Commodity-wise Domestic, International Prices and Arrivals at Different Centers

Weekly Highlights-Domestic Market:**Pulses Sector-Highlights:**

Average weekly Chana price in major markets traded down by 1.05% to 5260 from 5316 during the week under review. Market has been waiting for a good demand for a long time. Mills are unable to continue processing even its 50 % capacity due to lack of normal demand. Stocks have accumulated in mills while farmers still have 15 to 20 % stock with them. Big players drove the chana market up from 4400 to 5700 in April and sold their old stock at higher price. However, small players are well trapped now, as they have brought it at higher level. Market is facing liquidity crunch right now and the consumers buying based on immediate needs only as income level has come down. If demand does not improve two-three months more, stakeholders may start releasing stock. So, range-bound (Rs5000-5400) movement is expected this week. Sentiment remains weak.

Tur import is taking place at 6100-6200 in Mumbai in the limited volume while it may increase in the second half of June. Some importers are offering Tur at 6300-6400 for July delivery. Demand is yet to improve in the domestic markets. So, any spike in Tur market is unlikely. Farmers & stockists have started offloading stocks slowly. Nafed still has around 3.44 lakh MT old stock and it can be pumped in if prices start increasing again. Apart from it, the enhanced MSP (6000 to 6300) for next season may encourage farmers to grow more Tur this year. Early monsoon rains may encourage farmers to sow early. Demand is weak, so Tur cash market would not move up beyond a certain level. It may continue to trade in the range of 6350-6650 in Gulbarga market.

Urad cash market traded sideways despite the low stocks in domestic markets. It stayed steady at Rs6550-6600 in Mumbai while the local crop in Tamil Nadu is being traded at Rs 6350-6400. Demand is weak while the importers are offering Urad at Rs6550-6650 for the forward month July. Import is taking place and the volume may increase in the second half of this month till July-Aug. Kharif sowing may start early and the new crop may hit the market from end Aug. Apart from it around 1 lakh MT Urad import is expected in June and July. So, any spike is unlikely now. The market has already adjusted with the new import policy now. Higher MSP (6000 to 6300) for the new season may encourage farmers to maintain area at previous level or increase it slightly. Nafed has 55000 MT Urad from old stock.

Slight recovery might be seen in the cash moong market despite ongoing arrivals from the summer crop. Prices have decreased below MSP in all major markets and are being traded at Rs6000 to 6600. As Nafed is about to start the procurement drive from 15th of June in M.P. & Orisha, a recovery is expected in the cash market. In other markets the pressure on price would continue as Kharif sowing in Karnataka has already started and the big crop may start hitting the market from mid-Aug. Demand in domestic market is weak. Even the import flow would continue in limited volume as Myanmar is offering Moong at \$950(INR Rs 6600-6700 at Indian ports) per MT. Weather is favourable and higher MSP(7196 to 7275) for the new season may encourage farmers to maintain kharif area at previous year level. The overall outlook seems steady to slightly firm for the short term.

Slight recovery was seen in the cash Masur markets. It moved up by Rs 100 to Rs 6625 in Kanpur market while the Canadian Masur is being offered at Rs 6500 at Mumbai port. Masur markets too may trade range bound as arrivals in market may increase. A vessel having 35,000 MT is expected by the end of this month. Canadian new crop would start hitting the market in mid-Aug. So, global market may trade down. Stockists in the local market too would not hold stock August onward. Demand is low amid expectation of the higher supply from the imported stock. It may limit upward momentum.

Global Market:

Global chickpea markets traded almost firm during the past week. Markets remain concerned with the production potential in North America and the possibility the region will need to import food grade product in the coming season. Supplies of marginal and feed quality chickpeas remain significant in Canada, but are no longer having a negative impact on markets-as per the news released by Statpub.

Global Lentil markets were softened to some extent during the week under review against slowing sales and worries that India has yet to announce any changes to import duties for lentils. The trend may continue if fresh export demand starts.

The seeded area under dry peas is expected to be slightly higher at 1750 thousand ha in 2021-20 against 1722 thousand ha last year in Canada. However, yield may decline from 2.73 to 2.57 t/ha this year due to average yield expectation owing to the expected uncondusive weather conditions. So, the production is forecast to decrease from 4594 to 4400 thousand tonnes this year. Total supply and the export figure too may decrease from 4927 to 4790 and 3800 to 3700 thousand tonnes respectively. However domestic use may increase from 827 to 840 thousand tonnes this year. The carryout to decrease from 300 to 250 thousand tonnes.

Lentils production in Canada is expected to decrease from 28.68 in 2020-21 to 2.7 MMT in 2021-22 due to slightly lower area & yield. Export too are expected to decrease by 2 lakh MT to 25 lakh MT in 2021-22. Total supply is expected to decrease from 31.82 to 29.25 lakh MT due to likely lower production in 2021-22. Against it domestic usage. However, domestic use would decrease from 3.27 to 2.75 lakh MT in 2021-22. So carryout stock would stay at same las last year at 1.5 MT. Average yearly price is expected to be in the range of \$ 585 per MT. For 2002-21 it is \$ 600 per MT.

The seeded area under Chickpeas is expected to be slightly lower at 100 thousand ha this year in Canada against 121 thousand ha last year. the yield too may decline from 1.79 to 1.75 t/ha this year. The production of Chickpeas may decrease from 214 to 170 thousand tonne in 2021-22. However, total supply and export may increase slightly from 507 to 520 and 115 to 125 thousand tonnes respectively this year due to low domestic use. The carryout would increase slightly from 305 to 310 thousand tonnes this year. the yearly average price is expected to rule at \$545 per tonne against \$610 last year.

Chickpeas production in Australia is expected to increase from 2.81 to 7.55 lakh Mt in 2020-21. Even field peas production would increase from 2.19 to 2.94 lakh MT-n 2020-21. Even lentils production may increase from 5.34 to 6.34 lakh Mt in 2020-21.

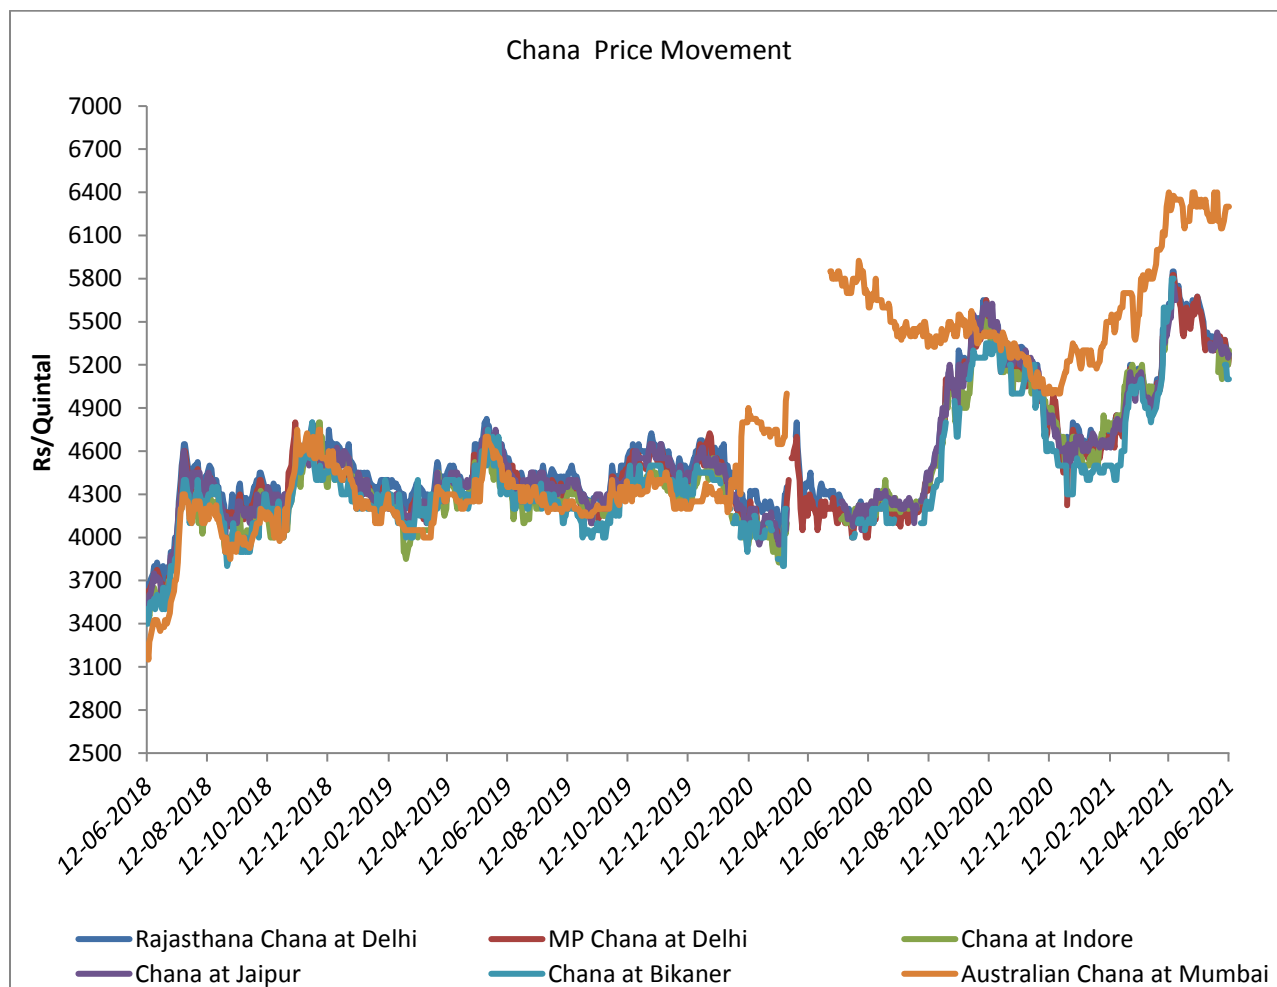

Lentils production in US for 2020 has been pegged at 336,201 MT based on 514,000 acres. Lentil production is up by 40% from last year with a USDA production estimate of 7.41 million cwt. Planted acreage was up 9% from 2019 with 528,000 acres in 2020, and harvested acreage was up even more, 21% at 514,000 acres. Weekly Outlook: - Pulses are likely to trade mixed.

Pulses-Wise Scenario:

Chana

Current Scenario:

Chana cash market traded down by 1.05 % to 5260 from 5316 taking cue from other pulses at the end of the week. In the beginning of the week, slight recovery was seen, but could not sustain due to lack of demand. Arrivals are increasing in Gujarat and Madhya Pradesh & Delhi. Millers are unable to sell processed daal in normal way. Nafed has 8.50 lakh MT old stock. Apart from it weak demand, poor offtake of daal and the increasing availability of mango would continue to put a cap on price. Following graph illustrates chana price movement in different markets:

Market Outlook: Weak movement is expected to continue in cash the chana market this week due to weak demand at lower level. Actually demand for besan is weak and it has pressurized the market. Temples, hotels and other major consuming centers are closed, which use gram flour in bigger volume. Apart from this the purchasing power of the common man has decreased by 50%. Indian importers have imported around 4831.34 MT chana during April 2021. India imported 3.29 lakh MT Chana during last financial year. Overall tone is weak.

Chana Weekly Technical Analysis:

Technical Commentary:

- Decreasing price & OI hint weak sentiments in futures market in the near term.
- RSI is steady in the neutral region, hints indcision.
- Prices closed below 9 and 18 days EMAs.
- Candlestick chart hints bearish sentiment.

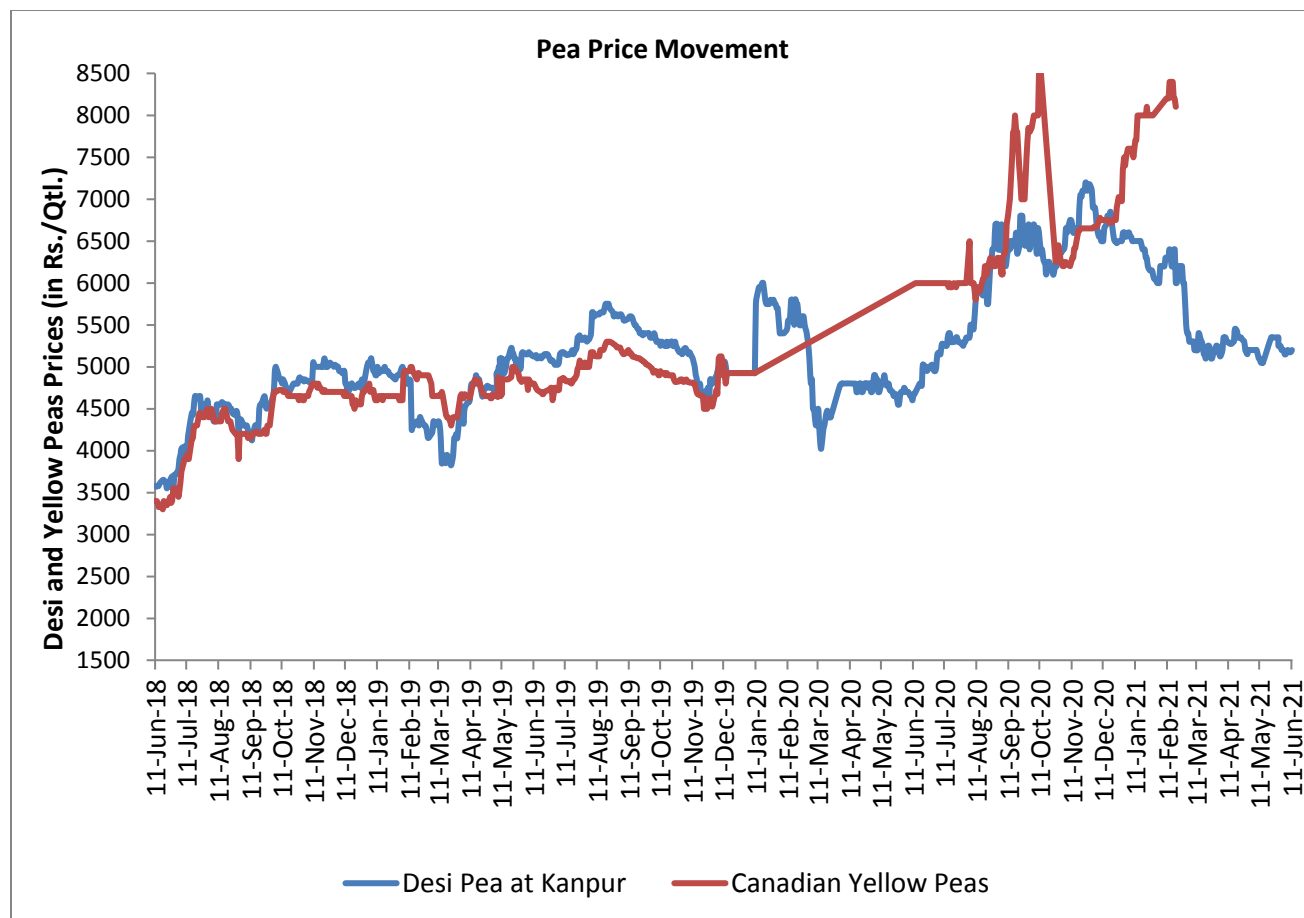

Strategy: sale on rise

Chana	NCDEX	July	Sell below	5165	5100	5075	5195

• Do not carry forward stock for next week.

Peas (Matar):
Market Recap:

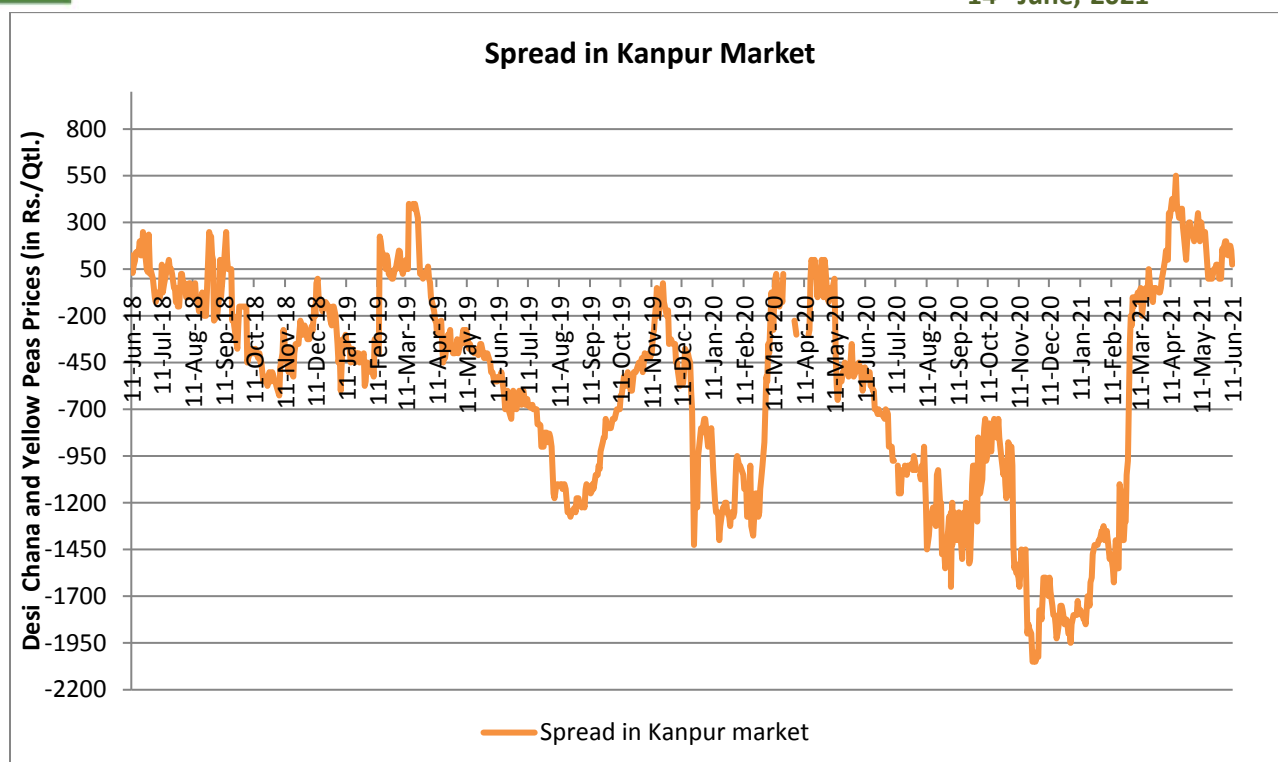

Govt. has not given any import quota for peas as of now. However, if prices of chana moves up (unlikely before 10 of July, when festive season starts, slight recovery might be seen in peas cash market too. If India saves itself from the third wave of COVID-19, demand is expected to improve. Peas prices traded slightly down due to falling chana prices. Matar in Kanpur market is being traded at Rs 5100 per qtl. There was no quotes for green peas as availability is negligible. As of now there is no intension to open peas import. It may move further down taking cue from weak chana market. Following chart shows price movement in various markets:

Current Market Dynamics & Outlook: Peas market traded slightly down due to weak tone in other pulses market. In Kanpur market it was quoted at Rs 5100 per qtl. Overall, all India average weekly price was down by Rs 50 to Rs 5100 per qtl. In Mumbai market, there was no quote for yellow peas as stock has been exhausted. There is no quotes for imported peas as availability is almost nil. Poor purchasing power too is hampering demand.

Spread With Chana:

Spread between Chana and Peas, at Kanpur market moved in positive zone. Gap has been fulfilled now and it is Rs 50 up now. Spread is expected to remain in the positive zone in June too on relative movement in Chana prices. Overall outlook seems steady to slightly weak this week too.

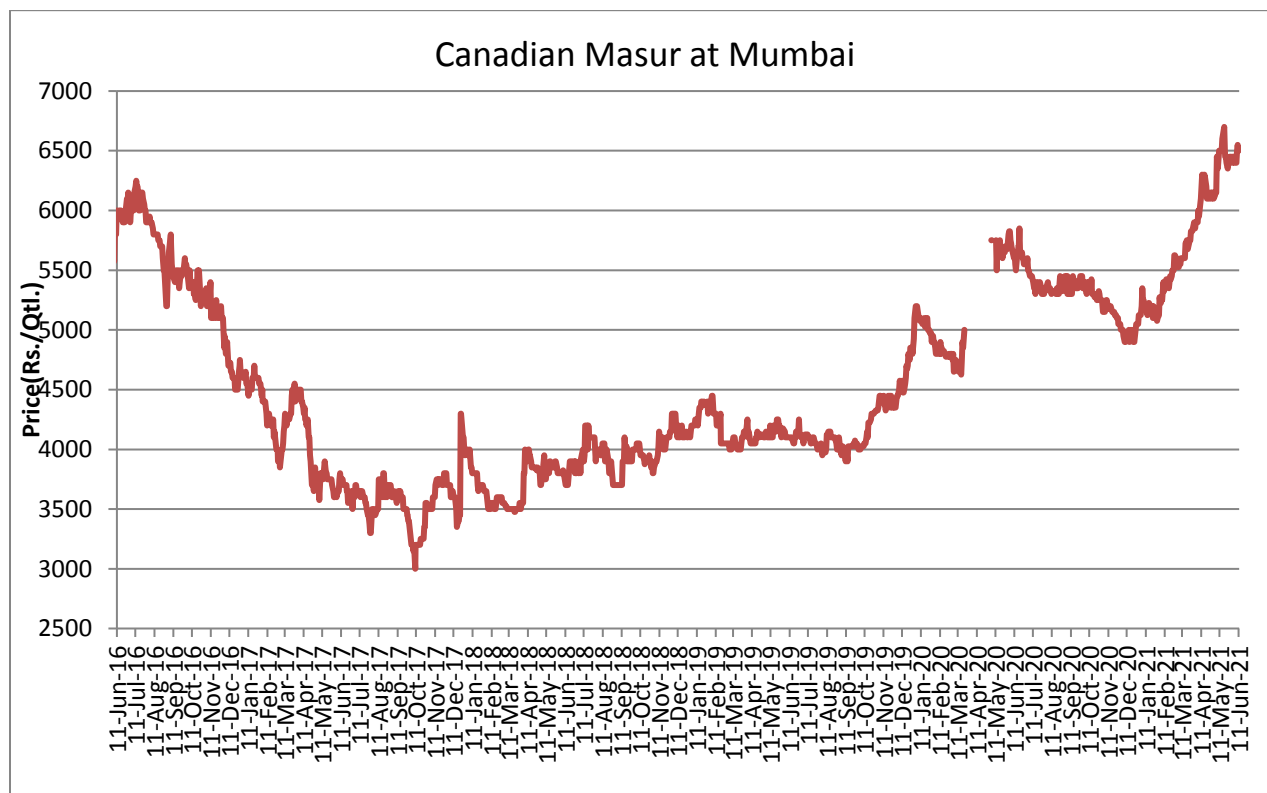

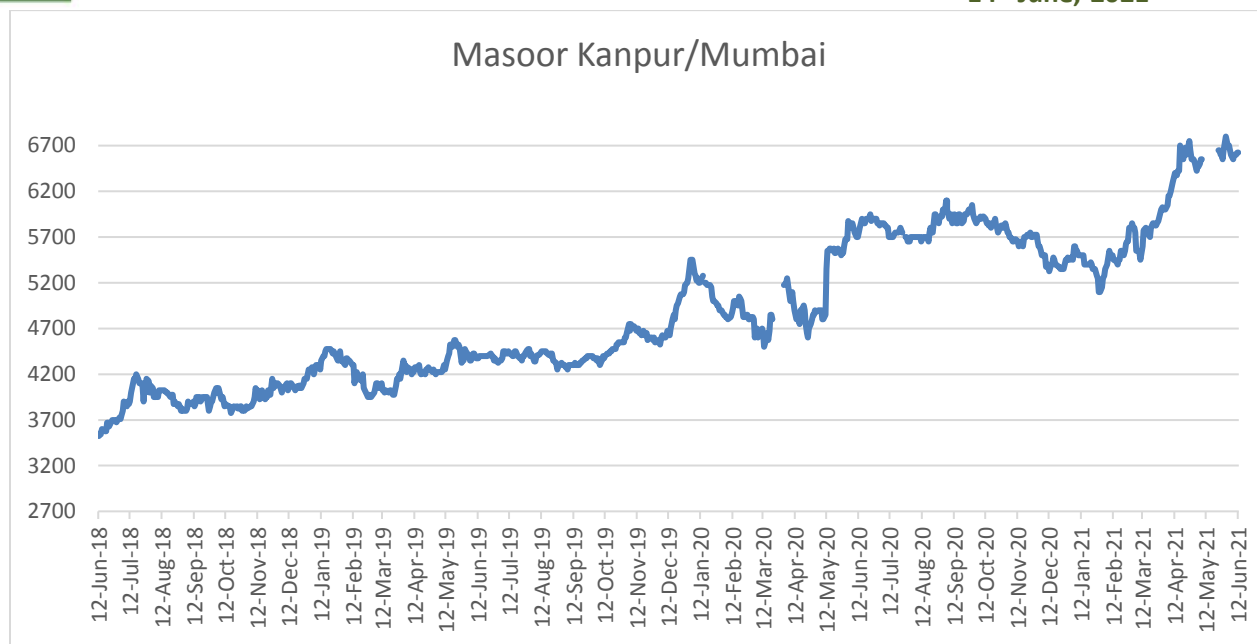

Market Outlook For June: Steady to slightly weak movement is expected in June-2021.

Lentils (Masoor):

Market Recap:

The cash Masur market traded slightly up to Rs 6625 in Kanpur market while imported stock traded steady at Rs6450-6500 in Mumbai market. Demand is weak, so, it would trade steady to slightly up. Import flow is limited as quotes in Canada & Australia are ruling higher. New crop in Canada would hit market in Aug, so, the import volume would increase and before this stockists in domestic market may prefer to release stocks, purchased from the local crop. Imported Masur is coming at Indian ports at Rs 6450-6500.

Current Scenario: As demand in cash market is weak, prices may stay steady at the current level despite arrivals are unexpectedly low in May and June this year.

Market Outlook: Prices may trade steady to slightly weak due to sluggish demand from mills even at low level. Overall tone in the masur market remains weak in the 2nd week of June-2021. Lockdown are being relaxed in phased manner, but demand is unlikely to improve due to the low purchasing power of the common man.

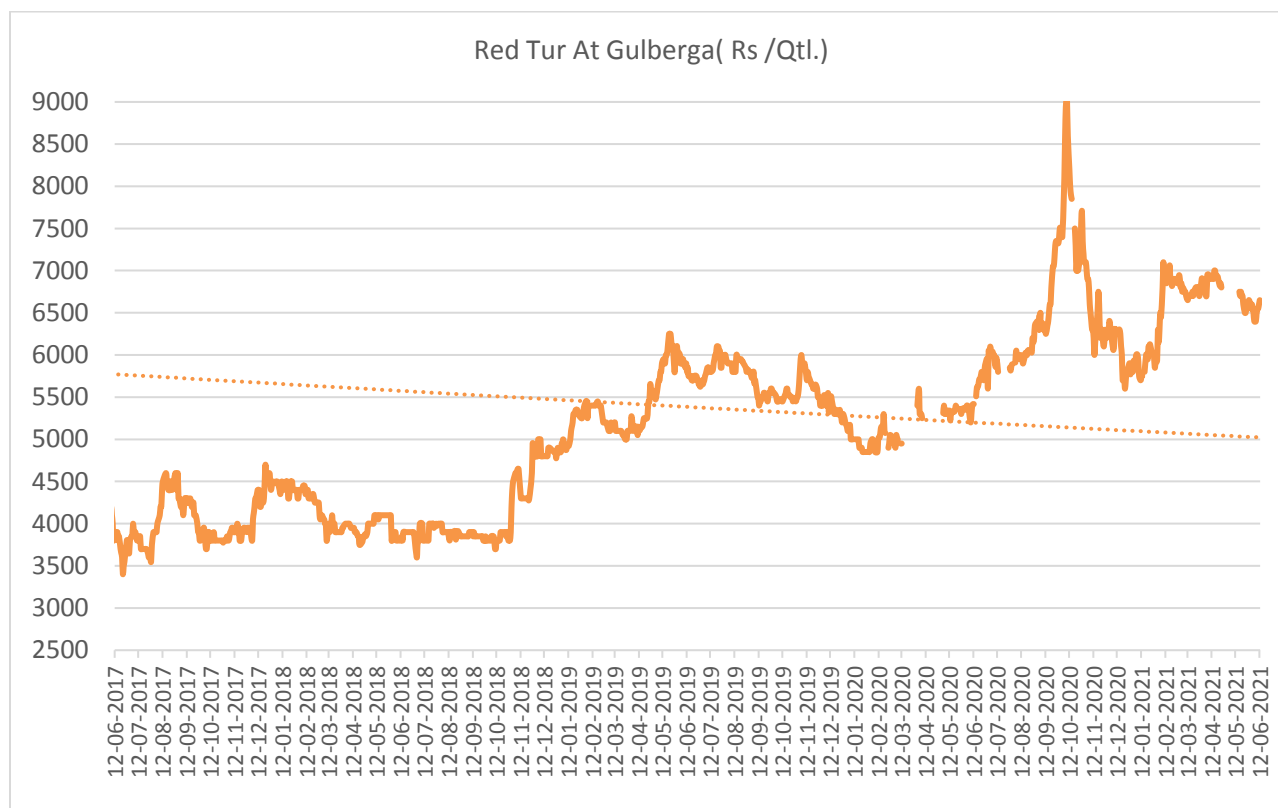

Pigeon Pea (Tur/Toor):

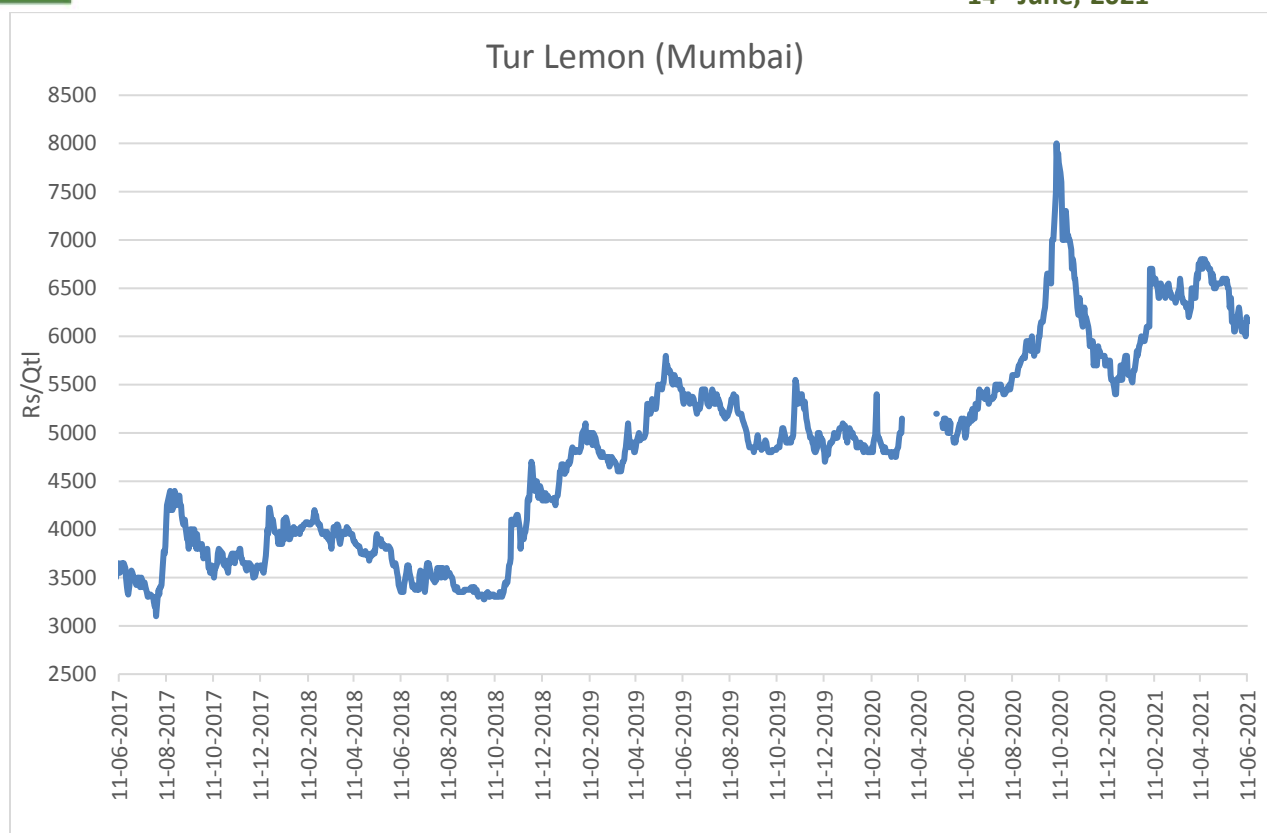

Slight recovery was seen in Tur cash market. It moved up by Rs 100 to 6500 on Saturday. Almost all major markets traded steady to slightly firm. The upward momentum would not continue as the importers are offering Tur at low price (6150-6250) at ports. Arrival from farmers/stockists stocks may continue as the inner tone in the market turned weak.

Current Market Dynamics & Outlook:

Lemon Tur is available at 6150-6250 at Mumbai port. Sowing may start in the third week of June as the pre-monsoon rainfall has increased the soil moisture in the field. The import flow is not expected to increase substantially before mid- June and July. Despite the increased quotes in Myanmar and Sudan by \$ 80 to 100 per MT, there is parity and imports expected, so daal prices may trade weak this week too.

India imported around 4304 MT tur in April-2021, the 4th month of the MY-2020-21 for tur. India imported 4.97 lakh MT last year. It would affect total availability in the market. This year (FY) over 5.5 lakh MT import is expected. Stockists and traders may try to push up market by holding crop till Sep-Oct -2021. If monsoon starts with good rainfall, area may increase and good sowing may help market to cool down.

In the 2nd week of June-2021, average price in Gulberga marke was slightly up.

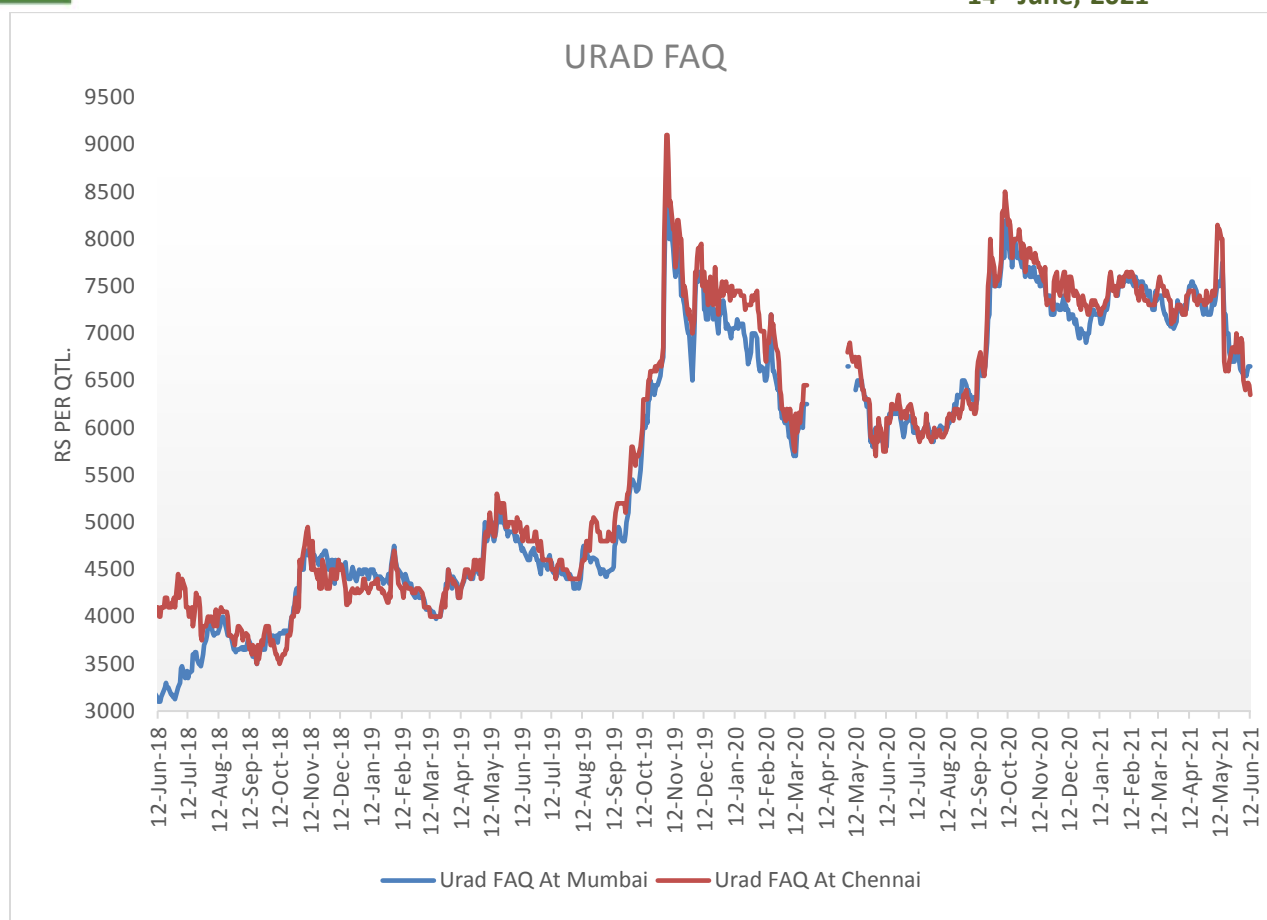

Black Matpe (Urad):

Imported Urad traded up by Rs 50 to Rs 6650 at Mumbai while the local crop in Tamil Nadu traded down by Rs 150 to Rs 6350. Stockists continue to release stocks as the importers are offering Urad at Rs 6500-6650 for forward months. So, the cash market is unlikely to move up. Apart from it, the enhanced MSP would encourage farmers to maintain area at previous year's level. so , the pressure may build up again. Myanmar is offering Urad FAQ at \$850-60 and SQ at \$950. Demand is low.

Current Market Dynamics & Outlook:

Arrival from rabi crop is over now while arrival is at its low due the ongoing lockdown .Major urad crop comes in kharif season. As availability in Myanmar too is low and so, import flow would be limited to some extent. India imported around 31573 MT urad in March-2021. From April to March-21-India imported only 3.29 lakh MT urad out of allocated four lakh MT quota. Import is free now, so when parity turns in favour of India, the volume of import may increase.

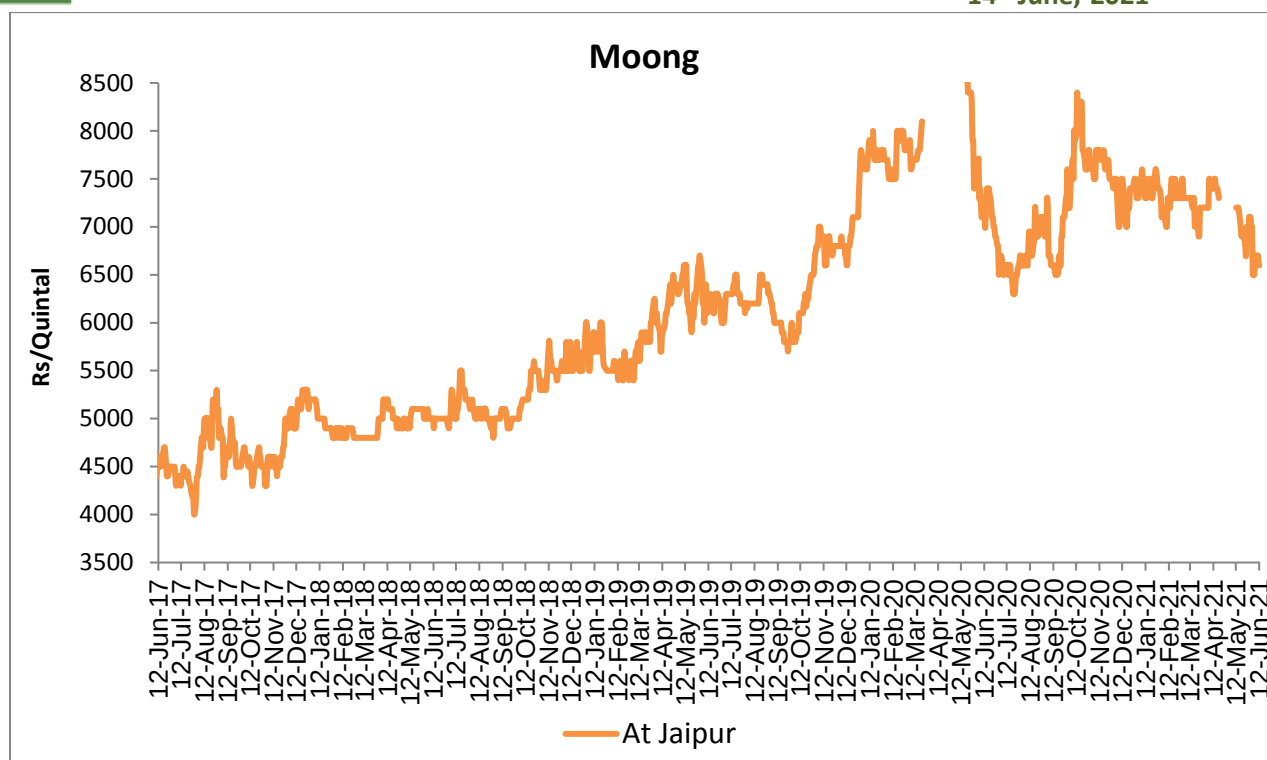

Market Outlook: *Urad Prices are likely to show weak movement.*

Green Gram (Moong):

Market Recap:

The Moong cash market may trade up despite the arrival from the summer crop. Procurement drive, stockists/millers active buying may support the Moong market in coming weeks. Moong is already ruling below MSP. It is being traded at Rs 6400 in Jaipur market, may move up to Rs 6600-6800 in coming weeks. Sowing started in Karnataka. The enhanced MSP would encourage farmers to grow more moong. Import flow may improve as the quotes in Myanmar is steady at \$950 for Annaseva. Kharif sowing progress, monsoon rains, import volume and the purchase volume at MSP would be the main price driving forces for Moong in coming weeks. Procurement drive from the summer crop may start.

Market Outlook: Moong prices are likely to trade steady to weak in the near term.

Import policy & duty structure:

Commodity	Trade Policy		Tariff Schedule			
	Export	Import	Bound Duty	Proposed Cess in Budget-2021	Import Duty	Total Applied Duty with Cess
