market.

Strategy: Sell on rise

Supports & Resistances			S1	S2	PCP	R1	R2
Chana	NCDEX	Mar	4576	4482	4609	4705	4745
Weekly Trade Call*			Call	Entry	T1	T2	SL
Chana	NCDEX	Mar	Sell on rise	4650	4575	4550	4680

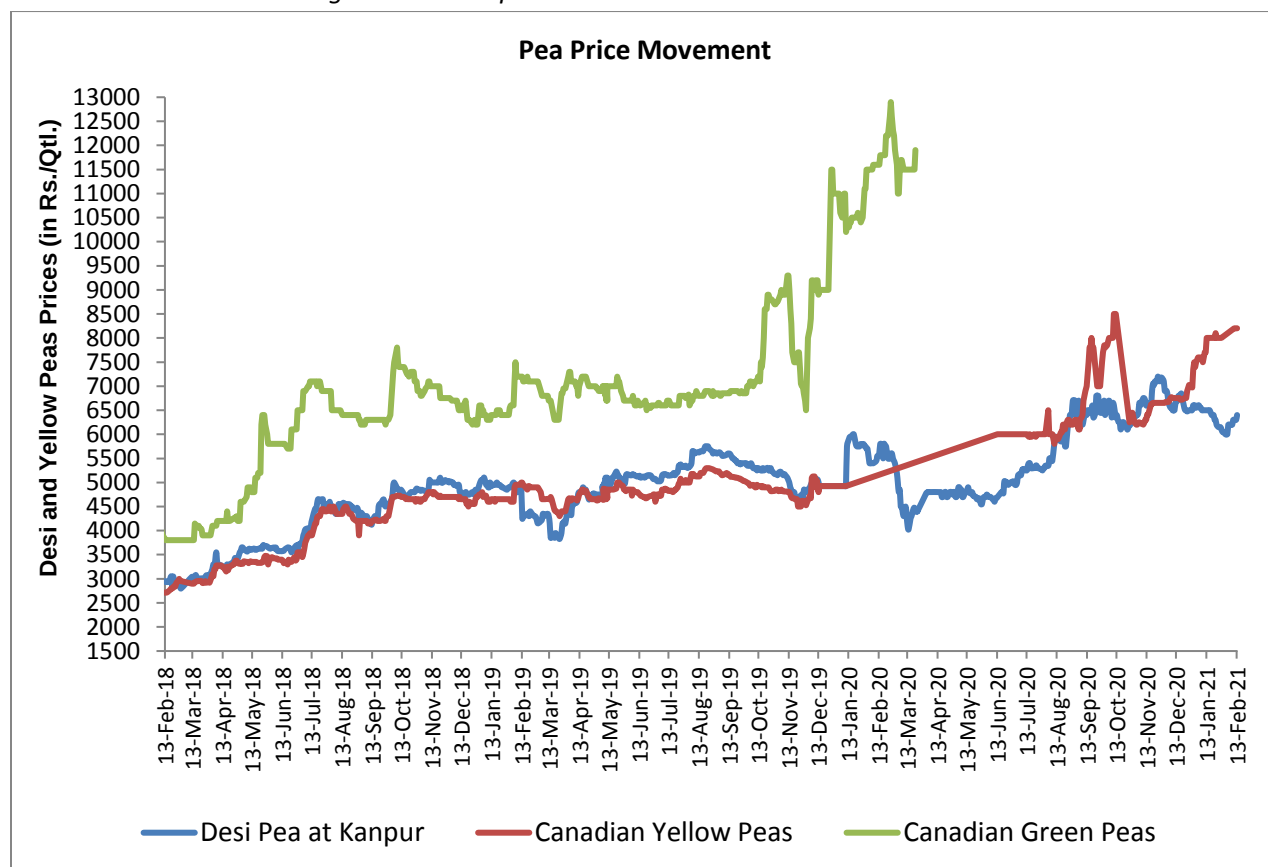

- Do not carry forward stock for next week.

Peas (Matar):

Market Recap:

Despite negligible availability of field peas at ports, prices of yellow and green peas have decreased with increasing flow of new arrivals of green peas in various markets. As arrival of green peas would increase in coming weeks, pressure on price might be seen. Arrival from new crop is expected to increase from mid Feb-2021, so stockists who have stocks of peas, are now selling it. Import is not taking place and the govt. is not in favor of allowing import above 1.5 lakh MT. Demand is weak as other pulses are available comparatively at cheaper price. Matar in Kanpur market is being traded at Rs 6400 per qtl. Green peas was quoted at Rs 8200 due to negligible availability in the local market.

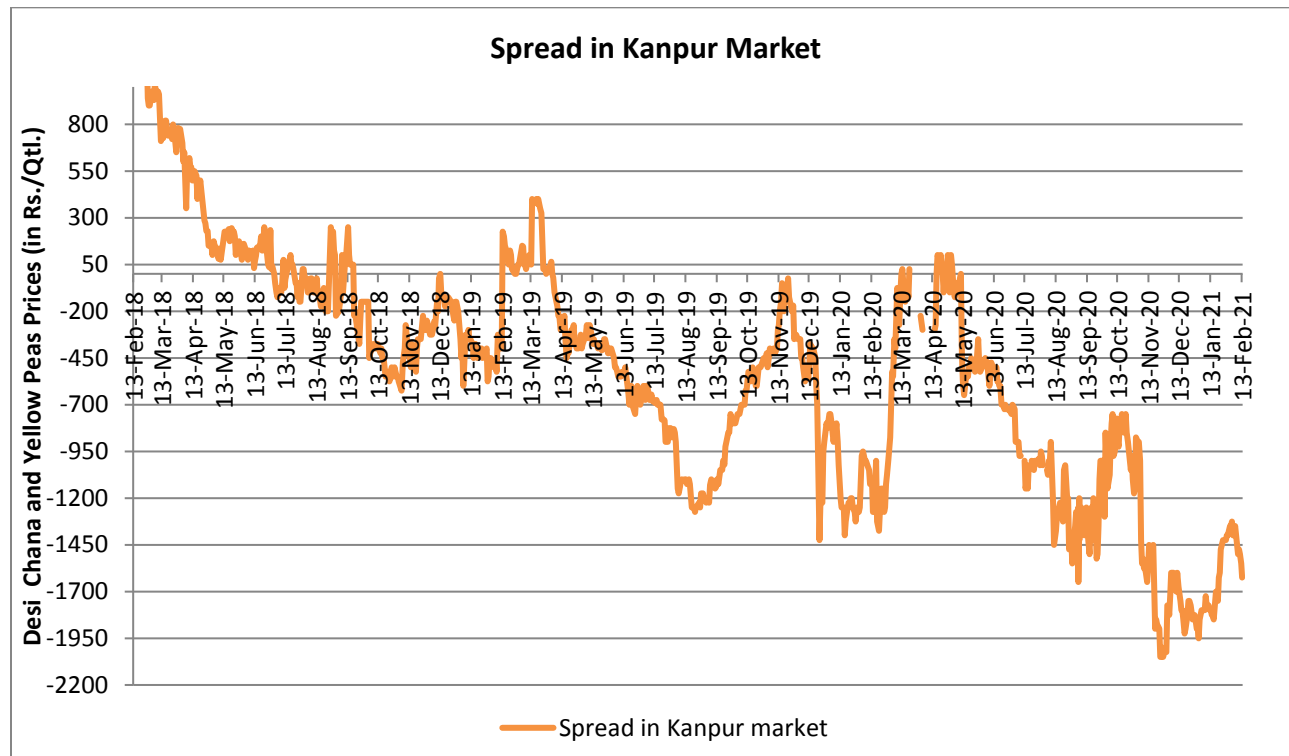

Despite stable demand for yellow peas and daal, prices are expected to trade steady to slightly weak. Govt. is not in favor of additional import despite higher prevailing price in domestic market. As prices are higher, area may increase this year by 3 to 5 percent. As of now farmers have covered 10.69 lakh ha against season's normal of 8.78 lakh ha. It is down by 2.55 % at the end of Jan-2021. In Kanpur market prices decreased by Rs 100 to Rs 6400. Following chart shows price movement in various markets:

Current Market Dynamics & Outlook: Peas market traded slightly down due to new arrivals and weak demand. Stockists are now willing to sell before pressure from new arrival builds up.. In Kanpur market it was quoted at Rs 6400 per qtl. Overall, all India average weekly price was down by 2.5% to Rs 6320 per qtl. In Mumbai market, there was no quote for yellow peas as stock has been exhausted. Canadian yellow pea in Kolkata is being traded at Rs 6600-6700. No trade has been reported at this price this week too.

Spread With Chana:

Spread between Chana and Peas, at Kanpur market remained in negative zone. Gap has increased considerably from Rs 1400 to Rs 1625 due to decreased peas price. Spread is expected to remain in the negative zone in Feb too on relative movement in Chana prices. Overall outlook seems steady to slightly weak this week too.

Gap has increased from Rs 1400 to Rs 1625 in last one week, based on weekly average of the price. Spread is expected to remain at negative zone in Feb too on relative movement in Chana prices.

Market Outlook For Feb: Weak movement is expected in Feb-2021.

Market Outlook: Steady to slightly weak tone may prevail.

Lentils (Masoor):

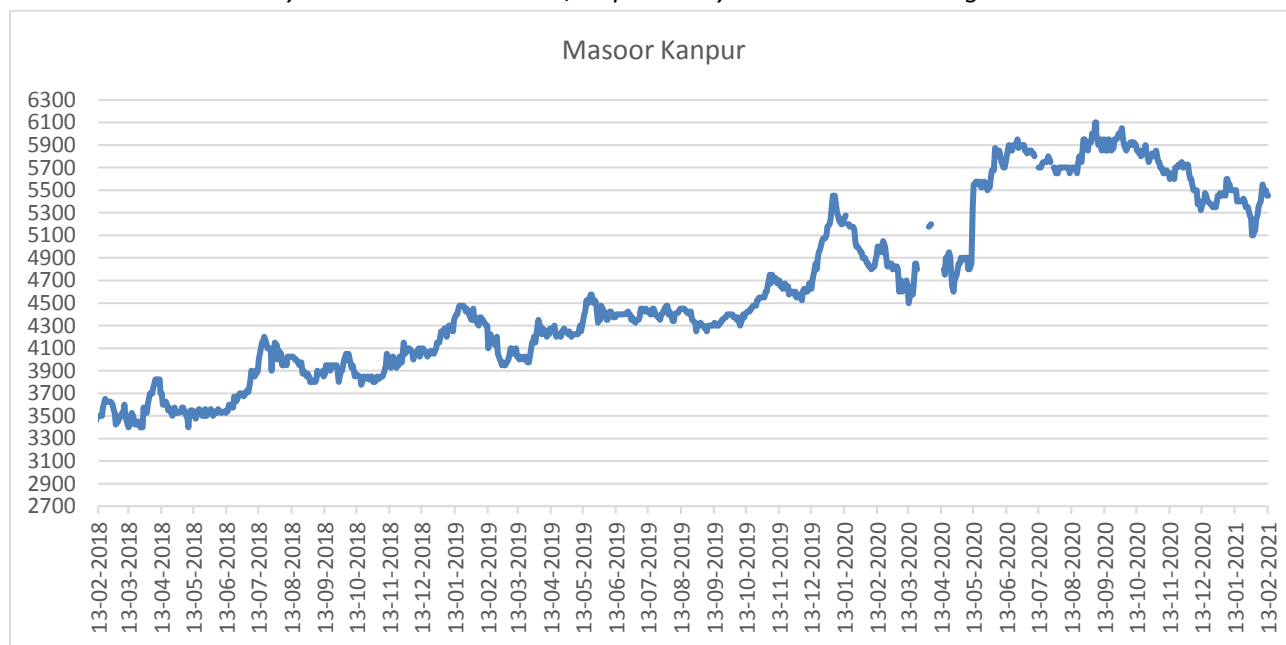

Market Recap:

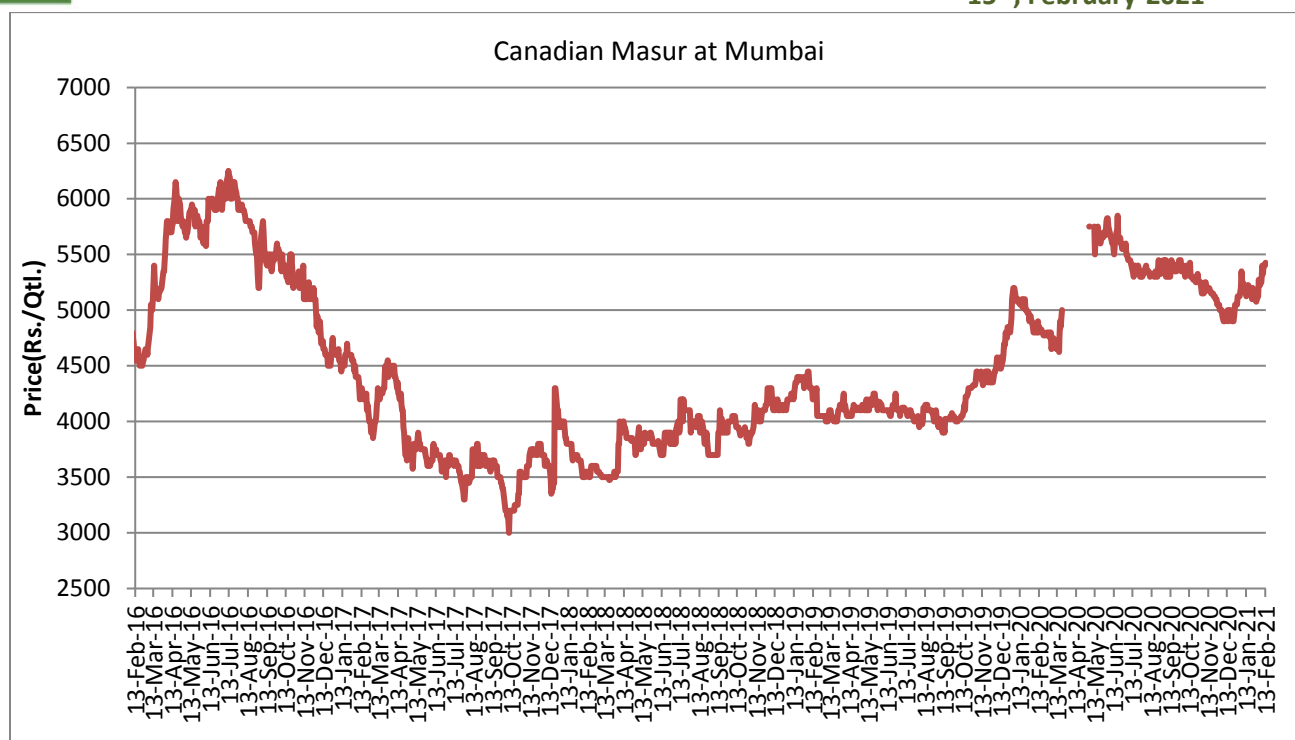

Lentils prices may decrease with increasing arrivals in Madhya Pradesh. Crop is nearing at maturity stages in Bihar while arrivals are expected in Uttar Pradesh by the end of this month. Higher stock of imported crop, new arrivals and weak demand at this point of time may pressurize lentils prices in coming weeks. Nafed is gearing up to procure lentils in M.P. & Bihar. lentil price is expected to decrease to Rs4800 to 5000 in mid – March. Stock of lentils in Canada is at comfortable level and prices may continue to rule at current level. So, any steep decrease is unlikely in coming weeks. There is a gossip in the market that India may import more lentils to fill the gap of tight supply side in other pulses like tur and urad. Lentils price may decrease to Rs-4800-5000 by mid March. Harvesting may be delayed in U.P. & Bihar by 10 days due to late sowing this year and high moisture level in the field. Overall tone is bearish. Current uptrend is unlikely to continue.

At Mumbai ports importers are selling masur at Rs 5400-5450. As prices are ruling above MSP in domestic market, Nafed may decide to sell its old stocks but not before procurements drive ends. Supply side would be at comfortable level as import flow would continue in 2021 too at regular intervals. In Feb, it may move down slightly and rule in the range of Rs 5100-5400.

Current Scenario:

Ample stock is available at ports. At Mumbai ports importers are selling masur at Rs 5350-5450. Any spike in masur market is unlikely now. Demand is weak, so price may trade in limited range this week too.

Market Outlook: Prices may trade steady to slightly weak due to new arrival and stock of imported stock at various ports. Overall tone in masur market remains weak in the third week of Feb-2021.

Pigeon Pea (Tur/Toor):

Market Recap:

Tur cash market may move further up as pace of arrival is comparatively lower at this point of time. Apart from this private players including new entrants have stored 20 to 25 % more stock this year in anticipation of uptrend to continue. Around 90% warehouses are full now in Maharashtra and Karnataka. Fear of low import volume from overseas markets, low stock with Nafed and stock in strong hands may continue to push up tur price in coming months to some extent. Right now demand for daal is weak and Rs200 to 300 down ward correction is expected in the short term. June onward price movement would depend on monsoon rains and sowing progress. In May-June prices may rule in the range of 7500-8000.

Nafed would have to face difficulty to get bulk quantity at MSP this year. It may hardly procure 1 lakh MT this year. In brief, overall outlook remains firm. Market may move up to Rs7500 but not before a correction of Rs 300-400.

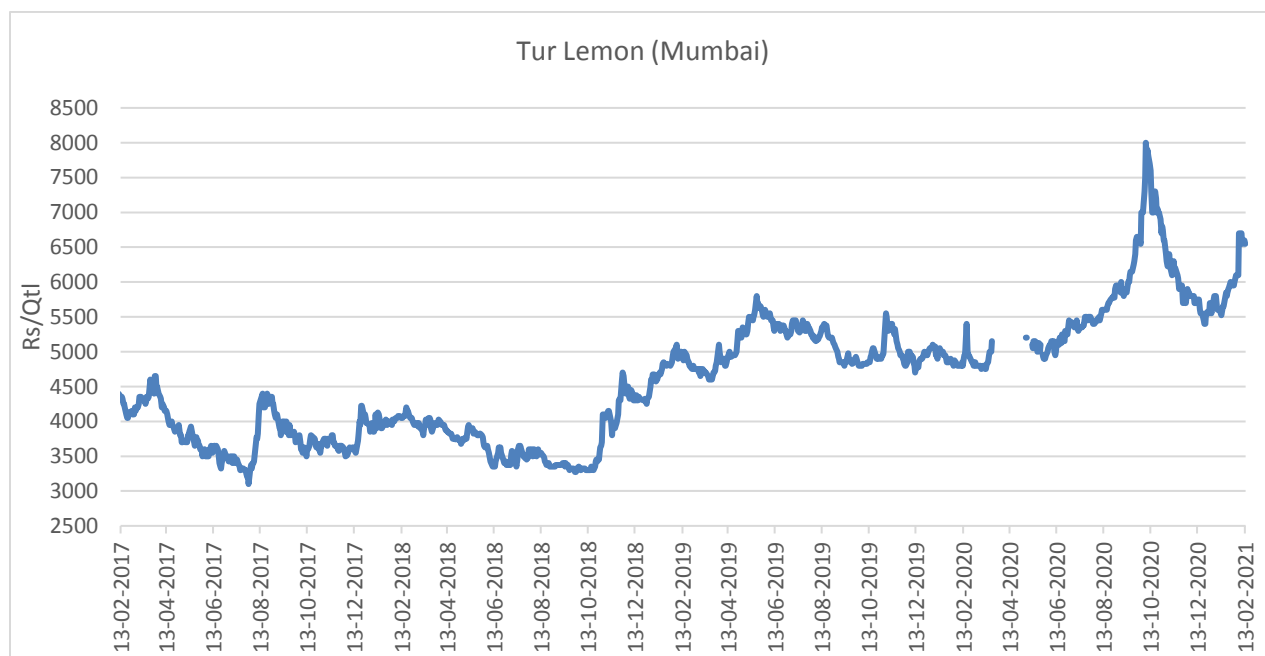

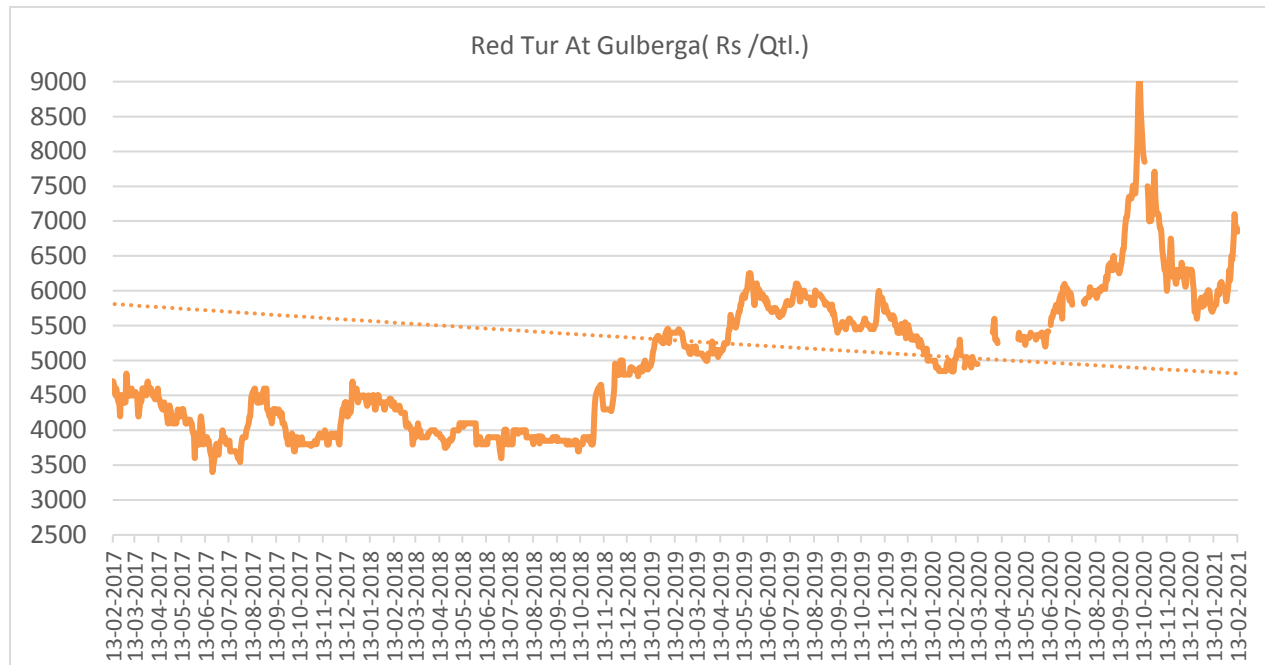

Crop condition is good so far. Indian farmers had covered 48.49 lakh ha against 45.88 lakh ha last year. As per Agriwatch estimate India may harvest 37.24 lakh Mt crop this year. Weather condition in next one month is very crucial for driving price up and down in Feb-March-2021. Overall tone is firm.

Current Market Dynamics & Outlook:

India imported around 1.28 lakh MT tur in Dec-20, the first month of the MY-20-2021 for tur. India imported around 4.25 lakh MT tur (Dec-2019 to Nov-2020 last year). This year the volume may decrease below 4 lakh MT. It would affect total availability in the market. Stockists and traders may try to push up market by

holding crop till June –July-2021.If monsoon starts with good rainsfall, area may increase and good sowing may help market to cool down. But second quarter is very tricky at price point of view.Nafed may release stock to cool down price but not before procurement ends in April. So, market may continue to trade firm.

Nafed has procured 10,000 MT Tur so far at minimum support price of Rs 6000.The maximum (8000 MT) tur has been procured in Karnataka,followed byMh at 1001MT.As prices are ruling above MSP,Procurement quantity would be much than than normal expectation.Arrival is lower at this point of time.Farmers are hlding stock in anticipation of higher prices in coming weeks.Private trades are active and it shows prices to move up further if arrival stay steady.

In the second week of Feb-2021, average price in Gulberga market was up by Rs 150 to Rs 6650-6750 due to commencement of procurement and slower release by farmers. It may continue to support prices in coming weeks. Apart from this likely restricted selling by Nafed may support market in coming weeks.

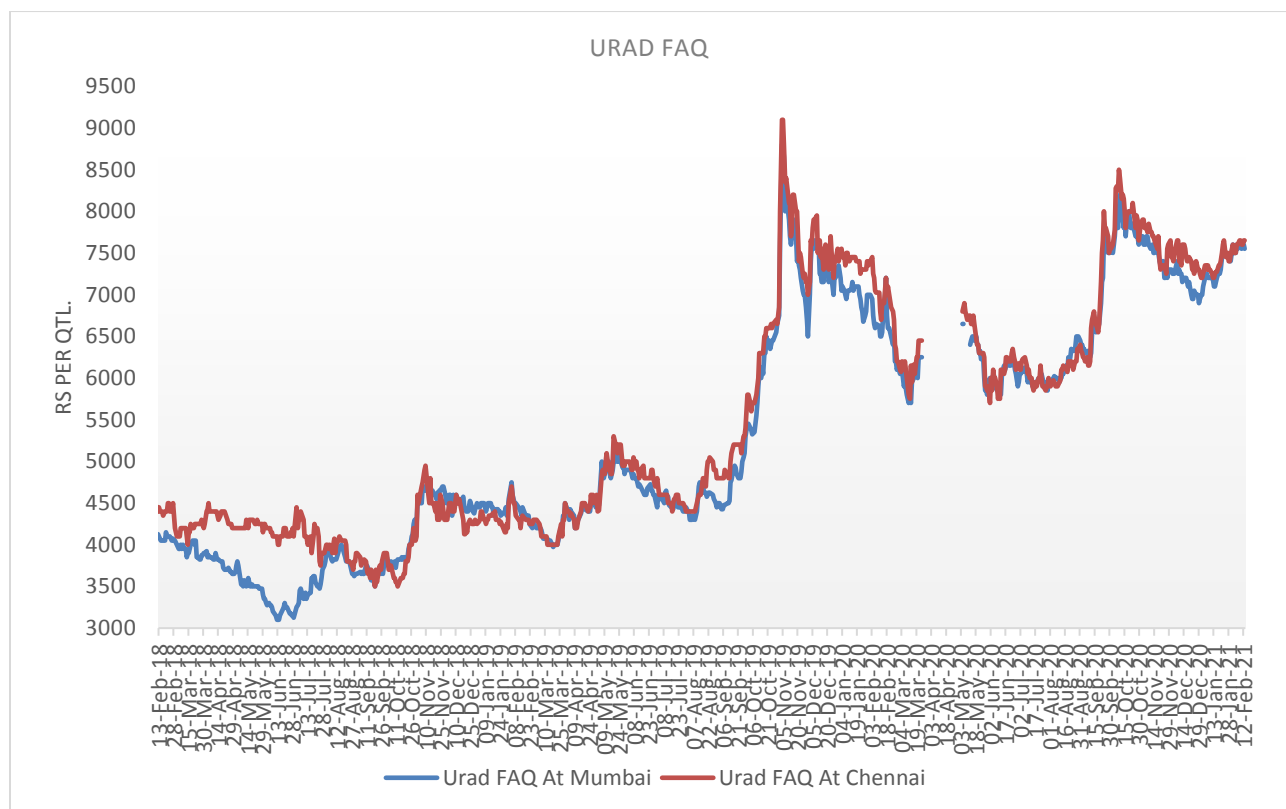

Black Matpe (Urad):

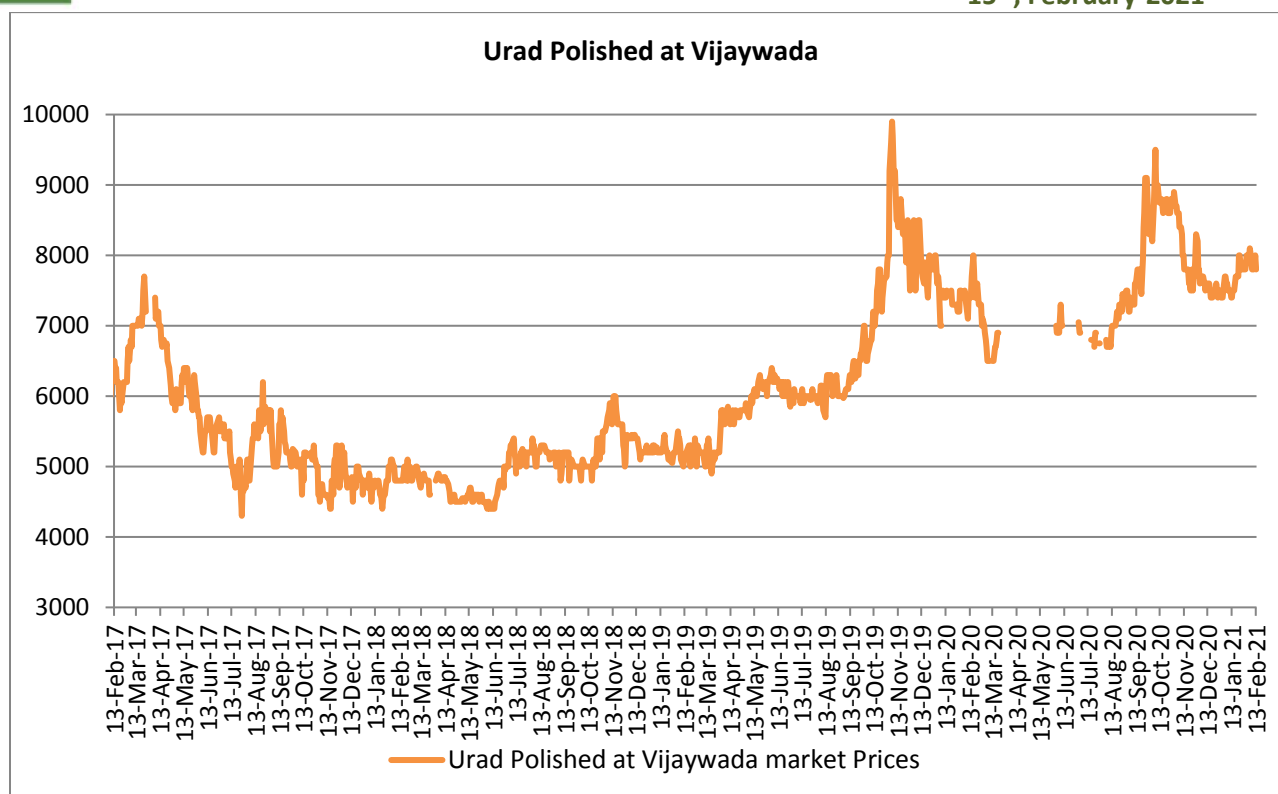

Urad cash market traded steady to slightly firm as supply side is tight right now amid lower import flow and poor arrivals from early shown rabi crop. Arrival pressure might be felt in March. Demand for daal has increased while farmers/stockists are not releasing stock. Bulk arrival is expected only in March from local crop. So , overall tone seems firm and market may move up by Rs 100-200 from current level. Procurement by Nafed is rather slow as prices are ruling above MSP right now and may continue to rule at higher level. Big kharif crop is sixth month away, so any major decline is unlikely in coming weeks.

Current Market Dynamics & Outlook:

Arrival from rabi crop is expected to increase in March . However crop size is lower and it would be consumed locally in Andhra Pradesh and Tamil Nadu. From states, crop would hit market in April. So , any major decline in urad market is unlikely at this point of time .Major urad crop comes in kharif season. As availability in Myanmar too is low and price up, bulk volume import is not possible in Feb and Mar-2021 too. India imported around 38,000MT urad in Dec-2020. The volume may increase to 40-45,000 MT in Feb. From April to Dec-India imported only 1.38 lakhMT urad.

Market Outlook: Urad Prices are likely to show side ways movement.

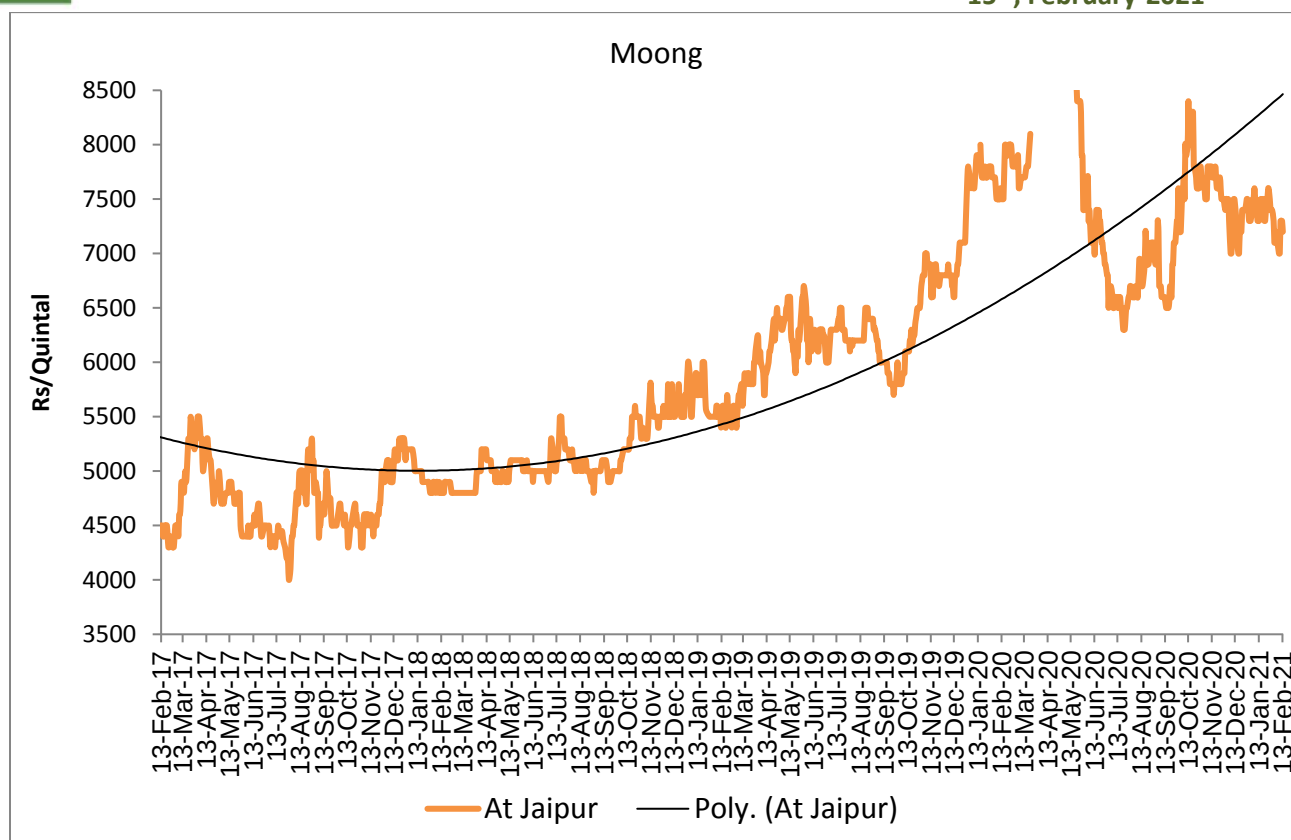

Green Gram (Moong):

Market Recap:

Moong cash market is likely to trade range bound as supply demand side is almost balanced. Pressure might be felt when new crop would start hitting market from Odisha in March end. Crop condition of moong is good in AP, Tamil Nadu and Orisha. Import flow would remain restricted as there is no parity at current level. Apart from it availability in Myanmar is weak this year. Prices in the market like Gannavaram traded down at 7500-7600 during the week. In north and central India, prices have decreased below MSP for low quality crop.. Sideways movement is expected this week in Moong market. . Arrival from Rabi crop is expected from end Mar.

Rabi area is expected to increase this year. Farmers have covered only 6.59 lakh has so far against the normal of 9.86 lakh ha. Pressure from the Rabi crop may be felt only in March 2021. Farmers in AP have covered 0.70 lakh ha against the normal of 1.29 lakh ha. Rabi's normal area is 9.86 lakh ha. Agriwatch expects 14.95 lakh MT kharif production as per revised estimates after discounting the flood and higher rains generated loss. Total production including Rabi is expected to move up by 2.39 lakh Mt to 21.45 lakh Mt this year.

Market Outlook: Moong prices are likely to trade steady to slightly weak in the near term.
