Weekly Highlights-Domestic Market:

Pulses Sector-Highlights:

Despite recovery in Kharif pulses sowing the coverage area under pulses is yet lagging behind by 3 % as on 28th July 2021. Arhar area is up by 3.95 % so far while Moong bean and Urad bean are running behind by 9.90 and 8.91 % so far. Now the major concern in Maharashtra, some parts in Gujarat and Madhya Pradesh is to start re-sowing in muddy areas caused by floods. Farmers would not be able to start re-sowing before 15teen days if rains stops. They may go for short duration crops like Moong and Urad. The loss of standing crop has been reported from Maharashtra, Gujarat and Karnataka. Total area loss is said to be 50-60 thousand ha for pulses. Mh is the worst affected state. Districts like Raigad and Ratnagiri (Konkan region), Kolhapur & Satara are still facing issue of water logging. Farmers in Naded and Sholapur too are facing excess water problem.. In Karnataka, Gulbarga, Bidar, Bagalkot sowing has started again. The overall situation is expected to improve at sowing front in coming weeks.

Lentils prices have improved again in domestic markets and may move up further. Availability in global market would decrease to 22 to 24 lakh MT this year as lentils production in Canada may decrease to 12-13 lakh MT against normal of 24 to 25 lakh MT. Heat wave have badly affected the standing crop in the in major growing state Saskatchewan and there is no respite till now. The crop is in pod filling stages and is facing extreme moisture stress. Crop in Australia too is not in good condition and the production there is expected around 5 lakh MT against the normal of 6 to 7 lakh MT. So, prices would remain at high higher level and it would directly impact the prices in domestic market as India normally imports 8-10 lakh MT annually. Apart from it the demand in local market have started improving. The overall tone remains firm. Kanpur market moved up by 100 to 6800 now, while imported Masur is being offered at 6500 in Mumbai. The global market quotes may move up to \$780-800. As of now it is stable at \$750.

Sowing of Moong too is lagging behind by 9.90 % to 26.47lakh ha as on 28 July-2021. All Moong growing states are lagging behind in area coverage except Karnataka, M.P. & Telangana. As the major producing state like Rajasthan is lagging behind by 17 % so far, the area gain in other states has been neutralized. If area recovers smartly in Raj, the crop size would be normal. It would be interesting to see whether farmers would go for re-sowing or shift to other crops, where new plant has been washed out. As sowing would continue till the first week of Sept, the possibility of re-sowing is still there, but yield is certainly going to be down of re-sown crop. The prices of moong too moved up by 200 to 6700 in Rajasthan. Weather conditions remain the major price driving forces as of now. Myanmar is offering Moong at \$900-950 per MT basis Indian ports.

Despite recovery in the Urad bean area this week the all India coverage is lagging behind by 8.90 % to 29.96 lakh ha so far. The main growing state like M.P. the area is down by 13.25% to 12.83 lakh ha. So gains in Raj, Mh and Guj have been neutralized by the low coverage in M.P. Loss by flooding area excess rains are still being assessed. As per the latest information around 20,000-25000 Urad area has been lost in Maharashtra and Gujarat. It may increase further if rains continues. Prices of Urad in the domestic market too have improved by 200-250 in all markets during last week. It increased by 6550 to 6750 in Mumbai market. It may move up further if area loss increases. Myanmar quotes are stable at \$850 & 950 per MT basis Indian ports. In other market prices of Urad has moved up by Rs100-150 per qtl.

Recovery continued in Chana cash markets due to improved offtake of besan and dal amid restricted sale by stockists and supply disturbance due to rains.. Cash market moved up by 100-150 in all major markets despite sale by Nafed. Futures too moved up taking clue from decreased arrival, improved demand from retail sectors. However, any major spike is unlikely as supply side would continue from the central pool. In Delhi market chana cash market moved up by 2.90% to 5140. The overall sentiment seems firm for the week. Losses in area and uptrend in other pulses too is impacting Chana and dal prices.

Recovery in Tur market is expected as supply side seems tightening with the start of the festive demand and the low flow of import. All major markets traded up despite the higher area coverage this year so far. However, area loss due to flooding have encouraged stackists, mills to hold stock. If heavy rains occur again, it may disturb the size of the incoming crop. Tur traded up by Rs100-200, may move up further in coming weeks. As supply front is not at comfortable level, govt may try to source other pulses too from the international markets.

Global Market Updates:

As per General Customs Administration of China peas import in China increased by 10 % to 2.69 lakh MT in April-2021 against 2.45 lakh MT in March. Imports so far total 978,833 MT, versus 399,515 in the same period the previous calendar year. Canada exported 2.53 lakh MT in April-2021 to China. United States was the second most important origin shipping 9,495 MT, followed by France at 3,511 MT.

Peas harvest in US is 40% complete, compared to 14% at the same time last year. Farmers in Montana made considerable progress with their harvest, with an estimated 61% of the crop now in the bin, triple progress by the beginning of August last year. Progress is also being reported in North Dakota, with 11% of that state's crop now in the bin, up from 8% at this time last year as per Statpub latest release.

According to reports from USDA state level offices Peas harvesting started in the US. In Montana around 20% crop has been harvested. Limited progress is also reported in Washington state and Oregon, suggesting around 101,000 acres of peas have been harvested, compared to roughly 10,000 at this time last year. Markets expect the first production estimate in September, but if yields are at least within 10% of their recent five year average around 88,000 metric tons (MT) of peas are now in bin, compared to roughly 7,000 at this time last year.

Lentils markets in the North America continued to trade firm on the back of strong export sales and fear of low yield in major growing belts. Millers, importers and traders are expecting reduction in duty as supply side is tight in the local market. Indian gov.t too is monitoring market very closely and taking necessary actions to control the price rise. In this regard 3 steps, like freeing import of Tur, Moong & Urad from restricted to free list till October-2021 on 15th May, stock declaration and stock limit on 2nd July-2021, have been taken. All these developments go against exporting countries as prices in the Indian markets have decreased by 10 to 20 %, barring lentils, from mid-May-2021.

Global field peas market traded firm on increasing fear of low production in the North America. Most of the producing region is facing dry and hot conditions, resulting in deteriorating crop ratings and accelerating plant development in parts of the growing area. Grain size may be small and the yield low. Export movement has slowed down. Buyers are in a wait and watch mood.

Chickpeas market too traded up due to doubt over yields and quality in Canada and the US. However, desi chickpeas traded low due to poor demand from Pakistan and the Asian countries. It has affected chickpeas value in Australia too. India is not taking interest to buy Chana as prices have come down here below minimum support price.

Area planted for all chickpeas for the 2021 crop year is estimated at 341,000 acres, up 26% from the previous year, according to the USDA's annual seeded area report. Area harvested is forecast at 334,600 acres, 27% above 2020. Small chickpea area planted is estimated at 67,000 acres, up 38% from 2020. Area harvested for small chickpeas is forecast at 65,600 acres, a 37% increase from 2020. Area planted for large chickpeas in 2021 is estimated at 274,000 acres, a 24% increase from the previous year. Large chickpeas area harvested is forecast at 269,000 acres, a 25% increase from 2020.

The seeded area under dry peas is expected to be slightly higher at 1750 thousand ha in 2021-22 against 1722 thousand ha last year in Canada. However, yield may decline from 2.73 to 2.57 t/ha this year due to average yield expectation owing to the expected unconducive weather conditions. So, the production is forecast to decrease from 4594 to 4400 thousand tonnes this year. Total supply and the export figure too may decrease from 4927 to 4790 and 3800 to 3700 thousand tonnes respectively. However domestic use may increase from 827 to 840 thousand tonnes this year. The carryout to decrease from 300 to 250 thousand tonnes.

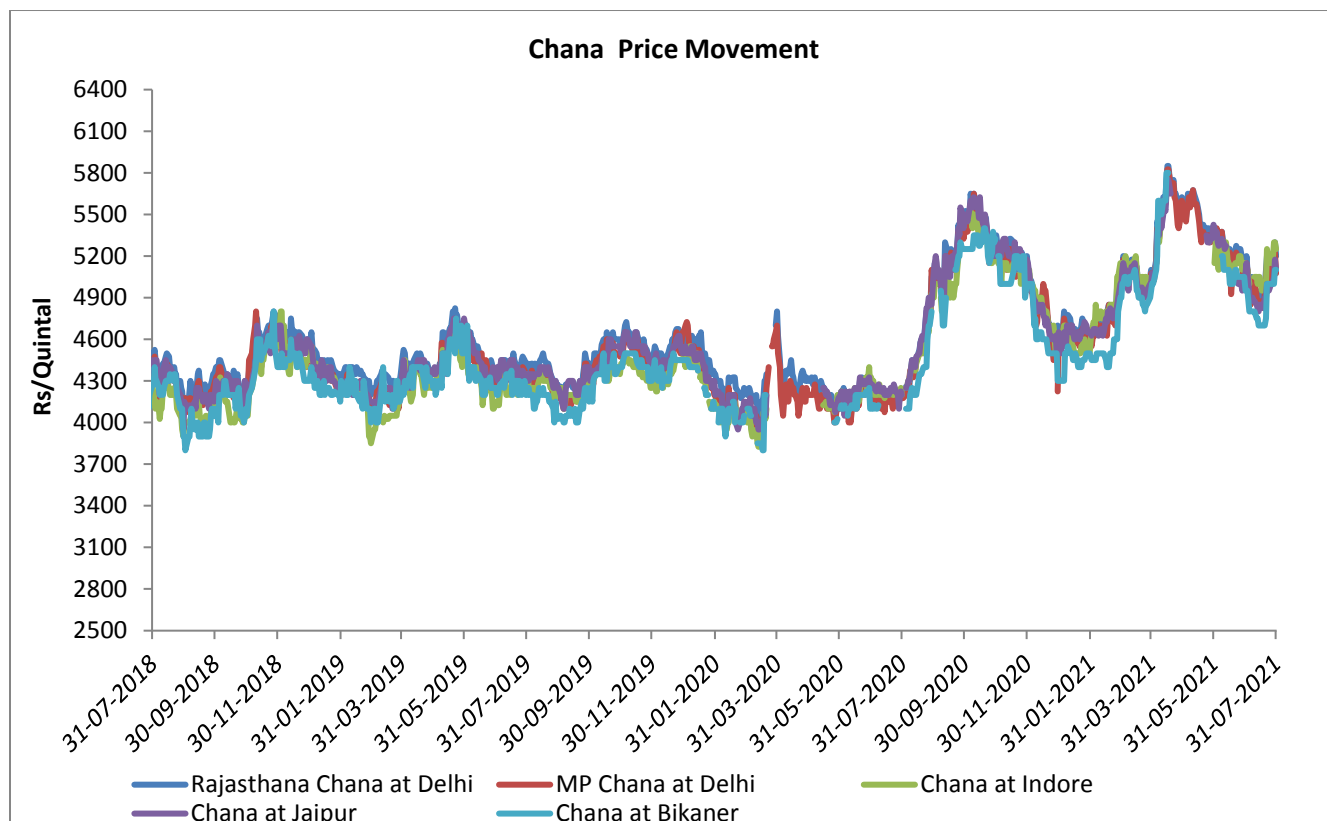

Lentils production in Canada is expected to decrease from 28.68 in 2020-21 to 2.7 MMT in 2021-22 due to slightly lower area & yield. Export too are expected to decrease by 2 lakh MT to 25 lakh MT in 2021-22. Total supply is expected to decrease from 31.82 to 29.25 lakh MT due to likely lower production in 2021-22. Against it domestic usage. However, domestic use would decrease from 3.27 to 2.75 lakh MT in 2021-22. So carryout stock would stay at same as last year at 1.5 MT. Average yearly price is expected to be in the range of \$ 585 per MT. For 2002-21 it is \$ 600 per MT.

Monthly Outlook: -Pulses are likely to trade steady to slightly mixed in Aug.

Pulses-Wise Scenario:
Chana
Current Scenario:

Chana cash market could not retain its gain seen during the last week on Monday taking clue from weak futures and demand constraints. After a down ward correction market should improve again. Supply side is at comfortable level right now. Festive demand is expected from Aug and it would drive price up despite the sale by Nafed. It would continue to release chana stock to keep market well supplied during festive season. Chana price may recover by Rs200 and may cross 5200 by the end of the week.

Import flow would remain restricted as duty plus cess is 60%. Import flow may continue from the least developed countries as they enjoys benefit of zero duty. Following graph illustrates chana price movement in different markets:

Market Outlook:

Cash market traded weak on Tuesday after continuous improvement during last week. After some downward correction it is bound to move up again.

Chana Weekly Technical Analysis:

Technical Commentary:

- Decreasing price & OI hint weak sentiments in futures market in the near term.
- RSI is steady in the neutral region, hints indecision.
- Prices closed below 9 and 18 days EMAs.
- Candlestick chart hints weak momentum.

Strategy: Buy on dip

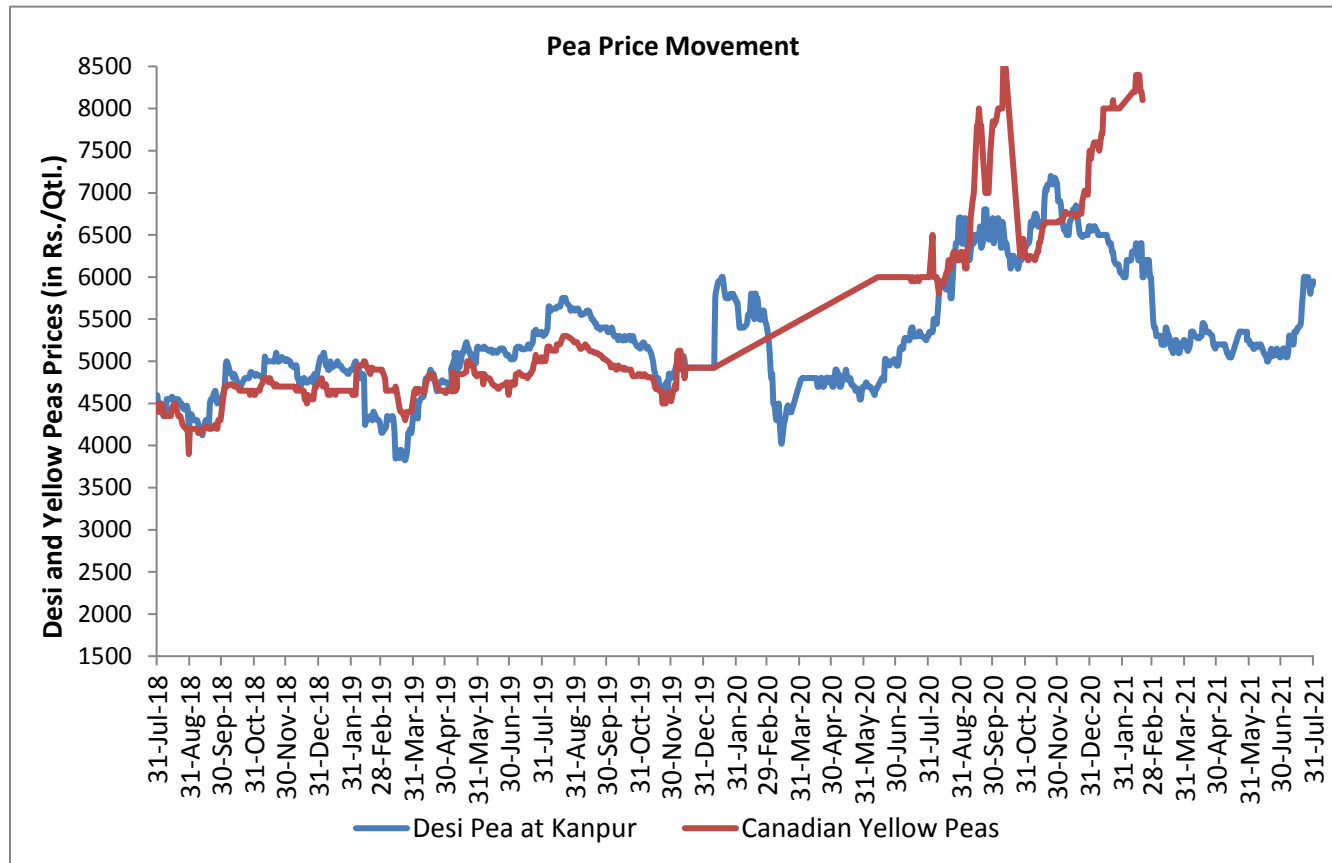

Supports & Resistances			S1	S2	PCP	R1	R2
Chana	NCDEX	Aug	5023	4954	5037	5212	5273
Weekly Trade Call*			Call	Entry	T1	T2	SL
Chana	NCDEX	Aug	Buy above	5024	5100	5125	5000

• Do not carry forward stock for next week.

Peas (Matar):

Market Recap:

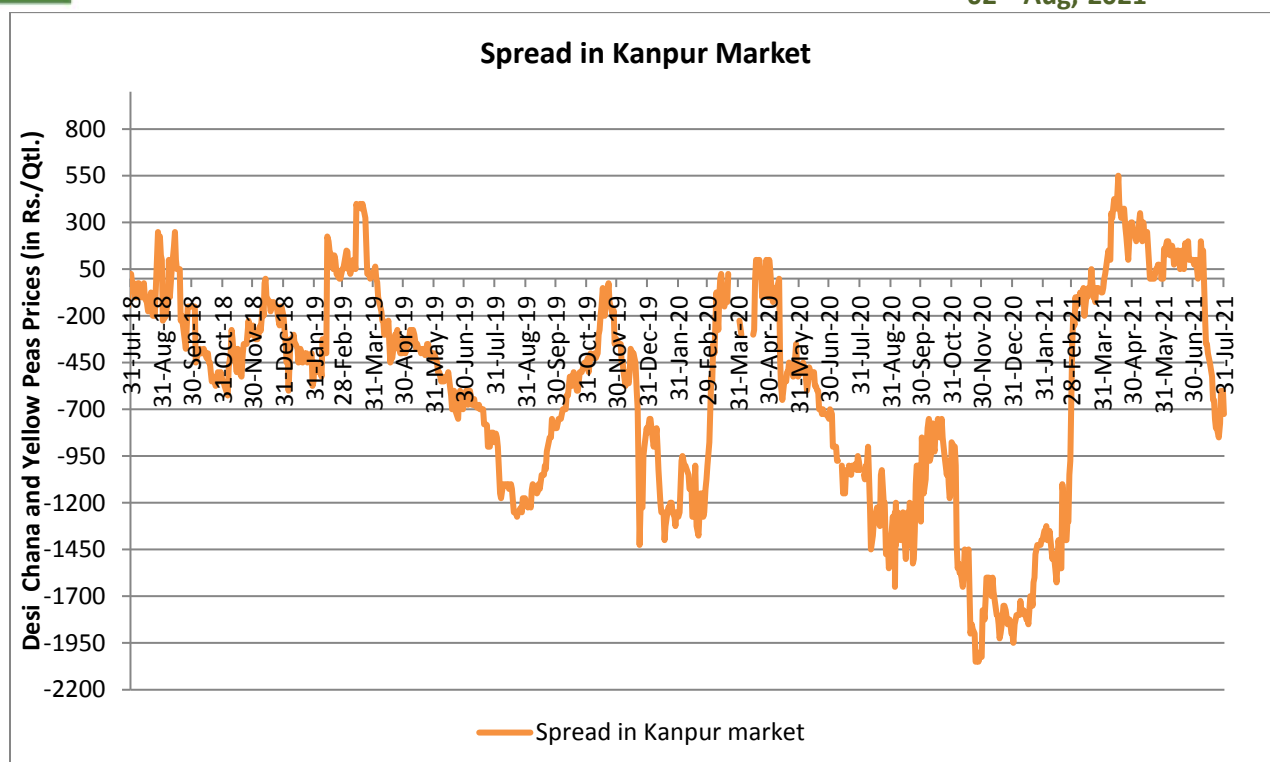

Short supply of pea has started supporting peas market and prices moved up by 8.74 % to 5808. It may move further up. Govt. has not given any import quota for peas as of now. However, if prices of chana moves up, it may support peas market too. If India saves itself from the third wave of COVID-19, demand is expected to improve. Matar in Kanpur market is being traded at Rs 6000-6100 per qtl. There was no quotes for green peas as availability is negligible. As of now there is no intention to open peas import. It may move further up. Following chart shows price movement in various markets:

Current Market Dynamics & Outlook: Peas market traded smartly up due to changed inner tone in pulses market. Supply constraints are pushing up peas market. In Kanpur market it was quoted at Rs 6000 per qtl. Overall, all India average weekly price was up by Rs 700 to Rs 5900 per qtl. In Mumbai market, there was no quote for yellow peas as stock has been exhausted. There is no quotes for imported peas as availability is almost nil.

Spread With Chana:

Spread between Chana and Peas, at Kanpur market moved in negative zone. Gap has decreased slightly to Rs 725 now. Spread is expected to remain in the negative zone in Aug too on relative movement in Chana prices. Overall outlook seems steady to slightly firm this week too.

Market Outlook For Aug: Steady to slightly firm movement is expected in Aug-2021.

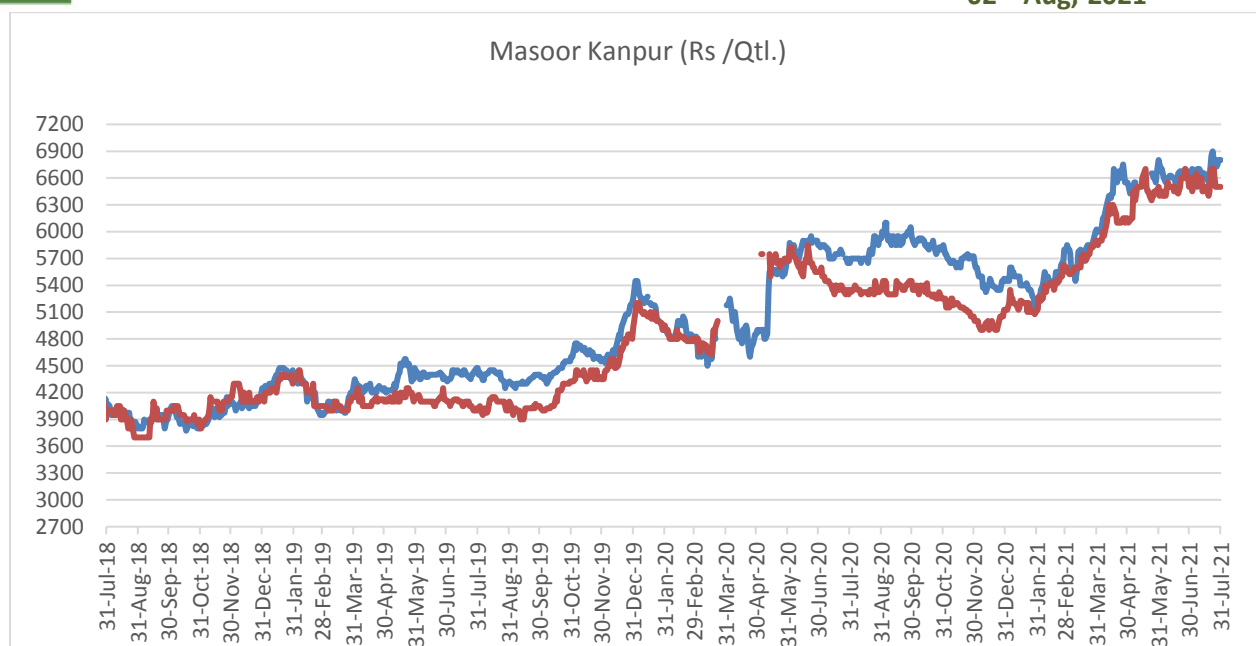

Lentils (Masoor):

Market Recap:

The cash Masur market stayed steady at Rs 6800-6900 in Kanpur market while imported stock traded at Rs 6500-6600 in Mumbai market. Demand is yet to increase. Govt has reduced the duty on Masur from 10% to 0 while cess has been reduced to 10 % now from 20% . This means now importers have to pay 10 % as cess. It may pressurize market to some extent. Supply from SEZ may be increased and they may sell it in Indian market. Importers are waiting for this move. However, once the supply pressure ends from SEZ stock, Masur may move up again. Sep onward supply from Canada may start from the new crop. However, export quotes may be increased there as heat wave is disturbing the expected crop size this year.

Current Scenario:

Market is bound to move up. Govt may try to increase supply through contracting deals to supply pulses. However, any immediate relief is unlikely at this point of time due to the low production size this year. Supply side is tight.

Red colour shows the imported Masur price

Market Outlook: Prices may trade steady to slightly firm.

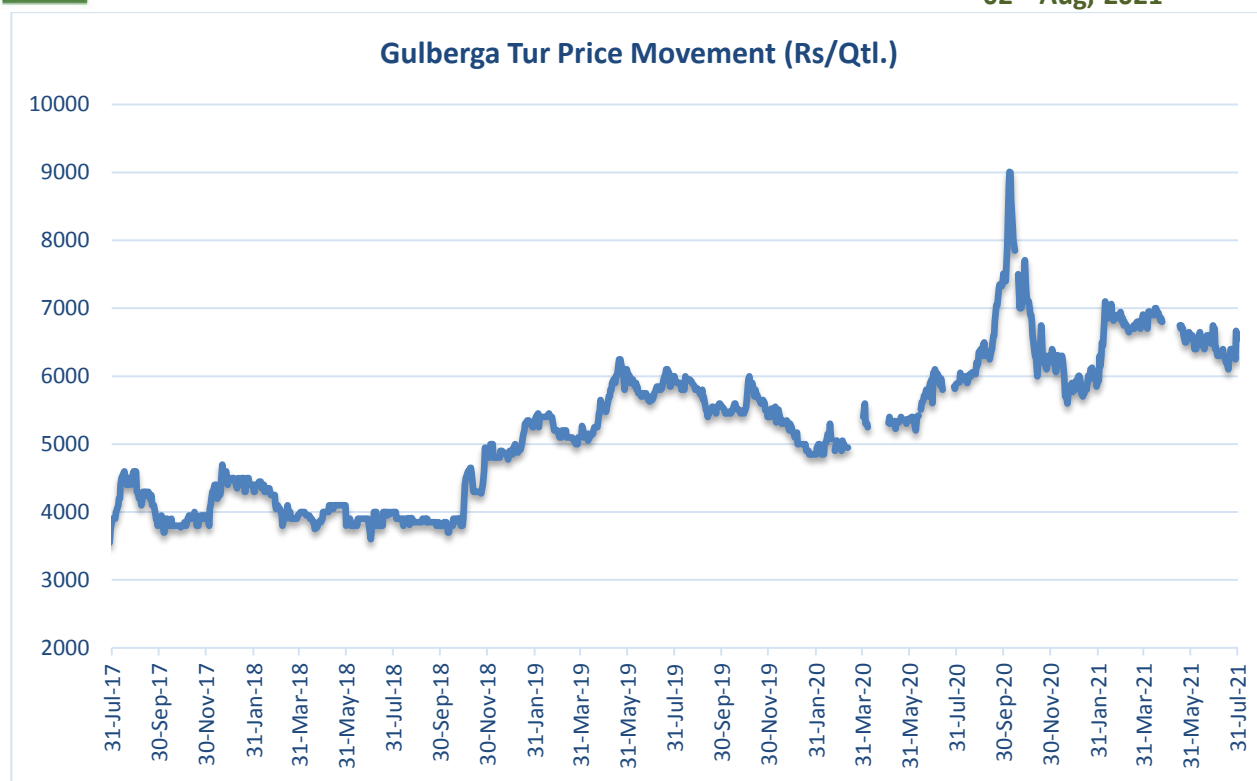

Pigeon Pea (Tur/Toor):

Slight recovery might be seen in tur cash market as area loss is being reported from Maharashtra and Karnataka. Orisha, AP are lagging behind. So, good prospect for Tur production has turned into negative. If rains continues, situation may be deteriorate further. It may support Tur price in coming weeks. Tur in Gulberga market traded at Rs 6500-6600 per qtl and may touch to Rs 6700-6900.

Current Market Dynamics & Outlook:

Lemon Tur is available at 6500-6600 at Mumbai port. Sowing has started but running with slow pace due to lack of rains in some regions and water-logging, flooding in other regions. The import flow is not expected to increase substantially even in Aug.

India imported 26380 MT in June. So far India has imported total 38000 MT from April to June-2021. In July import volume is expected to increase to 40,000 MT. Supply side is at comfortable level. So any spike in cash market is unlikely.

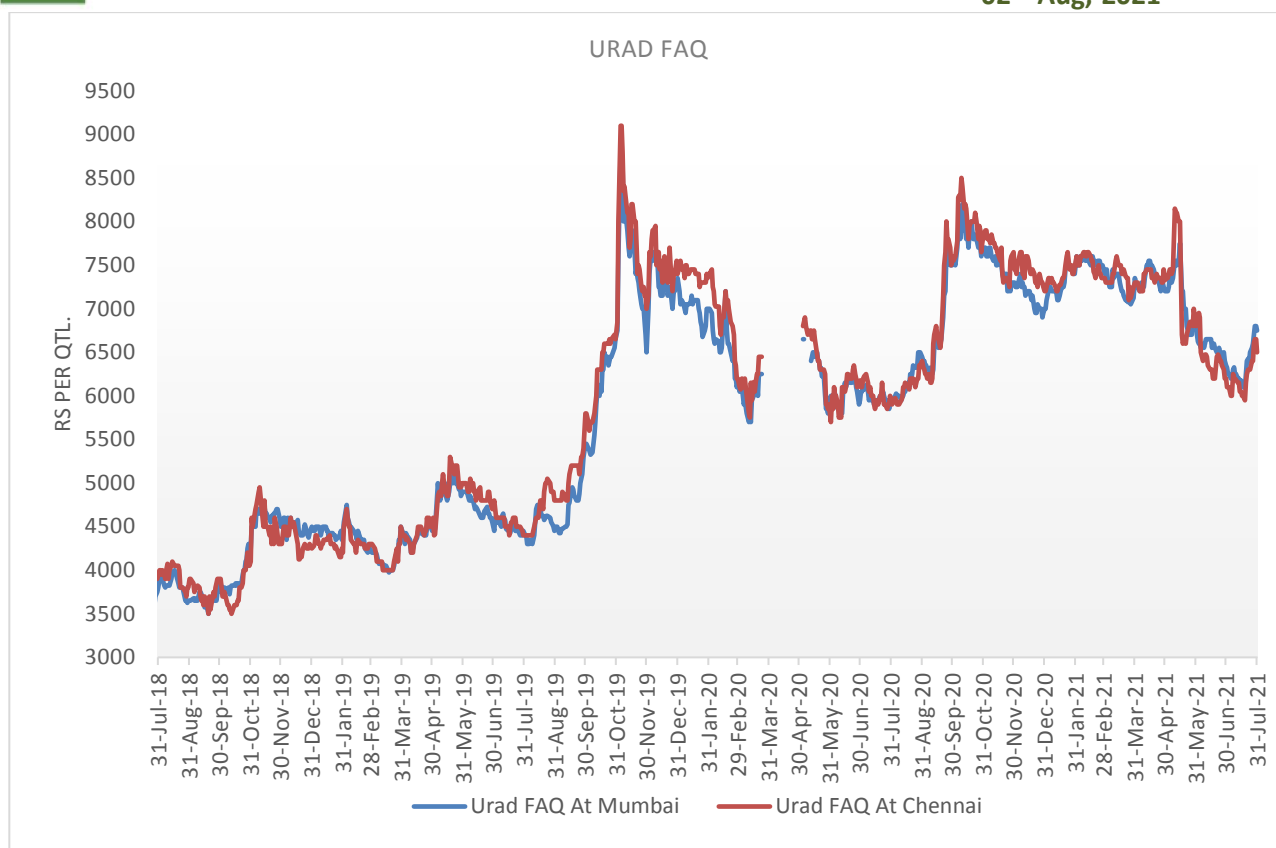

Black Matpe (Urad):

Imported Urad traded up by 200 to Rs 6600-6750 at Mumbai while the local crop in Tamil Nadu traded up too by Rs 150 to Rs 6400-6550. Price should improve as relaxation in stock limit has been given to stake holders. Apart from this flooding and lower area coverage too may support urad prices in coming weeks. Stockists /millers may hold stock for longer time and it should push market up again to some extent. Myanmar is offering Urad FAQ at \$850 and SQ at \$950. Demand is yet to pick up.

Current Market Dynamics & Outlook:

Major Urad crop comes in kharif season. Farmers have covered only 29.96 lakh ha so far , down by 32.6 89 percent from last year till date. As availability in Myanmar too is low and so any big decline is not expected before the new crop hits the market., India imported around 83000 MT urad in from April to June-2021. Import is free now, so when parity turns in favour of India, the volume of import may increase.

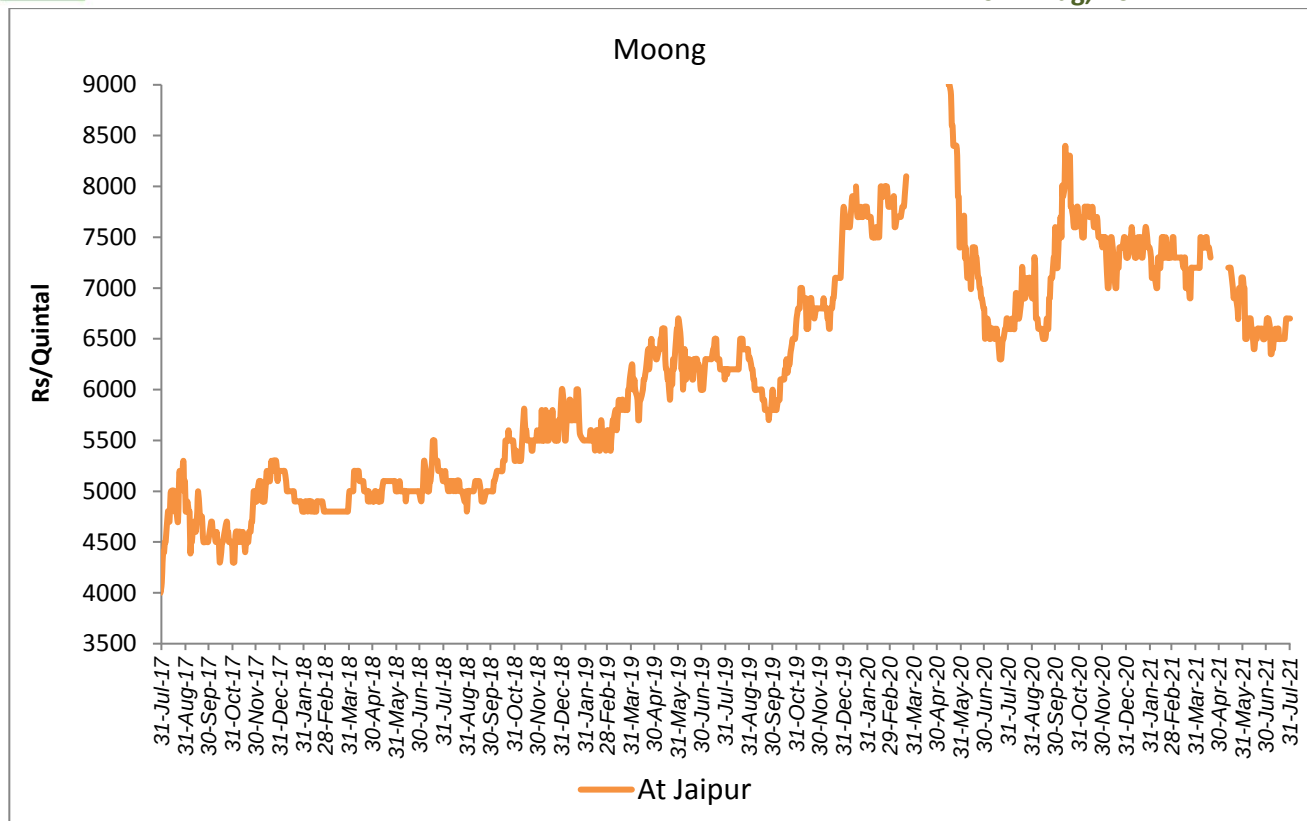

Market Outlook: Urad Prices are likely to show steady to slightly firm momentum this week.

Green Gram (Moong):

Market Recap:

Due to area loss in Karnataka and Maharashtra by flooding Moong may trade up in coming weeks. Import volume is low while demand is yet to improve. The production prospects have deteriorated. So, firm sentiment is expected in the cash moong market in coming weeks.

Market Outlook: Moong prices are likely to trade steady to firm in the near term.

Kharif Pulses Coverage Area Coverage As on 30th July-2021
