***Commodity-wise Domestic, International Prices and Arrivals at Different Centers***

## **Weekly Highlights-Domestic Market:**

### *Pulses Sector-Highlights:*

**All India Pulses area is running behind by 10.17 % as on 22nd July 2021. Arhar area is up by 5.37% so far while Moong and Urad bean are lagging behind by 18.42 and 22.68 % so far.**

**The region behind poor coverage is erratic rainfall. The excessive rainfall in Maharashtra and Karnataka too is posing great threat to the standing crops and the area gains seen at Arhar front may be neutralized .Loss of standing crop has been reported from Maharashtra and Karnataka. Around 20,000-25 000 ha area is said to be lost for Arhar in the both states. The loss may increase further as survey is not being conducted due to flooding in 5 major districts of Maharashtra due to flooding. Parts of the Raigad and Ratnagiri districts in the coastal Konkan region, Kolhapur district & Satara. Nanded and Sholapur too may face water logging issues if rains continue. In Karnataka, Gulbarga, Bidar, Bagalkot are facing water logging issues. It will affect total size of the crop. See details in table at page no. 12.**

**Govt. slashed down basic import duty on lentils to 0% from earlier 10%. Apart from it the cess has been reduced from 20 to 10 % now. Import from the US will attract 20 % duty now from earlier 30 %. The immediate impact might be seen as declining lentils prices in the short term.**

**Sowing of Moong too is lagging behind by 18.42 % as on 22nd July-2021. Rajasthan has just covered 56.21 % of season's normal area at 10.69 against 15.08 lakh ha last year. Despite better sowing performance in Karnataka and Maharashtra rains and flooding may end the early sowing gains. Rains continues and it would be interesting to see whether farmers would go for re-sowing or shift to other crops, where new plant has been washed out. As sowing would continue till the first week of Sept, the possibility of re-sowing is still there, but yield is certainly going to be down of re-sown crop. Prices of moong has been stable this week too at 6500 in Jaipur market. If area loss increases, prices may move up despite the low demand.**

**The similar condition is with Urad. The area is lagging behind by 22.69 % so far. Area in the major producing states like Madhya Pradesh, Rajasthan and Uttar Pradesh are lagging behind by 31.40 and 32 % so far. Only Gujarat and Maharashtra have maintained area coverage above last year's level. The recent flooding has impacted crop in Maharashtra. As per the latest information around 15,000 Urad area has been lost in Maharashtra and Gujarat. It may increase further if rains continues. Prices of Urad in the domestic market too have improved last week. It increased by 3.13 % to 6250 in Mumbai market. It may move up further if area loss increases. Myanmar quotes are stable at \$850 & 950 per MT basis Indian ports. In other market prices of Urad has moved up by Rs100-150 per qtl.**

**Recovery in Chana cash market was seen last week due to improved offtake of besan and dal. Cash market moved up by 100-150 in all major markets despite sale by Nafed. Futures too moved up taking clue from decreased arrival, improved demand from retail sectors. However, any major spike is unlikely as supply side would continue from the central pool. In Delhi market chana cash market moved up by 4.63 % to 5075. The overall sentiment seems firm for the week. Losses in area and uptrend in other pulses too is impacting Chana and dal prices.**

**With continuing heat wave in major growing state Saskatchewan, the 90 % contributor of lentil production in Canada has diminished the hope for normal production this year. The crop size may decrease from 10 to 20 % if the heat wave continues. In domestic market prices of lentil has started moving up again. The quotes in Canada has already gone up by 420 to \$735-40 for forward delivery. With improving demand in domestic market prices in Kanpur market moved up by 1.62% to 6741 from previous week. It may move up further as demand is picking up.**

## **Global Market Updates:**

**Crop conditions in Saskatchewan and other parts of the Canadian Prairies are deteriorating rapidly because of extremely hot and dry weather and minimal rainfall-according to Saskatchewan Agriculture. The prolonged period**

of heat, coupled with the extremely dry conditions of the topsoil, has caused crops to be short, thin and impulsively advancing in many regions of the province due to the stress. Around 30% of the pulses crops are ahead of their normal stages of development for this time of year. However, heat wave may affect normal crop size.

**According to reports from USDA state level offices Peas harvesting started in the US.** In Montana around 20% crop has been harvested. Limited progress is also reported in Washington state and Oregon, suggesting around 101,000 acres of peas have been harvested, compared to roughly 10,000 at this time last year. Markets expect the first production estimate in September, but if yields are at least within 10% of their recent five year average around 88,000 metric tons (MT) of peas are now in bin, compared to roughly 7,000 at this time last year.

**Lentils markets in the North America continued to trade firm on the back of strong export sales and fear of low yield in major growing belts.** Millers, importers and traders are expecting reduction in duty as supply side is tight in the local market. Indian gov.t too is monitoring market very closely and taking necessary actions to control the price rise. In this regard 3 steps, like freeing import of Tur, Moong & Urad from restricted to free list till October-2021 on 15th May, stock declaration and stock limit on 2nd July-2021, have been taken. All these developments go against exporting countries as prices in the Indian markets have decreased by 10 to 20 %, barring lentils, from mid-May-2021.

**Global field peas market traded firm on increasing fear of low production in the North America.** Most of the producing region is facing dry and hot conditions, resulting in deteriorating crop ratings and accelerating plant development in parts of the growing area. Grain size may be small and the yield low. Export movement has slowed down. Buyers are in a wait and watch mood.

**Chickpeas market too traded up due to doubt over yields and quality in Canada and the US.** However, desi chickpeas traded low due to poor demand from Pakistan and the Asian countries. It has affected chickpeas value in Australia too. India is not taking interest to buy Chana as prices have come down here below minimum support price.

**Area planted for all chickpeas for the 2021 crop year is estimated at 341,000 acres, up 26% from the previous year, according to the USDA's annual seeded area report.** Area harvested is forecast at 334,600 acres, 27% above 2020. Small chickpea area planted is estimated at 67,000 acres, up 38% from 2020. Area harvested for small chickpeas is forecast at 65,600 acres, a 37% increase from 2020. Area planted for large chickpeas in 2021 is estimated at 274,000 acres, a 24% increase from the previous year. Large chickpeas area harvested is forecast at 269,000 acres, a 25% increase from 2020.

**The seeded area under dry peas is expected to be slightly higher at 1750 thousand ha in 2021-22 against 1722 thousand ha last year in Canada.** However, yield may decline from 2.73 to 2.57 t/ha this year due to average yield expectation owing to the expected uncondusive weather conditions. So, the production is forecast to decrease from 4594 to 4400 thousand tonnes this year. Total supply and the export figure too may decrease from 4927 to 4790 and 3800 to 3700 thousand tonnes respectively. However domestic use may increase from 827 to 840 thousand tonnes this year. The carryout to decrease from 300 to 250 thousand tonnes.

**Lentils production in Canada is expected to decrease from 28.68 in 2020-21 to 2.7 MMT in 2021-22** due to slightly lower area & yield. Export too are expected to decrease by 2 lakh MT to 25 lakh MT in 2021-22. Total supply is expected to decrease from 31.82 to 29.25 lakh MT due to likely lower production in 2021-22. Against it domestic usage. However, domestic use would decrease from 3.27 to 2.75 lakh MT in 2021-22. So carryout stock would stay at same as last year at 1.5 MT. Average yearly price is expected to be in the range of \$ 585 per MT. For 2002-21 it is \$ 600 per MT.

**Monthly Outlook:** -Pulses are likely to trade steady to slightly mixed in July.

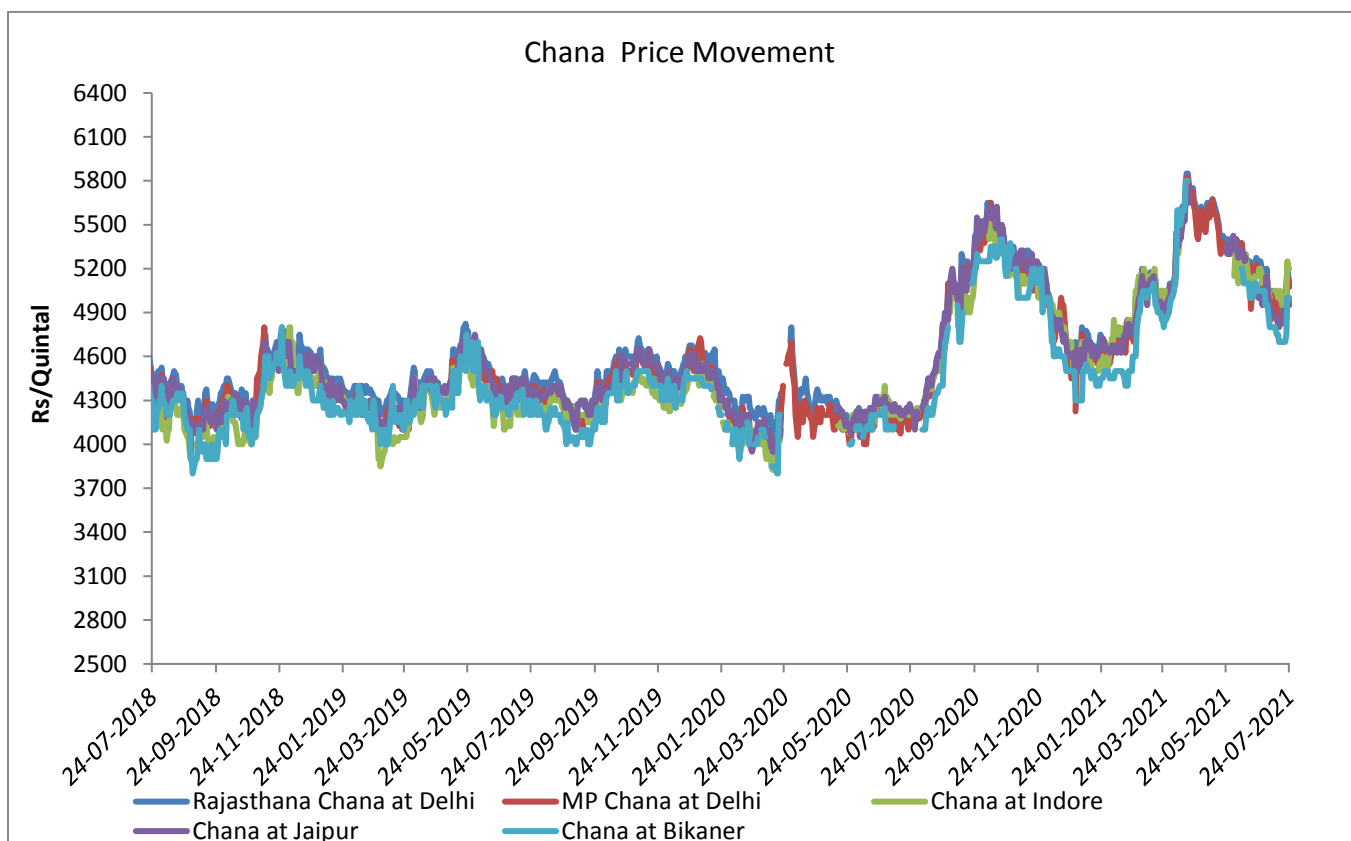

**Pulses-Wise Scenario:**

**Chana**

**Current Scenario:**

Chana cash market could not retain its gain seen during the last week on Monday taking clue from weak futures and demand constraints. After a down ward correction market should improve again. Supply side is at comfortable level right now. Festive demand is expected from Aug and it would drive price up despite the sale by Nafed. It would continue to release chana stock to keep market well supplied during festive season. Chana price may recover by Rs200 and may cross 5000 by the end of the week.

Import flow would remain restricted as duty plus cess is 60%. Import flow may continue from the least developed countries as they enjoys benefit of zero duty. Following graph illustrates chana price movement in different markets:

**Market Outlook:**

Cash market traded weak on Monday after continuous improvement during last week. After some downward correction it is bound to move up again.

### Chana Weekly Technical Analysis:

#### Technical Commentary:

- Decreasing price & OI hint weak sentiments in futures market in the near term.
- RSI is steady in the neutral region, hints indecision.
- Prices closed below 9 and 18 days EMAs.
- Candlestick chart hints weak momentum.

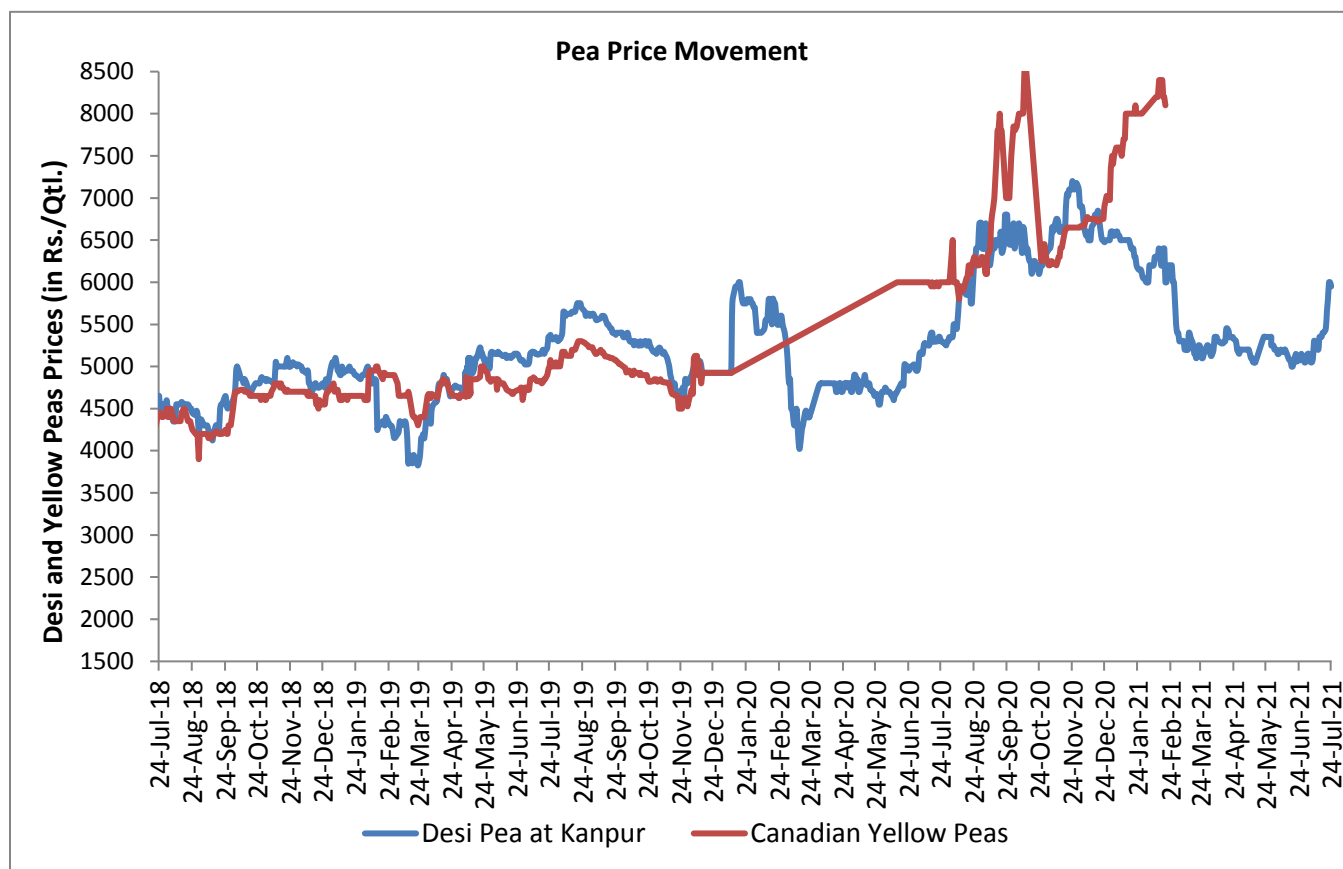

#### Strategy: Buy on dip

| Supports & Resistances |       |     | S1        | S2    | PCP  | R1   | R2   |
|------------------------|-------|-----|-----------|-------|------|------|------|
| Chana                  | NCDEX | Aug | 4853      | 4822  | 4973 | 5102 | 5216 |
| Weekly Trade Call*     |       |     | Call      | Entry | T1   | T2   | SL   |
| Chana                  | NCDEX | Aug | Buy above | 4950  | 5025 | 5050 | 4910 |

- Do not carry forward stock for next week.

**Peas (Matar):**
**Market Recap:**

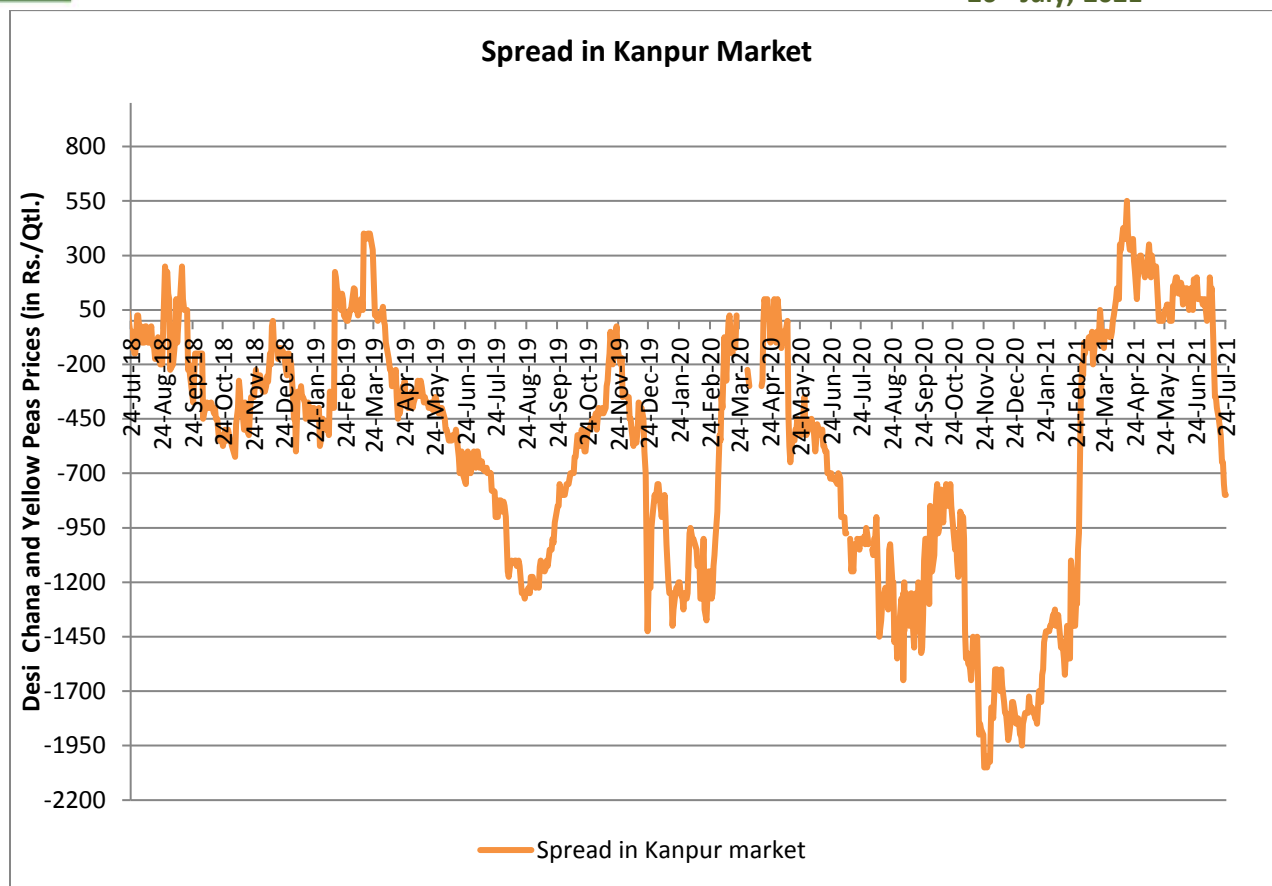

Short supply of pea has started supporting peas market and prices moved up by 8.74 % to 5808. It may move further up. Govt. has not given any import quota for peas as of now. However, if prices of chana moves up, it may support peas market too. If India saves itself from the third wave of COVID-19, demand is expected to improve. Matar in Kanpur market is being traded at Rs 5950-6000 per qtl. There was no quotes for green peas as availability is negligible. As of now there is no intension to open peas import. It may move further up. Following chart shows price movement in various markets:

**Current Market Dynamics & Outlook:** Peas market traded smartly up due to changed inner tone in pulses market. Supply constraints are pushing up peas market. In Kanpur market it was quoted at Rs 6000 per qtl. Overall, all India average weekly price was up by Rs 700 to Rs 5900 per qtl. In Mumbai market, there was no quote for yellow peas as stock has been exhausted. There is no quotes for imported peas as availability is almost nil.

**Spread With Chana:**

Spread between Chana and Peas, at Kanpur market moved in negative zone. Gap has increased to is Rs 800 now. Spread is expected to remain in the negative zone in Aug too on relative movement in Chana prices. Overall outlook seems steady to slightly firm this week too.

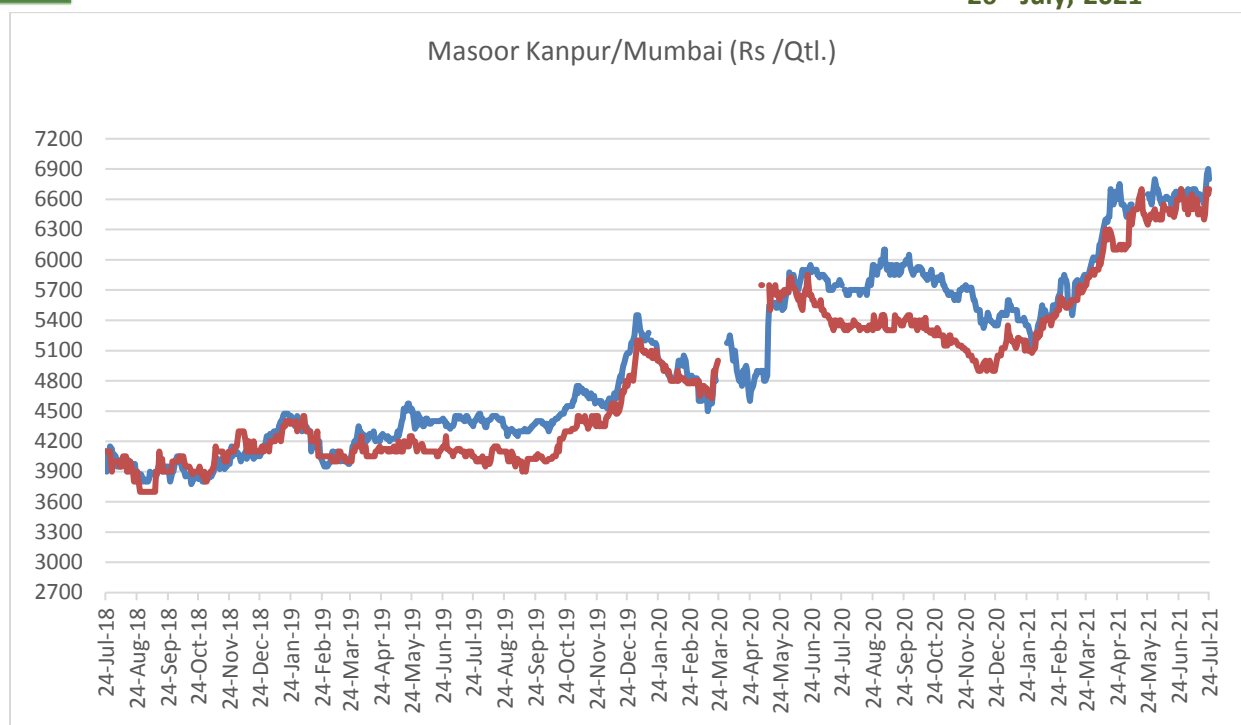

**Market Outlook For July:** Steady to slightly firm movement is expected in July-2021.

#### **Lentils (Masoor):**

##### **Market Recap:**

The cash Masur market traded down by Rs100 to Rs 6900 in Kanpur market while imported stock traded at Rs 6500 in Mumbai market. Demand is yet to increase. Govt has reduced the duty on Masur from 10% to 0 while cess has been reduced to 10 % now from 20% . This means now importers have to pay 10 % as cess. It may pressurize market to some extent. Supply from SEZ may be increased and they may sell it in Indian market. Importers are waiting for this move. However, once the supply pressure ends from SEZ stock, Masur may move up again. Sep onward supply from Canada may start from the new crop. However, export quotes may be increased there as heat wave is disturbing the expected crop size this year.

**Current Scenario:** As supply from SEZ is likely to improve, some downward correction in the market may be seen for the short term.

Red colour shows the imported Masur price

**Market Outlook:** Prices may trade steady to slightly weak with new import policy..

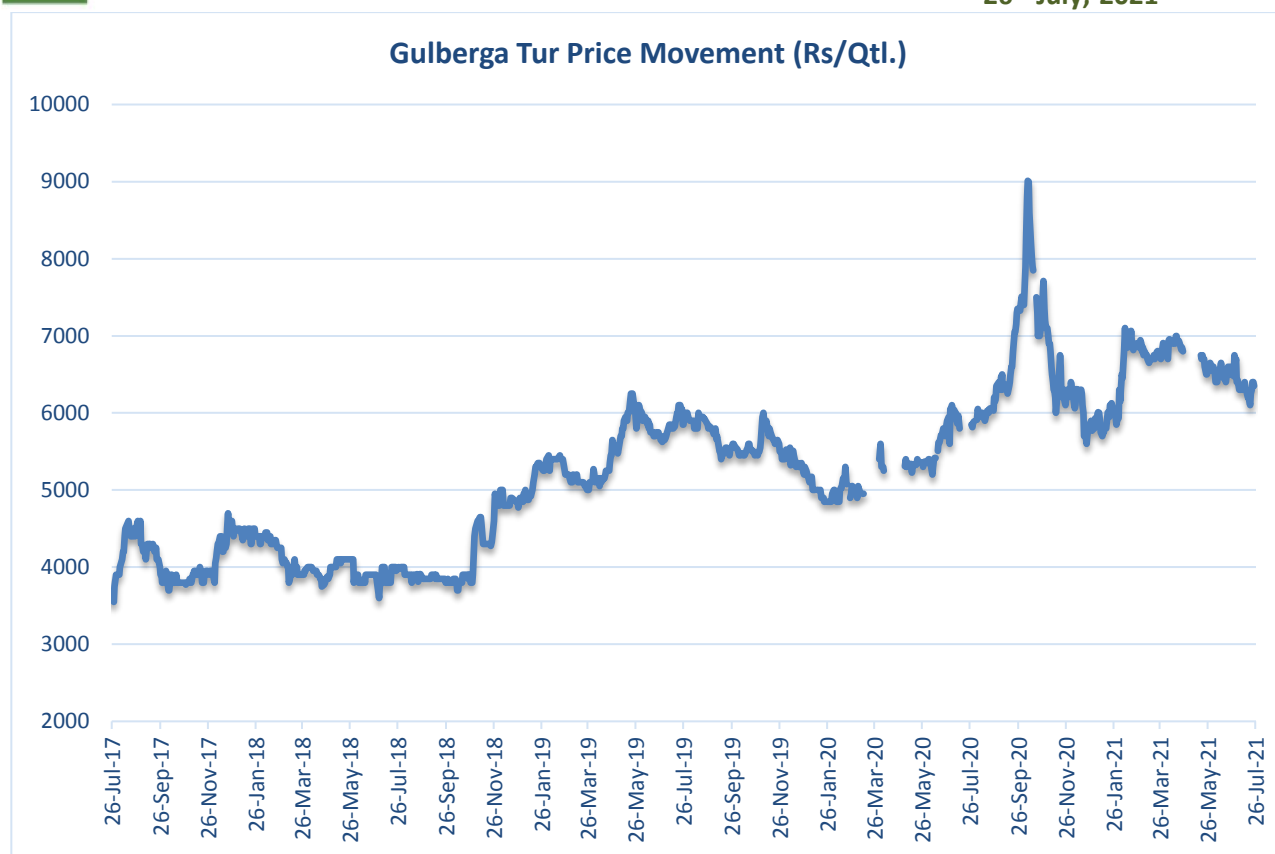

#### **Pigeon Pea (Tur/Toor):**

*Slight recovery might be seen in tur cash market as area loss is being reported from Maharashtra and Karnataka. Orisha, AP are lagging behind. So, good prospect for Tur production has turned negative. If rains continue, situation may deteriorate further. It may support Tur price in coming weeks. Tur in Gulberga market traded at Rs 6300-6350 per qtl and may touch to Rs 6500-6600.*

#### **Current Market Dynamics & Outlook:**

*Lemon Tur is available at 6250 at Mumbai port. Sowing has started but running with slow pace due to lack of rains in some regions and water-logging, flooding in other regions. The import flow is not expected to increase substantially even in July.*

*India imported 26380 MT in June. So far India has imported total 38000 MT from April to June-2021. In July import volume is expected to increase to 40,000 MT. Supply side is at comfortable level. So any spike in cash market is unlikely.*

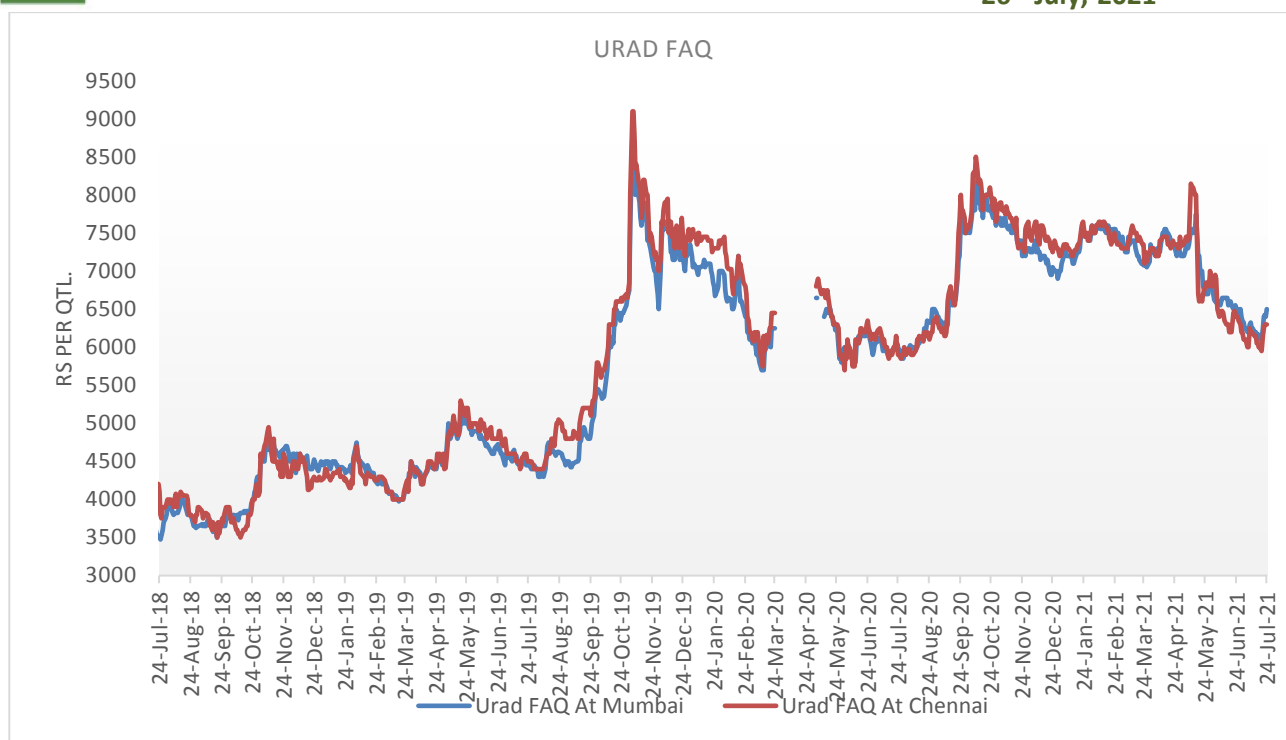

### **Black Matpe (Urad):**

Imported Urad traded up by 500 to Rs 6500-6600 at Mumbai while the local crop in Tamil Nadu traded up too by Rs 150 to Rs 6300-6350. Price should improve as relaxation in stock limit has been given to stake holders. Apart from this flooding and lower area coverage too may support urad prices in coming weeks. Stockists /millers may hold stock for longer time and it should push market up again to some extent. Myanmar is offering Urad FAQ at \$850 and SQ at \$950. Demand is yet to pick up.

### **Current Market Dynamics & Outlook:**

Major urad crop comes in kharif season. Farmers have covered only 22.23 lakh ha so far , down by 22.69 percent from last year till date. As availability in Myanmar too is low and so any big decline is not expected before the new crop hits the market., India imported around 83000 MT urad in from April to June-2021. Import is free now, so when parity turns in favour of India, the volume of import may increase.

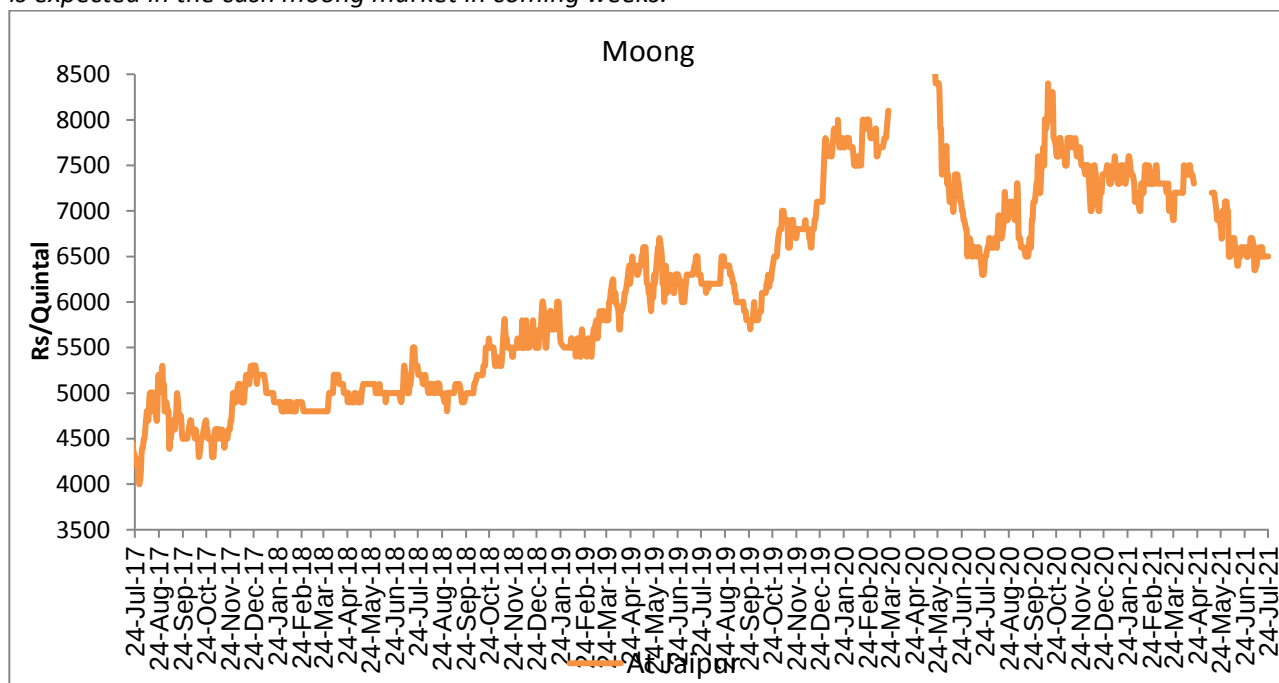

**Market Outlook:** Urad Prices are likely to show steady to slightly firm momentum this week.

### **Green Gram (Moong):**

#### **Market Recap:**

Due to area loss in Karnataka and Mharashtra by flooding Moong may trade up in coming weeks. Import volume is low while demand is yet to improve. The production prospects have deteriorated. So, firm sentiment is expected in the cash moong market in coming weeks.

**Market Outlook:** Moong prices are likely to trade steady to firm in the near term.
