Commodity-wise Domestic, International Prices and Arrivals at Different Centers

Weekly Highlights-Domestic Market:

Pulses Sector-Highlights

- **Chana arrivals in major markets decreased to negligible level due to closure of markets due to Holi and March closing.** No major trading activities reported. Market may move up by Rs150 to 200 in coming days. Nafed intends to buy 32 lakh MT chana in various states It would remain supportive for cash market. Normal trade is expected from the second week of April. Chana in Delhi market is being traded at Rs 5000-5050.Demand is likely to improve in the near term.
- **Tur market stayed steady at Rs 6750 in Gulberga market. More downside correction is unlikely as demand is expected to increase from mid-April.** After Holi market is expected to recover by Rs200-300 and may touch Rs7000 level. Arrival is negligible and normal trade is expected from mid-April. Lemon Tur prices in Mumbai decreased to 6200-6250.Mills may start buying from Mid-April as marriage season is about to start by end April. Import is not expected before June. Farmers in Myanmar are not able to move their crop to markets due to ongoing disturbance and it may decrease supply for export.
- **Urad cash market traded under pressure due to weak demand for daal at higher level,** increasing availability of imported urad from Myanmar and rabi arrivals in south Indian markets. Urad in Mumbai and Chennai markets increased by 2.78 % from 7375 to 7175 per qtl. However, prices are unlikely to decrease further as mills not releasing stock at discounted price. So, slight recovery may be seen in urad market in coming weeks. Next new kharif crop would be available in August only. One vessel has hit Indian ports with 14500 MT urad while two more are expected in first fortnight of April.
- **Pressure on moong cash market continues with expected arrivals from summer crop from mid –April 2021.**Crop condition is good so any major movement in moong market is unlikely. After Holi demand would decrease while arrival would increase. In Jaipur market moong price decrease by 0.93 % from Rs7133 to Rs 7067.It may slip below MSP in April. However, there is a short supply of quality crop, so it may continue to rule at higher level.
- **Despite new arrivals in market masur continues to trade firm as the landed cost of masur in Mumbai is Rs5750-5800.**Farmers too have restricted selling and it is causing short supply like condition. In summer season demand for masur daal increases and it may support market in coming weeks. Fear over low crop size too has made inner tone strong. So steady to slightly firm tone may prevail in cash market.

Global Market:

- **According to the Pulse Guidance Note issued last week by Pulse Australia (PA) and the Grains Industry Market Access Forum (GIMAF)** right now the monsoon season and India's political climate were being watched closely.India's and Pakistan's production from rabi, or winter crop is slightly lower than expectations due to drier conditions. Despite low production expectation India is still blocking most pulse imports, hope existed that India would drop its tariff on Australian lentils from the current 30 per cent.India would normally be the driver for Australia's pulse outlook, but tariffs and biosecurity challenges are currently keeping volume exports of Australian pulses out of the market. With Australian 2020 production at around 800,000t, it is debatable whether these markets can absorb the 2020 crop, so some growers are reporting to be holding stocks, waiting to see how the subcontinent production eventuates.

- **Bangladesh and Pakistan continue to buy chickpeas from Australia and so prices hinge around \$660-670 per MT basis** CiF at destinations. Pakistan has been regular buyer of containerised Australian chickpeas, and its peak figure of recent years is believed to be 37,759t in December 2020, the biggest volume seen since 34,805t in April 2018. The February 2021 export figure could well be above that to reflect containerised exports as well as the 25,000t of bulk to Pakistan, and further bulk sales to Bangladesh.
- **Prices for mungbeans stayed steady at previous month level at around \$1300/t for No. 1 grade, \$1200/t for processing and \$1100/t for manufacturing.** Harvesting is expected to begin soon in Queensland. recent rains are beneficial to standing crop in the field. Production prospects have improved a lot. Chinese buyers are active and most of the mungbeans booked for shipment from April onward. Containers are readily available for China right now.
- **Major pulses in Australia traded slightly firm as export demand is likely to continue in the second half of 2021.** Apart from it freight for some destinations in the Middle East & South Asia too moved up and it too has helped keeping prices up of chickpeas & lentils for bulk exports volume. On production front, most of Australia's moong growing areas in New South Wales & Queensland received good rains in recent days and more rains expected in northern South Wales, Victoria. The crop would be ready for harvest in April-May. It has increased better sowing prospects for winter crops like Chickpeas, Lentils and Fababeans.
- **Lentils production in Canada is expected to decrease from 28.68 in 2020-21 to 2.7 MMT in 2021-22** due to slightly lower area & yield. Export too are expected to decrease by 2 lakh MT to 25 lakh MT in 2021-22. Total supply is expected to decrease from 31.77 to 29.25 lakh MT due to likely lower production in 2021-22. Against it domestic usage. However, domestic use would decrease from 3.27 to 2.75 lakh MT in 2021-22. So carryout stock would stay at same as last year at 1.5 MT. Average yearly price is expected to be in the range of \$ 585 per MT. For 2002-21 it is \$ 600 per MT.
- **Dry peas production in Canada is expected to decrease from 45.94 lakh Mt in 2020-21 to 44.00 lakh MT in 2021-22** due to lower expected yield from 2.73 to 2.57 tonne in 2021-22. Total supply too would decrease from 49.22(2020-21) to 47.90 lakh MT in 2021-22. Export fig too is expected to decrease from 38 to 37 lakh MT in 2021-22. However, domestic usage may increase from 8.22 to 8.40 lakh MT in 2021-22. Carryout would decrease from 3 to 2.5 lakh MT. Yearly average price may hover at \$300 per MT in 2021-22 against 4330 in 2020-21.
- **Lentils export from Australia increased sharply in Dec-2020 as per data released by Australia Bureau of Statistics.** Total movement in Dec increased to 101,148 MT up by 189% from the previous month's total of 34,974. So far export sales have totalled 136,121 MT, up from 135,053 in the same period the last marketing year. India purchased 42,154 MT, Bangladesh 15,256 MT & Sri Lanka 14,970 MT
- **Chickpeas production in Australia is expected to increase from 2.81 to 7.55 lakh Mt in 2020-21.** Even field peas production would increase from 2.19 to 2.94 lakh MT in 2020-21. Even lentils production may increase from 5.34 to 6.34 lakh Mt in 2020-21.
- **Lentils production in US for 2020 has been pegged at 336,201 MT based on 514,000 acres.** Lentil production is up by 40% from last year with a USDA production estimate of 7.41 million cwt. Planted acreage was up 9% from 2019 with 528,000 acres in 2020, and harvested acreage was up even more, 21% at 514,000 acres.

Weekly Outlook: -Pulses are likely to trade mixed.

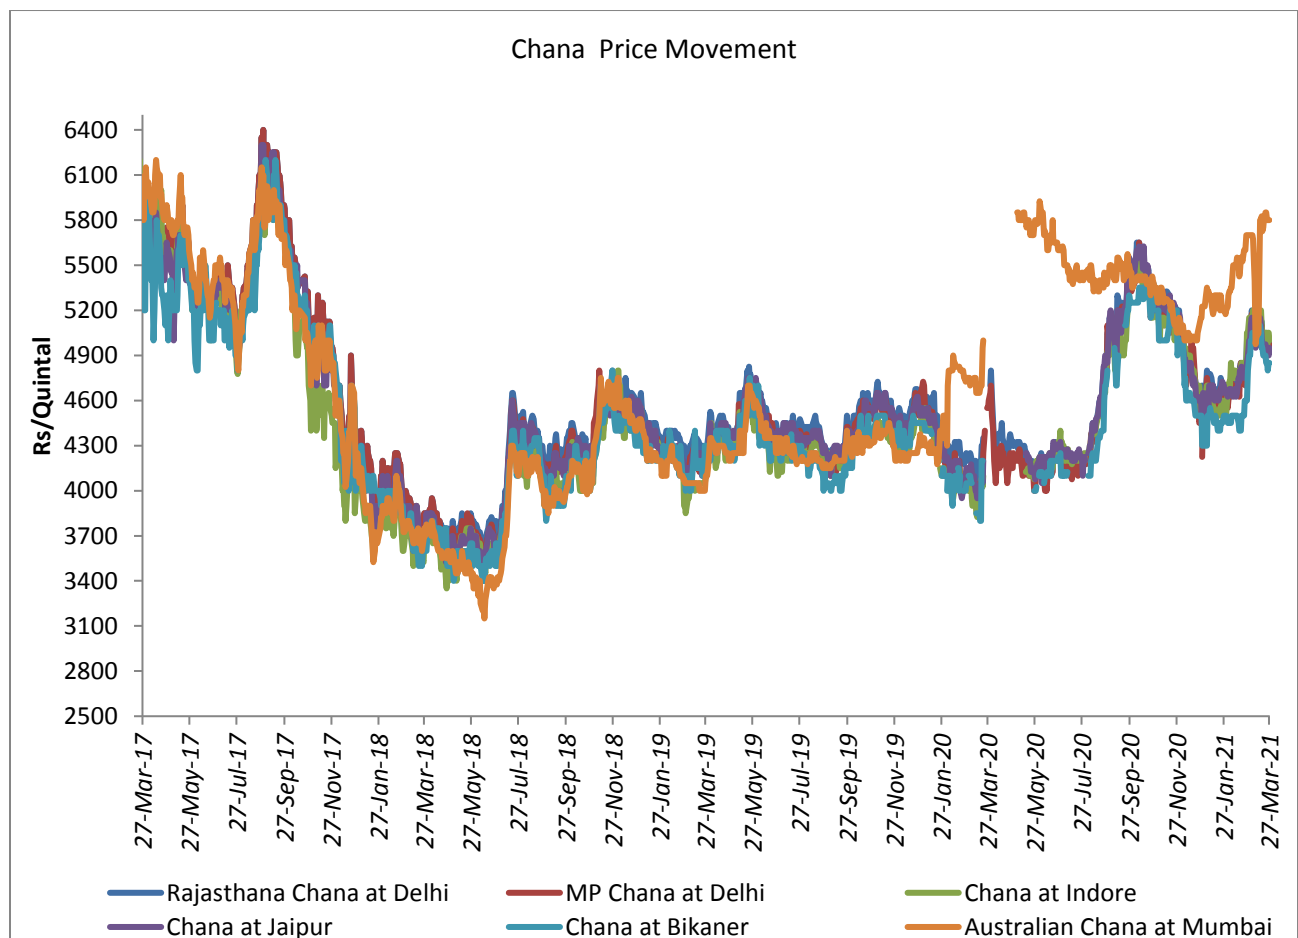

Pulses-Wise Scenario:

Chana

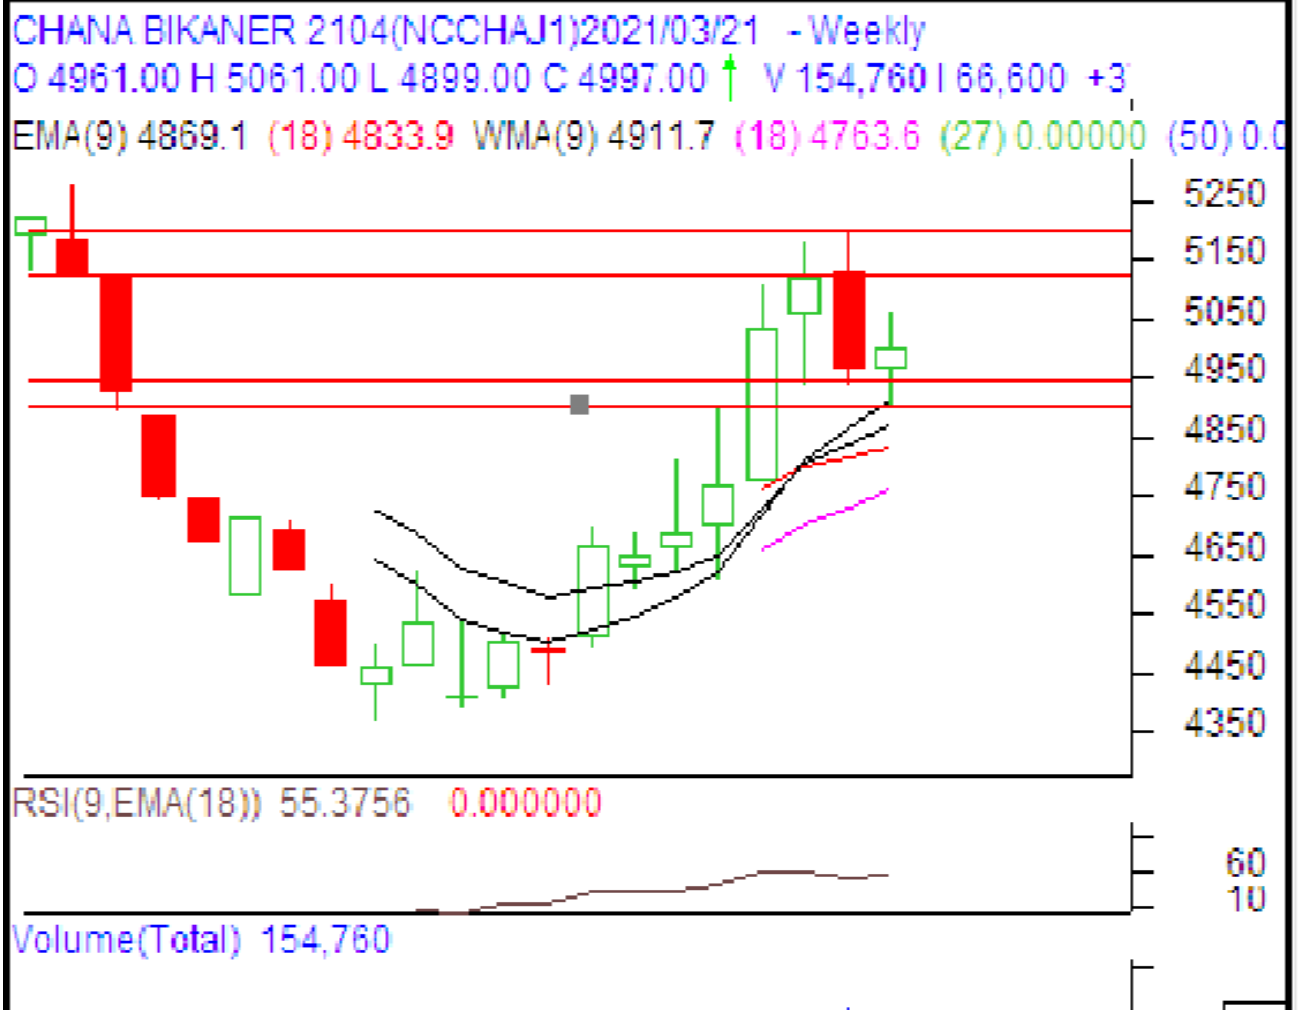

Current Scenario:

Chana cash market traded down during the week under review. Demand for daal is likely to improve while commencement of procurement drive by Nafed may support cash chana market in coming weeks. Stockists may be active once again. Right now they are engaged in March closing. Apart from it arrivals are comparative low due to closure of markets due to Holi. So, after the first week of April prices may recover by Rs150-200 and move near to MSP of Rs5100. If Nafed procures 32 lakh MT, as intended, price of chana may go up. In Delhi market prices decreased by 1.80 % to 4953 on all India basis over previous week.

As demand for daal is expected to improve, prices of chana may move up again from current level. Following graph illustrates chana price movement in different markets:

Market Outlook: Steady to slightly firm movement is expected in cash chana market this week as arrivals are expected to stay flat and normalcy in trade may resume soon. Indian importers have imported around 515765 MT chana during April to Jan 2021.

Chana Weekly Technical Analysis:

Technical Commentary:

- Increasing price & OI hint firm sentiments in futures market in the near term.
- RSI is steady in neutral region, hints steady momentum.
- Prices closed above 9 and 18 days EMAs
- Candlestick chart hints bullish sentiment.

Strategy:Buy on dip

Supports & Resistances			S1	S2	PCP	R1	R2
Chana	NCDEX	April	4942	4900	4997	5123	5198
Weekly Trade Call*			Call	Entry	T1	T2	SL
Chana	NCDEX	April	Buy above	4975	5100	5125	4940

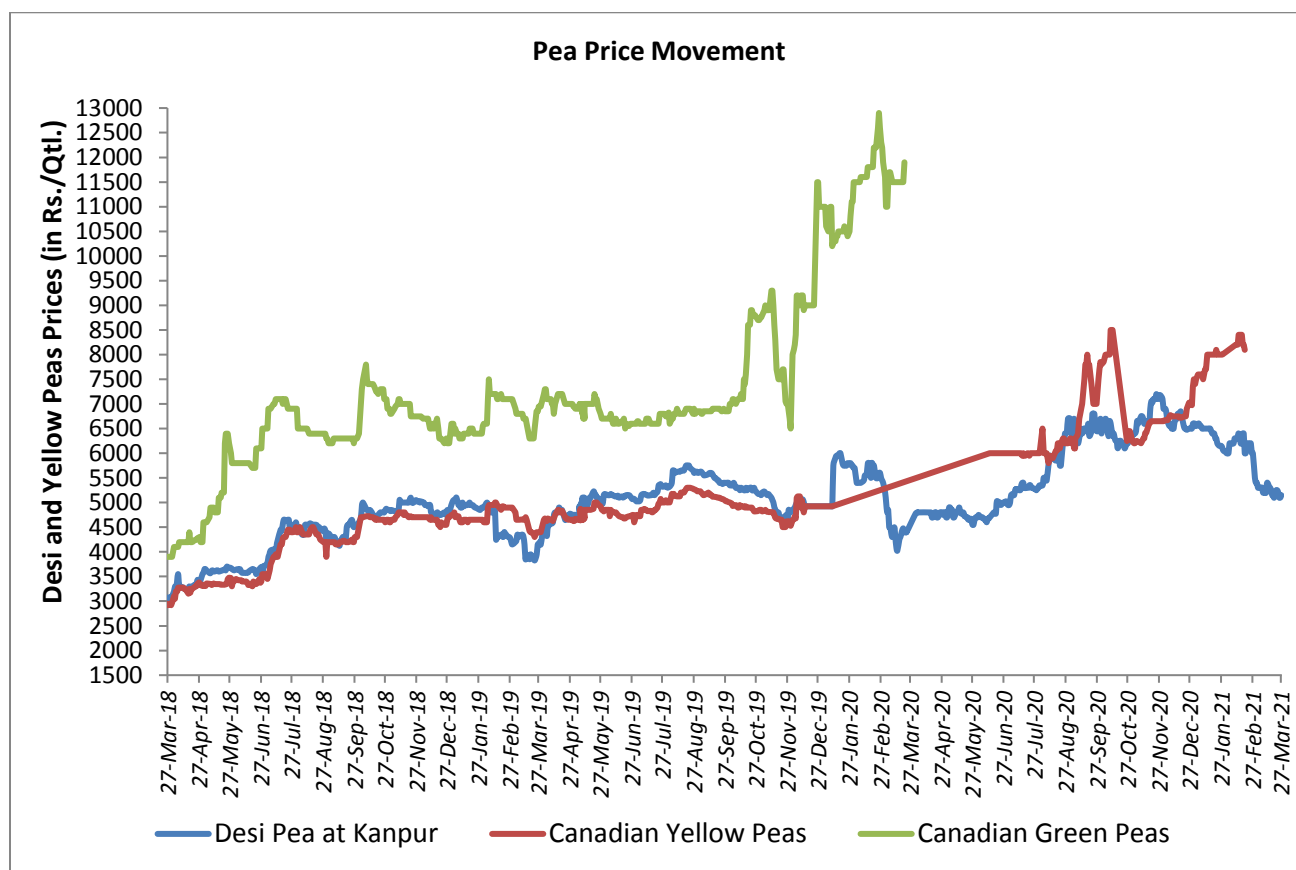

- Do not carry forward stock for next week.

Peas (Matar):

Market Recap:

Peas prices traded down despite negligible availability of field peas at ports, prices of yellow and green peas have decreased with increasing flow of new arrivals of green peas in various markets. As arrival of green peas would increase in coming weeks, pressure on price may continue.. Arrival from new crop is expected to increase from end -Mar-2021, so stockists who have stocks of peas , are now selling it. Import is not taking place and the govt. is not in favor of allowing import above 1.5 lakh MT. Demand is weak as other pulses are available comparatively at cheaper price. Matar in Kanpur market is being traded at Rs 5100 per qtl. Green peas was quoted at Rs 7800 due to negligible availability in the local market. Market is waiting for govt.'s move on peas import quantity for next financial year and revision in MIP.

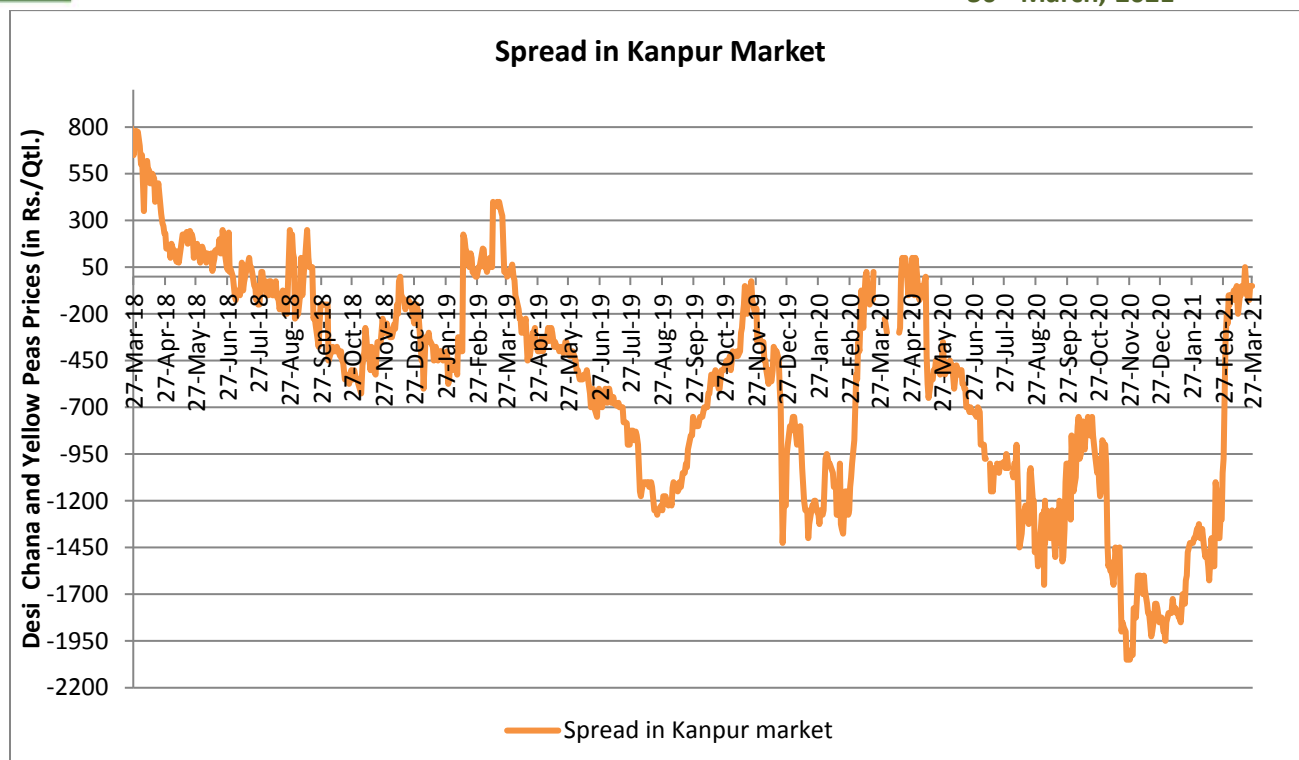

Despite stable demand for yellow peas and daal, prices are expected to trade steady to slightly weak..In Kanpur market prices decreased by Rs 200 to Rs 5100. Following chart shows price movement in various markets:

Current Market Dynamics & Outlook: Peas market traded weak on eased supply side. Green matar is available in good quantity and arrival is on. Stockists too are selling before pressure from new arrival builds up.. In Kanpur market it was quoted at Rs 5100 per qtl and may decrease to 4900-5000. Overall, all India average weekly price was down by 1.10% to Rs 5050 per qtl. In Mumbai market, there was no quote for yellow peas as stock has been exhausted. There is no quotes for imported peas as availability is almost nil.

Spread With Chana:

Spread between Chana and Peas, at Kanpur market remained in negative zone. Gap has been stable Rs 125 due to decreased peas price. Spread is expected to remain in the negative zone in April too on relative movement in Chana prices. Overall outlook seems steady to slightly weak this week too.

Gap has increased to Rs 125 in last one week, based on weekly average price. Spread is expected to remain at negative zone in the first week of April too on relative movement in Chana prices.

Market Outlook For April: Weak movement is expected in April-2021.

Lentils (Masoor):

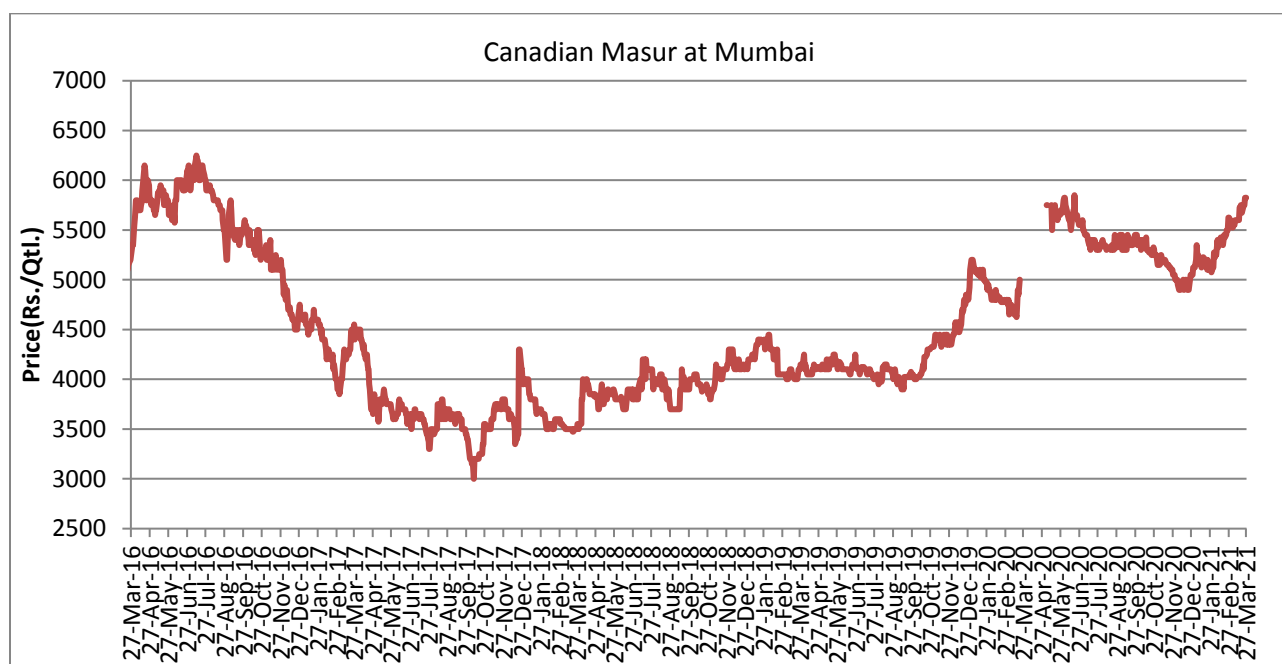

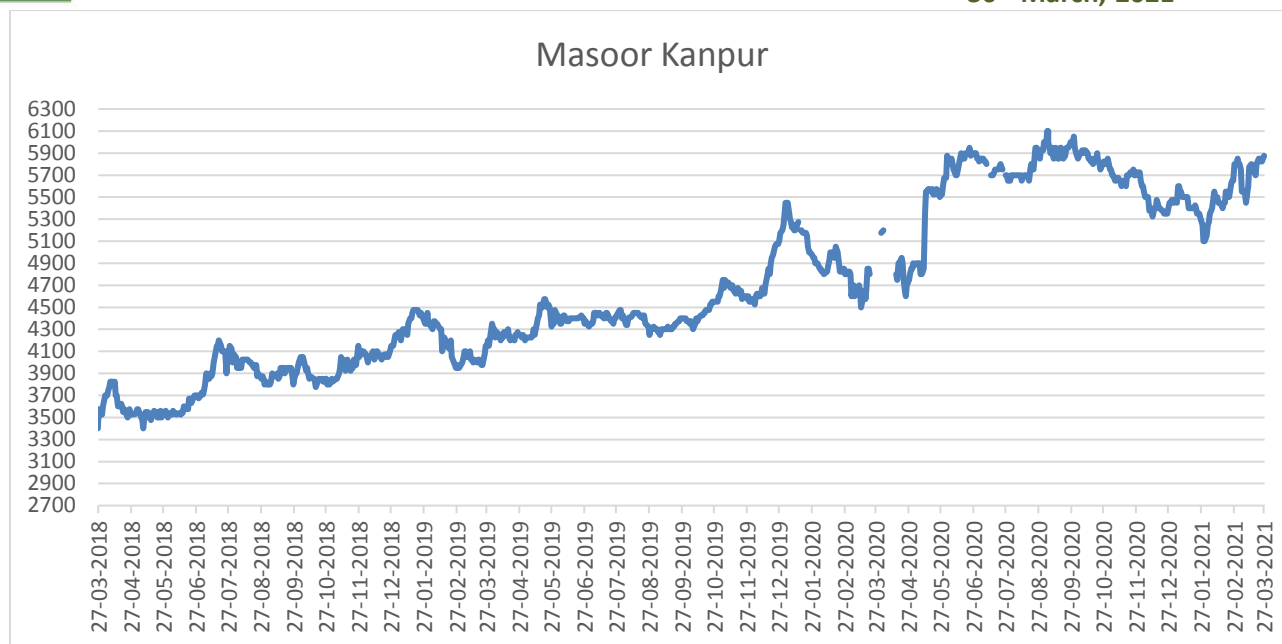

Market Recap:

Lentils prices may trade stable with decreasing arrivals in Madhya Pradesh and from other producing states. Harvesting has reached over 75% in Bihar and Uttar Pradesh. Higher stock of imported crop, new arrivals and weak demand at this point of time may cap lentils prices in coming weeks. Nafed is gearing up to procure lentils in M.P. & Bihar. Lentil price is expected to decrease to Rs5200-5400 by end April. Stock of lentils in Canada is at comfortable level and prices may continue to rule at current level there. So, any steep decrease is unlikely in coming weeks. There is a gossip in the market that India may import more lentils to fill the gap of tight supply side in other pulses like tur and urad.

At Mumbai ports importers are selling masur at Rs 5750-5850. As prices are ruling above MSP in domestic market, Nafed may decide to sell its old stocks but not before procurements drive ends. Supply side would be at comfortable level as import flow would continue in 2021 too at regular intervals

Current Scenario:

Ample stock is available at ports. At Mumbai port importers are selling masur at Rs 5750-5800. Any spike in masur market is unlikely now.

Market Outlook: Prices may trade steady due to low arrival and decreasing stock at various ports. Overall tone in masur market remains flat in the 1st week of April-2021. It would not sustain at higher level.

Pigeon Pea (Tur/Toor):

Market Recap:

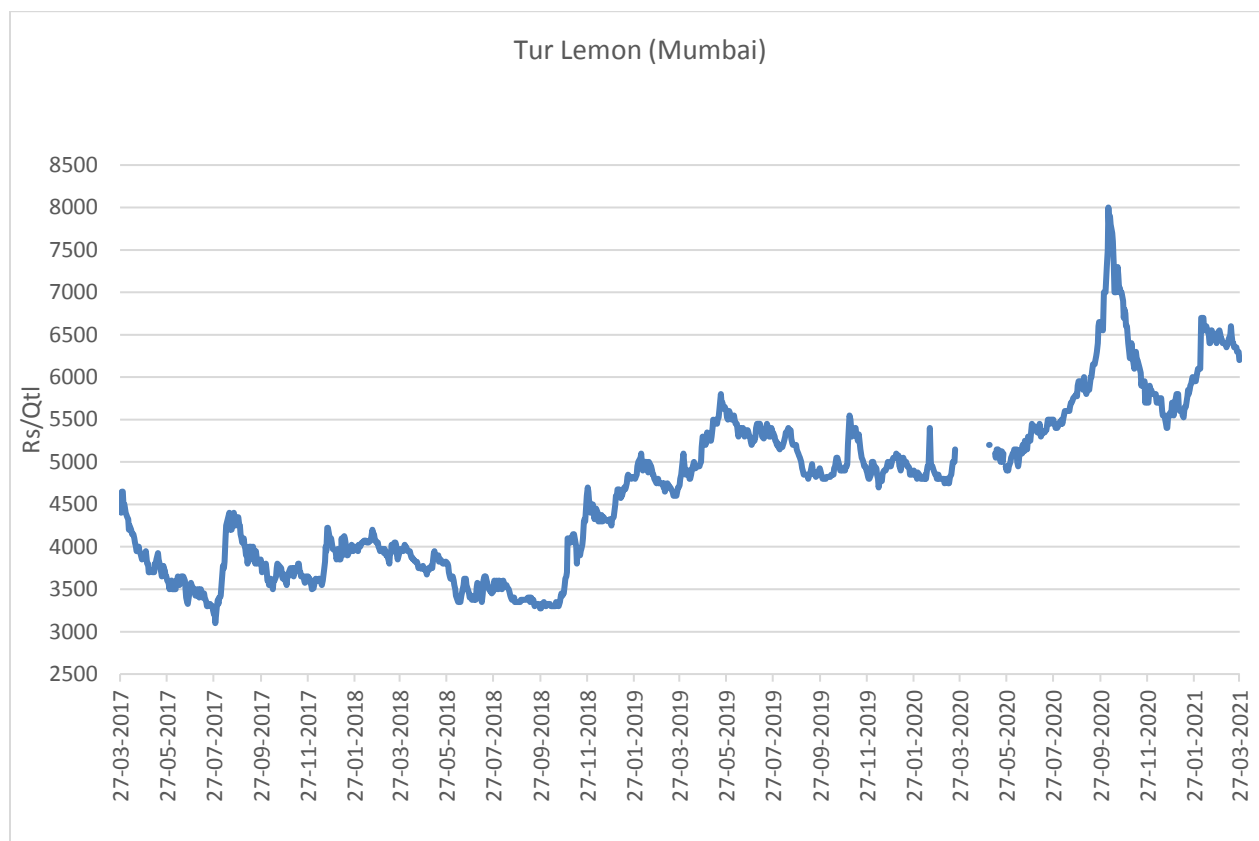

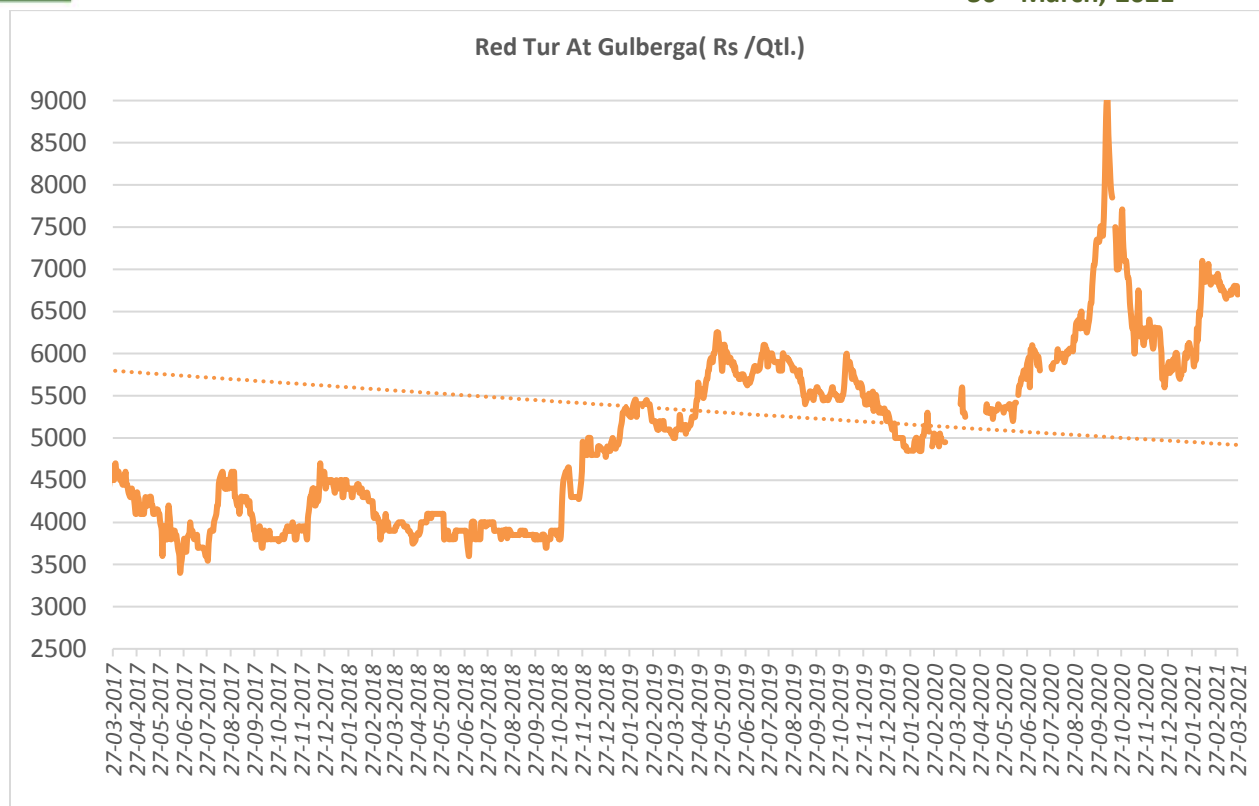

Tur cash market may trade stable as demand for daal is about to increase.. Import quota may help prices under check However, improvement in demand may push tur price up. It may improve again once demand improves to a certain extent. Private players including new entrants have stored 20 to 25 % more stock this year in anticipation of uptrend to continue. Around 90% warehouses are full now in Maharashtra and Karnataka. Fear of low import volume from overseas markets, low stock with Nafed and stock being in strong hands may push up tur price in coming months. June onward price movement would depend on monsoon rains and sowing progress. In May-June prices may rule in the range of 7500-8000 with start of marriage season. Stockists who have stored tur having 11% moisture level, may not be able to hold it for a longer period, if monsoon starts with good rains. Higher moisture level affects tur quality.

Indian farmers had covered 48.49 lakh ha against 45.88 lakh ha last year. As per Agriwatch estimate India may harvest 37.28 lakh Mt crop this year. Weather condition in next one month is very crucial for driving price up and down in March-2021. Overall tone is firm.

Current Market Dynamics & Outlook:

India imported around 13392 MT tur in Jan-2021, the 2nd month of the MY-20-2021 for tur. India imported around 4.25 lakh MT tur (Dec-2019 to Nov-2020 last year). This year the volume may be around 4.75 lakh MT. It would affect total availability in the market. Stockists and traders may try to push up market by holding crop till Sep-Oct -2021. If monsoon starts with good rainfall, area may increase and good sowing may help market to cool down. But second quarter is very tricky at price point of view. Nafed may release stock to cool down price but not before procurement ends in April-May. Till then market may continue to trade stable to slightly firm.

Nafed has procured 10,929.36 MT Tur so far at minimum support price of Rs 6000. The maximum (8000 MT) tur has been procured in Karnataka, followed by Mh at 1001 MT. As prices are ruling above MSP, Procurement quantity would be much than normal expectation. Arrival is lower at this point of time. Farmers are holding stock in anticipation of higher prices in coming weeks. Private trades are active and it shows prices to move up further if arrival stay steady.

In the 1st week of April-2021, average price in Gulberga market was down by Rs 50 to Rs 6600-6700 due to restricted buying by private trades at higher level. Prices are expected to improve.

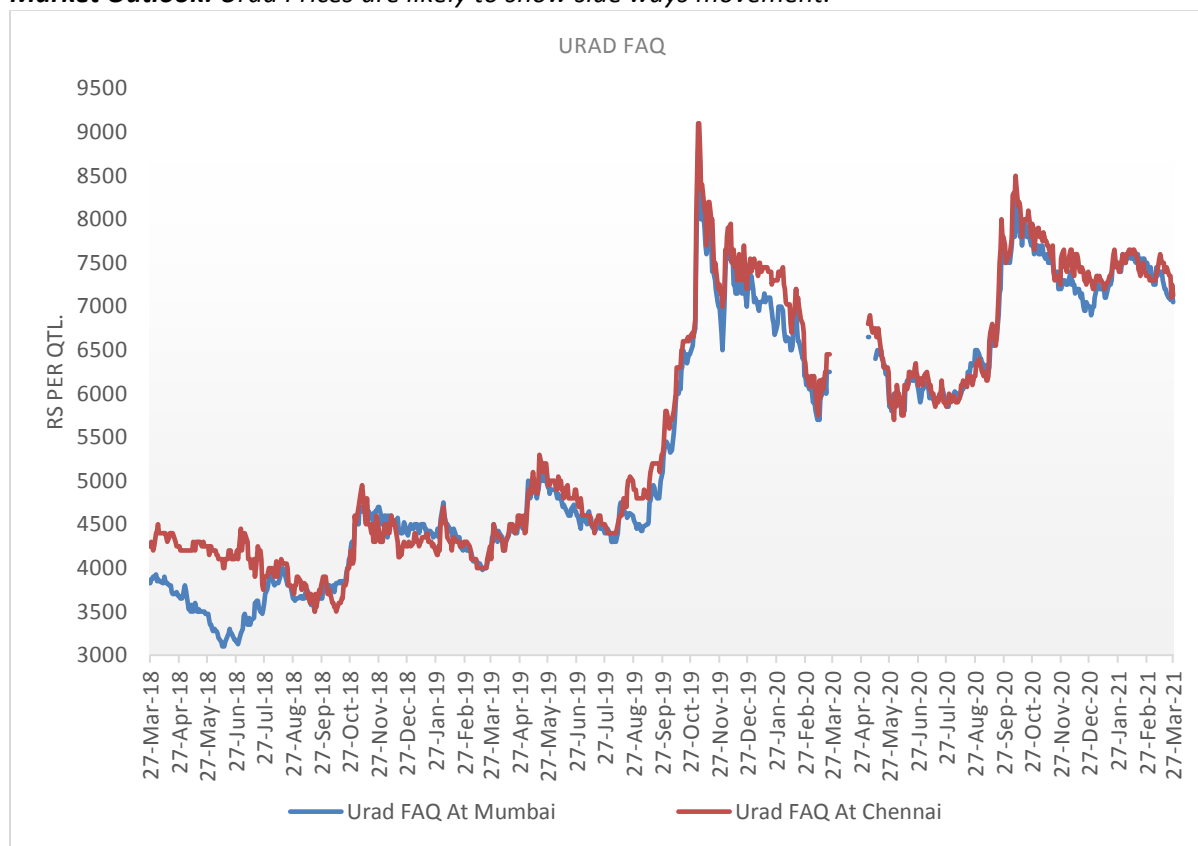

Black Matpe (Urad):

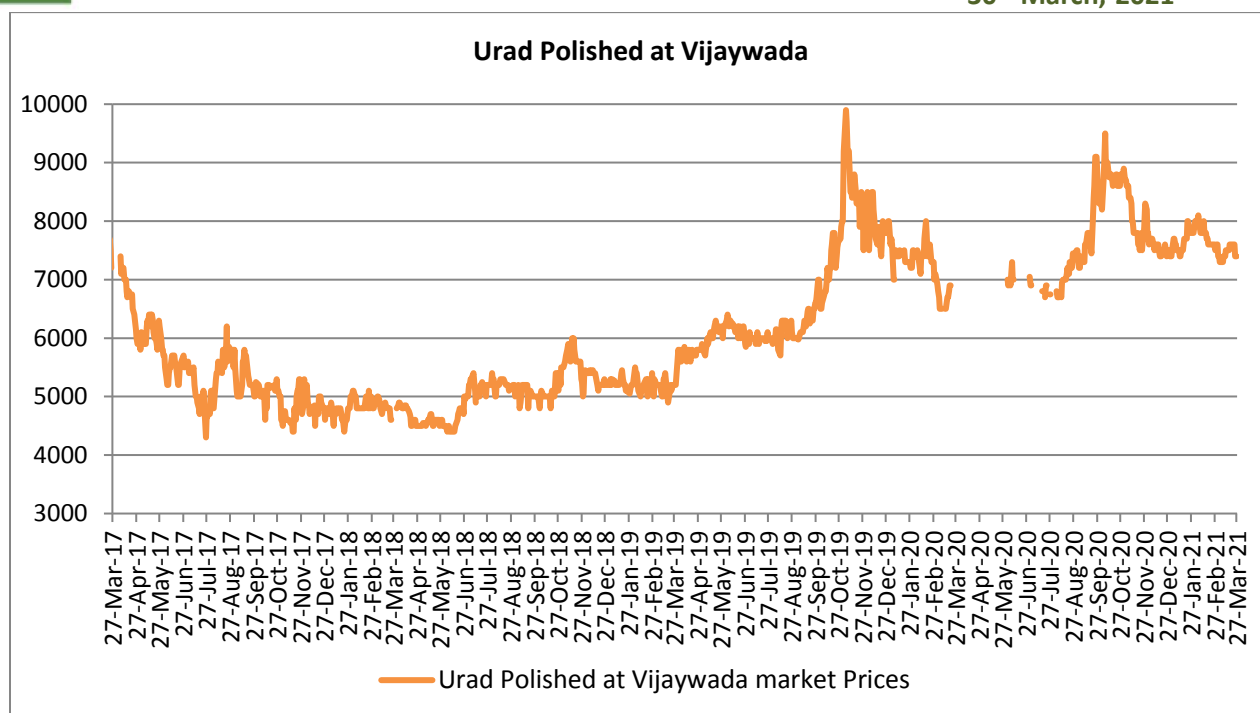

Urad cash market traded steady to slightly weak despite tight supply side, halted import flow from Myanmar. Arrivals from early shown rabi crop may help prices to cool down. Arrival pressure might be felt from mid March. Demand for daal has decreased while farmers/stockists are releasing stock at slower pace..Bulk arrival is expected only in March from local crop. So , overall tone seems firm in the medium term. Short term outlook is weak. Procurement by Nafed is rather slow as prices are ruling above MSP right now and may continue to rule at higher level. Big kharif crop is sixth month away, so any major decline is unlikely in coming weeks.Demand for daal at higher level is weak right now.

Current Market Dynamics & Outlook:

Arrival from rabi crop is expected to increase from end March . However crop size is lower and it would be consumed locally in Andhra Pradesh and Tamil Nadu. From states, crop would hit market in April. So , any major decline in urad market is unlikely at this point of time .Major urad crop comes in kharif season. As availability in Myanmar too is low and price up, bulk volume import is not possible in Mar-April-2021 too.India imported around 1.28 lakhMT MT urad in Jan-2021.. From April to Jan-21-India imported only 2.91 lakhMT urad.

Market Outlook: Urad Prices are likely to show side ways movement.

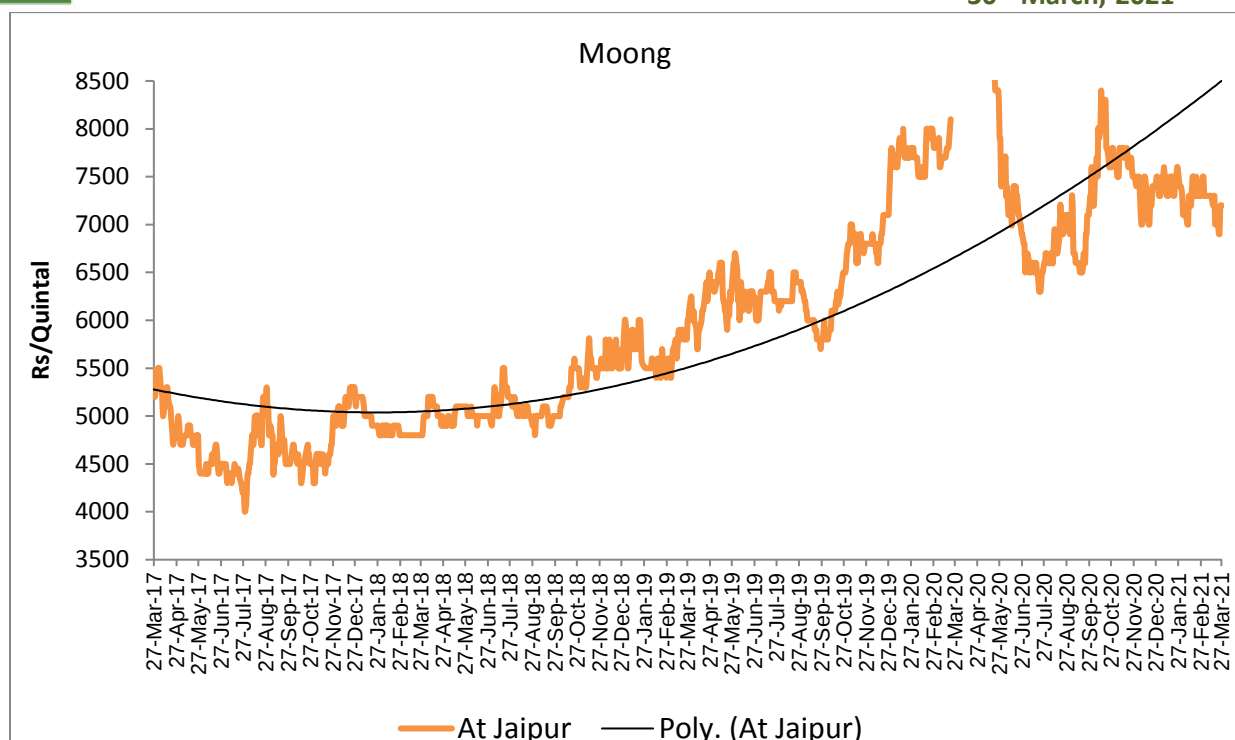

Green Gram (Moong):

Market Recap:

Moong cash market is likely to trade weak as supply is expected to ease from summer crop. Pressure might be felt when new crop would start hitting market from Odisha in March end. Crop condition of moong is good in AP, Tamil Nadu and Orisha. Import flow would remain restricted as there is no parity at current level. Apart from it availability in Myanmar is weak this year. Prices in the market like Gannavaram traded down at 7500-7600 during the week. In north and central India, prices have decreased below MSP for low quality crop.. Sideways movement is expected this week in Moong market. . Arrival from Rabi crop is expected from end Mar.

Rabi area is expected to increase this year. Farmers have covered only 6.59 lakh has so far against the normal of 9.86 lakh ha. Pressure from the Rabi crop may be felt only in March 2021. Total production including Rabi is expected to move up by 2.39 lakh Mt to 21.45 lakh Mt this year.

Market Outlook: Moong prices are likely to trade steady to slightly weak in the near term.
