Commodity-wise Domestic, International Prices and Arrivals at Different Centers

Weekly Highlights-Domestic Market:

Pulses Sector-Highlights

- **Firm sentiment continued in chana cash market during the week under review** on increased fear of yield loss not only in Rajasthan but also in M.P. and Maharashtra too. Millers are active now amid procurement drive pushing market up. Farmers are willing to sell on MSP, so arrival flow is comparatively low. AW expects arrivals to increase as prices are nearing to MSP. Futures market too is hinting towards firm market. Yield realization is normal to good in Karnataka, Gujarat and Andhra Pradesh. Overall outlook seems steady to slightly firm in the short to medium term. Chana in Delhi market is trading near MSP and may dip slightly with increasing arrivals from M.P. and Rajasthan.
- **Crop condition of summer moong is normal to good condition. Arrival is expected to hit market from April.** Crop condition of moong in Odisha, M.P. & Bihar is normal to good. Arrival from rabi crop is decreasing now. Demand is weak and prices are expected to decrease in coming weeks. As there is shortage of quality crop, prices are ruling around MSP. Stockists too have started offloading stock just ahead of summer crop. Steady to slightly weak tone may prevail in next two three weeks. Thereafter, monsoon rains in June and July would be the driving force for prices thereafter.
- **Tight supply side and almost halted import flow from Myanmar due to political unrest** urad cash market traded firm. Millers are again active sensing disruption of supply from Myanmar. Stocks at ports are low. Stockists are aware that next big kharif crop will be available not before August, so they are holding stocks and started buying again. It has kept market well supported. Agriculture and commerce ministry has allocated 4 lakh MT urad quota for next financial year. However, import will not take place before end June and July. So market may move up further from current level.
- **Masur cash market traded firm against all expectation due to increasing fear of low crop size.** At 30 % duty, landed price at Indian ports comes to Rs 6000-6100. So, prices are not coming down. Farmers too have restricted stocks sensing strong inner tone in coming weeks. Harvest commences in U.P. and Bihar and arrival pressure is expected by the end of this month. Importers too are unwilling to offload stock and so at price front any immediate relief is unlikely. Crop condition in U.P. and Bihar is average. However, reports are coming from some parts that yield is not up to farmers normal expectation. Import flow too is limited as Canada is quoting high prices due to lower carry-ins this year. Demand for masur daal has started increasing. Landed price at Mumbai is Rs 5800-5950 while it is being traded at Rs 5775 in Kanpur.
- **Arrival of peas has started increasing in producing states. Stockists are waiting for dry peas.** Right now moisture level is higher and it will take at least 15 days to come it to normal level. They expect prices to decrease further, at least below chana. As demand too is weak amid increasing arrivals, prices are coming down. It is being traded at Rs 5100-5150 in Kanpur market. In Lalitpur market, around 14-15 thousand bags are arriving daily and it may increase to 20 thousand bags in next 10 days. In Jhansi market 3000-3500 bags are arriving daily. It is being traded at Rs 4500-4800. Agriwatch expects stockists buying from 20th March and it may restrict decreasing trend in peas market

Global Market:

- **Lentils production in Canada is expected to decrease from 28.68 in 2020-21 to 2.7 MMT in 2021-22** due to slightly lower area & yield. Export too are expected to decrease by 2 lakh MT to 25 lakh MT in 2021-22. Total supply is expected to decrease from 31.77 to 29.25 lakh MT due to likely lower production in 2021-22. Against it domestic usage. However, domestic use would decrease from 3.27 to 2.75 lakh MT in 2021-22. So carryout stock would stay at same as last year at 1.5 MT. Average yearly price is expected to be in the range of \$ 585 per MT. For 2002-21 it is \$ 600 per MT.
- **Dry peas production in Canada is expected to decrease from 45.94 lakh Mt in 2020-21 to 44.00 lak MT in 2021-22** due to lower expected yield from 2.73 to 2.57 tonne in 2021-22. Total supply too would decrease from 49.22(2020-21) to 47.90 lakh MT in 2021-22. Export fig too is expected to decrease from 38 to 37 lakh MT in 2021-22. However, domestic usage may increase from 8.22 to 8.40 lakh MT in 2021-22. Carryout would decrease from 3 to 2.5 lakh MT. Yearly average price may hover at \$300 per MT in 2021-22 against 4330 in 2020-21.
- **Lentils export from Australia increased sharply in Dec-2020 as per data released by Australia Bureau of Statistics.** Total movement in Dec increased to 101,148 MT up by 189% from the previous month's total of 34,974. So far export sales have totalled 136,121 MT, up from 135,053 in the same period the last marketing year. India purchased 42,154 MT, B, desh 15,256 MT & Sri Lanka 14,970 MT
- **Chickpeas production in Australia is expected to increase from 2.81 to 7.55 lakh Mt in 2020-21.** Even field peas production would increase from 2.19 to 2.94 lakh MT in 2020-21. Even lentils production may increase from 5.34 to 6.34 lakh Mt in 2020-21.
- **Lentils production in US for 2020 has been pegged at 336,201 MT based on 514,000 acres.** Lentil production is up by 40% from last year with a USDA production estimate of 7.41 million cwt. Planted acreage was up 9% from 2019 with 528,000 acres in 2020, and harvested acreage was up even more, 21% at 514,000 acres. Average yield is estimated at 1,442 pounds per acre in the U.S., as per data release by the National Agricultural Statistics Service.
- **The USDA has released its final pulses production report of the year this Tuesday, Jan. 12, 2021** by the National Agricultural Statistics Service. As per new data dry peas are compiled by the National Agricultural Statistics Service. Dry peas production for 2020 has been pegged at 985,976 MT on 973,000 acres. Dry pea production as an average of all U.S. pea growing regions is down approximately 2% of last year, sitting at 21.7 million cwt in 2020, almost 986,000 MT, with planted acreage hitting 1 million acres. Harvested acreage hit 973,000 with an average yield of 2,234 pounds, an increase of 111 pounds an acre, the highest yield recorded since 2004. The drop in total production for dry peas from 2019 reflects the decline in planted and harvested acres of 9% and 7% respectively.
- **Ukraine has emerged as a major exporter of pulses in recent years. Ukraine exports yellow peas, Chickpeas, lentils and kidney bean.** Major buyers of Ukrainian pulses are Europe, India, Turkey and Pakistan. The GPC's World Pulses Day Ukraine Market Outlook scheduled for February 17th will feature expert panels that will analyze the market conditions for each crop just as the country heads into its pulse-planting season as per information given in media sources.

Weekly Outlook: -Pulses are likely to trade firm.

Pulses-Wise Scenario:

Chana

Current Scenario:

Cash chana market traded up by 0.04 % from Rs 5107 to Rs 5125 during the week under review. Even, Australian chana increased by 0.12 % to Rs 5720. New crop started in south Indian states like Andhra Pradesh, Tamil Nadu, Gujarat, M.P. and Maharashtra. Crop condition is good in all states except some doubts of lower yield in Rajasthan, M.P. and Maharashtra, where it may be lower than normal expectation due to lower rains during growth stages and lack of water in Canal in major growing districts. Moisture stress too in the field may affect normal yield in these states. Despite increasing fear of lower yield in Rajasthan and others states, overall supply side would be at comfortable level throughout the year as the new season would start over 2 MMT carryin stock. Nafed intension to buy over 2MMT chana this season may be supportive for chana. procurement would commence from the third week of March.

As demand for dal improved last week, prices of chana continued improve from current level. Following graph illustrates chana price movement in different markets:

Market Outlook: Steady to slightly firm movement is expected in cash chana market this week as fear has increased over lower yield realization. Arrival has started and it is likely to pick up in coming weeks. New arrivals may restrict uptrend on price until procurement starts. Indian importers have imported around 515765 MT chana during April to Jan 2021.

Chana Weekly Technical Analysis:

Technical Commentary:

- Increasing price & OI hint firm sentiments in futures market in the near term.
- RSI is steady in neutral region, hints steady momentum.
- Prices closed above 9 and 18 days EMAs
- Candlestick chart hints bullish sentiment.

Strategy: Buy on dip

Supports & Resistances			S1	S2	PCP	R1	R2
Chana	NCDEX	April	4945	4825	5120	5189	5220
Weekly Trade Call*			Call	Entry	T1	T2	SL
Chana	NCDEX	April	Buy above	5090	5150	5175	5060

- Do not carry forward stock for next week.

Peas (Matar):

Market Recap:

Despite negligible availability of field peas at ports, prices of yellow and green peas have decreased with increasing flow of new arrivals of green peas in various markets. As arrival of green peas would increase in coming weeks, pressure on price might be seen. Arrival from new crop is expected to increase from end-Mar-2021, so stockists who have stocks of peas, are now selling it. Import is not taking place and the govt. is not in favor of allowing import above 1.5 lakh MT. Demand is weak as other pulses are available comparatively at cheaper price. Matar in Kanpur market is being traded at Rs 5300 per qtl. Green peas was quoted at Rs 8000 due to negligible availability in the local market. Market is waiting for govt.'s move on peas import quantity for next financial year and revision in MIP.

Despite stable demand for yellow peas and daal, prices are expected to trade steady to slightly weak. Sowing is over now. In Kanpur market prices decreased by Rs 700 to Rs 5300. Following chart shows price movement in various markets:

Current Market Dynamics & Outlook: Peas market traded weak on eased supply side. Green matar is available in good quantity and arrival is on. Stockists too are selling before pressure from new arrival builds up.. In Kanpur market it was quoted at Rs 5300 per qtl and may decrease to 4900-5000. Overall, all India average weekly price was down by 10.60% to Rs5300 per qtl. In Mumbai market, there was no quote for yellow peas as stock has been exhausted. Canadian yellow pea in Kolkata is being traded at Rs 5800-5900. No trade has been reported at this price this week too.

Spread With Chana:

Spread between Chana and Peas, at Kanpur market remained in negative zone. Gap has increased considerably from Rs 950 to Rs 125 due to decreased peas price. Spread is expected to remain in the negative zone in March too on relative movement in Chana prices. Overall outlook seems steady to slightly weak this week too.

Gap has decreased from Rs 950 to Rs 125 in last one week, based on weekly average price. Spread is expected to remain at negative zone in the second week of March too on relative movement in Chana prices.

Market Outlook For March: Weak movement is expected in March-2021.

Lentils (Masoor):

Market Recap:

Lentils prices may decrease with increasing arrivals in Madhya Pradesh and from other producing states soon. Harvesting is about to start in Bihar while arrivals are expected in Uttar Pradesh by mid March. Higher stock of imported crop, new arrivals and weak demand at this point of time may pressurize lentils prices in coming weeks. Nafed is gearing up to procure lentils in M.P. & Bihar. Lentil price is expected to decrease to Rs4900-5000 by end March. Stock of lentils in Canada is at comfortable level and prices may continue to rule at current level there. So, any steep decrease is unlikely in coming weeks. There is a gossip in the market that India may import more lentils to fill the gap of tight supply side in other pulses like tur and urad.

At Mumbai ports importers are selling masur at Rs 5600-5650. As prices are ruling above MSP in domestic market, Nafed may decide to sell its old stocks but not before procurements drive ends. Supply side would be at comfortable level as import flow would continue in 2021 too at regular intervals.

Current Scenario:

Ample stock is available at ports. At Mumbai port importers are selling masur at Rs 5650-5700. Any spike in masur market is unlikely now.

Market Outlook: Prices may trade steady to slightly weak due to new arrival and stock of imported stock at various ports. Overall tone in masur market remains weak in the 3rd week of March-2021. It would not sustain at higher level.

Pigeon Pea (Tur/Toor):

Market Recap:

Tur cash market may trade down in the short term as demand for daal is weak right now. It may improve again once demand improves. Private players including new entrants have stored 20 to 25 % more stock this year in anticipation of uptrend to continue. Around 90% warehouses are full now in Maharashtra and Karnataka. Fear of low import volume from overseas markets, low stock with Nafed and stock being in strong hands may continue to push up tur price in coming months.. Right now demand for daal is weak and Rs100 to 200 down ward correction is expected in the short term. June onward price movement would depend on monsoon rains and sowing progress. In May-June prices may rule in the range of 7500-8000 with start of marriage season.

200-300 Nafed would have to face difficulty to get bulk quantity at MSP this year. It may hardly procure 50 thousand this year. In brief, overall outlook remains firm. Market may move up to Rs7500 but not before a correction of Rs 300. Crop condition is good so far. Indian farmers had covered 48.49 lakh ha against 45.88 lakh ha last year. As per Agriwatch estimate India may harvest 37.24 lakh Mt crop this year. Weather condition in next one month is very crucial for driving price up and down in March-2021. Overall tone is firm.

Current Market Dynamics & Outlook:

India imported around 13392 MT tur in Jan-201, the 2nd month of the MY-20-2021 for tur. India imported around 4.25 lakh MT tur (Dec-2019 to Nov-2020 last year). This year the volume may be around 4.75 lakh MT. It would affect total availability in the market. Stockists and traders may try to push up market by holding crop till Sep-Oct -2021. If monsoon starts with good rainfall, area may increase and good sowing may help market to cool down. But second quarter is very tricky at price point of view. Nafed may release stock to cool down price but not before procurement ends in April-May. Till then market may continue to trade firm.

Nafed has procured 10,000 MT Tur so far at minimum support price of Rs 6000. The maximum (8000 MT) tur has been procured in Karnataka, followed by MH at 1001 MT. As prices are ruling above MSP, procurement quantity would be much more than normal expectation. Arrival is lower at this point of time. Farmers are holding stock in anticipation of higher prices in coming weeks. Private trades are active and it shows prices to move up further if arrival stays steady.

In the 1week of March-2021, average price in Gulberga market was down by Rs 100 to Rs 6750-69850 due to restricted by private trades at higher level. It may continue to support prices in coming weeks.

Black Matpe (Urad):

Urad cash market traded steady to slightly weak despite tight supply side, halted import flow from Myanmar. Arrivals from early shown rabi crop may help prices to cool down. Arrival pressure might be felt from mid March. Demand for daal has decreased while farmers/stockists are releasing stock at slower pace..Bulk arrival is expected only in March from local crop. So , overall tone seems firm in the medium term. Short term outlook is weak. Procurement by Nafed is rather slow as prices are ruling above MSP right now and may continue to rule at higher level. Big kharif crop is sixth month away, so any major decline is unlikely in coming weeks.Demand for daal at higher level is weak right now.

Current Market Dynamics & Outlook:

Arrival from rabi crop is expected to increase from end March . However crop size is lower and it would be consumed locally in Andhra Pradesh and Tamil Nadu. From states, crop would hit market in April. So , any major decline in urad market is unlikely at this point of time .Major urad crop comes in kharif season. As availability in Myanmar too is low and price up, bulk volume import is not possible in Mar-Aprilr-2021 too.India imported around 1.28 lakhMT MT urad in Jan-2021.. From April to Jan-21-India imported only 2.91 lakhMT urad.

Market Outlook: Urad Prices are likely to show side ways movement.

Green Gram (Moong):

Market Recap:

Moong cash market is likely to trade weak as supply is expected to ease from summer crop. Pressure might be felt when new crop would start hitting market from Odisha in March end. Crop condition of moong is good in AP, Tamil Nadu and Orisha. Import flow would remain restricted as there is no parity at current level. Apart from it availability in Myanmar is weak this year. Prices in the market like Gannavaram traded down at 7500-7600 during the week. In north and central India, prices have decreased below MSP for low quality crop.. Sideways movement is expected this week in Moong market. . Arrival from Rabi crop is expected from end Mar.

Rabi area is expected to increase this year. Farmers have covered only 6.59 lakh has so far against the normal of 9.86 lakh ha. Pressure from the Rabi crop may be felt only in March 2021. Total production including Rabi is expected to move up by 2.39 lakh Mt to 21.45 lakh Mt this year.

Market Outlook: Moong prices are likely to trade steady to slightly weak in the near term.
