Weekly Highlights-Domestic Market:

Pulses Sector-Highlights:

Kharif pulses sowing is running down by 12.08 % to 70.65 lakh ha as on 16th July-2021. Tur area is up by 1.83 % to 32.79 lakh ha. Urad area is slightly down by 23.27 % to 17.87 lakh ha from last year till date. Moong area is down by 20.76 % to 16.37 lakh ha. Other pulses area is down by 14.50 % to 3.42 lakh ha. See details in table at page no. 12

Government has imposed stock limits on all pulses except Moong held by wholesalers, retailers, millers and importers on 2nd July 2021 with immediate effect for a period of four months up to 31st October, 2021. Stockists need to release the stock above prescribed limit, as a result of which the supply of **Lentil** is improving. Apart from this, declining quotations in Canada for forward month for new crop, expected in mid- Aug may lead to higher supply Sep onwards. Quotations in Canada have declined from \$840 to \$725-30 during last one month. Imposition of stock limit is pushing prices down. Trade associations from all over the country are opposing this move and if it is withdrawn, market may recover again however, it is unlikely that government will withdraw this move immediately. Limit might be relaxed.

Government has imposed stock limits on all pulses except Moong held by wholesalers, retailers, millers and importers on 2nd July 2021 with immediate effect for a period of four months up to 31st October, 2021. Stockists' need to release the stock above prescribed limit so supply in the open market is improving. Various trade associations are opposing this move. Major pulses markets in Madhya Pradesh, Maharashtra and Rajasthan remained closed for few days in protest. However, government's recent statements regarding stock limit signal that the policy will continue. There are rumors in the market that stock limit might be relaxed to give some respite to stakeholders. Right now sentiment remains weak for **Tur and dal**. Tur area coverage is slightly ahead of last year so far.

Urad continued to trade weak as expected in our June report. It traded down by 6.35% to 6102 in mid-July. June average monthly price was 6490. Continuous steps like the changed import policy, stock declaration order followed by stock limit, taken by the govt. to control prices seems paying off till now. New agreement to import 2.5 lakh MT Urad from Myanmar annually and the ongoing Kharif sowing too have weakened inner tone in the market despite the low coverage. As demand is weak, the overall sentiments remain weak. Farmers have covered 17.87 lakh ha under Urad as on 16th July-2021 against 23.29 lakh ha last year. It is lagging behind by 23.30%. The major producers like Madhya Pradesh, Rajasthan and Uttar Pradesh have covered only 13.07 lakh ha against 18.94 lakh ha last year. Monsoon has revived after 15th of July and the sowing activities are likely to pick up again.

Steady to slightly weak tone may prevail in the cash Moong market. Arrival from the summer crop is still coming while kharif sowing is on. Import is free now till Nov-2021 on condition that the bill for lading should be before 31st Oct-2021. Imposition of stock limit, the mandatory declaration of stock and weak demand in the domestic market have capped uptrend in the cash market. Moong prices declined by 1% to 6558 in mid-July from the monthly average of June in Jaipur market. It is already ruling below 775 from MSP. If India harvest bumper crop in the Kharif season, pressure would continue on the Moong price. Overall tone is weak for July. Kharif sowing of Moong is lagging behind by 20.76 % till mid of July. Farmers have covered 16.37 lakh ha so far and sowing activities may improve with the revival of monsoon again. The area of concern is Rajasthan & Maharashtra where it is lagging by 33.38 & 18 %. Both the states contribute 63 % in total kharif Moong production. The only respite is Karnataka where sowing is up by 8.30 % to 3.60 lakh ha.

Chana cash market traded down by 1.25 % from Rs.4945 to Rs. 4870 during the week under review. Steps taken by the govt. like stock limit, sales by Nafed amid weak demand for dal & besan along with stock declaration order, pressurized the market and it may continue if the festive demand gets delayed further. Supply side is at a comfortable level. Nafed continues to release stock. Traders and stockists, who have more stock than stipulated limit, have started liquidating their stocks. So, the awaited fresh demand, as expected from Aug, would be the key

driving force for the Chana cash market. Steps taken by the govt. would continue to rein in the prices. Chana in Delhi market traded at Rs 4850-4900 while July futures closed at Rs.4745. The overall tone is bearish.

Global Market Updates:

Crop conditions in Saskatchewan and other parts of the Canadian Prairies are deteriorating rapidly because of extremely hot and dry weather and minimal rainfall-according to Saskatchewan Agriculture. The prolonged period of heat, coupled with the extremely dry conditions of the topsoil, has caused crops to be short, thin and impulsively advancing in many regions of the province due to the stress. Around 30% of the pulses crops are ahead of their normal stages of development for this time of year. However, heat wave may affect normal crop size.

According to reports from USDA state level offices Peas harvesting started in the US. In Montana around 20% crop has been harvested. Limited progress is also reported in Washington state and Oregon, suggesting around 101,000 acres of peas have been harvested, compared to roughly 10,000 at this time last year. Markets expect the first production estimate in September, but if yields are at least within 10% of their recent five year average around 88,000 metric tons (MT) of peas are now in bin, compared to roughly 7,000 at this time last year.

Lentils markets in the North America continued to trade firm on the back of strong export sales and fear of low yield in major growing belts. Millers, importers and traders are expecting reduction in duty as supply side is tight in the local market. Indian govt too is monitoring market very closely and taking necessary actions to control the price rise. In this regard 3 steps, like freeing import of Tur, Moong & Urad from restricted to free list till October-2021 on 15th May, stock declaration and stock limit on 2nd July-2021, have been taken. All these developments go against exporting countries as prices in the Indian markets have decreased by 10 to 20 %, barring lentils, from mid-May-2021.

Global field peas market traded firm on increasing fear of low production in the North America. Most of the producing region is facing dry and hot conditions, resulting in deteriorating crop ratings and accelerating plant development in parts of the growing area. Grain size may be small and the yield low. Export movement has slowed down. Buyers are in a wait and watch mood.

Chickpeas market too traded up due to doubt over yields and quality in Canada and the US. However, desi chickpeas traded low due to poor demand from Pakistan and the Asian countries. It has affected chickpeas value in Australia too. India is not taking interest to buy Chana as prices have come down here below minimum support price.

Area planted for all chickpeas for the 2021 crop year is estimated at 341,000 acres, up 26% from the previous year, according to the USDA's annual seeded area report. Area harvested is forecast at 334,600 acres, 27% above 2020. Small chickpea area planted is estimated at 67,000 acres, up 38% from 2020. Area harvested for small chickpeas is forecast at 65,600 acres, a 37% increase from 2020. Area planted for large chickpeas in 2021 is estimated at 274,000 acres, a 24% increase from the previous year. Large chickpeas area harvested is forecast at 269,000 acres, a 25% increase from 2020.

The seeded area under dry peas is expected to be slightly higher at 1750 thousand ha in 2021-22 against 1722 thousand ha last year in Canada. However, yield may decline from 2.73 to 2.57 t/ha this year due to average yield expectation owing to the expected unconducive weather conditions. So, the production is forecast to decrease from 4594 to 4400 thousand tonnes this year. Total supply and the export figure too may decrease from 4927 to 4790 and 3800 to 3700 thousand tonnes respectively. However domestic use may increase from 827 to 840 thousand tonnes this year. The carryout to decrease from 300 to 250 thousand tonnes.

Lentils production in Canada is expected to decrease from 28.68 in 2020-21 to 2.7 MMT in 2021-22 due to slightly lower area & yield. Export too are expected to decrease by 2 lakh MT to 25 lakh MT in 2021-22. Total supply is expected to decrease from 31.82 to 29.25 lakh MT due to likely lower production in 2021-22. Against it domestic usage. However, domestic use would decrease from 3.27 to 2.75 lakh MT in 2021-22. So carryout stock would stay at same as last year at 1.5 MT. Average yearly price is expected to be in the range of \$ 585 per MT. For 2002-21 it is \$ 600 per MT.

Monthly Outlook: -Pulses are likely to trade steady to slightly mixed in July.

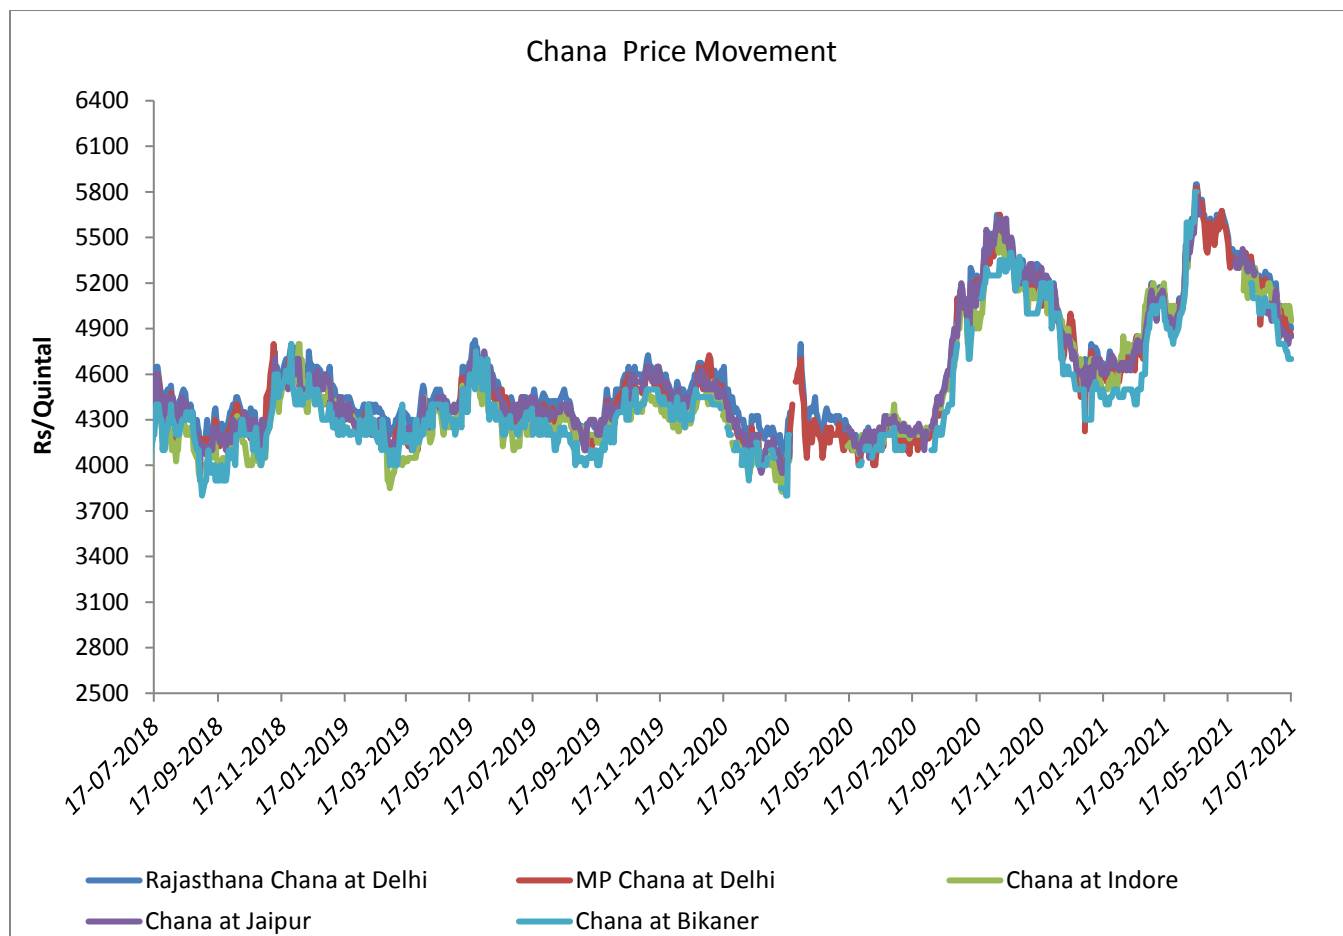

Pulses-Wise Scenario:

Chana

Current Scenario:

Chana cash market improved slightly on Monday taking clue from likely relaxation on stock limit. Supply side is at comfortable level. Nafed would continue to release chana stock to keep market well supplied during festive season. Chana price may recover by Rs200 and may cross 5000 this week. Overall, chana prices in Delhi market 1.25 % to 4870. If demand improves with the start of festive season, it too would support the cash market.

Import flow would remain restricted as duty plus cess is 60%. Import flow may continue from the least developed countries as they enjoy benefit of zero duty. Following graph illustrates chana price movement in different markets:

Market Outlook:

Cash market traded firm on Monday after continuous decline during last week. Likely relaxation in stock limit would give market the much needed support at this point of time. Apart from it demand may improve too.

Chana Weekly Technical Analysis:

Technical Commentary:

- Increasing price & OI hint firm sentiments in futures market in the near term.
- RSI is steady in the neutral region, hints indecision.
- Prices closed below 9 and 18 days EMAs.
- Candlestick chart hints firm momentum.

Strategy: Buy on dip

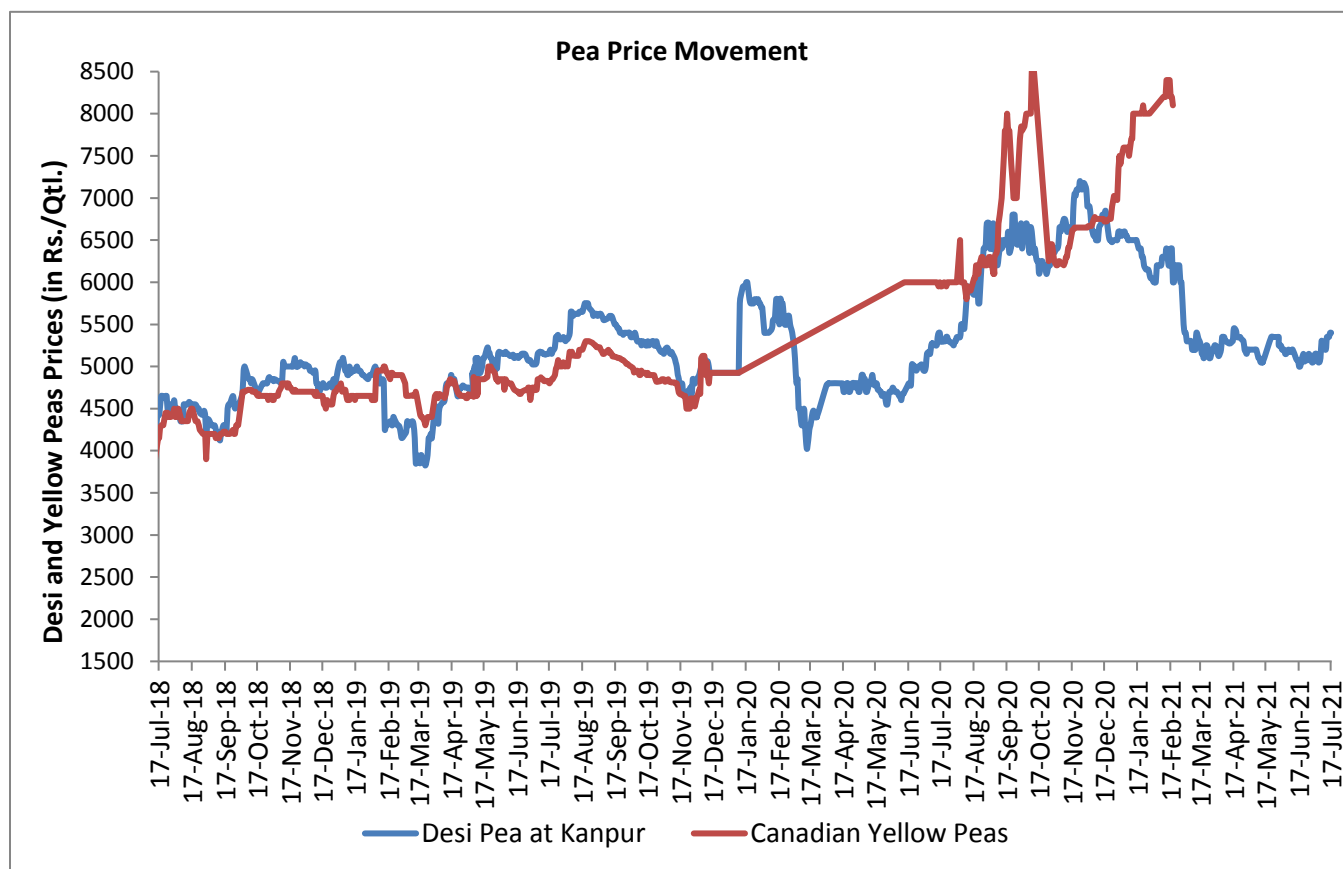

Supports & Resistances			S1	S2	PCP	R1	R2
Chana	NCDEX	Aug	4849	4800	4926	5075	5150
Weekly Trade Call*			Call	Entry	T1	T2	SL
Chana	NCDEX	Aug	Buy above	4920	4990	5010	4880

- Do not carry forward stock for next week.

Peas (Matar):

Market Recap:

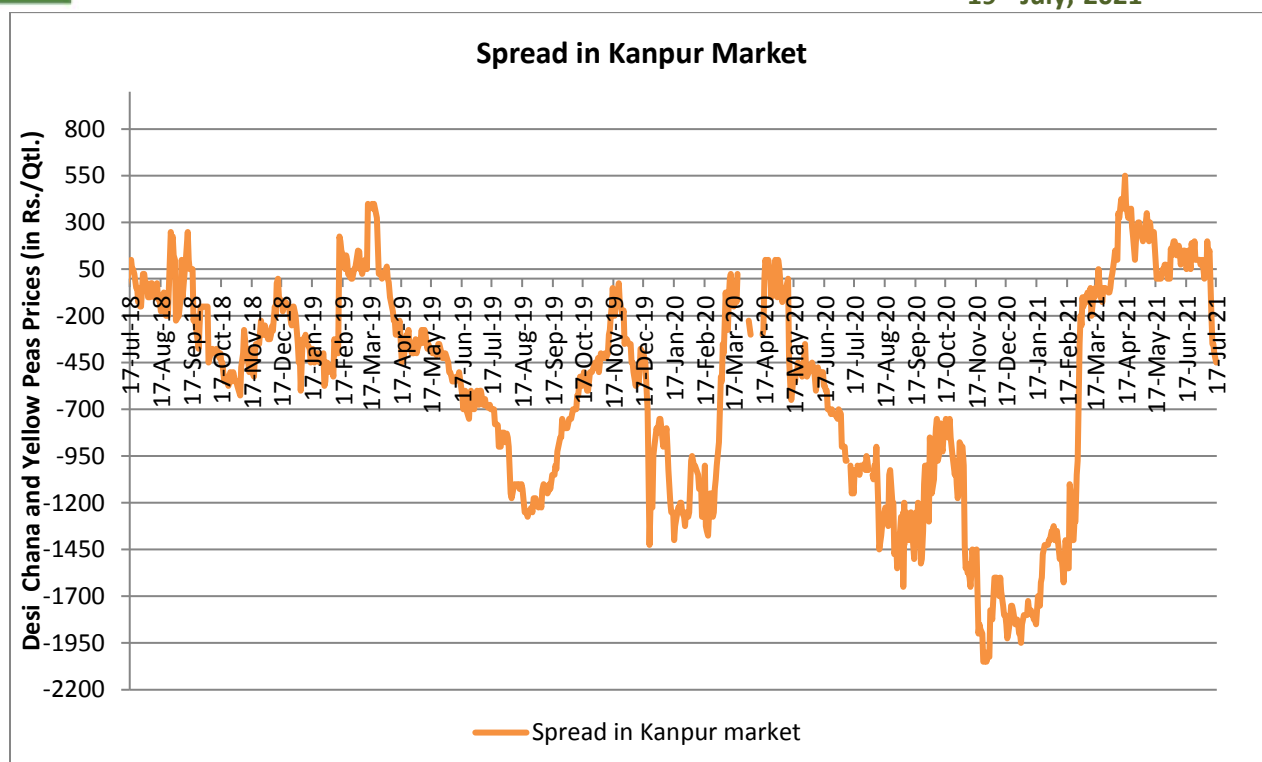

Govt. has not given any import quota for peas as of now. However, if prices of chana moves up (unlikely before 10 of July, when festive season starts, slight recovery might be seen in peas cash market too. If India saves itself from the third wave of COVID-19, demand is expected to improve. Pea's prices traded slightly down due to falling chana prices. Matar in Kanpur market is being traded at Rs 5150 per qtl. There was no quotes for green peas as availability is negligible. As of now there is no intension to open peas import. It may move further down taking cue from weak chana market. Following chart shows price movement in various markets:

Current Market Dynamics & Outlook: Peas market traded slightly up due to changed inner tone in pulses market. In Kanpur market it was quoted at Rs 5400 per qtl. Overall, all India average weekly price was down by Rs 100 to Rs 5200 per qtl. In Mumbai market, there was no quote for yellow peas as stock has been exhausted. There is no quotes for imported peas as availability is almost nil. Poor purchasing power too is hampering demand.

Spread With Chana:

Spread between Chana and Peas, at Kanpur market moved in positive zone. Gap has been fulfilled now and it is Rs 450 up now. Spread is expected to remain in the positive zone in July too on relative movement in Chana prices. Overall outlook seems steady to slightly weak this week too.

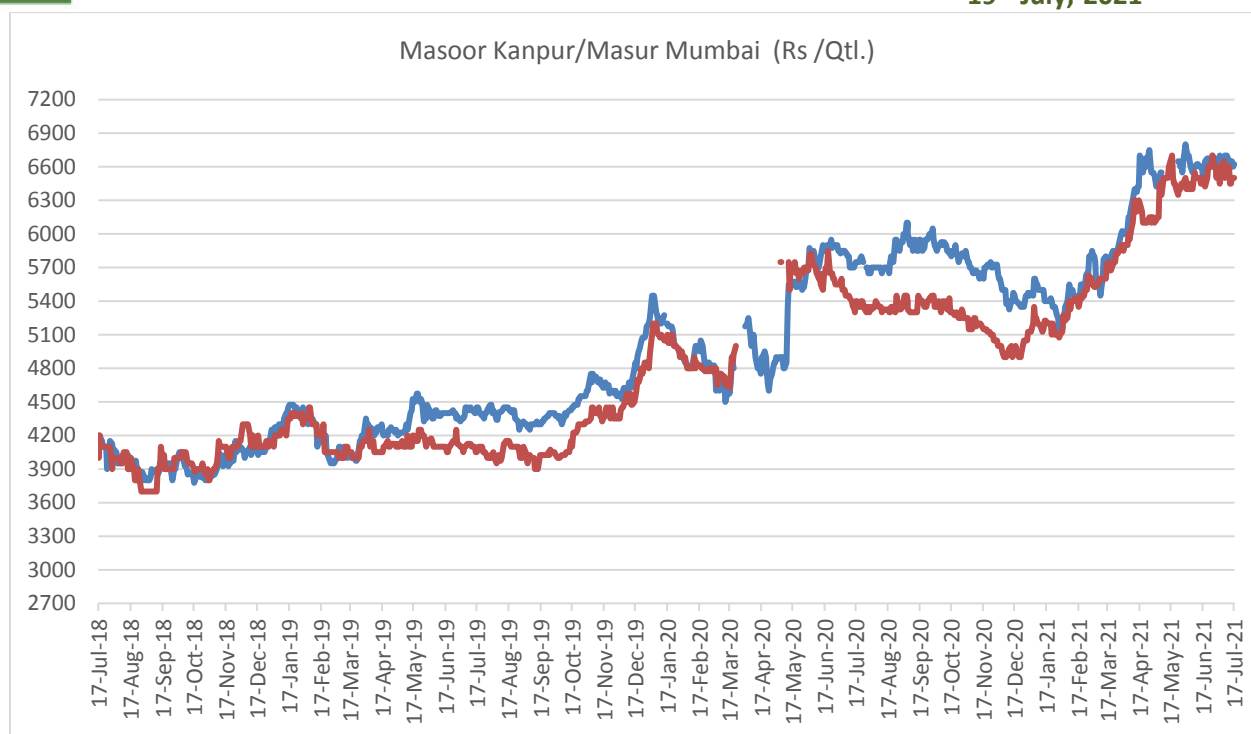

Market Outlook For July: Steady to slightly firm movement is expected in July-2021.

Lentils (Masoor):

Market Recap:

The cash Masur market traded down by Rs100 to Rs 6600 in Kanpur market while imported stock traded at Rs 6500 in Mumbai market. Demand is yet to increase. Imposition of stock limit too is pushing prices down. Trades association trades are opposing this move and if it is withdrawn, market may recover again. However, it is unlikely that govt will withdraw this move immediately. New crop in Canada would hit market in Aug. However, dry condition may delay sowing activities in Canada and harvesting may be delayed by 15 days. If dry weather continues, production may decline.

Current Scenario: As demand in cash market is improving amid likely relaxation in stock limit, prices may trade firm from the current level.

Red colour shows the imported Masur price

Market Outlook: Prices may trade steady to slightly firm.

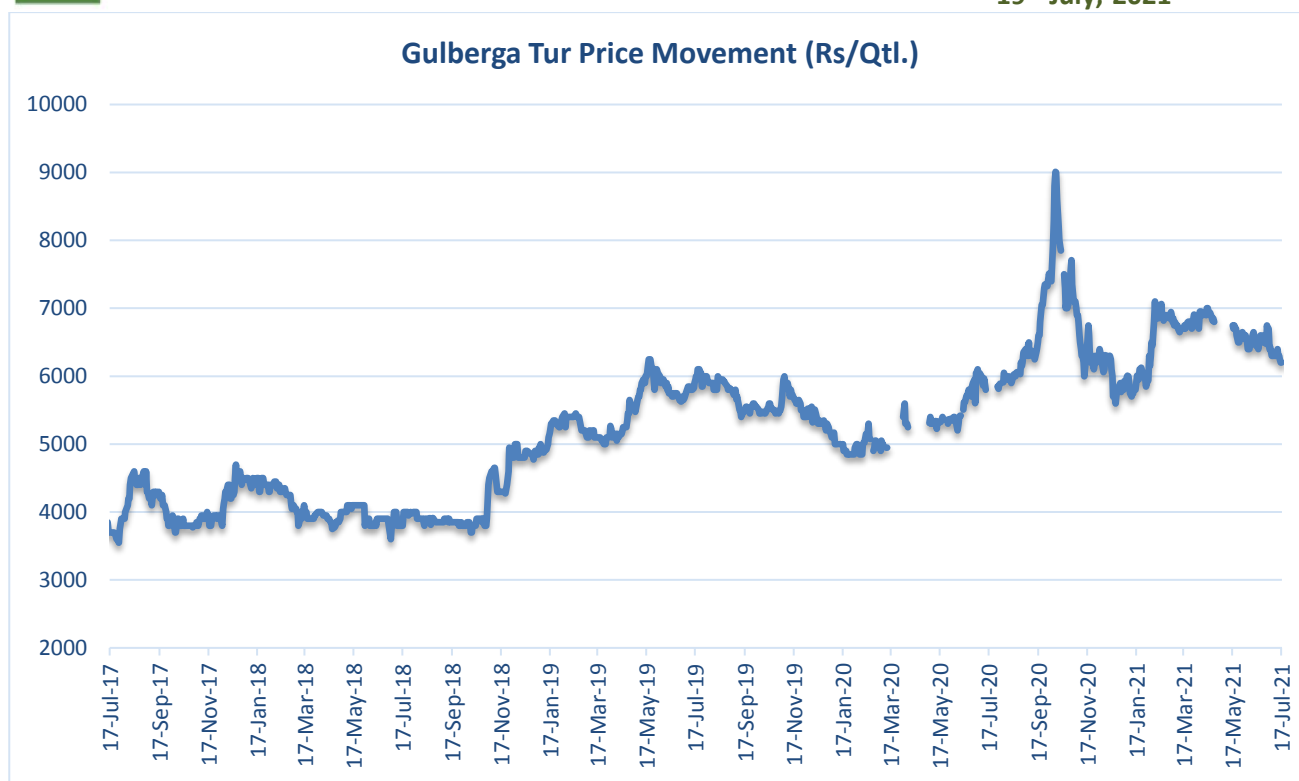

Pigeon Pea (Tur/Toor):

Tur market traded up by 1.45 % to Rs 6400 during the week under review. Slight recovery might be seen as import is free and MSP increased from 6000 to 6300. It may encourage farmers to grow more. The import flow will increase so any spike is unlikely in July. Tur in Gulberga market traded at Rs 6200-6300 per qtl and may touch to Rs 6400-6500. Nafed too has less than 3.44 lakh MT old stock. It shows normal supply side.

Current Market Dynamics & Outlook:

Lemon Tur is available at 6000 at Mumbai port. Sowing has started but running with slow pace due to lack of rains in some region and water-logging in other regions. The import flow is not expected to increase substantially even in July. Importers may restrict sale if prices move further down.

India imported 26380 MT in June. So far India has imported total 38000 MT from April to June-2021. In July import volume is expected to increase to 40,000 MT. Supply side is at comfortable level. So any spike in cash market is unlikely.

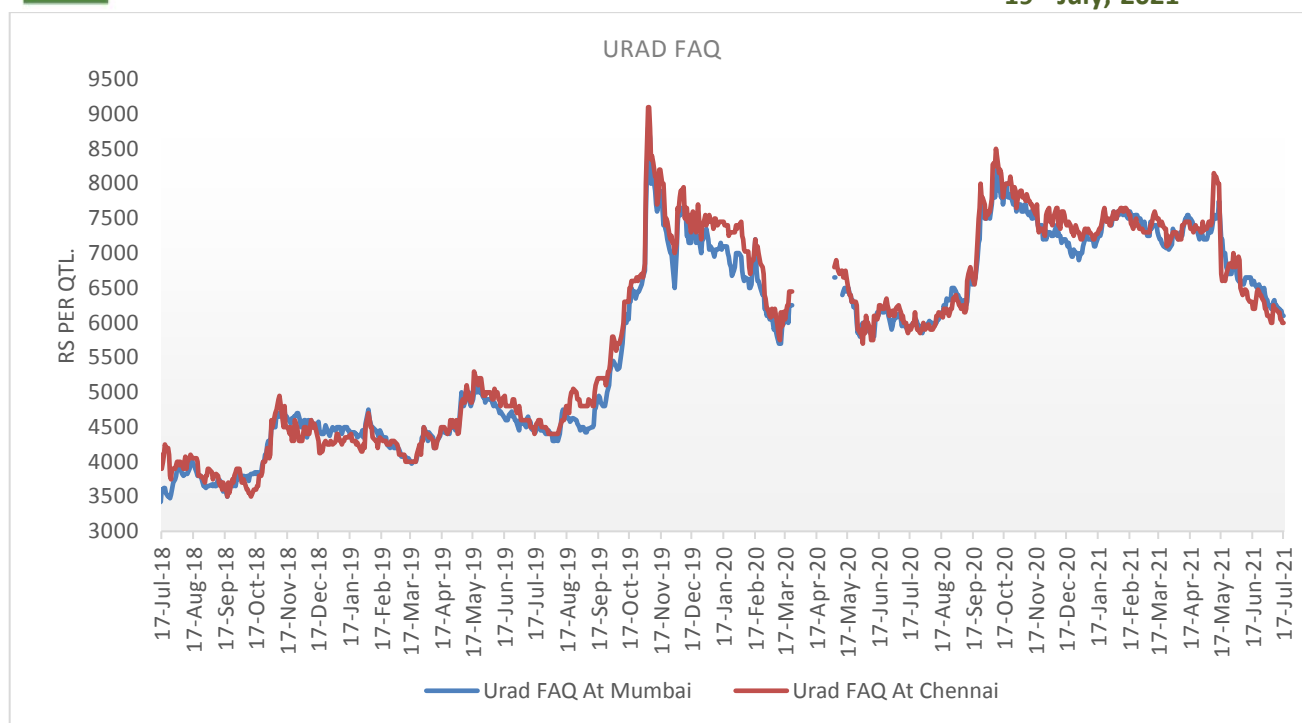

Black Matpe (Urad):

Imported Urad traded down by 100 to Rs 6000-6100 at Mumbai while the local crop in Tamil Nadu traded down by Rs 50 to Rs6150. Price should improve as relaxation in stock limit has been given to stake holders. Stockists /millers may hold stock for longer time and it should push market up again to some extent. Myanmar is offering Urad FAQ at \$830 and SQ at \$940.Demand is low.

Current Market Dynamics & Outlook:

Major urad crop comes in kharif season. Farmers have covered only 17.87 lakh ha so far , down by 23.30 percent from last year till date.As availability in Myanmar too is low and so any big decline is not expected before the new crop hits the market., India imported around 83000 MT urad in from April to June-2021. Import is free now, so when parity turns in favour of India, the volume of import may increase.

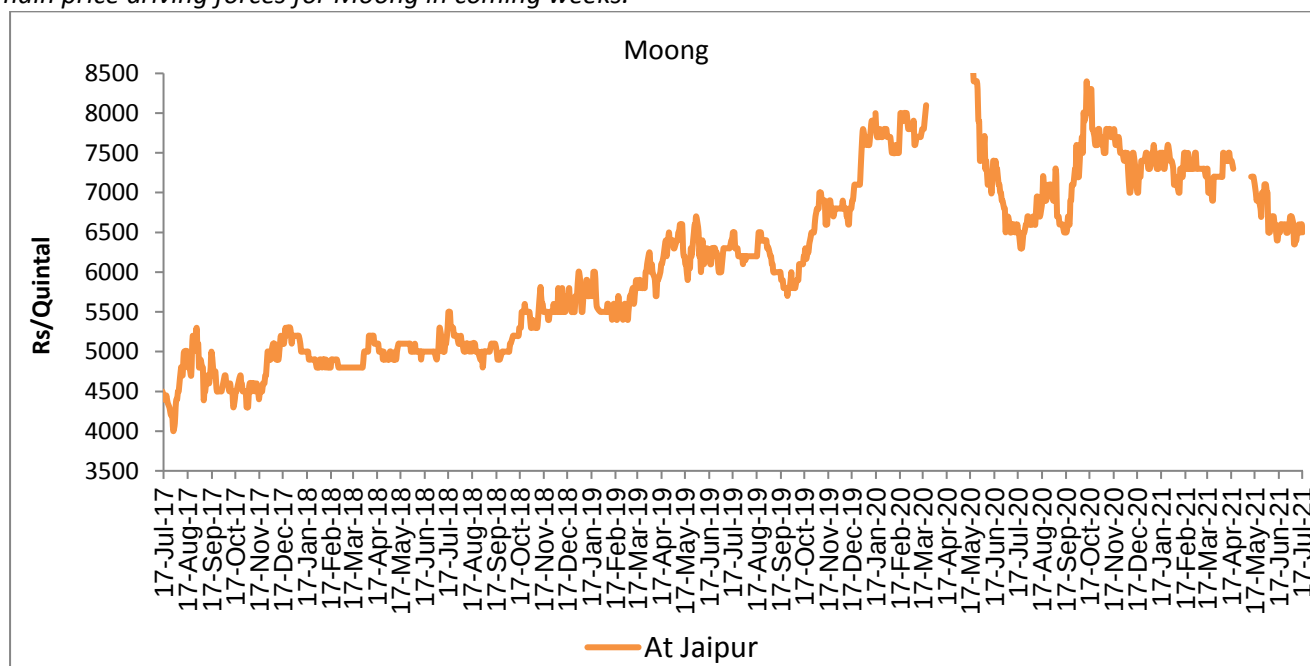

Market Outlook: Urad Prices are likely to show steady to slightly firm momentum this week.

Green Gram (Moong):

Market Recap:

Pressure on price seems building up again as the purchasing private participation would decrease due to strike in markets against govt's latest move on stock limit order for other pulses. Market may trade down in spite of slight recovery seen in the market. The Import flow may improve as the quotes in Myanmar is steady at \$950 for Annaseva. Kharif sowing progress, monsoon rains, import volume and the purchase volume at MSP would be the main price driving forces for Moong in coming weeks.

Market Outlook: Moong prices are likely to trade steady to weak in the near term.
