Weekly Highlights-Domestic Market:**Pulses Sector-Highlights:**

Kharif pulses sowing is running behind by 1.61 % to 52.49 lakh ha as on 9th July-2021. Tur area is up by 0.12 % to 24.45 lakh ha. Urad area is slightly up by 1.76% to 12.75 lakh ha from last year till date. However, Moong area is down by 11.64 % to 11.92 lakh ha. Other pulses area is up by 18.38% to 2.77 lakh ha. See details in table at page no. 12

The overall sentiments in pulses market, barring lentils remained weak despite the low area coverage under kharif pulses so far. The uneven distribution of rains in Karnataka, Maharashtra, Madhya Pradesh and Rajasthan has slowed down the sowing activities. Revival of monsoon is expected next week and Agriwatch expects the sowing activities to pick up again. The placing of tur, Moong and Urad from restricted to free list on 15th May 2021, the stock limit order from 2nd July-2021 and the commencement of Chana release by Nafed in Maharashtra, Madhya Pradesh and Rajasthan have changed the market sentiments except in lentils. Bulk buyers like mills, stockists have restricted their buying. Demand is weak. After mid-July demand should recover and the prices could start rising.

Chana cash market traded down by 3 % from Rs.5078 to Rs. 4945 during the week under review. Steps taken by the govt. like stock limit, sales by Nafed amid weak demand for daal & besan pressurized the market and it may continue if the festive demand gets delayed by 10 days. Supply side is at a comfortable level. Traders and stockists, who have more stock than stipulated limit, have started liquidating their stocks. So, the renewed demand, as expected, would be the key driving force for the Chana cash market. Steps taken by the govt. would continue to rein in the prices. Chana in Delhi market traded at Rs 5025 while July futures closed at Rs.4807. The overall tone is bearish.

Govt's steps taken in mid-May (changed import policy) and 2nd of July-2021(stock limit order) to rein in spiralling prices worked well and prices have come down by 7 % from 6800 to Rs 6300 now in Gulbarga market. Prices in other markets too decreased. Increasing possibility of the higher import flow from the African countries like Mozambique, Malawi September onwards and usual imports from Myanmar may help to increase supply in the domestic markets. Quotes in Myanmar too decreased by \$20 to \$840 in last two days. Sown area is down currently, but is expected to improve in coming weeks with expectation of revival in monsoon soon. So, any spike is unlikely in July and marginal increase might be seen in Aug. Demand from bulk buyers is weak. States like Gujarat may cover the lag in area in other states. If monsoon remains retarded for another 10 days, issues with crop size may surface again.

Sentiments in Urad market too remain weak as supply side is increasing through import and stockists due to stock limit order, free import and the stock declaration order. Stockists are releasing stock as new crop is hardly two months away now. The prices of Urad FAQ have decreased by 20 % from 7750 to 6200 from mid-May up to now. Sowing is lagging behind expectations, right now, but may improve with likely rains in the growing states. Supply side seems at comfortable level and may continue to trade near current level. Myanmar is offering SQ Urad at \$940 and FAQ at \$845 per MT basis Indian ports. Farmers may maintain area at the previous year's level. If the monsoon plays truant, area may decrease. Demand remains weak.

Continued arrivals from the summer crop, free import, stock limit and likely good kharif crop have turned market sentiment weak. The market has decreased by 10% from 7000 to 6300 from mid-May to 10th of July. It may decrease further if prospects for kharif Moong improves. Myanmar is offering Moong at \$950(INR Rs 6600-6700

at Indian ports) per MT. Weather is favourable and higher MSP (7196 to 7275) for the new season may encourage farmers to maintain kharif area at previous year level. Supply side would ease further.

Lentils market may trade up again as availability in the market is low despite the import flow. Global market is still ruling higher and the issue of the crop size in Canada continues. Crop in Canada is in dire need of rains. The next 10 days are very crucial for the standing crop. If it rains, forward quotes for the new crop may decrease. In the domestic market lentils price moved up by Rs 100 to 6700, imported lentils in Mumbai was quoted at 6600. It may further move up by Rs 200, as soon as demand starts.

Global Market Updates:

Lentils markets in the North America continued to trade firm on the back of strong export sales and fear of low yield in major growing belts. Millers, importers and traders are expecting reduction in duty as supply side is tight in the local market. Indian gov.t too is monitoring market very closely and taking necessary actions to control the price rise. In this regard 3 steps, like freeing import of Tur, Moong & Urad from restricted to free list till October-2021 on 15th May, stock declaration and stock limit on 2nd July-2021, have been taken. All these developments go against exporting countries as prices in the Indian markets have decreased by 10 to 20 %, barring lentils, from mid-May-2021.

Green lentils exporters in Canada are paying heed to seeding progress for this summer's kharif crop. Progressive area coverage is below the long term average but is higher than delayed seeding in 2019.

Global field peas market traded firm on increasing fear of low production in the North America. Most of the producing region is facing dry and hot conditions, resulting in deteriorating crop ratings and accelerating plant development in parts of the growing area. Grain size may be small and the yield low. Export movement has slowed down. Buyers are in a wait and watch mood.

Chickpeas market too traded up due to doubt over yields and quality in Canada and the US. However, desi chickpeas traded low due to poor demand from Pakistan and the Asian countries. It has affected chickpeas value in Australia too. India is not taking interest to buy Chana as prices have come down here below minimum support price.

Area planted for all chickpeas for the 2021 crop year is estimated at 341,000 acres, up 26% from the previous year, according to the USDA's annual seeded area report. Area harvested is forecast at 334,600 acres, 27% above 2020. **Small chickpea** area planted is estimated at 67,000 acres, up 38% from 2020. Area harvested for small chickpeas is forecast at 65,600 acres, a 37% increase from 2020. Area planted for large chickpeas in 2021 is estimated at 274,000 acres, a 24% increase from the previous year. Large chickpeas area harvested is forecast at 269,000 acres, a 25% increase from 2020.

The seeded area under dry peas is expected to be slightly higher at 1750 thousand ha in 2021-22 against 1722 thousand ha last year in Canada. However, yield may decline from 2.73 to 2.57 t/ha this year due to average yield expectation owing to the expected uncondusive weather conditions. So, the production is forecast to decrease from 4594 to 4400 thousand tonnes this year. Total supply and the export figure too may decrease from 4927 to 4790 and 3800 to 3700 thousand tonnes respectively. However domestic use may increase from 827 to 840 thousand tonnes this year. The carryout to decrease from 300 to 250 thousand tonnes.

Lentils production in Canada is expected to decrease from 28.68 in 2020-21 to 2.7 MMT in 2021-22 due to slightly lower area & yield. Export too are expected to decrease by 2 lakh MT to 25 lakh MT in 2021-22. Total supply is expected to decrease from 31.82 to 29.25 lakh MT due to likely lower production in 2021-22. Against it domestic usage. However, domestic use would decrease from 3.27 to 2.75 lakh MT in 2021-22. So carryout stock would stay

at same las last year at 1.5 MT. Average yearly price is expected to be in the range of \$ 585 per MT. For 2002-21 it is \$ 600 per MT.

Monthly Outlook: -Pulses are likely to trade steady to slightly weak except Lentils in July.

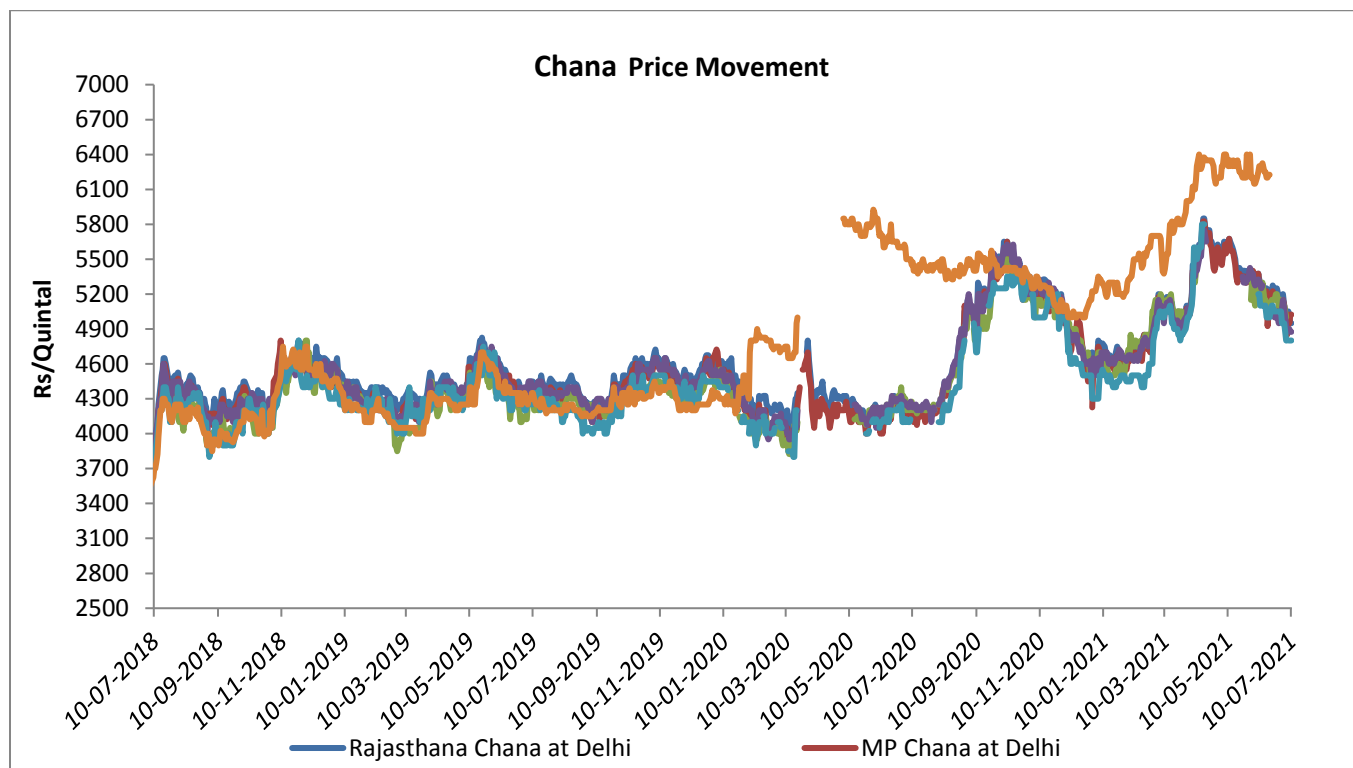

Pulses-Wise Scenario:

Chana

Current Scenario:

Chana cash market traded down by 2.13% to 4967 in in the second week of July -2021. Sentiments remain weak as Nafed has decided to sell Chana stock to increase supply side in the market. Apart from it stock limit order may cap upward momentum. Demand is not improving as expected. As festive season has started so demand for besan should improve. Chana is ruling below MSP and more downside is unlikely. As supply side would increase from Nafed's stock, any jump in Chana cash market is unlikely. New season had started with 21.32 MMT carry in stock. So, supply side would remain at comfortable level.

Import flow would remain restricted as duty plus cess is 60%. Import flow may continue from the least developed countries as they enjoys benefit of zero duty. Following graph illustrates chana price movement in different markets:

Market Outlook: Cash market traded weak with the announcement of stock limit order along with Nafed sale. Apart from it demand remains weak. Supply side is expected to ease as traders, stockists and importers have to maintain stock limit boundary. Major market remained closed against this order and the normal trade got disrupted once again. If govt withdraws its stock limit order, prices may improve, otherwise the pressure on price may continues. In Delhi market it traded down by Rs 150 to 4950 per qtl.. It may come down to 4850.

Chana Weekly Technical Analysis:

Technical Commentary:

- Decreasing price & OI hint weak sentiments in futures market in the near term.
- RSI is steady in the neutral region, hints indecision.
- Prices closed below 9 and 18 days EMAs.
- Candlestick chart hints bearish sentiment.

Strategy: Buy on dip

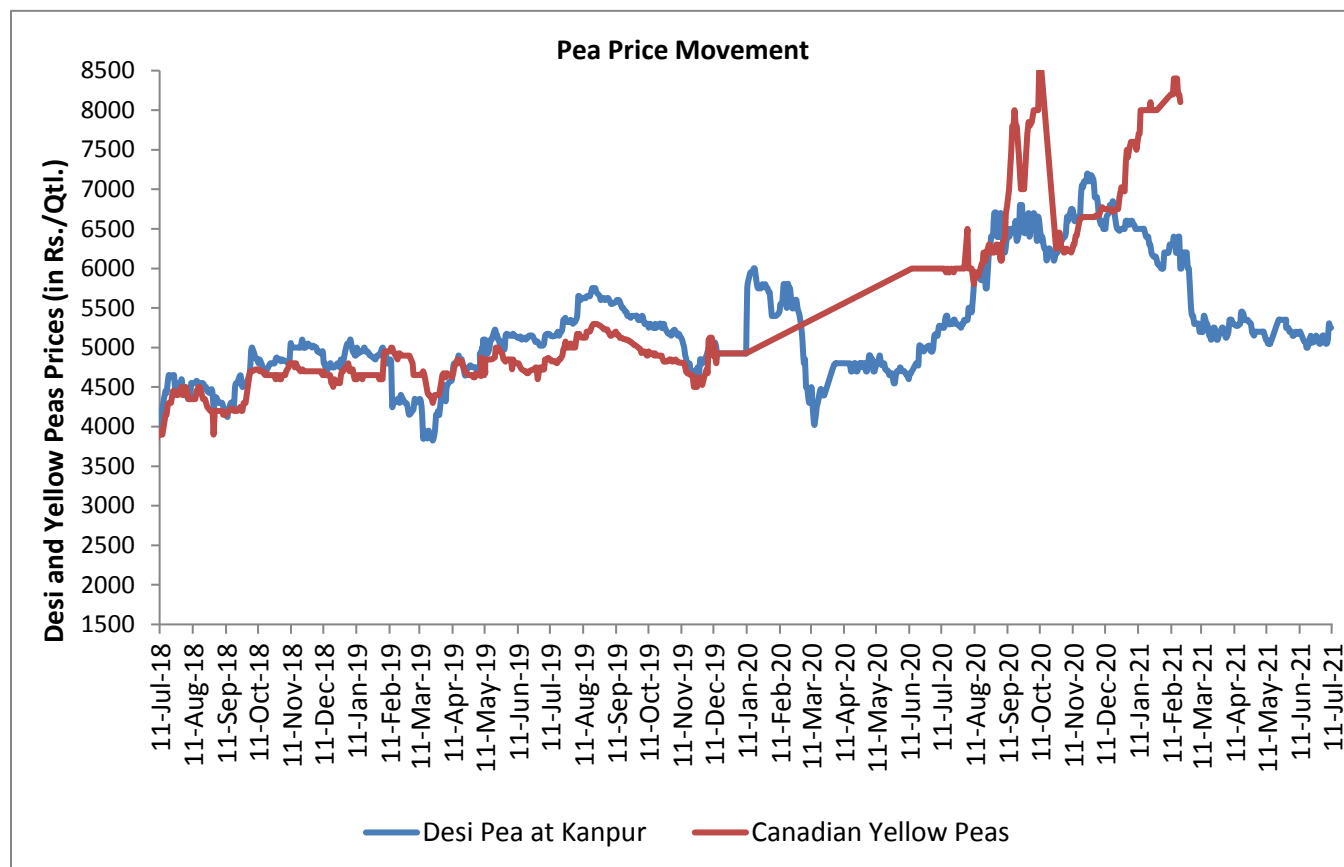

Supports & Resistances			S1	S2	PCP	R1	R2

Weekly Trade Call*			Call	Entry	T1	T2	SL
Chana	NCDEX	Aug	Buy above	4775	4850	4875	4455

- Do not carry forward stock for next week.

Peas (Matar):
Market Recap:

Govt. has not given any import quota for peas as of now. However, if prices of chana moves up (unlikely before 10 of July, when festive season starts, slight recovery might be seen in peas cash market too. If India saves itself from

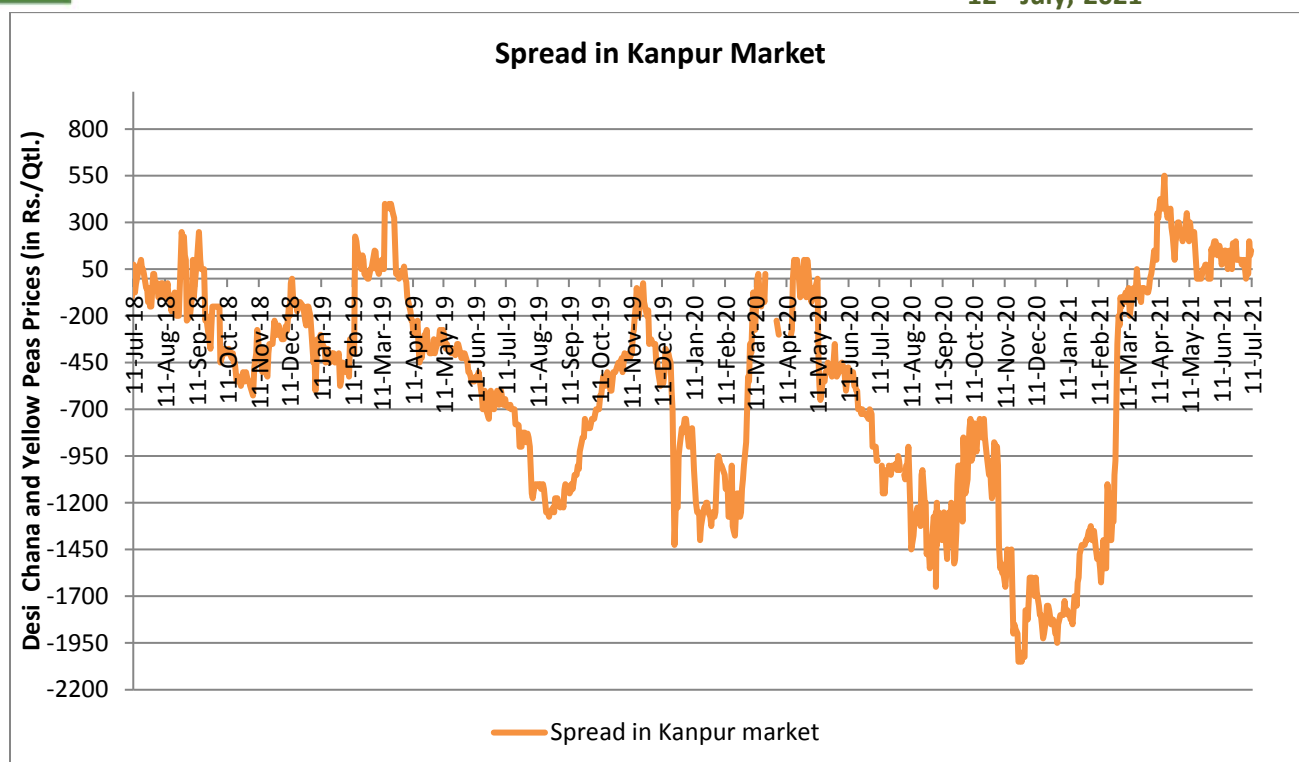

the third wave of COVID-19, demand is expected to improve. Pea's prices traded slightly down due to falling chana prices. Matar in Kanpur market is being traded at Rs 5150 per qtl. There was no quotes for green peas as availability is negligible. As of now there is no intension to open peas import. It may move further down taking cue from weak chana market. Following chart shows price movement in various markets:

Current Market Dynamics & Outlook: Peas market traded slightly down due to weak tone in other pulses market. In Kanpur market it was quoted at Rs 5100 per qtl. Overall, all India average weekly price was down by Rs 50 to Rs 5100 per qtl. In Mumbai market, there was no quote for yellow peas as stock has been exhausted. There is no quotes for imported peas as availability is almost nil. Poor purchasing power too is hampering demand.

Spread With Chana:

Spread between Chana and Peas, at Kanpur market moved in positive zone. Gap has been fulfilled now and it is Rs 150 up now. Spread is expected to remain in the positive zone in July too on relative movement in Chana prices. Overall outlook seems steady to slightly weak this week too.

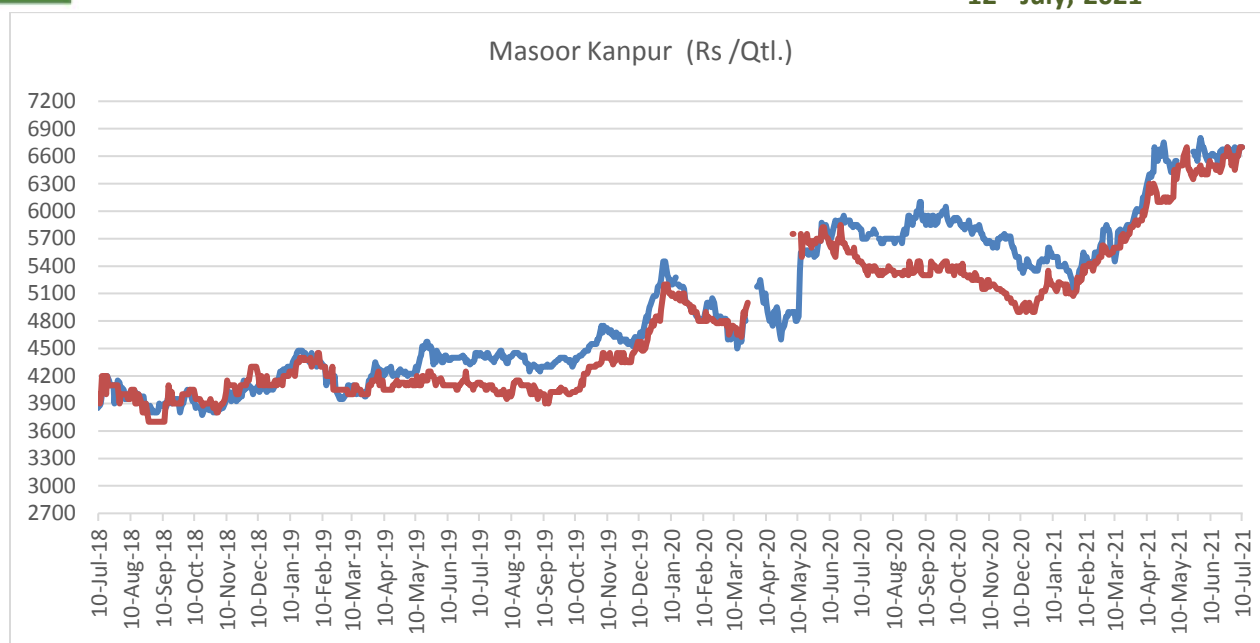

Market Outlook For July: Steady to slightly weak movement is expected in July-2021.

Lentils (Masoor):

Market Recap:

The cash Masur market traded down by Rs100 to Rs 6700 in Kanpur market while imported stock traded at Rs 6450-6500 in Mumbai market. Demand is yet to increase. Imposition of stock limit too is pushing prices down. Trades association trades are opposing this move and if it is withdrawn, market may recover again. However, it is unlikely that govt will withdraw this move immediately. New crop in Canada would hit market in Aug. However, dry condition may delay sowing activities in Canada and harvesting may be delayed by 15 days. If dry weather continues, production may decline. A vessel having 52000 MT Masur is expected in the second week of July. It may cap uptrend to some extent.

Current Scenario: As demand in cash market is weak amid imposition of stock limit, prices may trade weak from the current level.

Red colour shows the imported Masur price

Market Outlook: Prices may trade steady to slightly firm.

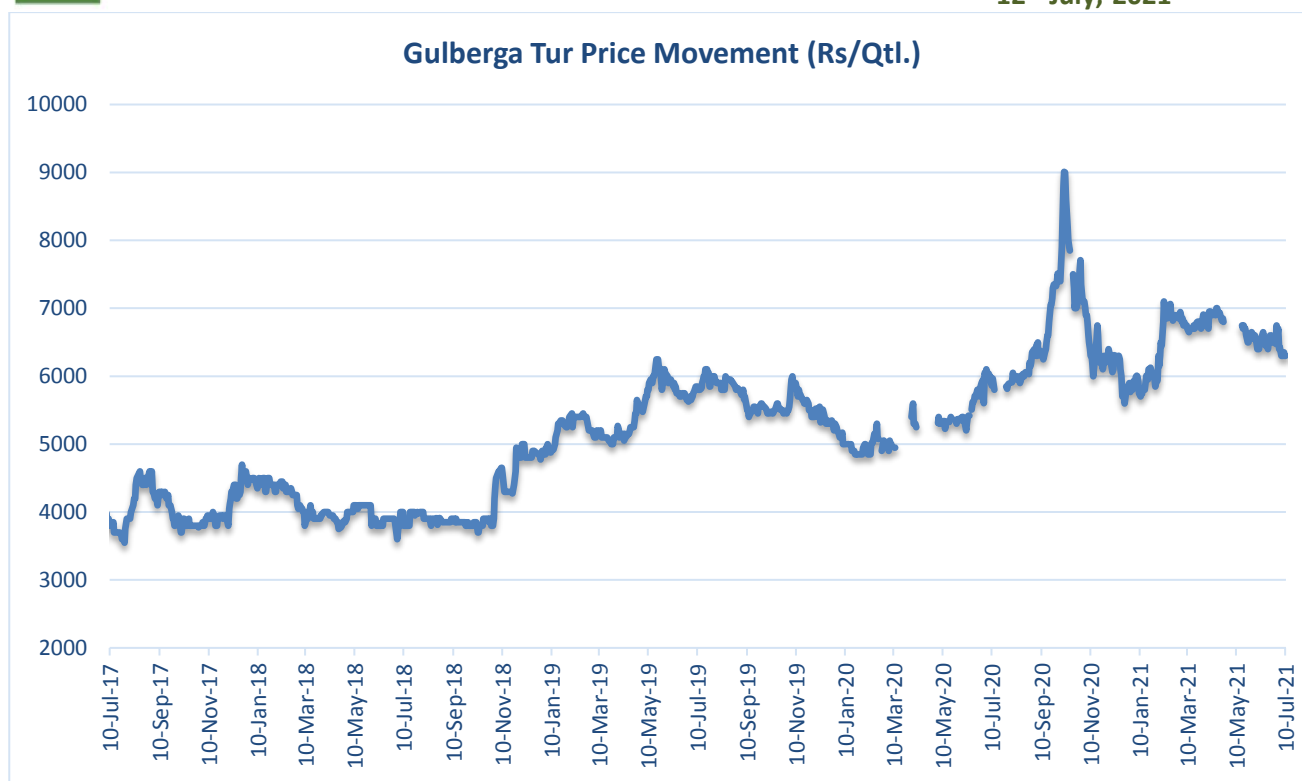

Pigeon Pea (Tur/Toor):

Tur market traded weak by 9% to Rs 6100 in June over May. Slight recovery might be seen as import is free and MSP increased from 6000 to 6300. It may encourage farmers to grow more. The import flow will increase so any spike is unlikely in July. Tur in Gulberga market traded at Rs 6400-6500 per qtl and may cross Rs 6600-6700. Nafed too has less than 3.44 lakh MT old stock. It shows normal supply side.

Current Market Dynamics & Outlook:

Lemon Tur is available at 6050-6150 at Mumbai port. Sowing has started but running with slow pace due to lack of rains in some region and water-logging in other regions. The import flow is not expected to increase substantially even in July. Importers may restrict sale if prices move further down.

India imported around 4304 MT tur in April-2021, the 4th month of the MY-2020-21 for tur. India imported 4.97 lakh MT last year. It would affect total availability in the market. This year (FY) over 5.5 lakh MT import is expected. Stockists and traders may try to push up market by holding crop till Sep-Oct -2021. If monsoon starts with good rains fall, area may increase and good sowing may help market to cool down.

Black Matpe (Urad):

Imported Ura traded down at Rs 6250 at Mumbai while the local crop in Tamil Nadu traded down by Rs 50 to Rs 6150. Stockists continue to release stocks as the importers are offering Urad at Rs 6500-6650 (New crop) for forward months. So, the cash market is unlikely to move up. Apart from it, the enhanced MSP would encourage farmers to maintain area at previous year's level. so, the pressure may build up again. Myanmar is offering Urad FAQ at \$850 and SQ down by \$25 at \$915. Demand is low.

Current Market Dynamics & Outlook:

Major urad crop comes in kharif season. Farmers have covered only 2.17 lakh ha so far, down by 0.91 percent from last year till date. As availability in Myanmar too is low and so any big decline is not expected before the new crop hits the market., India imported around 31573 MT urad in March-2021. From April to March-21-India imported only 3.29 lakh MT urad out of allocated four lakh MT quota. Import is free now, so when parity turns in favour of India, the volume of import may increase.

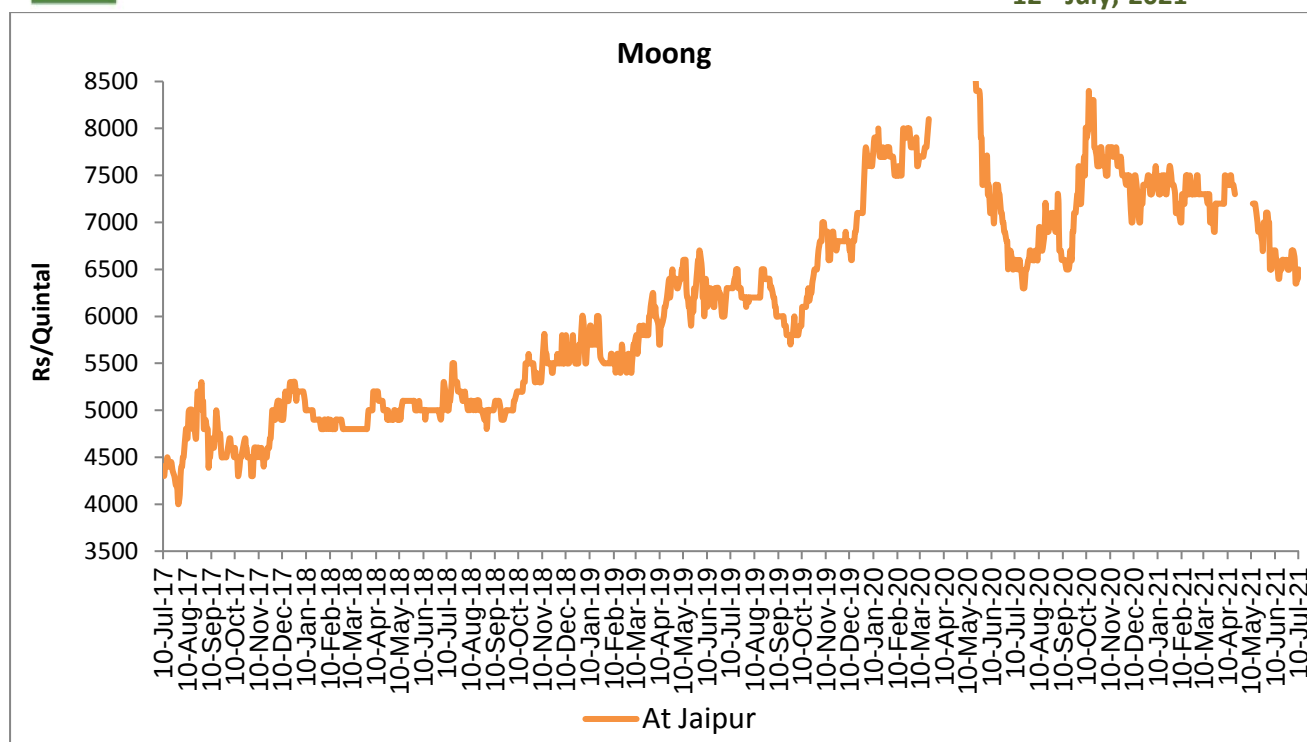

Market Outlook: Urad Prices are likely to show weak movement.

Green Gram (Moong):

Market Recap:

Pressure on price seems building up again as the purchasing private participation would decrease due to strike in markets against govt's latest move on stock limit order for other pulses. Market may trade down in spite of slight recovery seen in the market. The Import flow may improve as the quotes in Myanmar is steady at \$950 for Annaseva. Kharif sowing progress, monsoon rains, import volume and the purchase volume at MSP would be the main price driving forces for Moong in coming weeks.

Market Outlook: Moong prices are likely to trade steady to weak in the near term.

All India Kharif Pulses Area Sowing As on 9th July-2021
