Weekly Highlights-Domestic Market:

Pulses Sector-Highlights:

Kharif pulses sowing is running behind by 16.78 % to 14.58 lakh ha as on 25th June-2021. Tur area is down by 36.92 % to 5.57 lakh ha. Urad area is slightly down by 0.91% to 2.17 lakh ha from last year till date. However, Moong area is up by 1.95% to 5.23 lakh ha. other pulses are a is up by 20.33% to 14.58 lakh ha. See details in table at page no. 12

Stock limit on pulses imposed by the govt. last week has started affecting the normal trades in pulses cash markets. All associations related to pulses have started opposing this move and called for strike for two to three days in various markets in India. The strike may extend if govt. continues with its move. It may affect processing activities in mills. Traders may decide to stop buying kharif crop at MSP, especially Moong which is out of the stock limit. Moong price is already ruling down by Rs700-800 from MSP.

Disturbance in the monsoon advancement too has affected the normal sowing of Tur, Moong & Urad. Area is down despite a good start. As the monsoon progress is expected to move again from 8th of July-21 sowing activities may pick up again. It is an early stage of sowing and area may recover.

Chana cash market traded down by 1.20% to 5078 during the week under review. Steps taken by the govt. like stock limit, sales by Nafed amid weak demand for daal & besan pressurized the market and the pressure may continue despite the beginning of festive season. Supply side is likely to ease. Traders and stockists, who have more stock than stipulated limit, may release stock. So, chana and its products may low in July. Steps taken by the govt. would continue to reign the price. Chana in Delhi market traded at Rs 5100 while July futures at 5066.

The recent stock limit order has stopped the expectation of recovery in Tur and daal markets. Trades ,stockists & mills having excess stock would have to release stock now. It has dashed down all the hopes for recovery in the market. Pulses trades communities had retained stock sensing the low import flow and availability in the market amid commencement of festive season. Under the prevailing condition steady to slightly weak movement is expected. Tur traded down by Rs300 to 6400 in Gulbarga market on Saturday. It may further decrease by 200, if stock limit order continues. Govt.'s strategy seems working here to keep prices down. Quotes in Myanmar too decrease by \$20 to \$840 in last two days.

There was no impact on the Urad cash market. Prices of imported Urad continue to rule at Rs 6350-6400 in Mumbai market. Stockists have already reduced their stock after the declaration of free import order. Demand is weak while supply side is almost balanced with increasing flow of import. Kharif area is expected to be at last year's level or slightly increase. New arrivals from kharif crop is expected August onward. So supply side might be balanced in the coming weeks. Urad local in Chennai decreased from Rs6200 to 6100. Myanmar decreased SQ quote from &935 to 910 while FAQ quotes stayed steady at \$850 per MT basis Indian ports. Fundamental remains weak for urad cash market in July.

As expected slight recovery was seen in the Moong cash market. However, it may discontinue again as other pulses market seems trading low. Good kharif crop is expected this year and stockists may prefer to release stock as fundamentals have turned weak now. Moong cash market may trade steady to slightly weak in coming weeks. Myanmar is offering Moong at \$950(INR Rs 6600-6700 at Indian ports) per MT. Weather is favourable and higher MSP (7196 to 7275) for the new season may encourage farmers to maintain kharif area at previous year level. Supply side would ease further.

Lentils cash market in Mumbai traded down by Rs200 to 6500 while in Kanpur market it traded down by Rs 100 to 6650. A vessel having 50,000 Mt Masur is expected to hit Indian port this week. Importers have lowers its quotes by Rs 200-250 to 6500 for immediate delivery. Apart from it stock limit, weak demand too have pressurized Masur market to some extent. Steady to slightly weak tone may prevail in the Masur market in July. Stockists may start releasing excess stock. Pressure seems on the cash market.

Global Market Updates:

Global chickpea markets traded almost firm during the past week. Markets remain concerned with the production potential in North America and the possibility the region will need to import food grade product in the coming season. Supplies of marginal and feed quality chickpeas remain significant in Canada, but are no longer having a negative impact on markets-as per the news released by Statpub.

Global Lentil markets were softened to some extent during the week under review against slowing sales and worries that India has yet to announce any changes to import duties for lentils. The trend may continue if fresh export demand starts.

The seeded area under dry peas is expected to be slightly higher at 1750 thousand ha in 2021-20 against 1722 thousand ha last year in Canada. However, yield may decline from 2.73 to 2.57 t/ha this year due to average yield expectation owing to the expected uncondusive weather conditions. So, the production is forecast to decrease from 4594 to 4400 thousand tonnes this year. Total supply and the export figure too may decrease from 4927 to 4790 and 3800 to 3700 thousand tonnes respectively. However domestic use may increase from 827 to 840 thousand tonnes this year. The carryout to decrease from 300 to 250 thousand tonnes.

Lentils production in Canada is expected to decrease from 28.68 in 2020-21 to 2.7 MMT in 2021-22 due to slightly lower area & yield. Export too are expected to decrease by 2 lakh MT to 25 lakh MT in 2021-22. Total supply is expected to decrease from 31.82 to 29.25 lakh MT due to likely lower production in 2021-22. Against it domestic usage. However, domestic use would decrease from 3.27 to 2.75 lakh MT in 2021-22. So carryout stock would stay at same las last year at 1.5 MT. Average yearly price is expected to be in the range of \$ 585 per MT. For 2002-21 it is \$ 600 per MT.

The seeded area under Chickpeas is expected to be slightly lower at 100 thousand ha this year in Canada against 121 thousand ha last year. the yield too may decline from 1.79 to 1.75 t/ha this year. The production of Chickpeas may decrease from 214 to 170 thousand tonne in 2021-22. However, total supply and export may increase slightly from 507 to 520 and 115 to 125 thousand tonnes respectively this year due to low domestic use. The carryout would increase slightly from 305 to 310 thousand tonnes this year. the yearly average price is expected to rule at \$545 per tonne against \$610 last year.

Chickpeas production in Australia is expected to increase from 2.81 to 7.55 lakh Mt in 2020-21. Even field peas production would increase from 2.19 to 2.94 lakh MT-n 2020-21. Even lentils production may increase from 5.34 to 6.34 lakh Mt in 2020-21.

Lentils production in US for 2020 has been pegged at 336,201 MT based on 514,000 acres. Lentil production is up by 40% from last year with a USDA production estimate of 7.41 million cwt. Planted acreage was up 9% from 2019 with 528,000 acres in 2020, and harvested acreage was up even more, 21% at 514,000 acres.

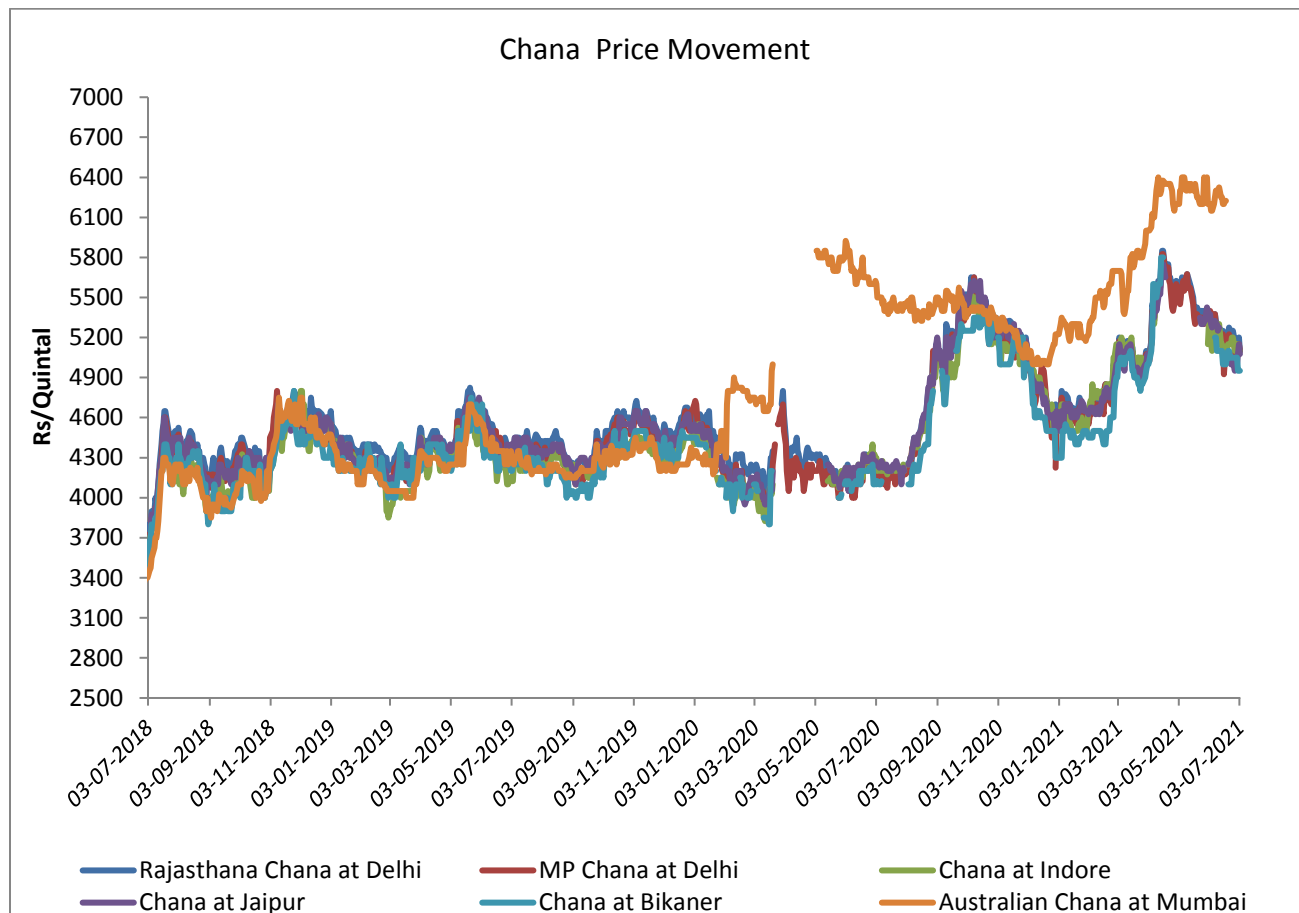

Weekly Outlook: -Pulses are likely to trade weak.

Pulses-Wise Scenario:

Chana

Current Scenario:

Chana cash market traded up by 0.82 % to 5140 from 5098 expecting festive demand for gram flour in coming weeks. Arrival is stable. In the beginning of the week, pressure was seen on the prices. Market is expecting improvement in demand. Arrivals are almost stable in Gujarat, Madhya Pradesh & Delhi. Millers too expect improvement in demand ahead of festive season. Nafed has 8.50 lakh MT old stock. Nafed has procured 5.46 lakh MT chana so far in this season. Nafed has stopped sale for old Chana due to low bids. However, sale attempts are expected again in Aug-Sep. Following graph illustrates chana price movement in different markets:

Market Outlook: Cash market traded weak with the announcement of stock limit order. Apart from it demand remains weak. Supply side is expected to ease as traders, stockists and importers have to maintain stock limit boundary. Major market remained closed against this order and the normal trade got disrupted once again. If govt withdraws its stock limit order, prices may improve, otherwise the pressure on price may continue. In Delhi market it traded down by Rs 150 to 4950 per qtl.. It may come down to 4850.

Chana Weekly Technical Analysis:

Technical Commentary:

- Decreasing price & OI hint weak sentiments in futures market in the near term.
- RSI is steady in the neutral region, hints indcision.
- Prices closed below 9 and 18 days EMAs.
- Candlestick chart hints bearish sentiment.

Strategy: Buy on dip

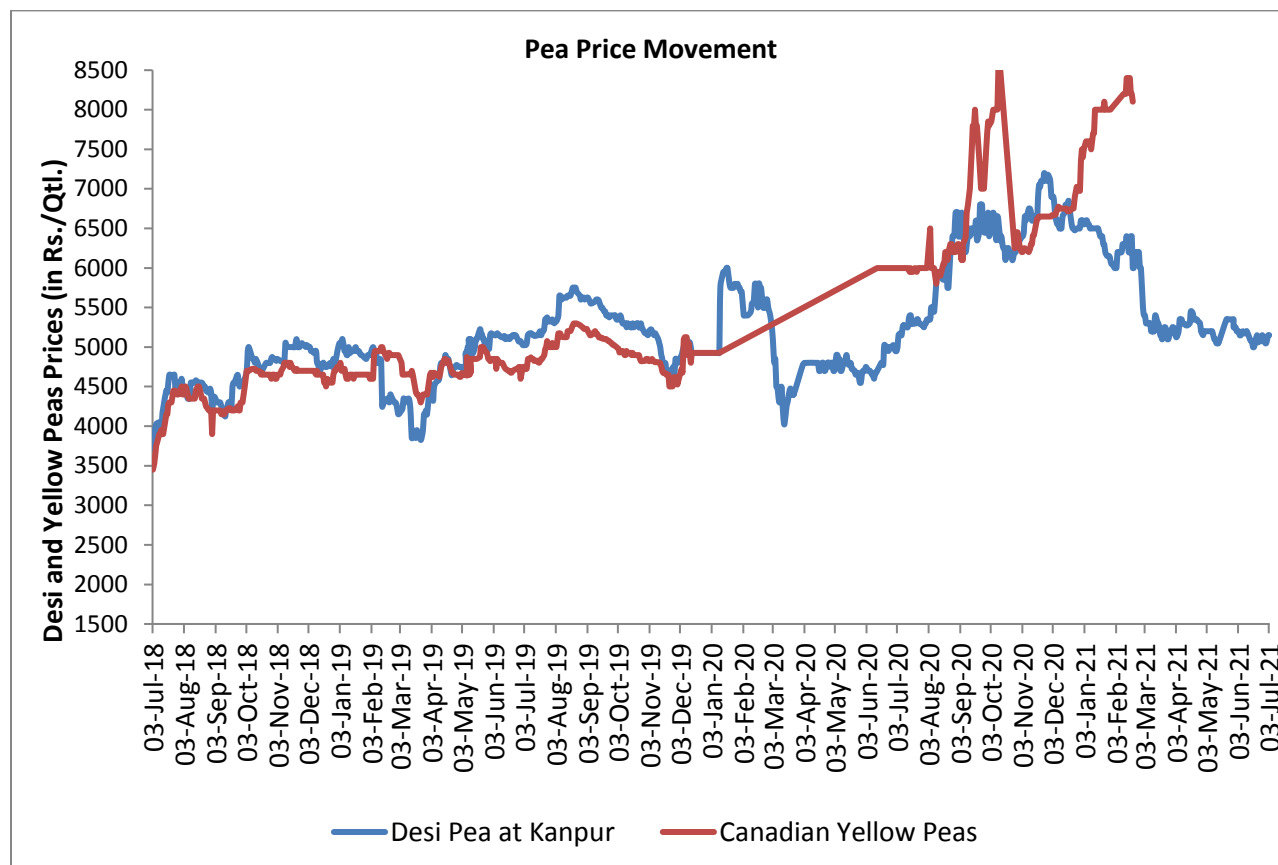

Supports & Resistances			S1	S2	PCP	R1	R2
Chana	NCDEX	July	4809	4748	4864	4926	5136
Weekly Trade Call*			Call	Entry	T1	T2	SL
Chana	NCDEX	July	Buy above	4850	4900	4925	4820

- Do not carry forward stock for next week.

Peas (Matar):

Market Recap:

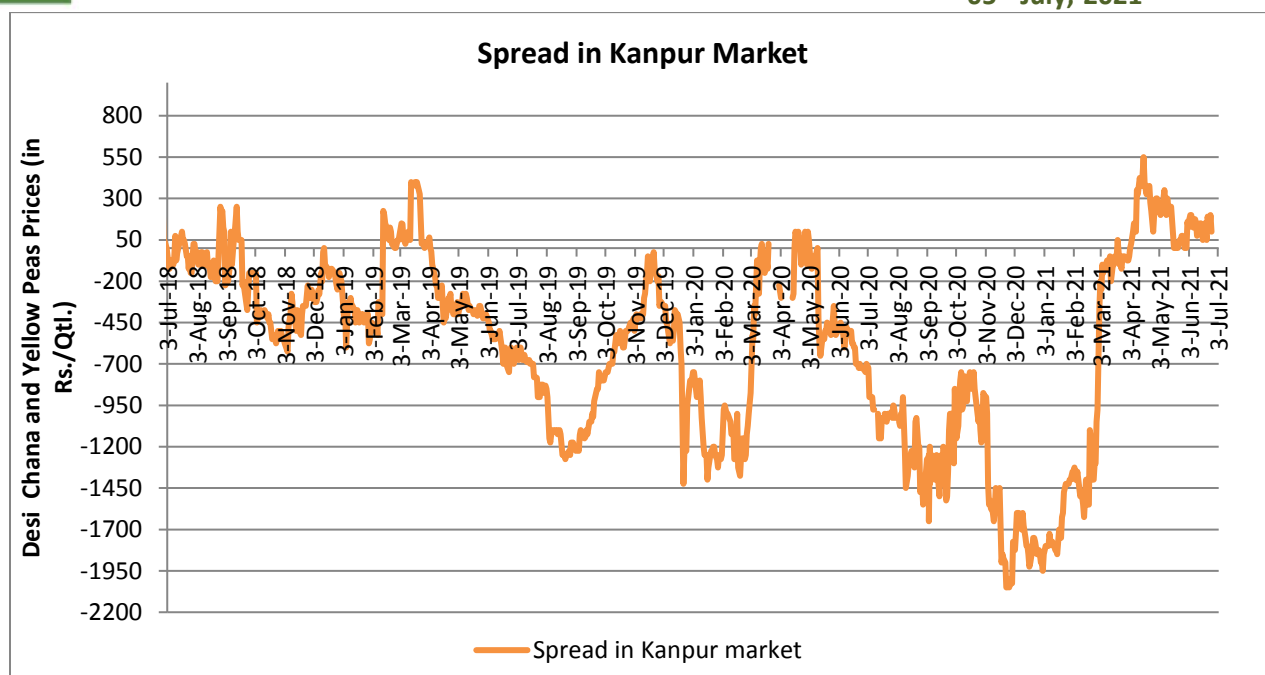

Govt. has not given any import quota for peas as of now. However, if prices of chana moves up (unlikely before 10 of July, when festive season starts, slight recovery might be seen in peas cash market too. If India saves itself from the third wave of COVID-19, demand is expected to improve. Pea's prices traded slightly down due to falling chana prices. Matar in Kanpur market is being traded at Rs 5150 per qtl. There was no quotes for green peas as availability is negligible. As of now there is no intension to open peas import. It may move further down taking cue from weak chana market. Following chart shows price movement in various markets:

Current Market Dynamics & Outlook: Peas market traded slightly down due to weak tone in other pulses market. In Kanpur market it was quoted at Rs 5100 per qtl. Overall, all India average weekly price was down by Rs 50 to Rs 5100 per qtl. In Mumbai market, there was no quote for yellow peas as stock has been exhausted. There is no quotes for imported peas as availability is almost nil. Poor purchasing power too is hampering demand.

Spread With Chana:

Spread between Chana and Peas, at Kanpur market moved in positive zone. Gap has been fulfilled now and it is Rs 100 up now. Spread is expected to remain in the positive zone in July too on relative movement in Chana prices. Overall outlook seems steady to slightly weak this week too.

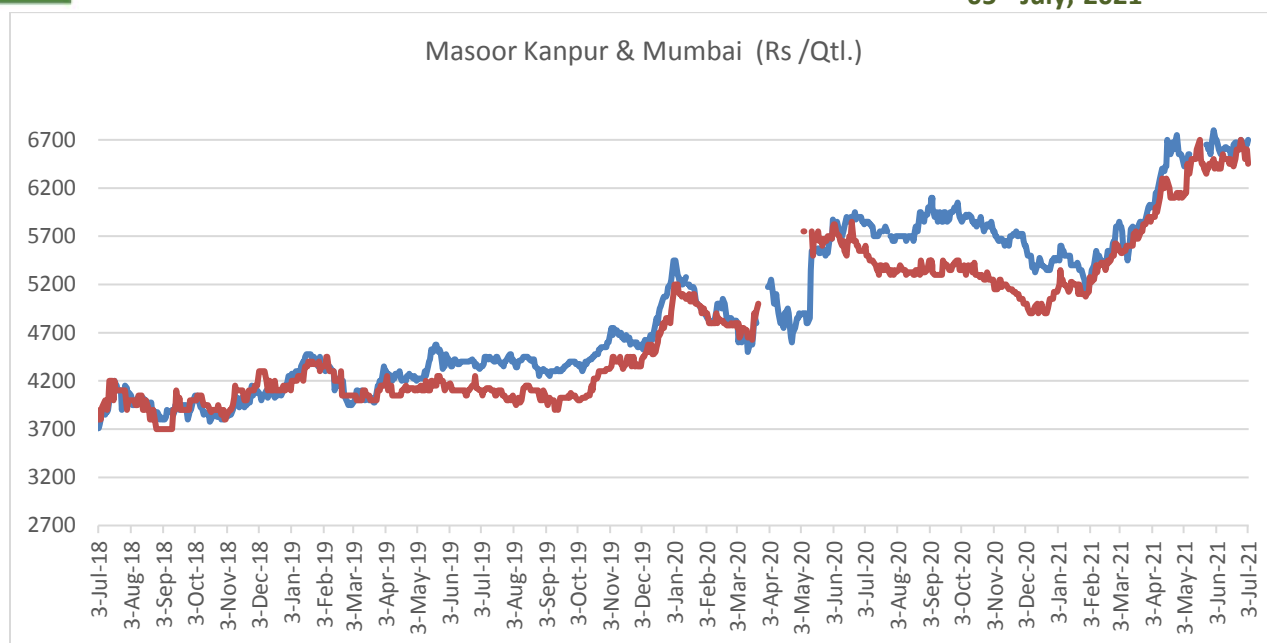

Market Outlook For July: Steady to slightly weak movement is expected in July-2021.

Lentils (Masoor):

Market Recap:

The cash Masur market traded down by Rs100 to Rs 6600 in Kanpur market while imported stock traded at Rs 6450-6500 in Mumbai market. Demand is yet to increase. Imposition of stock limit too is pushing prices down. Trades association trades are opposing this move and if it is withdrawn, market may recover again however, it is unlikely that govt will withdraw this move immediately. New crop in Canada would hit market in Aug. However, dry condition may delay sowing activities in Canada and harvesting may be delayed by 15 days. If dry weather continues, production may decline. A vessel having 52000 MT Masur is expected in the second week of July. It may cap uptrend to some extent.

Current Scenario: As demand in cash market is weak amid imposition of stock limit, prices may trade weak from the current level.

Red colour shows the imported Masur price

Market Outlook: Prices may trade steady to slightly weak.

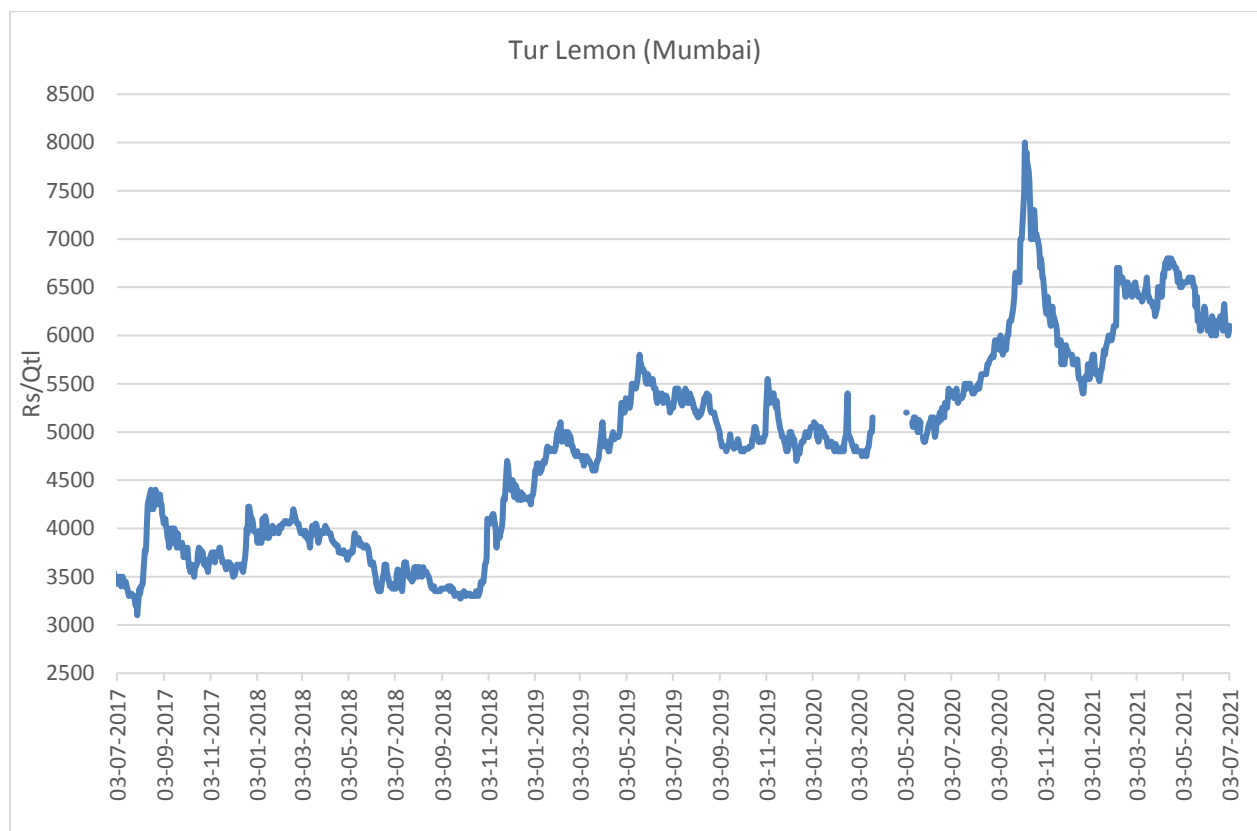

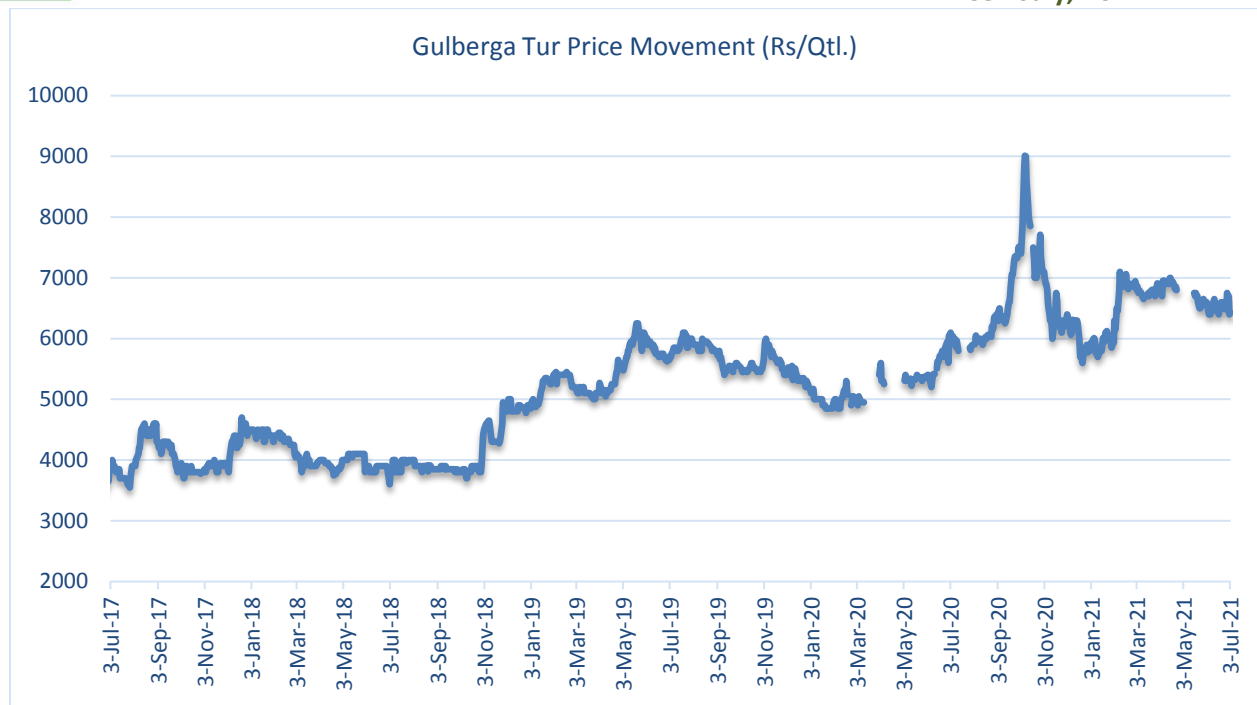

Pigeon Pea (Tur/Toor):

Stock limit imposed by the govt has capped the recovery in the market. If demand doesn't improve, and stock limit continues, prices may fall further. Overall trend is weak despite sowing being lagging behind by 30 % so far due to erratic rains.

Current Market Dynamics & Outlook:

Lemon Tur is available at 6050-6150 at Mumbai port. Sowing has started but is running with slow pace due to lack of rains in some regions and water-logging in other regions. The import flow is not expected to increase substantially even in July. Importers may restrict sales if prices move further down.

India imported around 4304 MT tur in April-2021, the 4th month of the MY-2020-21 for tur. India imported 4.97 lakh MT last year. It would affect total availability in the market. This year (FY) over 5.5 lakh MT import is expected. Stockists and traders may try to push up the market by holding crop till Sep-Oct-2021. If monsoon starts with good rainfall, area may increase and good sowing may help the market to cool down.

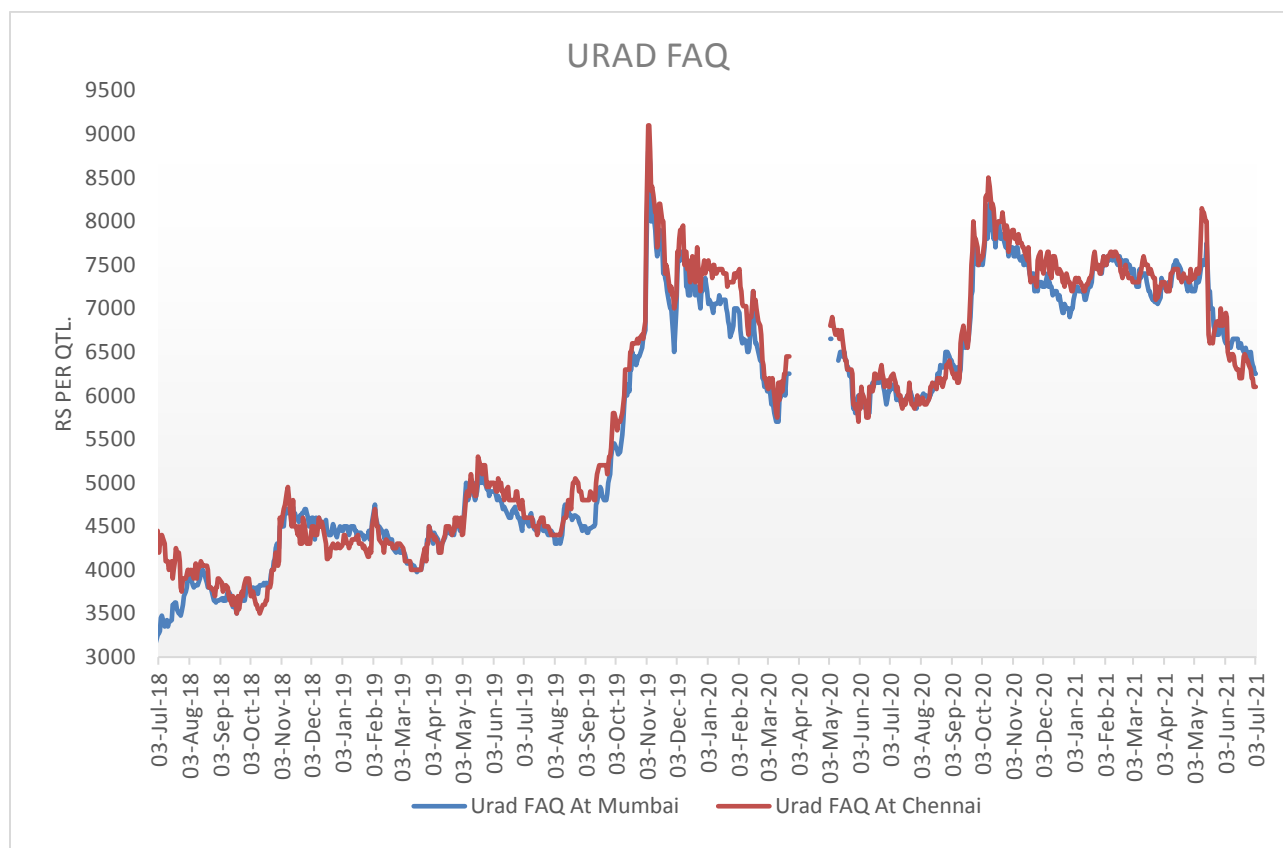

Black Matpe (Urad):

Imported Urad stayed steady at Rs 6650 at Mumbai while the local crop in Tamil Nadu traded down by Rs 50 to Rs6300. Stockists continue to release stocks as the importers are offering Urad at Rs 6500-6650 (New crop) for forward months. So, the cash market is unlikely to move up. Apart from it, the enhanced MSP would encourage farmers to maintain area at previous year's level. so , the pressure may build up again. Myanmar is offering Urad FAQ at \$850 and SQ down by \$25 at \$915.Demand is low.

Current Market Dynamics & Outlook:

.Major urad crop comes in kharif season. Farmers have covered only 2.17 lakh ha so far , down by 0.91 percent from last year till date.As availability in Myanmar too is low and so any big decline is not expected before the new crop hits the market., India imported around 31573 MT urad in March-2021. From April to March-21-India imported only 3.29 lakh MT urad out of allocated four lakhMT quota.Import is free now, so when parity turns in favour of India, the volume of import may increase.

Market Outlook: Urad Prices are likely to show weak movement.

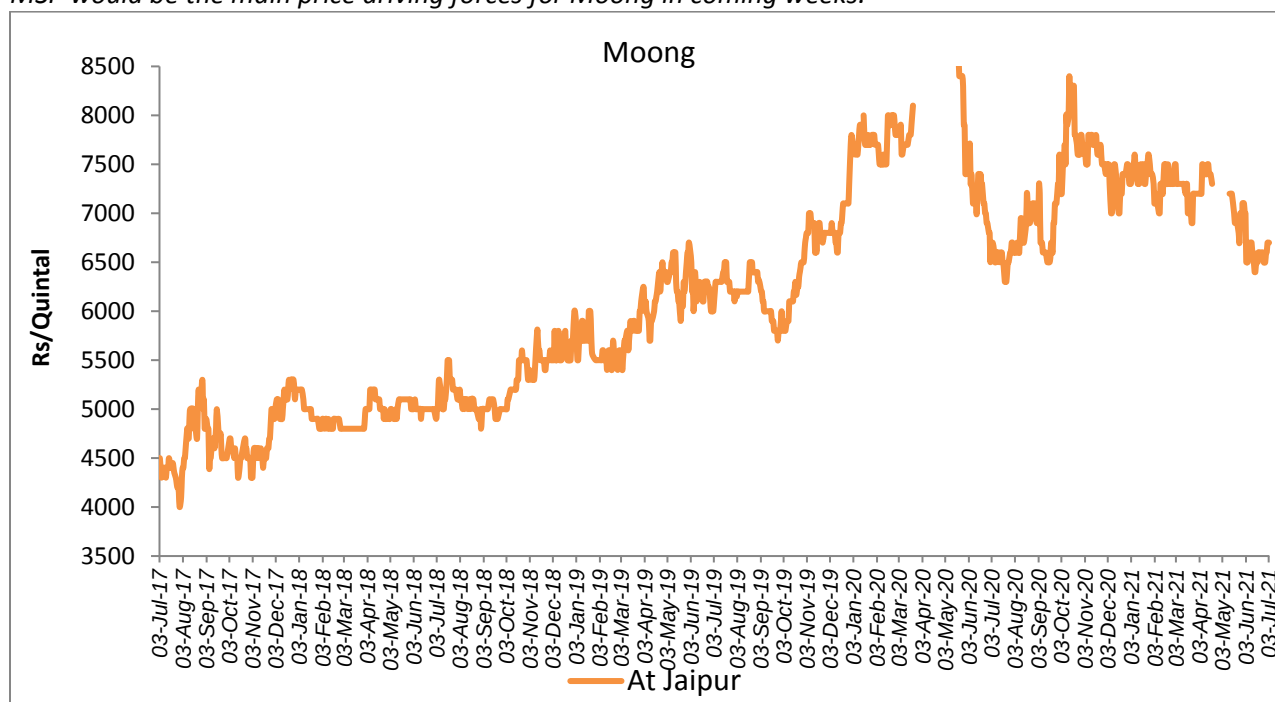

Green Gram (Moong):

Market Recap:

Pressure on price seems building up again as the purchasing private participation would decrease due to strike in markets against govt's latest move on stock limit order for other pulses. Market may trade down in

spite of slight recovery seen in the market. The Import flow may improve as the quotes in Myanmar is steady at \$950 for Annaseva. Kharif sowing progress, monsoon rains , import volume and the purchase volume at MSP would be the main price driving forces for Moong in coming weeks.

Market Outlook: Moong prices are likely to trade steady to weak in the near term.
