Weekly Highlights-Domestic Market:

Pulses Sector-Highlights

- ***As per the latest update by BoM-bureau of Meteorology (Australia) has forecast normal monsoon season in India. This means Indian farmers will receive good rains in June, July, Aug & Sep. There is no chance of La Nina or El-Nino. If it happens, it would be good for Kharif crops in general and India & Indian farmers in particular. Indian farmers are waiting for the IMD forecast, likely in the first-second week of April-2021. Urad & Moong including paddy is the main Kharif crops. The IMD will come with its own forecast soon, likely by the end of this month.***
- ***The govt. has made it compulsory for new importers, exporters & customs brokers to verify their identity under the customs (Verification of Identity & Compliance) Regulations, 2021. This includes verification of incorporation document, PAN, Aadhaar, and place of business. The regulation also gives customs authorities the power to undertake identity verification for existing traders.***
- ***Chana production estimates for the crop year 2020-21 have been revised down from 110.63 lakh MT (preliminary estimates) to 97.67 lakh MT based on reports of lower yields in the major producing states like Rajasthan (20%), M.P. (12%), Karnataka, U.P., and Maharashtra 5% each. Lower production and stockist buying at the current prices may continue to support the cash Chana market. Chana cash market may move to Rs 5500-5800 in May. However, if COVID cases increase, lockdown is imposed & pulses are distributed free of cost, it may cap the uptrend. Good monsoon rains too may help to rein in prices.***
- ***Some fall in yield of tur in some states, this year, stockists' strong holding power and slow imports due to unrest in Myanmar, may push up tur price again. Arrival from UP is expected soon and the crop size is expected to be around 2.50 lakh MT in this state. It may meet the immediate requirements of mills. In June import may take place. So, it may cap any unexpected jump in the tur market. As demand is increasing, prices may move up by Rs 200 to 300 more. Apart from it mango season is about to start and it may check the price. Fundamentals for tur market is firm so may continue to move in the range of 6800-7500 in April.***
- ***Despite an extended timeline for urad import from backlog quota (31st March to 30th April-2021), and the import quota of 4 lakh MT for the ongoing financial year, the Urad market continues to trade firm. Some downward correction was seen in March, but it could not sustain due to short supply in the domestic market and the slower pace of import flow from Myanmar. Import from the new quota would not take place before June, while new local crop would not be available before August-September. So, the cash market may move up by 200-300 by the end of April.***
- ***Arrival of the summer Moong crop is expected to hit the market from April. The crop condition of moong in Odisha, M.P. & Bihar is normal to good. Arrival from the rabi crop is decreasing now. Demand is weak and prices are expected to decrease in the coming weeks. As there is a shortage of quality crops, prices are ruling around MSP. Stockists too have started offloading stock just ahead of the summer crop. Steady to slight weak tone may be seen during the next two to three weeks. Thereafter, monsoon rains and sowing of next crop would be the driving forces for prices. Prices may come down below MSP.***

- **As lentil prices are ruling above MSP, Nafed may plan to buy lentils at market prices as prices are unlikely to decrease much.** The arrival pace may increase in the coming weeks and prices may cool down by Rs 250-300 from the current level. The crop size (11.73 lakh MT against 13.49 lakh MT preliminary estimates) is lower and import will continue despite 30 % duty and cess. Right now lentil is ruling at Rs 5700-5800, which may come down to Rs 5400-5500. With the rising temperature and the Ramzan and marriage season, demand may improve and it will not allow the market to decrease beyond a certain level.

Global Market:

- **According to the Pulse Guidance Note issued last week by Pulse Australia (PA) and the Grains Industry Market Access Forum (GIMAF)** right now the monsoon season and India's political climate were being watched closely. India's and Pakistan's production from rabi, or winter crop is slightly lower than expectations due to drier conditions. Despite low production expectation India is still blocking most pulse imports, hope existed that India would drop its tariff on Australian lentils from the current 30 per cent. India would normally be the driver for Australia's pulse outlook, but tariffs and biosecurity challenges are currently keeping volume exports of Australian pulses out of the market. With Australian 2020 production at around 800,000t, it is debatable whether these markets can absorb the 2020 crop, so some growers are reporting to be holding stocks, waiting to see how the subcontinent production eventuates.
- **Bangladesh and Pakistan continue to buy chickpeas from Australia and so prices hinge around \$660-670 per MT basis** CiF at destinations. Pakistan has been regular buyer of containerised Australian chickpeas, and its peak figure of recent years is believed to be 37,759t in December 2020, the biggest volume seen since 34,805t in April 2018. The February 2021 export figure could well be above that to reflect containerised exports as well as the 25,000t of bulk to Pakistan, and further bulk sales to Bangladesh.
- **Prices for mungbeans stayed steady at previous month level at around \$1300/t for No. 1 grade, \$1200/t for processing and \$1100/t for manufacturing.** Harvesting is expected to begin soon in Queensland. recent rains are beneficial to standing crop in the field. Production prospects have improved a lot. Chinese buyers are active and most of the mungbeans booked for shipment from April onward. Containers are readily available for China right now.
- **Lentils production in Canada is expected to decrease from 28.68 in 2020-21 to 2.7 MMT in 2021-22** due to slightly lower area & yield. Export too are expected to decrease by 2 lakh MT to 25 lakh MT in 2021-22. Total supply is expected to decrease from 31.77 to 29.25 lakh MT due to likely lower production in 2021-22. Against it domestic usage. However, domestic use would decrease from 3.27 to 2.75 lakh MT in 2021-22. So carryout stock would stay at same as last year at 1.5 MT. Average yearly price is expected to be in the range of \$ 585 per MT. For 2020-21 it is \$ 600 per MT.
- **Dry peas production in Canada is expected to decrease from 45.94 lakh Mt in 2020-21 to 44.00 lakh MT in 2021-22** due to lower expected yield from 2.73 to 2.57 tonne in 2021-22. Total supply too would decrease from 49.22(2020-21) to 47.90 lakh MT in 2021-22. Export fig too is expected to decrease from 38 to 37 lakh MT in 2021-22. However, domestic usage may increase from 8.22 to 8.40 lakh MT in 2021-22. Carryout would decrease from 3 to 2.5 lakh MT. Yearly average price may hover at \$300 per MT in 2021-22 against 4330 in 2020-21.

- **Chickpeas production in Australia is expected to increase from 2.81 to 7.55 lakh MT in 2020-21.** Even field peas production would increase from 2.19 to 2.94 lakh MT in 2020-21. Even lentils production may increase from 5.34 to 6.34 lakh Mt in 2020-21.
- **Lentils production in US for 2020 has been pegged at 336,201 MT based on 514,000 acres.** Lentil production is up by 40% from last year with a USDA production estimate of 7.41 million cwt. Planted acreage was up 9% from 2019 with 528,000 acres in 2020, and harvested acreage was up even more, 21% at 514,000 acres. Weekly Outlook: -Pulses are likely to trade mixed.

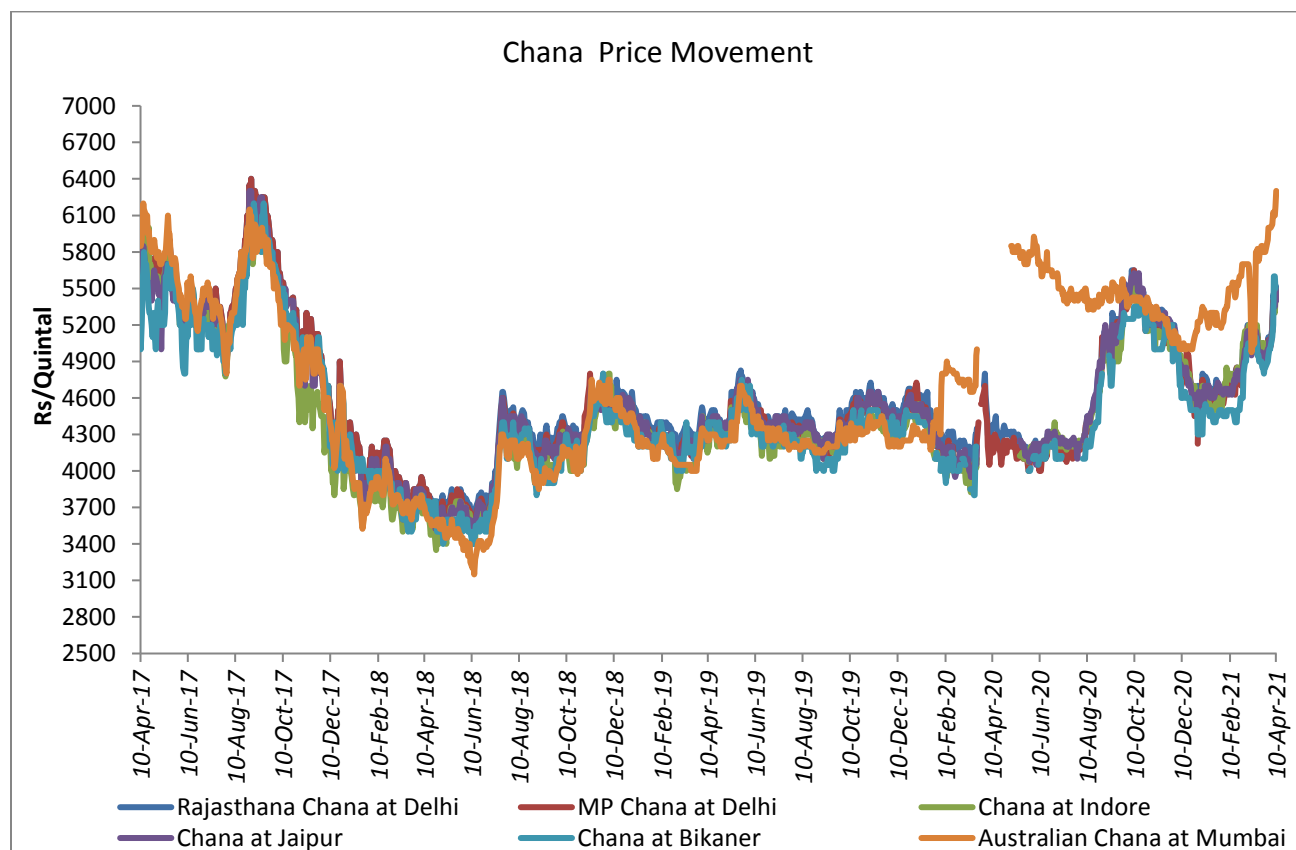

Pulses-Wise Scenario:

Chana

Current Scenario:

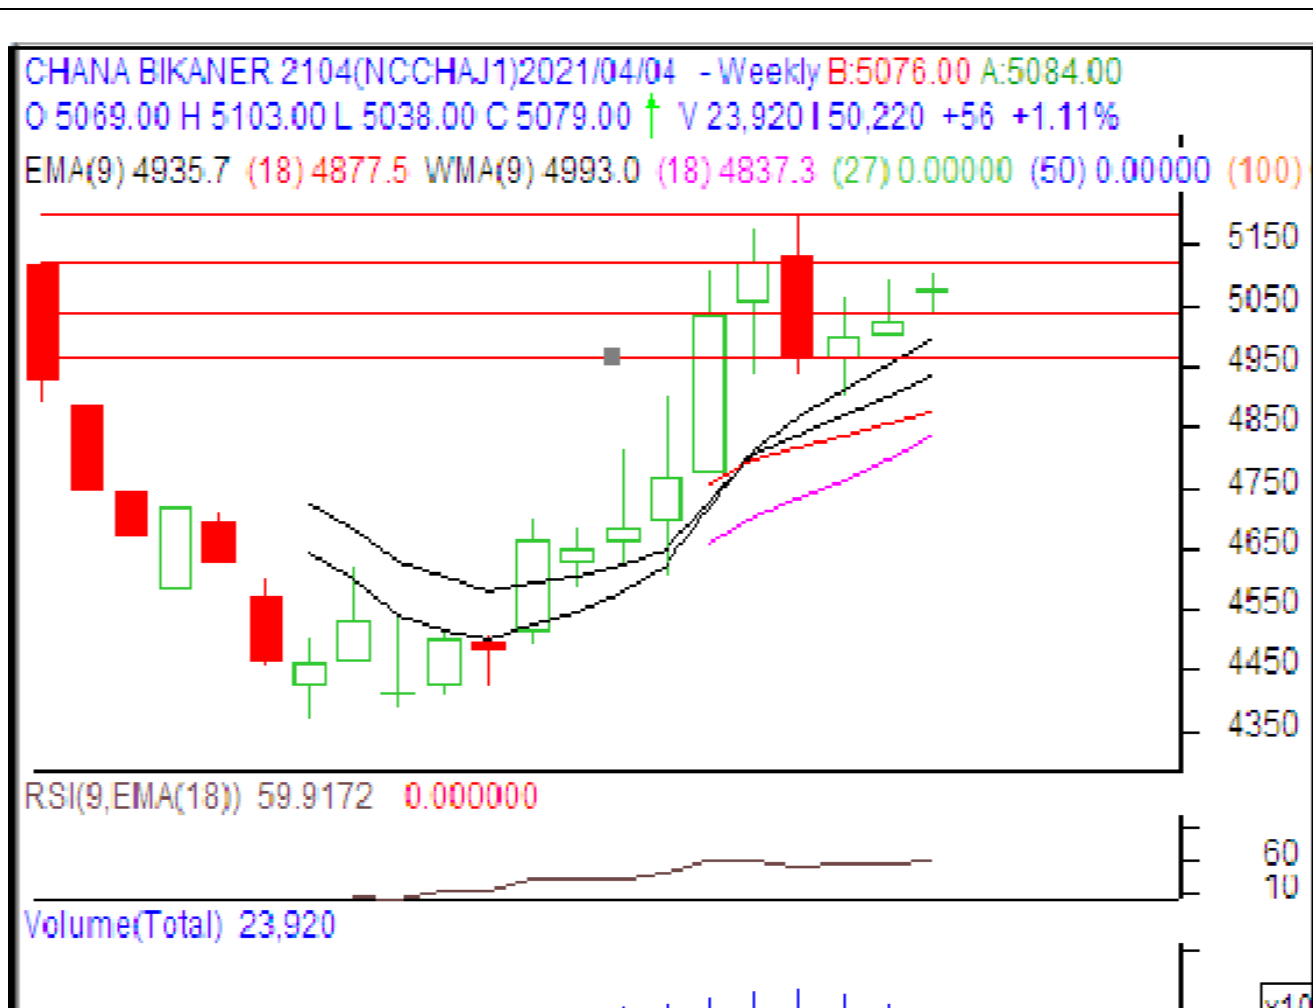

Chana cash market traded up due to low flow of arrivals during the week under review. Demand for daal is likely to improve while commencement of procurement drive by Nafed may support cash chana market in coming weeks. Stockists may be active once again. Normal trade is expected from the 2nd week of April. So, after the first week of April prices may recover by Rs150-200 and move near to MSP of Rs5100. If Nafed procures 32 lakh MT, as intended, price of chana may go up. In Delhi market prices increased by 1.53 % to 5029 on all India basis over previous week.

As demand for daal is expected to improve, prices of chana may move up again from current level. Following graph illustrates chana price movement in different markets:

Market Outlook: Steady to slightly firm movement is expected in cash chana market this week as arrivals are expected to stay flat and normalcy in trade may resume not before 15th of April. Indian importers have

imported around 523985 MT chana during April to Feb 2021. Around 8100 Mt has been imported in Feb-2021 including Kabuli chana too.

Chana Weekly Technical Analysis:

Technical Commentary:

- Increasing price & OI hint firm sentiments in futures market in the near term.
- RSI is steady in neutral region, hints steady momentum.
- Prices closed above 9 and 18 days EMAs
- Candlestick chart hints bullish sentiment.

Strategy: Buy on dip

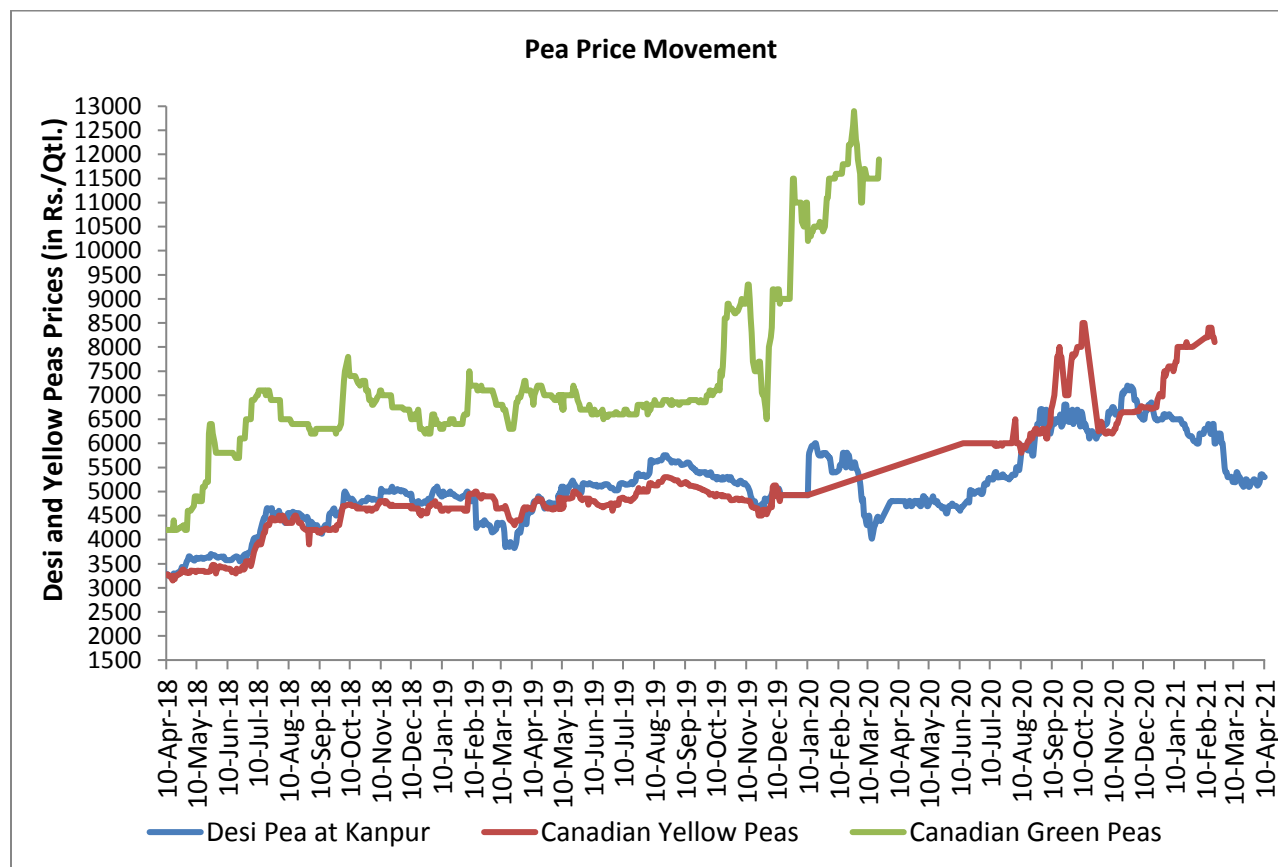

Supports & Resistances			S1	S2	PCP	R1	R2
Chana	NCDEX	June	5571	5511	5672	5750	5800
Weekly Trade Call*			Call	Entry	T1	T2	SL
Chana	NCDEX	June	Buy above	5600	5700	5750	5545

- Do not carry forward stock for next week.

Peas (Matar):
Market Recap:

Govt has not given any import quota for peas as of now. However, if prices of chana moves up beyond a certain level, govt. has option to import peas and ease supply side in the domestic market. Peas prices traded down despite negligible availability of field peas at ports, prices of yellow and green peas have decreased with increasing flow of new arrivals of green peas in various markets. As arrival of green peas would increase in coming weeks, pressure on price may continue. Import is not taking place. Demand is weak as other pulses are available comparatively at cheaper price. Matar in Kanpur market is being traded at Rs 5300 per qtl. Green peas was quoted at Rs 7500 due to negligible availability in the local market. Market is waiting for govt.'s move on peas import quantity for next financial year and revision in MIP.

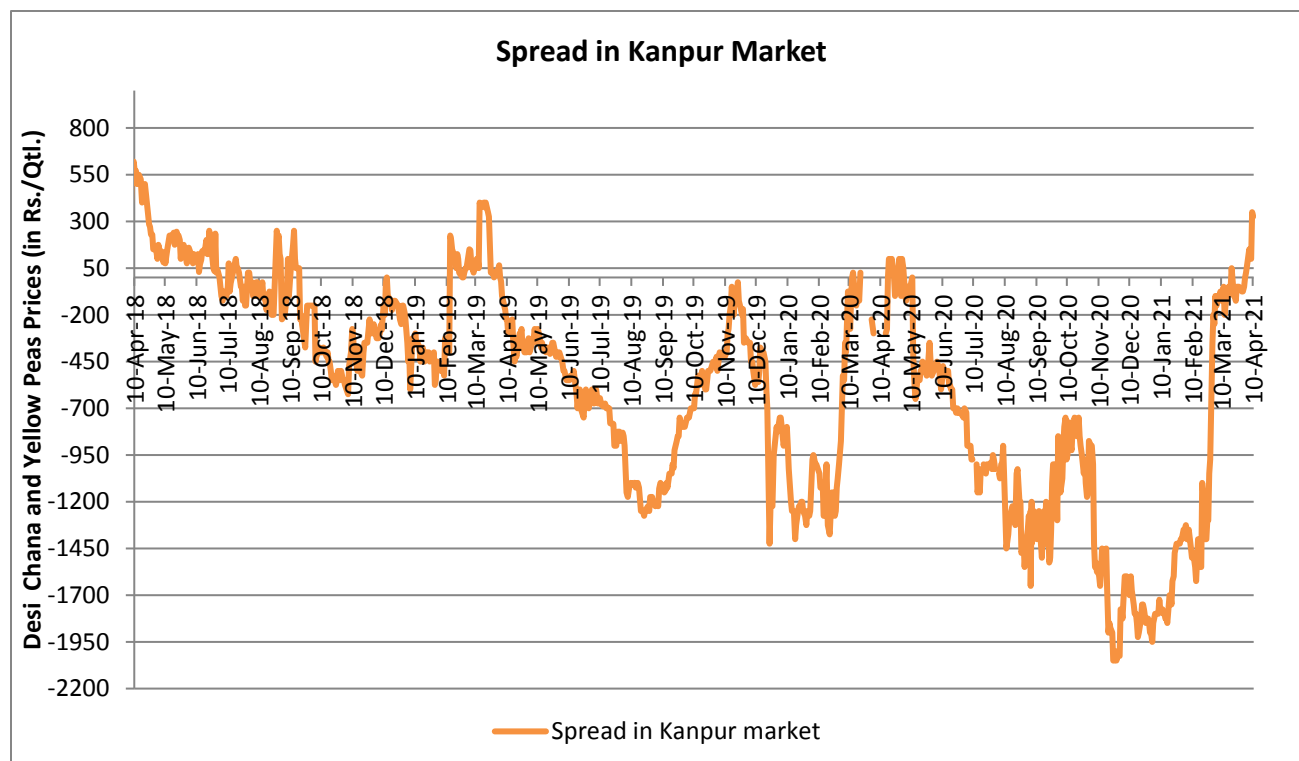

Despite stable demand for yellow peas and daal, prices are expected to trade steady to slightly weak.. In Kanpur market prices increased by Rs 200 to Rs 5250-5300. Following chart shows price movement in various markets:

Current Market Dynamics & Outlook: Peas market traded firm on decreasing supply side. Green matar is available in good quantity and arrival is on. Stockists too are selling before pressure from new arrival builds up.. In Kanpur market it was quoted at Rs 5300 per qtl.. Overall, all India average weekly price was up by 3.25% to Rs 5300 per qtl. In Mumbai market, there was no quote for yellow peas as stock has been exhausted. There is no quotes for imported peas as availability is almost nil.

Spread With Chana:

Spread between Chana and Peas, at Kanpur market moved in positive zone. Gap has been fulfilled now and it is 250 up now. Spread is expected to remain in the positive zone in April too on relative movement in Chana prices. Overall outlook seems steady to slightly weak this week too.

Market Outlook For April: Steady to slightly firm movement is expected in April-2021.

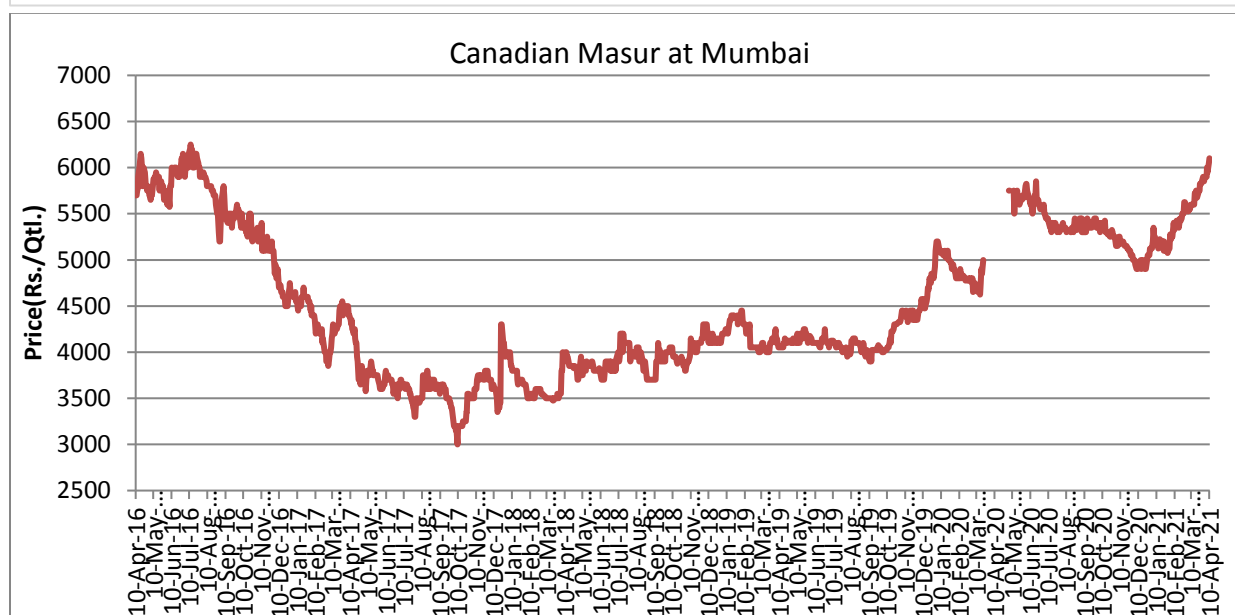

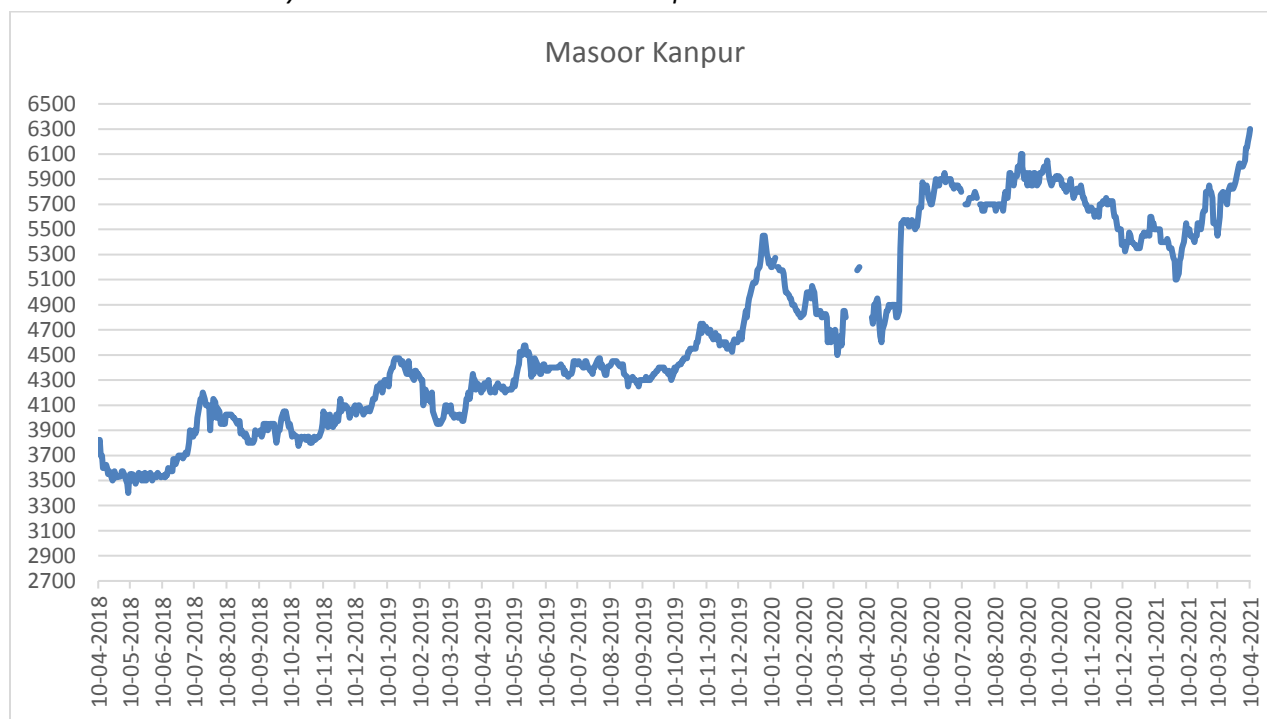

Lentils (Masoor):
Market Recap:

Lentils prices may trade stable to slightly weak with increasing arrivals in Madhya Pradesh and from other producing states. Harvesting has reached over 95% in Bihar and Uttar Pradesh. Higher stock of imported crop, new arrivals and weak demand at this point of time may cap lentils prices in coming weeks. Nafed is gearing up to procure lentils in M.P. & Bihar. Lentil price is expected to decrease to Rs5400-5600 by end April. Stock of lentils in Canada is at comfortable level and prices may continue to rule at current level there. So, any steep decrease is unlikely in coming weeks. There is a gossip in the market that India may import more lentils to fill the gap of tight supply side in other pulses like tur and urad.

At Mumbai ports importers are selling masur at Rs 6100. As prices are ruling above MSP in domestic market, Nafed may decide to sell its old stocks but not before procurements drive ends. Supply side would be at comfortable level as import flow would continue in 2021 too at regular intervals

Current Scenario:

Ample stock is available at ports .At Mumbai port importers are selling masur at Rs 6100-6200. Any spike in masur market is unlikely now. Correction in market is expected.

Market Outlook: Prices may trade steady to slightly weak due to low demand from mills. Overall tone in masur market remains flat in the 2nd week of April-2021. It would not sustain at higher level.

Pigeon Pea (Tur/Toor):

Market Recap:

Tur cash market may trade stable to slightly firm as demand for daal is about to increase.. Import quota may help prices under check .However, improvement in demand may push tur price up. It may improve again once

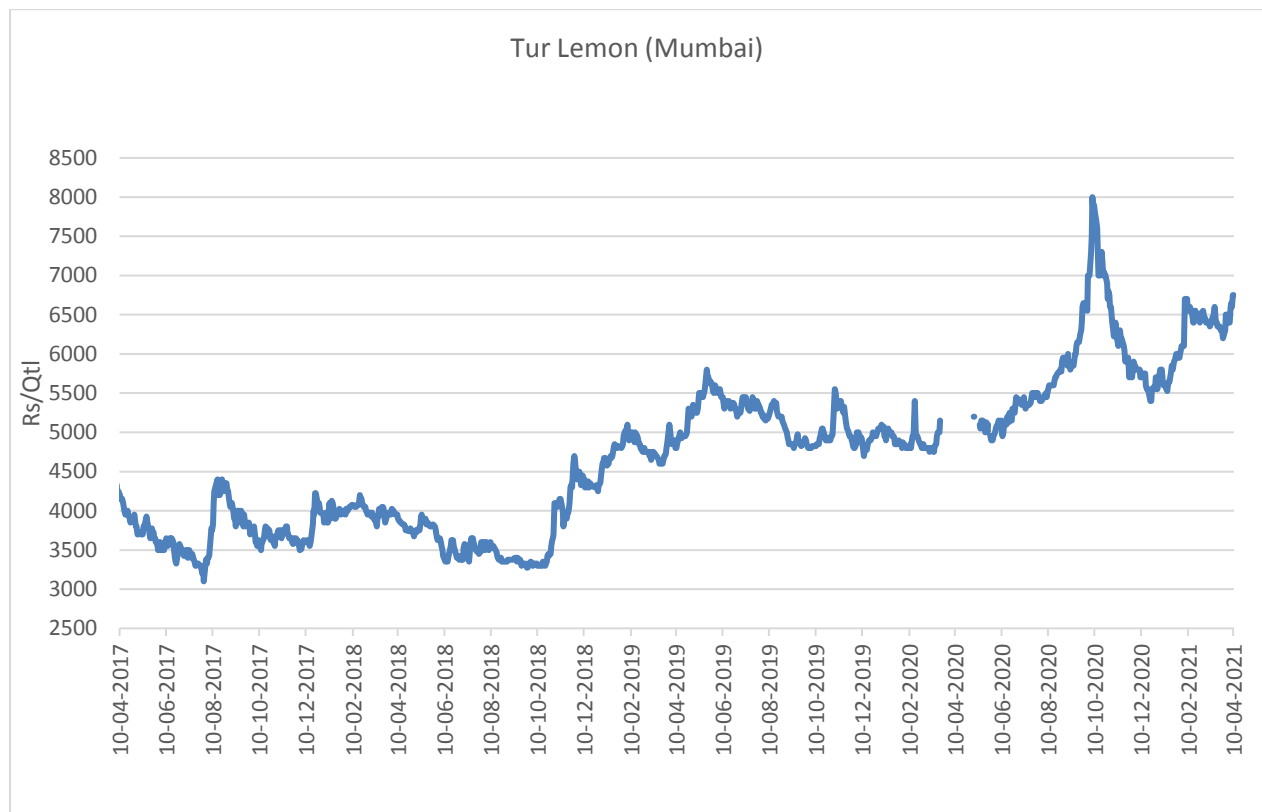

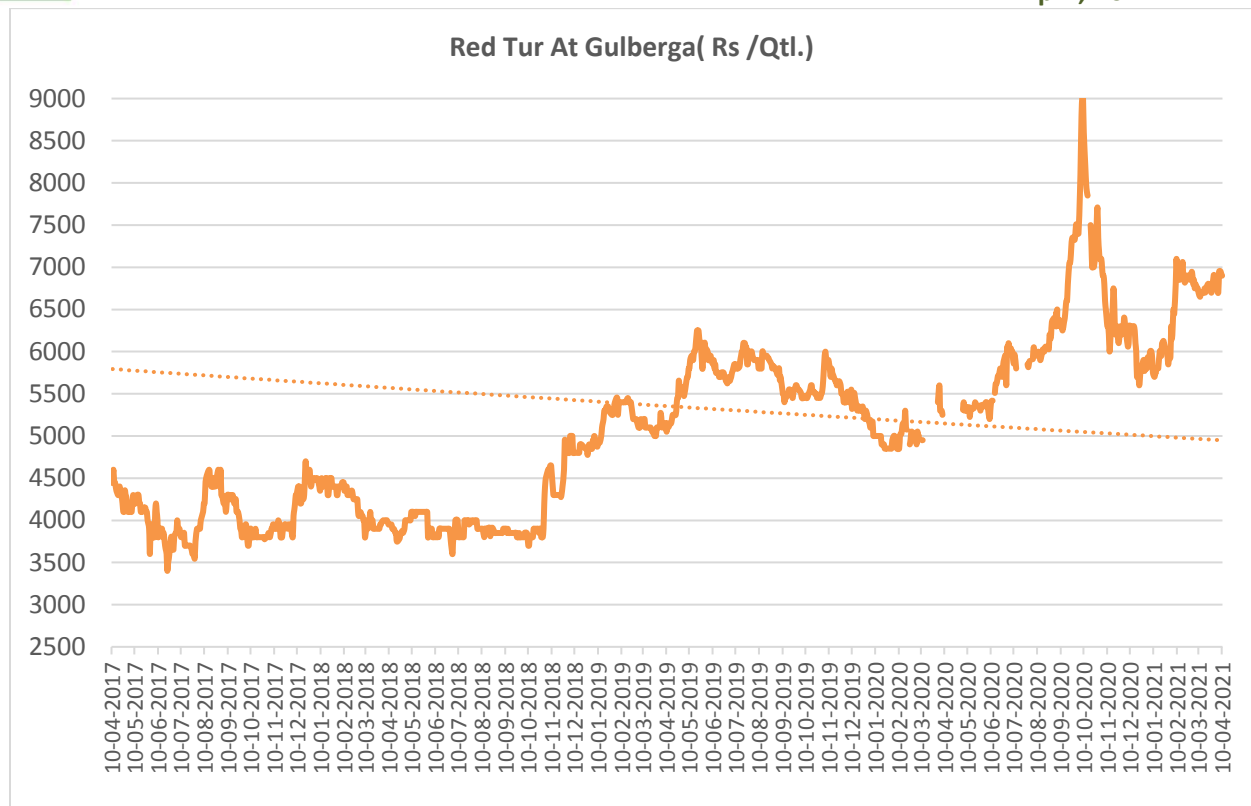

demand improves to a certain extent. Private players including new entrants have stored 20 to 25 % more stock this year in anticipation of uptrend to continue. Around 90% warehouses are full now in Maharashtra and Karnataka. Fear of low import volume from overseas markets, low stock with Nafed and stock being in strong hands may push up tur price in coming months. June onward price movement would depend on monsoon rains and sowing progress. In May-June prices may rule in the range of 7200-7500 with start of marriage season. Stockists who have stored tur having 11% moisture level, may not be able to hold it for a longer period, if monsoon starts with good rains. Higher moisture level affects tur quality.

Indian farmers had covered 48.49 lakh ha against 45.88 lakh ha last year. As per Agriwatch estimate India may harvest 37.28 lakh Mt crop this year. Weather condition in next one month is very crucial for driving price up and down in March-2021. Overall tone is firm.

Current Market Dynamics & Outlook:

India imported around 5766 MT tur in Feb-2021, the 3rd month of the MY-20-2021 for tur. India imported around 4.25 lakh MT tur (Dec-2019 to Nov-2020 last year). This year the volume may be around 4.75 lakh MT. It would affect total availability in the market. Stockists and traders may try to push up market by holding crop till Sep-Oct -2021. If monsoon starts with good rains fall, area may increase and good sowing may help market to cool down. But second quarter is very tricky at price point of view. Nafed may release stock to cool down price but not before procurement ends in April-May. Till then market may continue to trade stable to slightly firm.

Nafed has procured 10,929.36 MT Tur so far at minimum support price of Rs 6000. The maximum (8000 MT) tur has been procured in Karnataka, followed by Mh at 1001 MT. As prices are ruling above MSP, Procurement quantity would be much than normal expectation. Arrival is lower at this point of time. Farmers are holding stock in anticipation of higher prices in coming weeks. Private trades are active and it shows prices to move up further if arrival stay steady.

In the 2nd week of April-2021, average price in Gulberga market was up by Rs 200 to Rs 6950-7100 due to lower arrivals and buying by private trades at higher level. Prices are expected to improve.

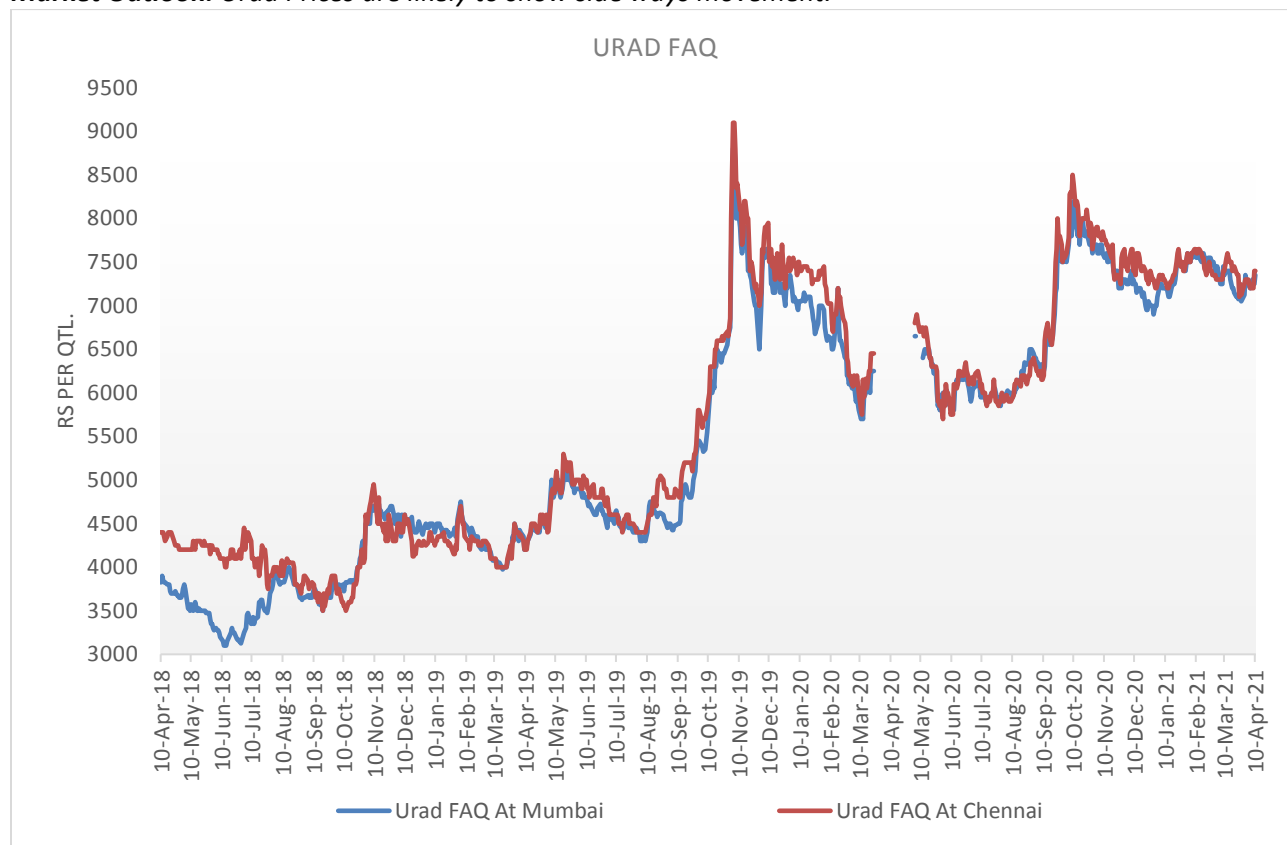

Black Matpe (Urad):

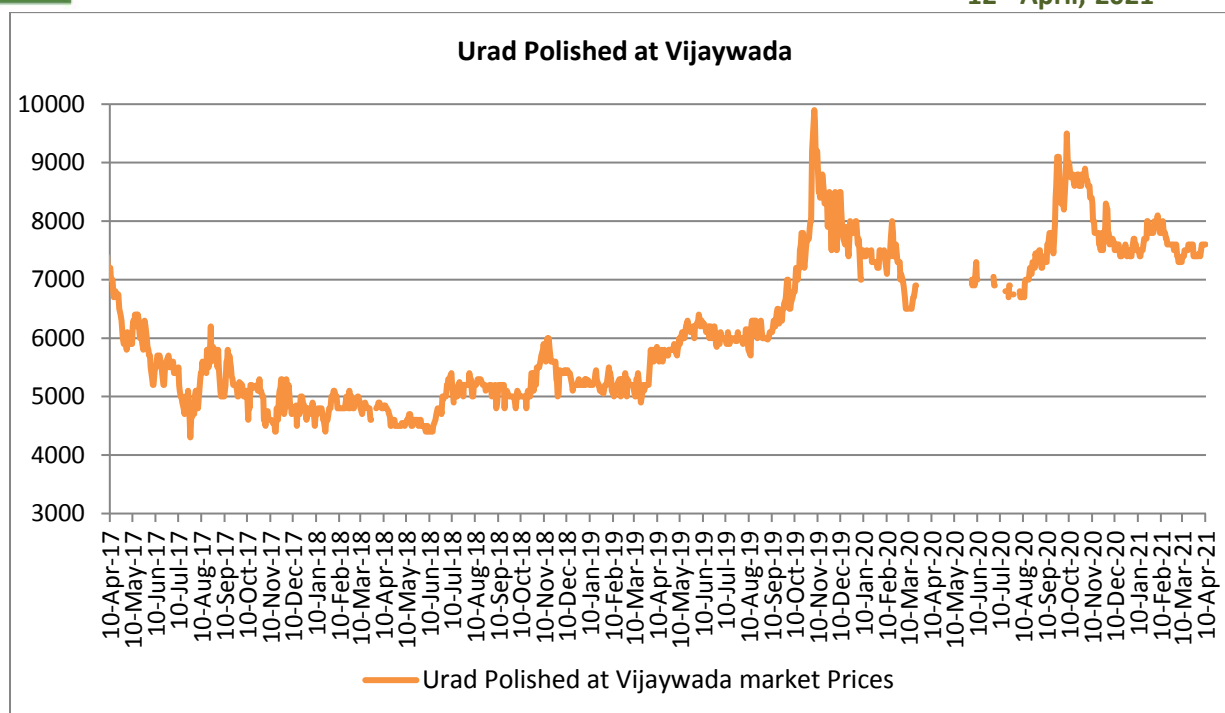

Urad cash market traded steady to slightly firm despite import flow from back log quota.. Arrivals from early shown rabi crop may help prices to cool down. Arrival pressure might be felt from mid April. Demand for daal has decreased while farmers/stockists are releasing stock at slower pace..Bulk arrival is expected only this Month. So , overall tone seems firm in the medium term. Short term outlook is weak. Procurement by Nafed is rather slow as prices are ruling above MSP right now and may continue to rule at higher level. Big kharif crop is sixth month away, so any major decline is unlikely in coming weeks.Demand for daal at higher level is weak right now.

Current Market Dynamics & Outlook:

Arrival from rabi crop is expected to increase . However crop size is lower and it would be consumed locally in Andhra Pradesh and Tamil Nadu. From states, crop would hit market in April. So , any major decline in urad market is unlikely at this point of time .Major urad crop comes in kharif season. As availability in Myanmar too is low and price up, bulk volume import is not possible in Mar-April-2021 too.India imported around 1.28 lakhMT MT urad in Jan-2021.. From April to Jan-21-India imported only 2.91 lakhMT urad.

Market Outlook: Urad Prices are likely to show side ways movement.

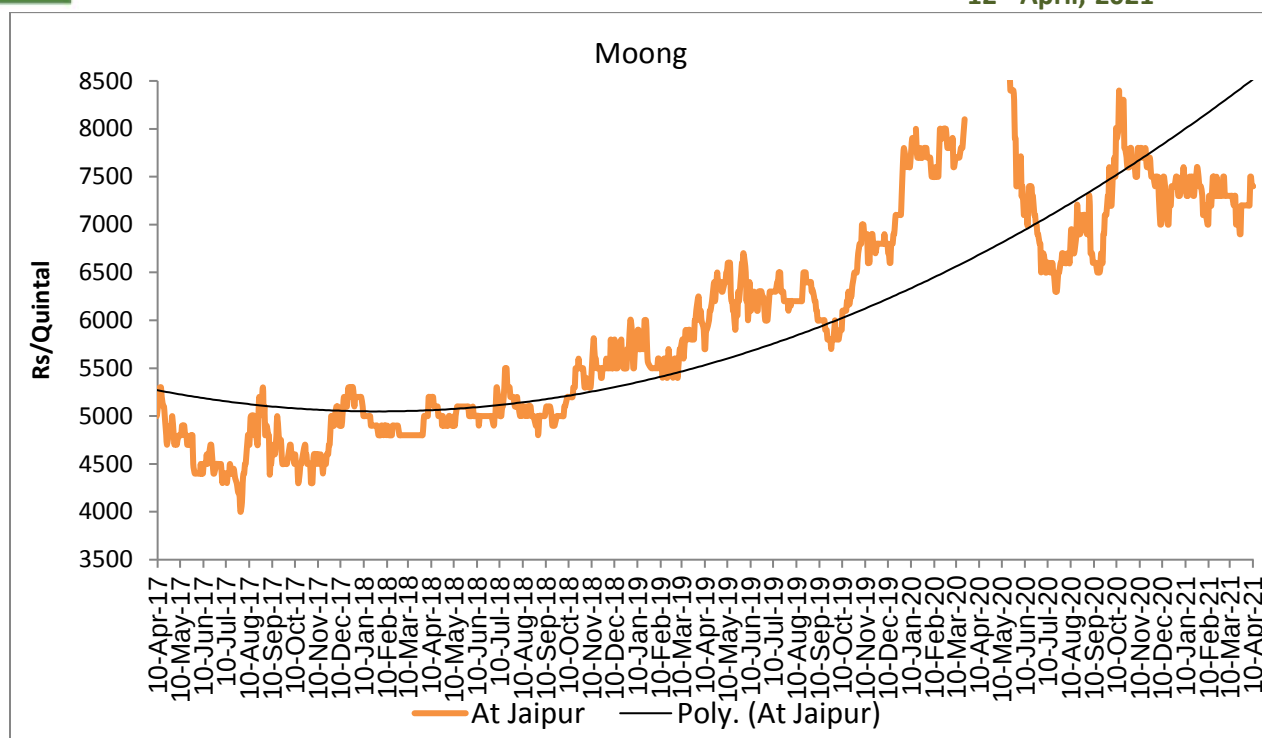

Green Gram (Moong):

Market Recap:

Moong cash market is likely to trade sideways as supply is expected to ease from summer crop. Pressure might be felt when new crop would start hitting market from Odisha in March end. Crop condition of moong is good in AP, Tamil Nadu and Orisha. Import flow would remain restricted as there is no parity at current level. Apart from it availability in Myanmar is weak this year. Prices in the market like Gannavaram traded down at 7500-7600 during the week. In north and central India, prices have decreased below MSP for low quality crop.. Sideways movement is expected this week in Moong market. . Arrival from Rabi crop is expected from end Mar.

Rabi area is expected to increase this year. Farmers have covered only 6.59 lakh has so far against the normal of 9.86 lakh ha. Pressure from the Rabi crop may be felt only in March 2021. Total production including Rabi is expected to move up by 2.39 lakh Mt to 21.45 lakh Mt this year.

Market Outlook: Moong prices are likely to trade steady to slightly weak in the near term.
