Commodity-wise Domestic, International Prices and Arrivals at Different Centers

Weekly Highlights-Domestic Market:

Pulses Sector-Highlights:

Kharif pulses sowing is running behind by 16.78 % to 14.58 lakh ha as on 25th June-2021. Tur area is down by 36.92 % to 5.57 lakh ha. Urad area is slightly down by 0.91% to 2.17 lakh ha from last year till date. However, Moong area is up by 1.95% to 5.23 lakh ha. other pulses area is up by 20.33% to 14.58 lakh ha. See details in table at page no. 12

Average weekly Chana price in major markets traded slightly up by 0.82 % to 5140 from 5098 during the week under review. Arrivals are stable while markets expect demand to increase in coming weeks. With commencement of the festive season from July demand for gram flour would increase and it may support Chana market at current level. However, if the third wave of pandemic starts, it may continue to affect demand in July too. Stocks have accumulated in mills while farmers still have 15 to 20 % stock with them. Consumers of Chana daal are buying based on their immediate needs as the income level has gone down. Market is facing liquidity crunch too as the offtake from mills is low. In rainy season moisture level increases and it affects quality of Chana. So, arrivals might be stable. As demand is expected to increase, price may improve. Chana in the North & Central India may continue to rule in the range of Rs 5000-5300 this week.

Recovery in Tur & Tur Daal market seems very much in the sight. Prices of major brands like Pistal, Amul Prime Gold and Other branded daal have increased by Rs 3 to 4 per k.g. during last week in major markets of Maharashtra. Latur is the prime centre of Chana daal in west India. Recovery was seen in Karnataka and North Indian markets too for branded daal. Whenever, prices in Latur region increase, it hints firm sentiments in other Indian markets. Traders, stockists may prefer to buy Tur daal instead of whole tur. It may push up Tur price by Rs200-300 by mid-July. Tur price recovered by 1.36 % to Rs 6554 in Gulbarga market. It may move up to 6700-6800 in two to three weeks. In Mumbai market imported Tur too traded up by 1.16 % to Rs 6179. Import flow is low while no big volume is expected in Jun-July. So, overall tone seems firm. Stockists have started restricting release while the purchase of daal may increase.

Govt. has signed a MoU with Myanmar for importing 2.5 lakh MT Urad & 1 lakh MT Tur annually. Kharif sowing is yet to pick up. Overall tone remains weak as importers are offering urad at Rs 6300-6400 in Mumbai and Chennai market. Demand is yet to pick up while stockists /mills are releasing stocks sensing weak tone prevailing in the market despite some improvement in prices. Even the quotes for forward delivery has been reduced by Rs 100 to Rs6500 for July while the new crop would hit the market by end August. Apart from this, import is taking place and the volume may increase in the second half of this month till July-Aug. Apart from it around 1 lakh MT Urad import is expected in June and July. So, any spike is unlikely now. Higher MSP (6000 to 6300) for the new season may encourage farmers to maintain area at previous level or increase it slightly. Nafed has 55000 MT Urad from old stock. Range bound movement is expected in the Urad market.

The Moong cash market stayed steady at previous level while sentiments remain weak due to the low demand and the good sowing prospects. Arrivals from the summer crop continues while early kharif sowing in Karnataka has increased pressure on price despite the ongoing purchase from the summer crop by Nafed in M.P. Prices have decreased below MSP in all major markets and are being traded at Rs6000 to 6500. Demand in domestic market is weak. Even the import flow would continue in limited volume as Myanmar is offering Moong at \$950(INR Rs

6600-6700 at Indian ports) per MT. Weather is favourable and higher MSP (7196 to 7275) for the new season may encourage farmers to maintain kharif area at previous year level. Range bound movement is expected this week.

Recovery in lentils market was seen last week due to the increased quotes (from 6450 to 6650) at ports. Demand is expected to increase while trades/stockists too have restricted sale sensing strong inner tone. Masur moved up by Rs 100 to 6700 in Kanpur market while in M.P. it moved up by Rs 75 to 6500-6600. It may move up by Rs 100 to 200 until vessels hit the Indian ports, expected in mid-July. As supply side is good in the global market, it should trade in the range of Rs 6800-6900 in July. The short term outlook is firm.

Global Market:

Global chickpea markets traded almost firm during the past week. Markets remain concerned with the production potential in North America and the possibility the region will need to import food grade product in the coming season. Supplies of marginal and feed quality chickpeas remain significant in Canada, but are no longer having a negative impact on markets-as per the news released by Statpub.

Global Lentil markets were softened to some extent during the week under review against slowing sales and worries that India has yet to announce any changes to import duties for lentils. The trend may continue if fresh export demand starts.

The seeded area under dry peas is expected to be slightly higher at 1750 thousand ha in 2021-20 against 1722 thousand ha last year in Canada. However, yield may decline from 2.73 to 2.57 t/ha this year due to average yield expectation owing to the expected uncondusive weather conditions. So, the production is forecast to decrease from 4594 to 4400 thousand tonnes this year. Total supply and the export figure too may decrease from 4927 to 4790 and 3800 to 3700 thousand tonnes respectively. However domestic use may increase from 827 to 840 thousand tonnes this year. The carryout to decrease from 300 to 250 thousand tonnes.

Lentils production in Canada is expected to decrease from 28.68 in 2020-21 to 2.7 MMT in 2021-22 due to slightly lower area & yield. Export too are expected to decrease by 2 lakh MT to 25 lakh MT in 2021-22. Total supply is expected to decrease from 31.82 to 29.25 lakh MT due to likely lower production in 2021-22. Against it domestic usage. However, domestic use would decrease from 3.27 to 2.75 lakh MT in 2021-22. So carryout stock would stay at same as last year at 1.5 MT. Average yearly price is expected to be in the range of \$ 585 per MT. For 2002-21 it is \$ 600 per MT.

The seeded area under Chickpeas is expected to be slightly lower at 100 thousand ha this year in Canada against 121 thousand ha last year. The yield too may decline from 1.79 to 1.75 t/ha this year. The production of Chickpeas may decrease from 214 to 170 thousand tonne in 2021-22. However, total supply and export may increase slightly from 507 to 520 and 115 to 125 thousand tonnes respectively this year due to low domestic use. The carryout would increase slightly from 305 to 310 thousand tonnes this year. The yearly average price is expected to rule at \$545 per tonne against \$610 last year.

Chickpeas production in Australia is expected to increase from 2.81 to 7.55 lakh Mt in 2020-21. Even field peas production would increase from 2.19 to 2.94 lakh MT in 2020-21. Even lentils production may increase from 5.34 to 6.34 lakh Mt in 2020-21.

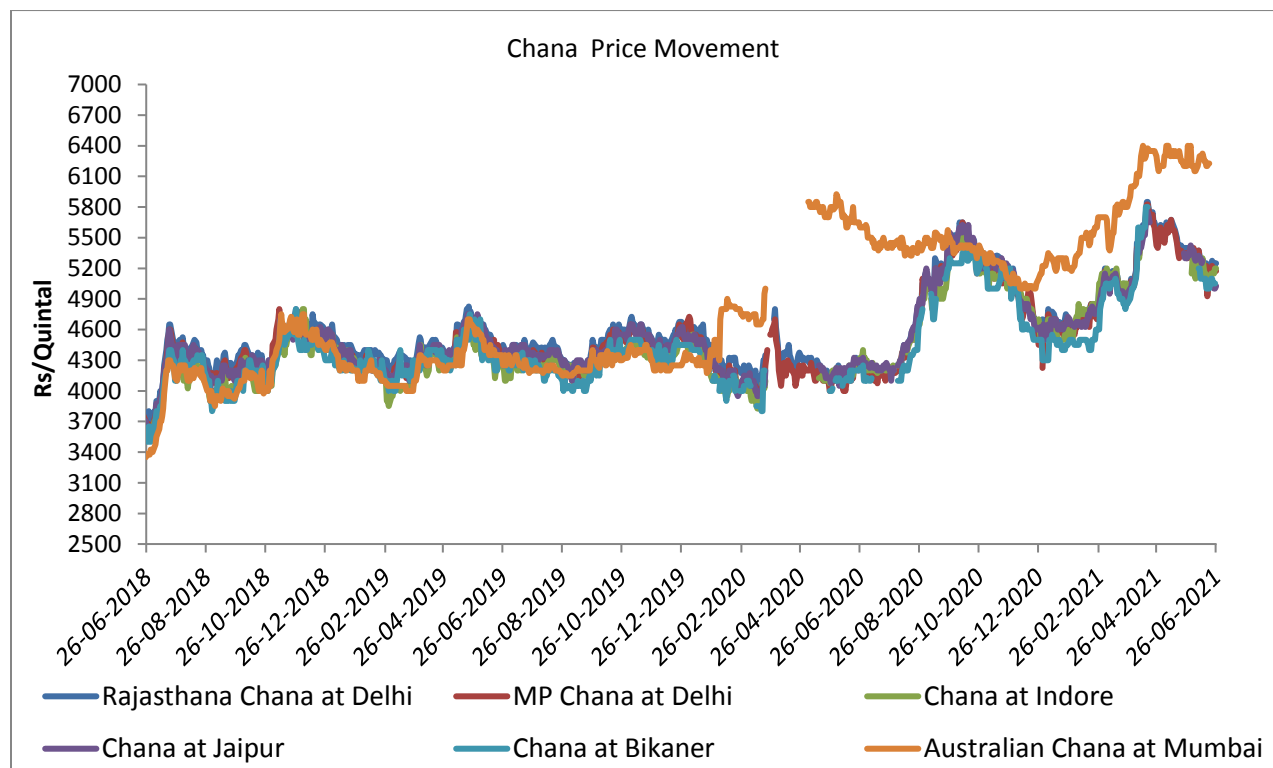

Lentils production in US for 2020 has been pegged at 336,201 MT based on 514,000 acres. Lentil production is up by 40% from last year with a USDA production estimate of 7.41 million cwt. Planted acreage was up 9% from 2019 with 528,000 acres in 2020, and harvested acreage was up even more, 21% at 514,000 acres. Weekly Outlook: -Pulses are likely to trade mixed.

Pulses-Wise Scenario:

Chana

Current Scenario:

Chana cash market traded up by 0.82 % to 5140 from 5098 expecting festive demand for gram flour in coming weeks. Arrival is stable. In the beginning of the week, pressure was seen on the prices. Market is expecting improvement in demand. Arrivals are almost stable in Gujarat, Madhya Pradesh & Delhi. Millers too expect improvement in demand ahead of festive season. Nafed has 8.50 lakh MT old stock. Nafed has procured 5.46 lakh MT chana so far in this season. Nafed has stopped sale for old Chana due to low bids. However, sale attempts are expected again in Aug-Sep. Following graph illustrates chana price movement in different markets:

Market Outlook: Slight recovery in market might be seen. nafed may announce sale of Chana again as it has to releasold Chana stock as quality of Chana continue to deteriorate. Now demand for besan is expected to start and it may support market to some extent. Temples, hotels and other major consuming centers are expected to reopen again, which use gram flour in bigger volume, may lend support to cash market. Indian importers have imported around 4831.34 MT chana during April 2021. India imported 3.29 lakh MT Chana during last financial year. Overall tone is weak.

Chana Weekly Technical Analysis:

Technical Commentary:

- Decreasing price & OI hint weak sentiments in futures market in the near term.
- RSI is steady in the neutral region, hints indecision.
- Prices closed below 9 and 18 days EMAs.
- Candlestick chart hints bearish sentiment.

Strategy: Buy on dip

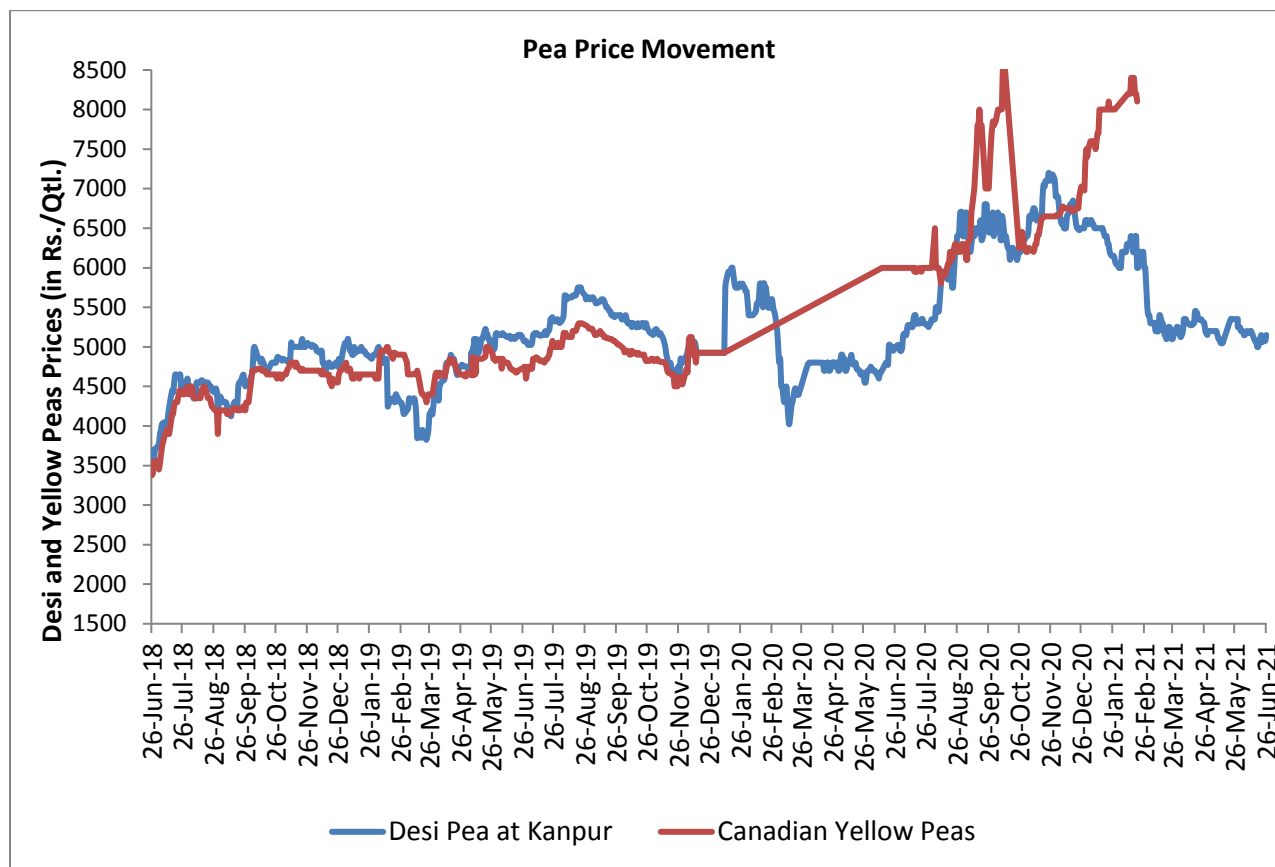

Supports & Resistances			S1	S2	PCP	R1	R2
Chana	NCDEX	July	5038	4960	5038	5254	5275
Weekly Trade Call*			Call	Entry	T1	T2	SL
Chana	NCDEX	July	Buy above	5000	5100	5150	4965

- Do not carry forward stock for next week.

Peas (Matar):

Market Recap:

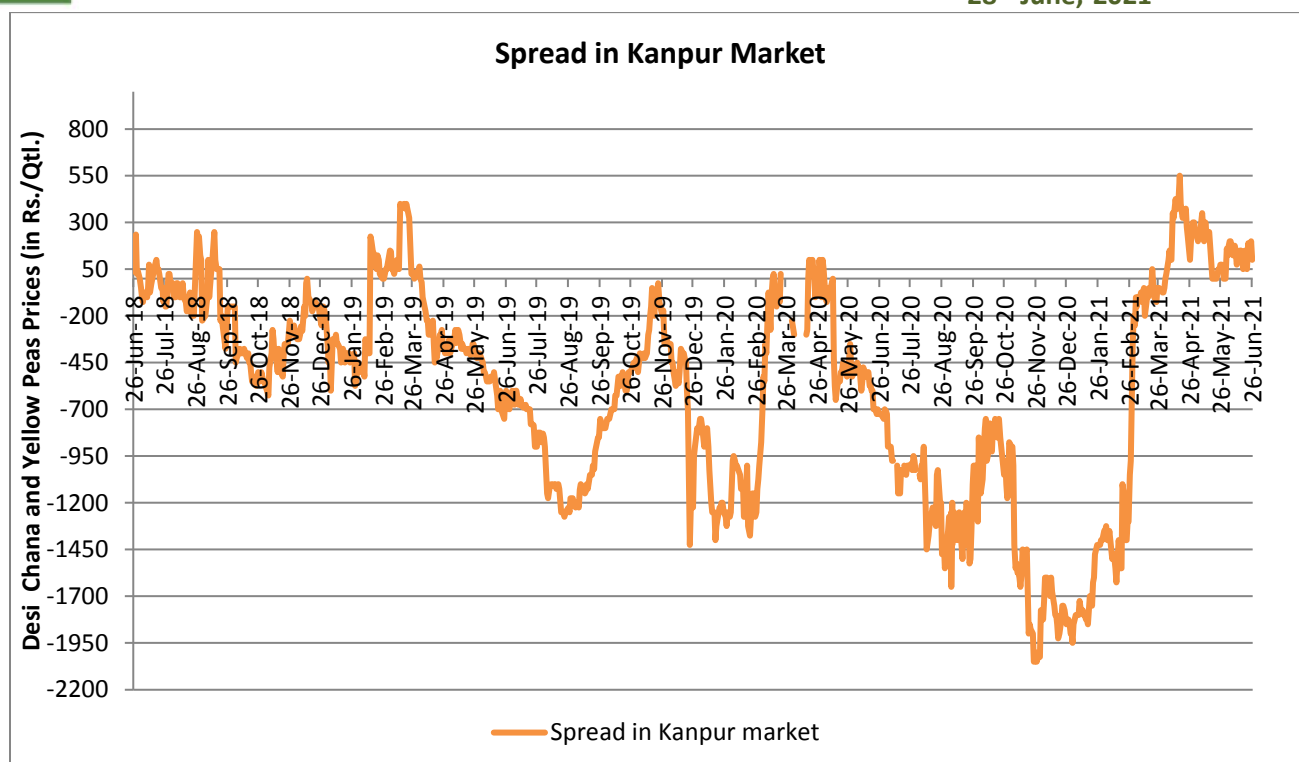

Govt. has not given any import quota for peas as of now. However, if prices of chana moves up (unlikely before 10 of July, when festive season starts, slight recovery might be seen in peas cash market too. If India saves itself from the third wave of COVID-19, demand is expected to improve. Pea's prices traded slightly down due to falling chana prices. Matar in Kanpur market is being traded at Rs 5150 per qtl. There was no quotes for green peas as availability is negligible. As of now there is no intension to open peas import. It may move further down taking cue from weak chana market. Following chart shows price movement in various markets:

Current Market Dynamics & Outlook: Peas market traded slightly down due to weak tone in other pulses market. In Kanpur market it was quoted at Rs 5100 per qtl. Overall, all India average weekly price was down by Rs 50 to Rs 5100 per qtl. In Mumbai market, there was no quote for yellow peas as stock has been exhausted. There is no quotes for imported peas as availability is almost nil. Poor purchasing power too is hampering demand.

Spread With Chana:

Spread between Chana and Peas, at Kanpur market moved in positive zone. Gap has been fulfilled now and it is Rs 100 up now. Spread is expected to remain in the positive zone in July too on relative movement in Chana prices. Overall outlook seems steady to slightly weak this week too.

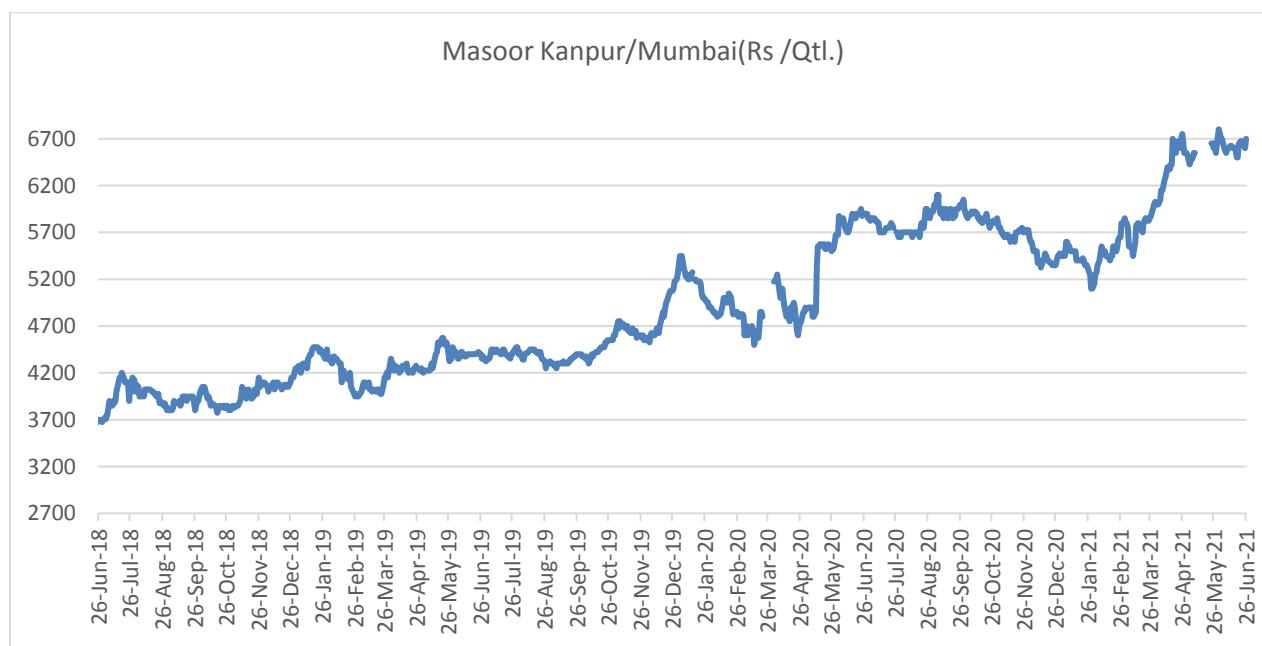

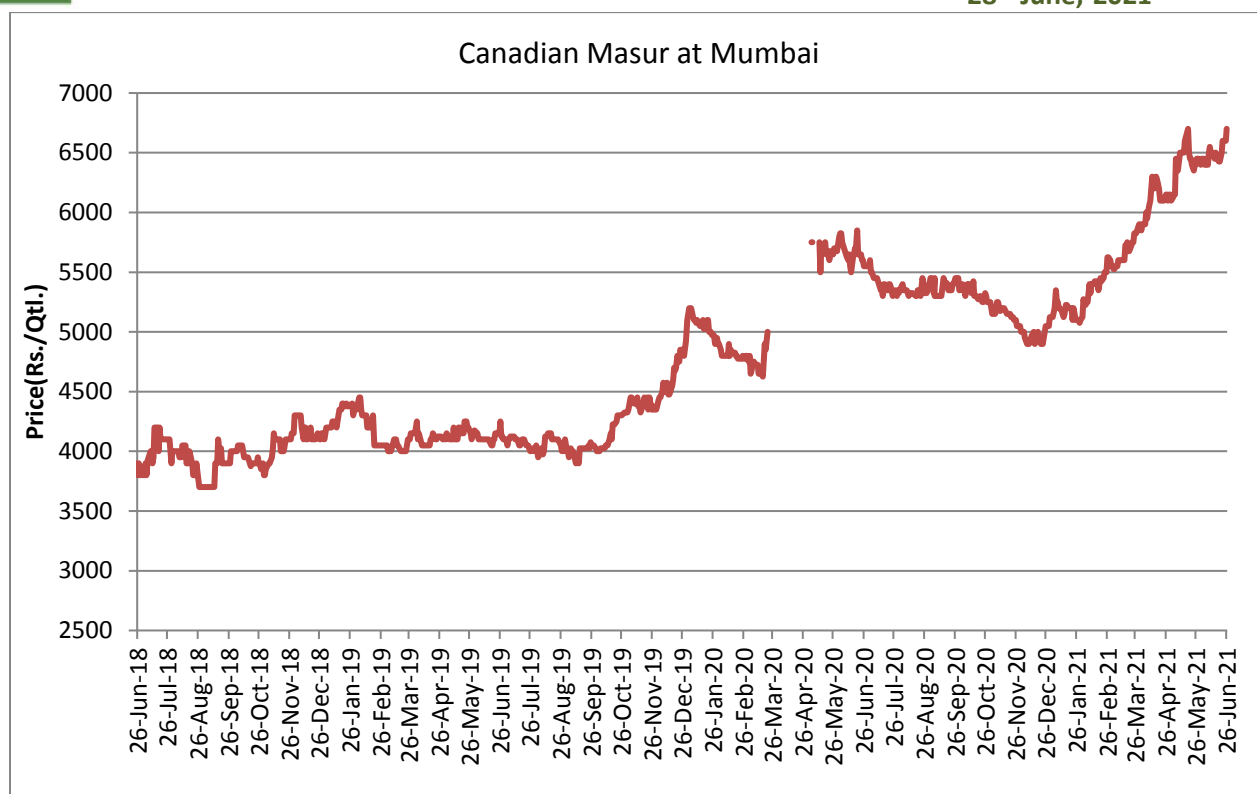

Market Outlook For July: Steady to slightly firm movement is expected in July-2021. Duty reduction is yet awaited. If duty is reduced, market may decline.

Lentils (Masoor):

Market Recap:

The cash Masur market traded slightly up to Rs 6700 in Kanpur market while imported stock traded up to at Rs 6650-6700 in Mumbai market. Demand is about to increase, so, it would trade steady to slightly up. Import flow is limited as quotes in Canada & Australia are ruling higher. New crop in Canada would hit market in Aug. However, dry condition may delay sowing activities in Canada and harvesting may be delayed by 15 days. If dry weather continues, production may decline. A vessel having 52000 MT Masur is expected in the second week of July. It may cap uptrend to some extent.

Current Scenario: As demand in cash market will improve, prices may trade firm from the current level.

Market Outlook: Prices may trade steady to slightly firm due to the demand from mills even at the current level. Overall tone in the masur market remains weak in the 2nd week of June-2021. Lockdown are being relaxed in phased manner.

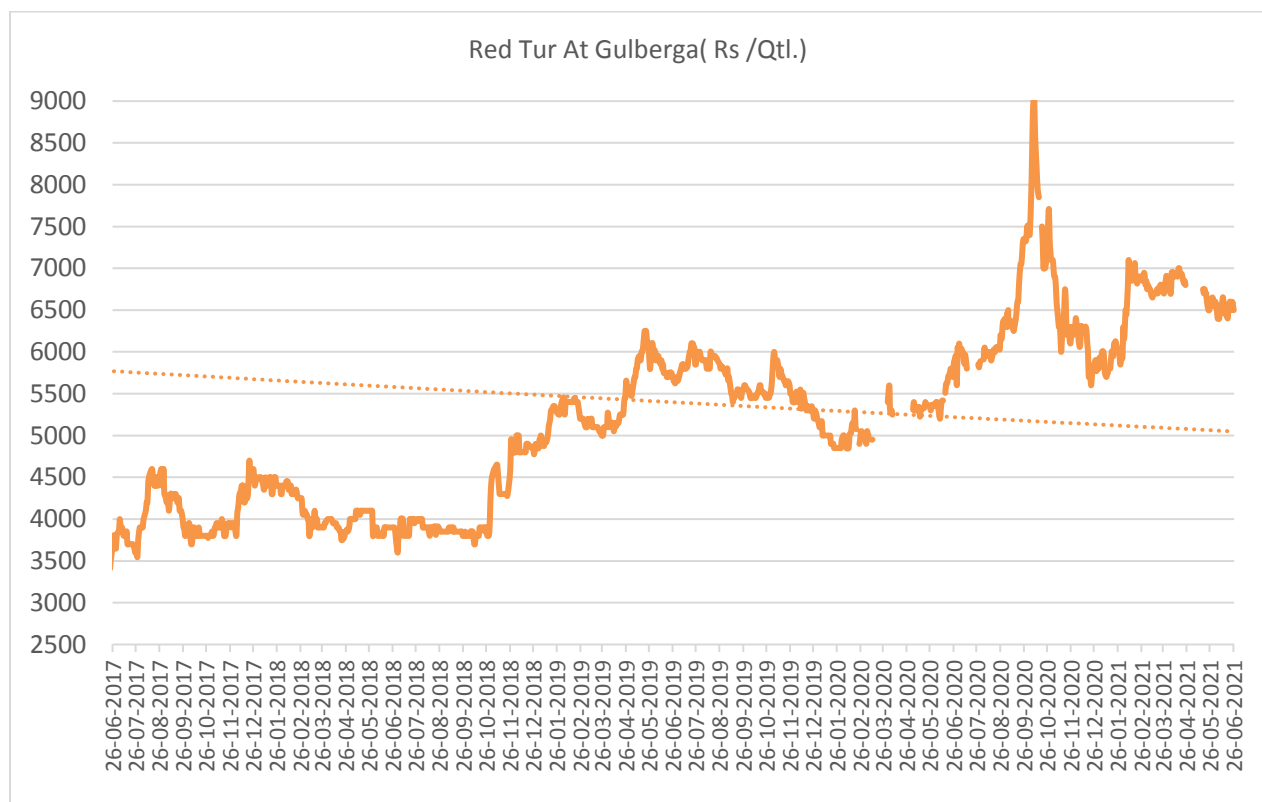

Pigeon Pea (Tur/Toor):

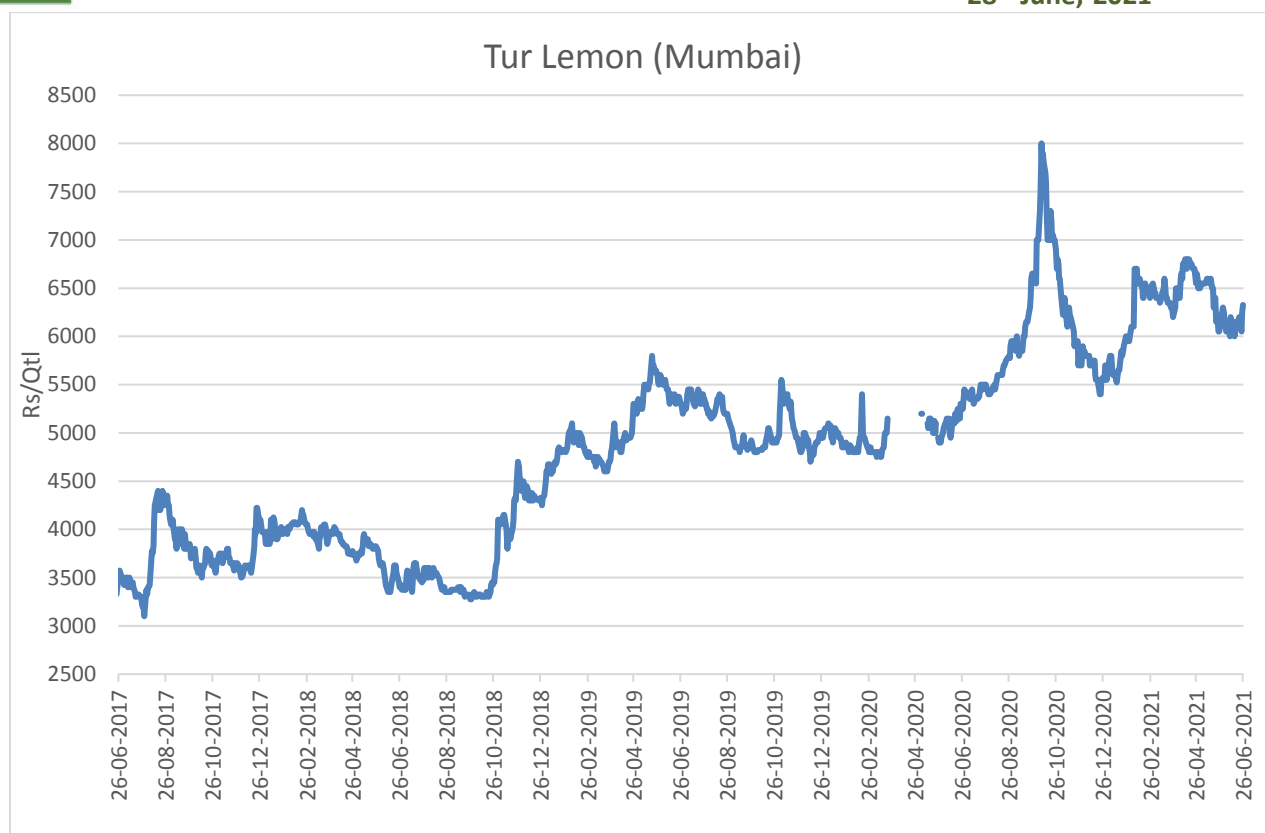

Slight recovery was seen in Tur cash market. It moved up by Rs 50 to 6550-6600.. Almost all major markets traded steady to slightly firm. The upward momentum may continue as the importers are offering Tur now at price (6450-6500) for July aug delivery. Arrival from farmers/stockists stocks might be restricted ahead of festive demand. as the inner tone in the market turned firm once again. Sowing area is already down by 37% to 5.57 lakh ha so far.

Current Market Dynamics & Outlook:

Lemon Tur is available at 6150-6250 at Mumbai port. Sowing has started but running with slow pace due to lack of rains in some region and and water-logging in other regions.The import flow is not expected to increase substantially even in July.Importers may restricts sale if prices moves further down.

India imported around 4304 MT tur in April-2021, the 4th month of the MY-2020-21 for tur. India imported 4.97 lakhMT last year.It would affect total availability in the market. This year (FY) over 5.5 lakh MT import is expected.Stockists and traders may try to push up market by holding crop till Sep-Oct -2021.If monsoon starts with good rainsfall, area may increase and good sowing may help market to cool down.

Black Matpe (Urad):

Imported Urad stayed steady at Rs 6650 at Mumbai while the local crop in Tamil Nadu traded down by Rs 50 to Rs 6300. Stockists continue to release stocks as the importers are offering Urad at Rs 6500-6650 (New crop) for forward months. So, the cash market is unlikely to move up. Apart from it, the enhanced MSP would encourage farmers to maintain area at previous year's level. so, the pressure may build up again. Myanmar is offering Urad FAQ at \$850-60 and SQ at \$950. Demand is low.

Current Market Dynamics & Outlook:

Major urad crop comes in kharif season. Farmers have covered only 2.17 lakh ha so far, down by 0.91 percent from last year till date. As availability in Myanmar too is low and so any big decline is not expected before the new crop hits the market. India imported around 31573 MT urad in March-2021. From April to March-21-India imported only 3.29 lakh MT urad out of allocated four lakh MT quota. Import is free now, so when parity turns in favour of India, the volume of import may increase.

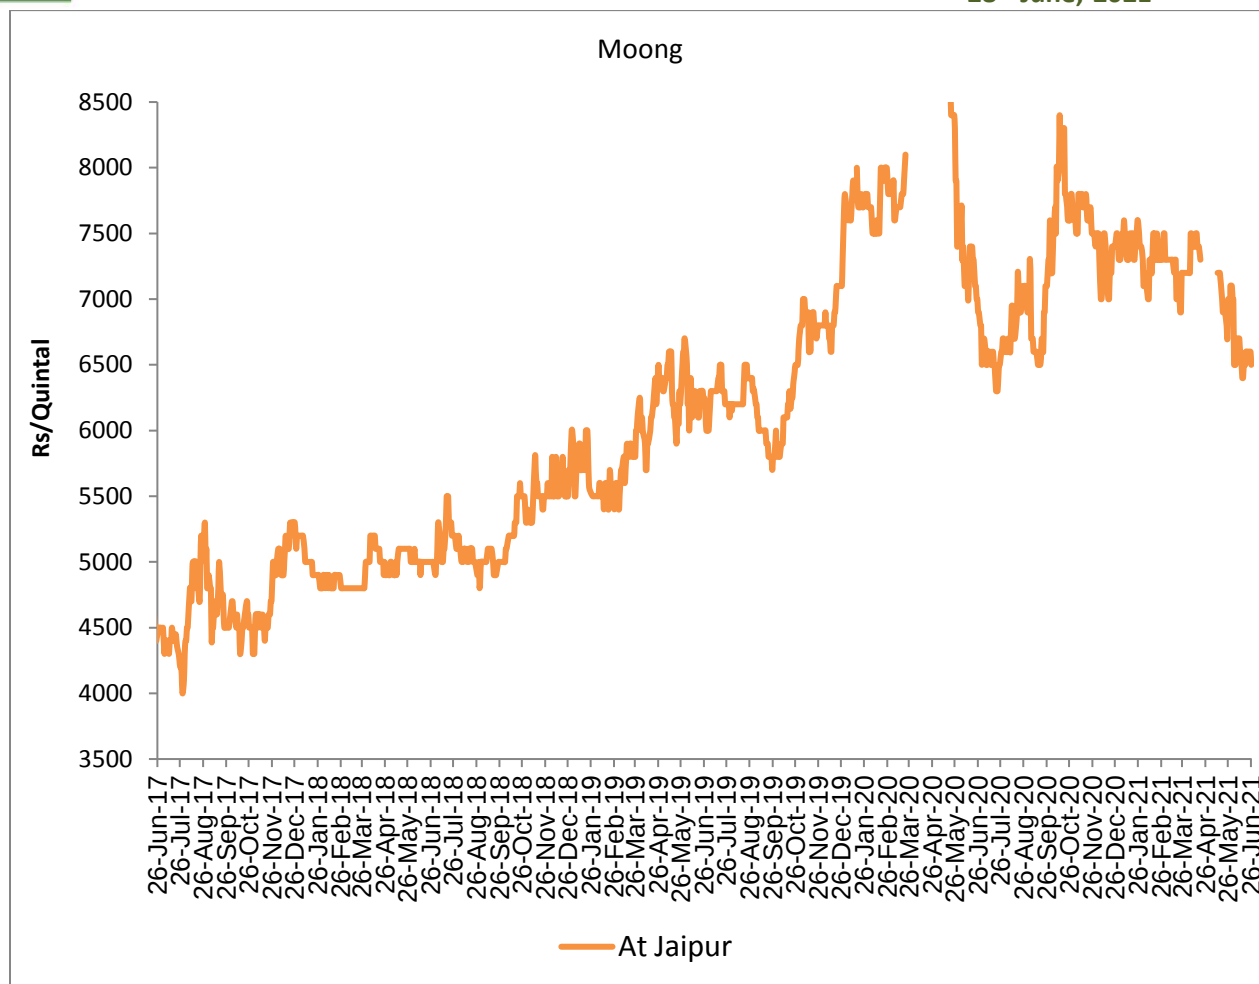

Market Outlook: Urad Prices are likely to show weak movement.

Green Gram (Moong):

Market Recap:

The Moong cash market could not move up as expected last week as the procurement drive is rather slow in M.P. despite stockists/millers active buying at rs6400-6500 in Rajasthan and Madhya Pradesh. Demand is low despite prices ruling below MSP. It is being traded at Rs 6500 in Jaipur market, may move down to Rs6300-6400 in coming weeks. Sowing started in Karnataka. The enhanced MSP would encourage farmers to grow more moong. Import flow may improve as the quotes in Myanmar is steady at \$950 for Annaseva. Kharif sowing progress, monsoon rains , import volume and the purchase volume at MSP would be the main price driving forces for Moong in coming weeks.

Market Outlook: Moong prices are likely to trade steady to weak in the near term.
