Weekly Highlights-Domestic Market:*Pulses Sector-Highlights:*

All India Kharif pulses area continued to recover as expected and was up by 1.67 % to 134.23 lakh ha against 132.02 lakh ha last year as on 20th Aug-2021. Arhar area is up by 3.92 % to 48.24 so far while Moong bean is running behind by 0.15 % to 33.99 lakh ha. Urad bean area recovered slowly and is up by 0.16 % to 37.06 lakh ha. so far. Despite higher production forecast in the 4th Adv Est. ,Prices of Urad, Tur , Lentils and Moong have recover again and may move up further as arrivals are expected to be late by 10 to 15 days. Apart from this higher quotes in Myanmar for Urad, Tur and in Canada for Lentils amid improved demand from mills in the domestic markets has lent support to cash dal market. Weather remains favourable for pulses crops and the production in Kharif season may improve.

Lentils cash market continued to trade up and extended its gain by 6.99 % to 7400 in Kanpur market. Average weekly price in Mumbai moved up too by 5.35% to 6733 from 6391 during the week ending 21st Aug-2021. Strong tone from the global market, the slow pace of import and the increasing quotes in Canada (\$725 to \$750 per MT) have pushed up the prices in the domestic markets. It may move up above \$950-1000 in Dec-Jan .Harvesting in Canada has already started. As the crop size is bound to decrease by 40 to 50 % there, the supply from the overseas market would be tight and it would continue to push up prices. Farmers in Canada are unwilling to sell at current prices and in domestic market too people having stocks, have restricted sale. As of now Australian crop looks normal and the fear is growing if the weather continues to be dry, it may affect yield too. So , overall sentiments remain firm for the lentils market.

Moong area too has recovered in comparison to last week and now it is lagging behind by 1.23% to 32.52 lakh ha against 32.93 lakh ha last year. Almost all states area coverage have recovered now. The latest sowing figure is awaited. Agriwatch has published Moong Kharif production estimates for 2021-22 and the production size has been pegged at 15.93 lakh ha this year. Total production including Rabi & Summer has been pegged at 23.25 lakh MT. With higher production estimates, supply side seems at comfortable level as of now. Under normal condition prices may continue to trade range bound. Crop in Myanmar too is in very good condition and may hit market after 15th Sep-2021. Myanmar is offering Moong at \$900-950 per MT basis Indian ports. It may decrease with the arrivals from the new crop. Prices in domestic market are ruling in the range of Rs6000-6700, depending on quality of the crop. No major losses have been reported from any region except Bundi, Baran and Kota region.

Urad bean area recovered as expected last week and has crossed last year's level. The all India coverage is up by 0.5 % to 35.52lakh ha so far. New sowing data is awaited .The main growing state like M.P. the area is down by 4.28 % to 15.00 lakh ha. and 4.33% to 6.06 lakh ha in Uttar Pradesh. However, gains in Raj, Mh and Guj would compensate the area gap in M.P. and Uttar Pradesh to a great extent. Recent area loss due to flooding and heavy rains may be neutralized by late –re-sowing and higher area coverage in major states. Agriwatch has published Kharif APY estimated of Urad for 2021-22. The Kharif production has been pegged at 17.59 lakh MT. With an expected Rabi crop at 6.44 lakh MT, total production would be 24.03 lakh MT this year. It is almost similar to last year (24.19 lakh MT). Prices of Urad increased last week due to the increased quotes for imported Urad and growing fear of low production. Average weekly price in Mumbai and Chennai moved up by 0.72 % to 6869 from 6820. Myanmar quotes moved slightly down by \$3 at \$901 & 1063 per MT basis Indian ports. The overall sentiments remain firm. New arrival expected by the end of this month.

Improving demand for besan and dal Chana prices traded firm amid taking support from firm futures. Chana cash market in the central and North India moved up by 4.5% to 5350 from the previous 5120. Recovery in the cash market may continue in the coming weeks. Supply side seems getting tight as stockists have restricted sale sensing uptrend to continue. If Nafed increases its sale prices may soften, otherwise firm trend may continue. Govt has reduced production size from 126 to 119 lakh MT (Approx) in the 4th Adv Est. Agriwatch expects steady to slightly firm tone in the chana cash market.

Tur market traded up during last week and may improve slightly in the weeks ahead due to the low availability of stock at ports, the slower pace of import, restricted sale by stockists and mills fresh buying interest. It may move up by 200-300 to 6900-7000 in Gulbarga by the end of the month despite recovery in area coverage and the higher production estimate in the 4th Adv estimate. Crop condition is good and weather is congenial to the standing crop right now. Agriwatch has published its APY estimates of Tur for 2021-22 and has pegged production at 39.46 lakh MT. The higher production estimates would increase total supply at 50.80 lakh MT from earlier 49.64 lakh MT. As demand continues to improve, market is bound to move up.

Global Market Updates:

In Manitoba grasshopper population thrive in some area due to hot and dry conditions. It is an additional threat to the pulses production along with heat wave condition. Due to prolonged record breaking heat this summer has deteriorated crop growing conditions in Alberta. Alberta and Saskatchewan government doubled low yield appraisal threshold for farmers who salvage cereal/pulse crop as feed. Saskatchewan, Alberta and Manitoba are major lentil growing states in Canada.

The heat damage to crops is broader in Manitoba, Saskatchewan, Alberta. As middle of Jul U.S. Department of Agriculture rated subsoil moisture in the state as 80% short to very short. Lentil production in Canada may decrease by 50% from normal 24-25 LMT to 12-13 LMT this year. In Saskatchewan lentil crop condition was 18% good, 40% fair and 42% poor till last week. Crop is in pod filling stage and facing extreme moisture loss. The current quotes for lentil are at \$750. It may move up to \$800-850.

Australia's first crop production forecast for a current season for five major pulses including chickpeas, fieldpeas and lentils released by Pulse Australia (PA), it is 2.28 Mt which is 23% below the 2.96 Mt produced last year. Chickpea area is forecast to increase by 11% to 5.65 lakh ha with production estimate 6.62 LMT. Forecasted area for peas is 2.38 lakh ha with production estimate of 2.7 LMT while forecasted area for lentils is 3.04 lakh ha with production estimate of 4.54 LMT. Australia's production is down this year on dry conditions.

Global field peas market traded firm on increasing fear of low production in the North America. Most of the producing region is facing dry and hot conditions, resulting in deteriorating crop ratings and accelerating plant development in parts of the growing area. Grain size may be small and the yield low. Export movement has slowed down. Buyers are in a wait and watch mood.

Chickpeas market too traded up due to doubt over yields and quality in Canada and the US. However, desi chickpeas traded low due to poor demand from Pakistan and the Asian countries. It has affected chickpeas value in Australia too. India is not taking interest to buy Chana as prices have come down here below minimum support price.

Area planted for all chickpeas for the 2021 crop year is estimated at 341,000 acres, up 26% from the previous year, according to the USDA's annual seeded area report. Area harvested is forecast at 334,600 acres, 27% above

2020. Small chickpea area planted is estimated at 67,000 acres, up 38% from 2020. Area harvested for small chickpeas is forecast at 65,600 acres, a 37% increase from 2020. Area planted for large chickpeas in 2021 is estimated at 274,000 acres, a 24% increase from the previous year. Large chickpeas area harvested is forecast at 269,000 acres, a 25% increase from 2020.

The seeded area under dry peas is expected to be slightly higher at 1750 thousand ha in 2021-22 against 1722 thousand ha last year in Canada. However, yield may decline from 2.73 to 2.57 t/ha this year due to average yield expectation owing to the expected uncondusive weather conditions. So, the production is forecast to decrease from 4594 to 4400 thousand tonnes this year. Total supply and the export figure too may decrease from 4927 to 4790 and 3800 to 3700 thousand tonnes respectively. However domestic use may increase from 827 to 840 thousand tonnes this year. The carryout to decrease from 300 to 250 thousand tonnes.

Lentils production in Canada is expected to decrease from 28.68 in 2020-21 to 2.7 MMT in 2021-22 due to slightly lower area & yield. Export too are expected to decrease by 2 lakh MT to 25 lakh MT in 2021-22. Total supply is expected to decrease from 31.82 to 29.25 lakh MT due to likely lower production in 2021-22. Against it domestic usage. However, domestic use would decrease from 3.27 to 2.75 lakh MT in 2021-22. So carryout stock would stay at same as last year at 1.5 MT. Average yearly price is expected to be in the range of \$ 585 per MT. For 2002-21 it is \$ 600 per MT.

Monthly Outlook: -Pulses are likely to trade steady to slightly firm in Aug.

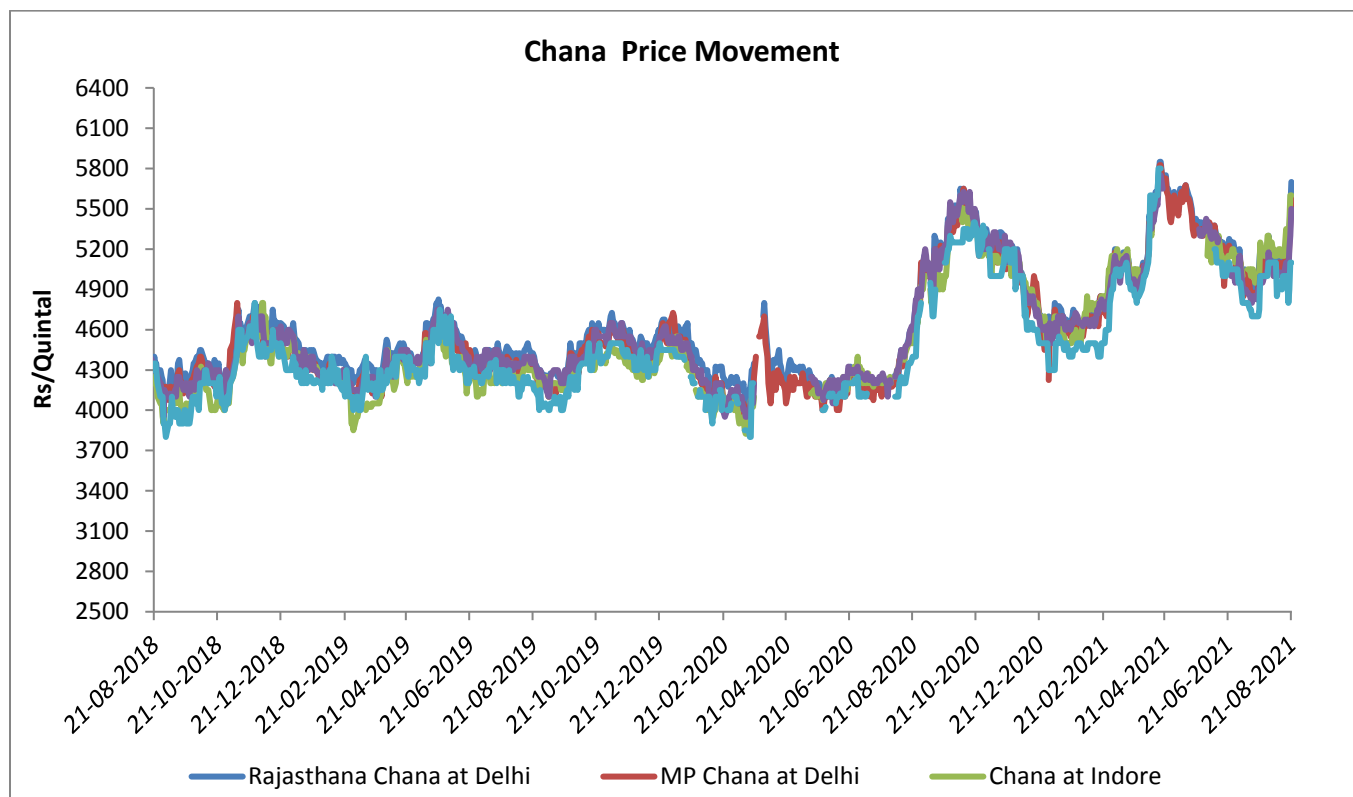

Pulses-Wise Scenario:

Chana

Current Scenario:

Chana cash market is likely to trade firm taking cue from firm futures, good demand for besan and firming up prices of other pulses. Nafed too is selling Chana at regular interval and is ensuring supply in the market. Festive demand would continue to lend support to chana cash market and it may move up to 5300-5400 in the near to medium term. After a down ward correction market has started improving again despite comfortable supply side. Chana price may recover by Rs200 and may cross 5400 by the end of the month.

Import flow would remain restricted as duty plus cess is 60%. Import flow may continue from the least developed countries as they enjoys benefit of zero duty. Following graph illustrates chana price movement in different markets:

Market Outlook:

Cash market traded firm on Monday after downward correction during last week. The overall sentiment remains firm.

Chana Weekly Technical Analysis:

Technical Commentary:

- Increasing price & OI hint firm sentiments in futures market in the near term.
- RSI is moving up in the neutral region, hints firm movement to continue
- Prices closed above 9 and 18 days EMAs.
- Candlestick chart hints firm momentum.

Strategy: Buy on dip

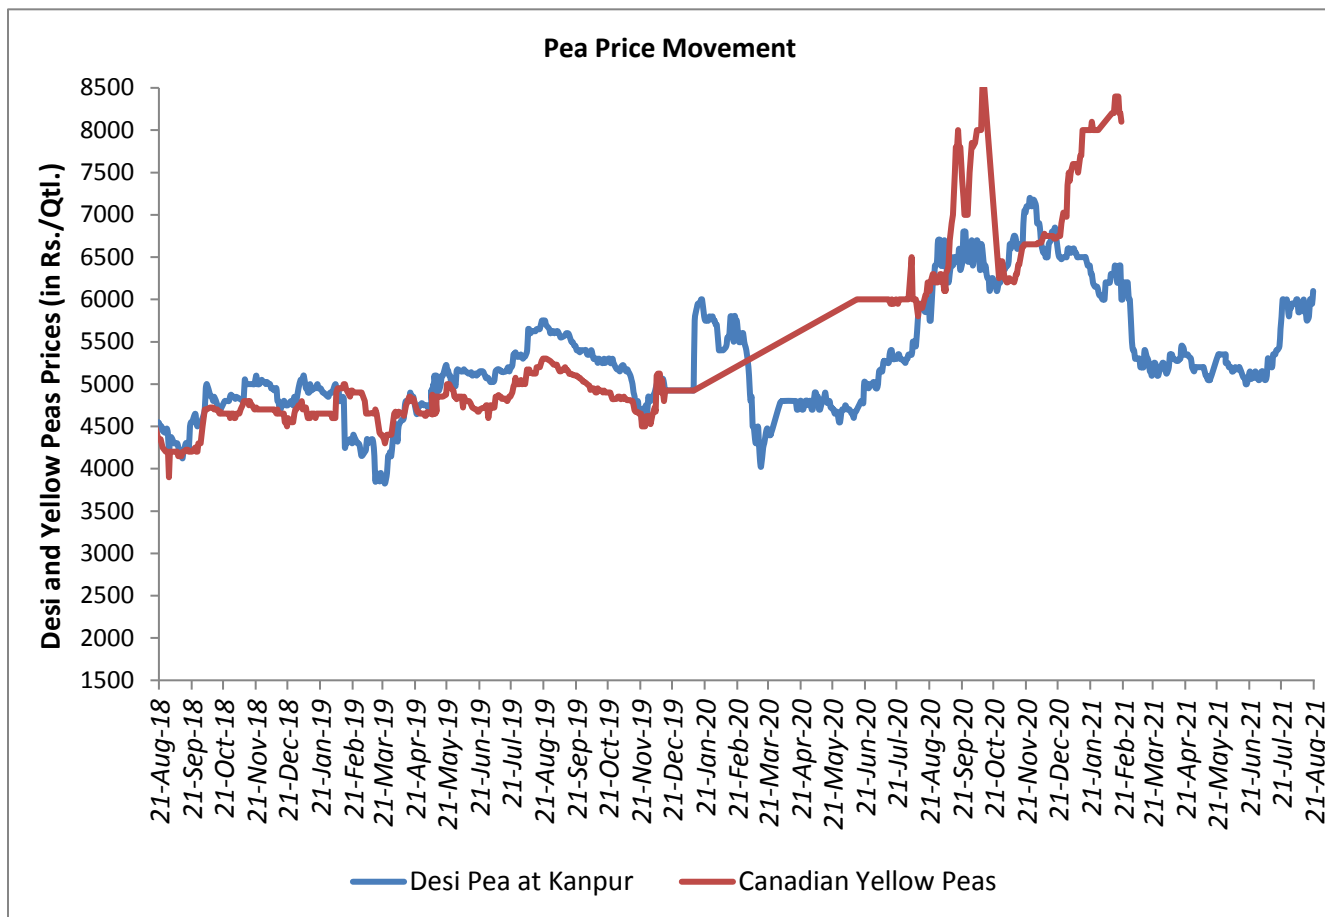

Supports & Resistances			S1	S2	PCP	R1	R2
Chana	NCDEX	Sep	5343	5296	5380	5405	5497
Weekly Trade Call*			Call	Entry	T1	T2	SL
Chana	NCDEX	Sep	Buy above	5347	5400	5425	5320

• Do not carry forward stock for next week.

Peas (Matar):
Market Recap:

Despite negligible stock at ports and weak demand for matar dal could not help market to stay steady last week. It decreased by 250 to 5750 from the previous week. As prices of other pulses have started moving up again, peas price may recover again. Harvesting has started in Canada and import is not possible due to the import restrictive policy by India. Govt is not going to allow peas import in the near to medium term.

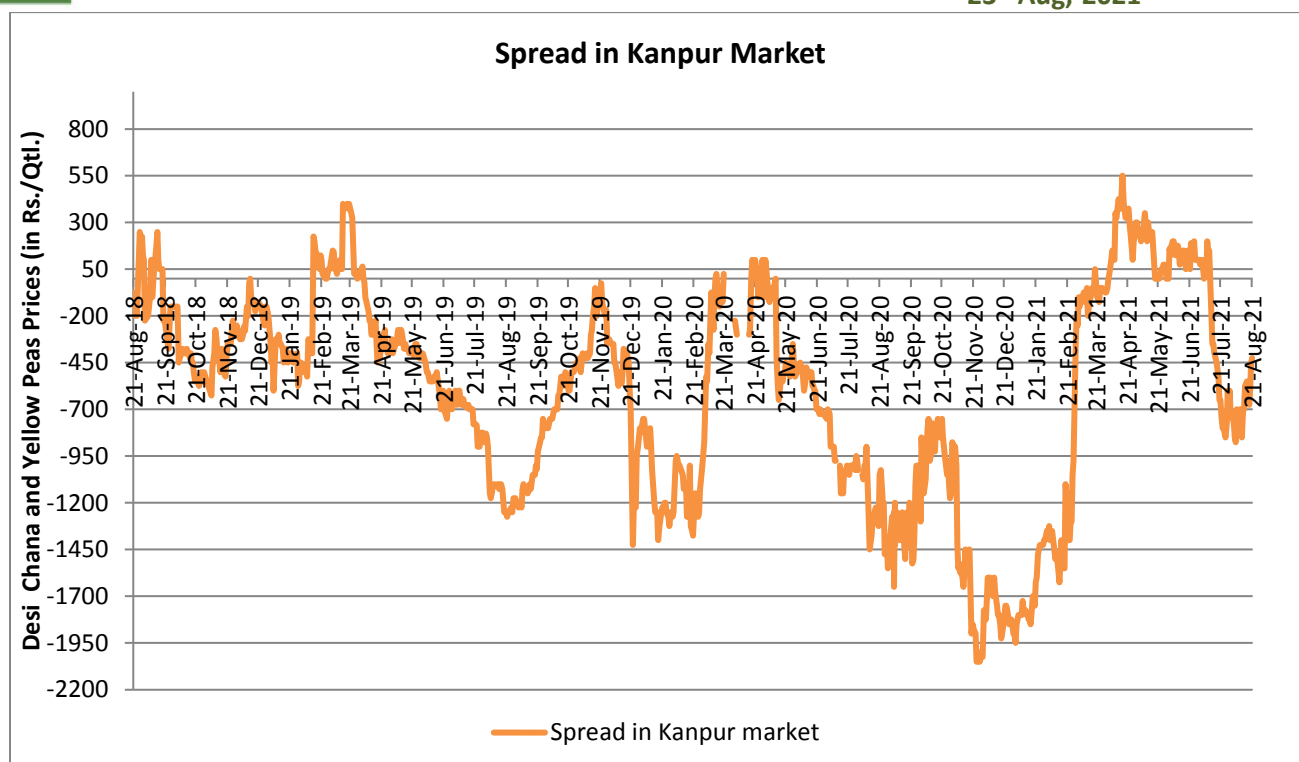

.Following chart shows price movement in various markets:

Current Market Dynamics & Outlook: Peas market traded down due to changed inner tone in pulses market. Despite supply constraints prices have decreased due to weak demand.. In Kanpur market it was quoted at Rs 5750 per qtl. Overall, all India average weekly price was down by Rs 250 to Rs 5700 per qtl. In Mumbai market, there was no quote for yellow peas as stock has been exhausted. There is no quotes for imported peas as availability is almost nil.

Spread With Chana:

Spread between Chana and Peas, at Kanpur market moved in negative zone. Gap has decreased slightly to Rs 550 now. Spread is expected to remain in the negative zone in Aug too on relative movement in Chana prices. Overall outlook seems steady to slightly firm in the near term.

Market Outlook For Aug: Steady to slightly firm movement is expected in Aug-2021.

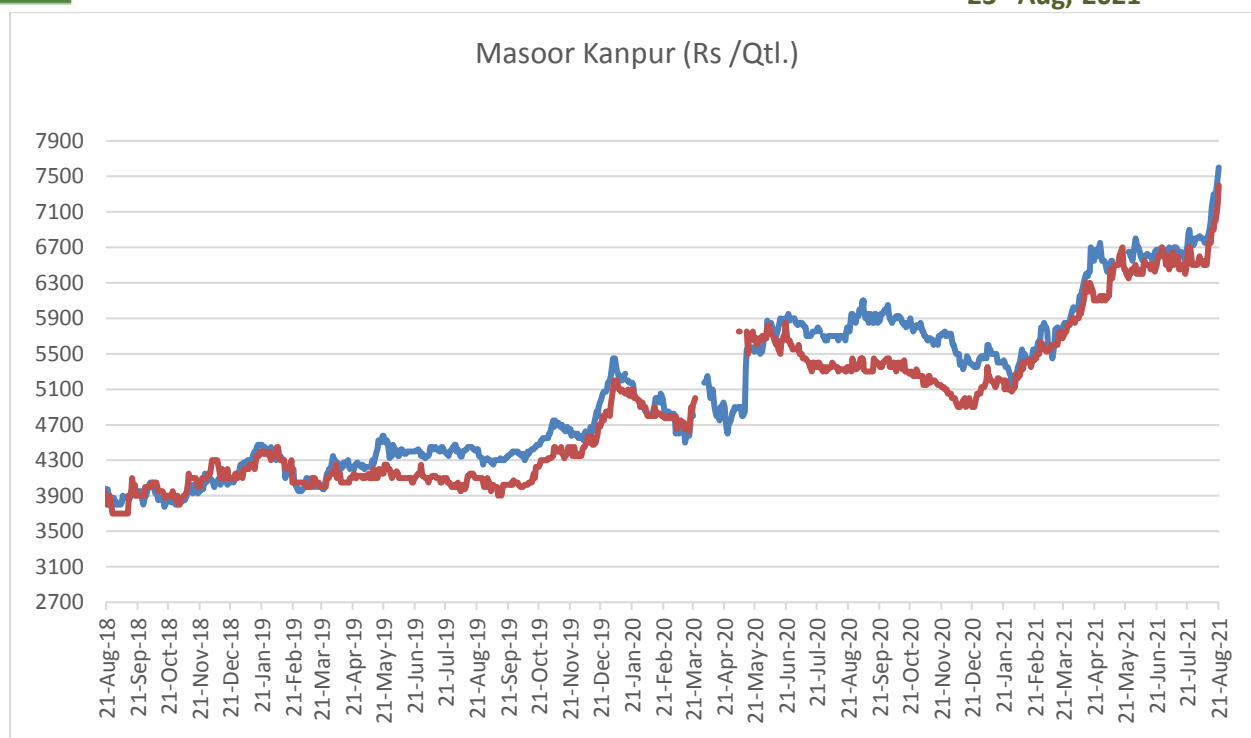

Lentils (Masoor):

Market Recap:

The cash Masur market traded firm at Rs 7500 -7600 in Kanpur market while imported stock traded at Rs 7300-7400 in Mumbai market. Demand is yet to increase. Govt has reduced the duty on Masur from 10% to 0 while cess has been reduced to 10 % now from 20% . This means now importers have to pay 10 % as cess. As crop size in Canada is small, import cost would continue to move up in the coming months Sep onward supply from Canada may start from the new crop. But it would not help market to decrease much as expected right now.

Current Scenario:

Market is bound to move up. Govt may try to increase supply through contracting deals to supply pulses. However, any immediate relief is unlikely at this point of time due to the low production size this year. Supply side is tight.

Red colour shows the imported Masur price

Market Outlook: Prices may trade steady to slightly firm.

Pigeon Pea (Tur/Toor):

Slight recovery might be seen in tur cash market as area loss is being reported from Maharashtra and Karnataka. Orisha, AP are lagging behind. So, good prospect for Tur production has turned into negative. If rains continues, situation may be deteriorate further. It may support Tur price in coming weeks. Tur in Gulberga market traded at Rs 6700 per qtl and may touch to Rs 6900-7000. In Mumbai it is being traded at 6425.

Current Market Dynamics & Outlook:

Lemon Tur is available at 6400-6425 at Mumbai port. Sowing has started but running with slow pace due to lack of rains in some regions and water-logging, flooding in other regions. The import flow is not expected to increase substantially even in Aug.

India imported 26380 MT in June. So far India has imported total 38000 MT from April to June-2021. In July import volume is expected to increase to 40,000 MT. Supply side is at comfortable level. So any spike in cash market is unlikely.

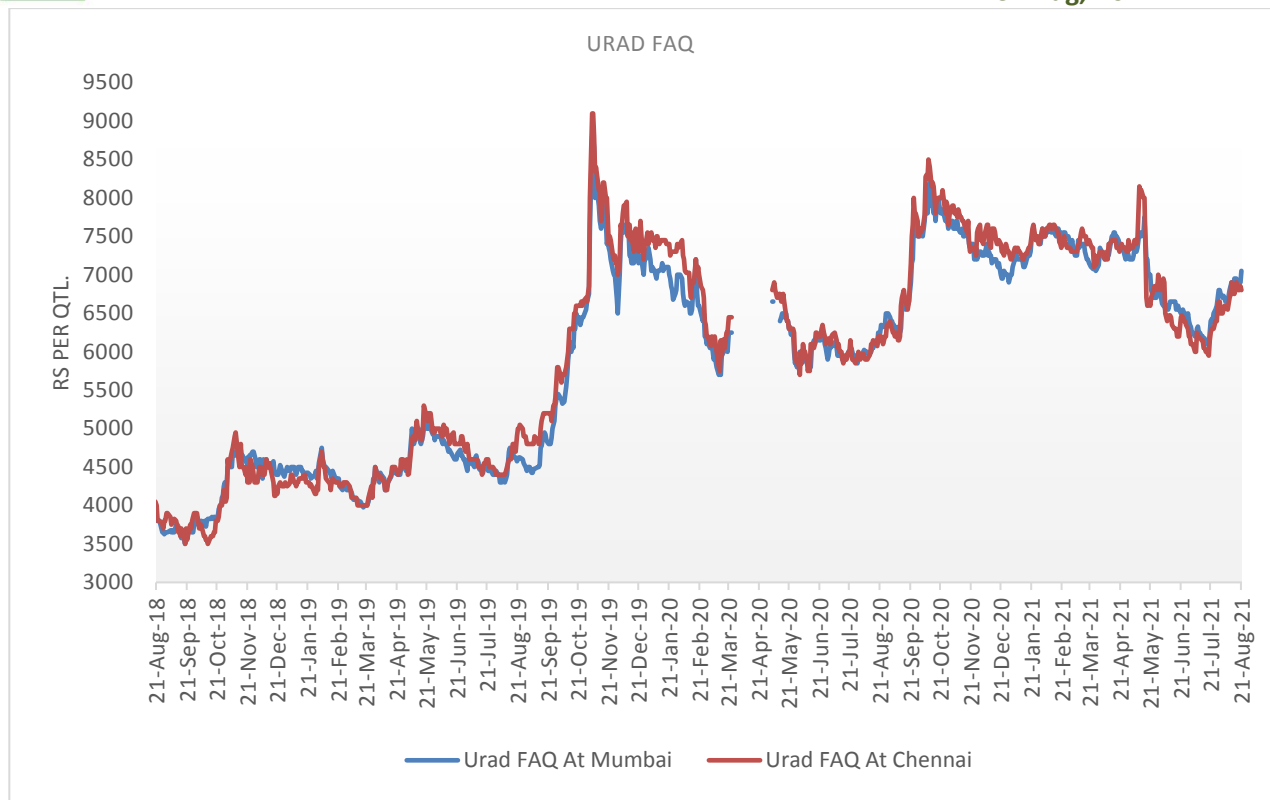

Black Matpe (Urad):

Imported Urad traded up by 300 to Rs 6900-6950 at Mumbai while the local crop in Tamil Nadu traded up too by Rs 150 to Rs 6600-6650. Price should improve as relaxation in stock limit has been given to stake holders. Crop loss too is lending support to the cash market. Stockists /millers may hold stock for longer time and it should push market up again to some extent. Myanmar is offering Urad FAQ at \$920 and SQ at \$1035. Demand is picking up.

Current Market Dynamics & Outlook:

Major Urad crop comes in kharif season. Farmers have covered only 35.52 lakh ha so far, down from 35.50 last year till date. As availability in Myanmar too is low and so any big decline is not expected before the new crop hits the market., India imported around 83000 MT urad in from April to June-2021. Import is free now, so when parity turns in favour of India, the volume of import may increase.

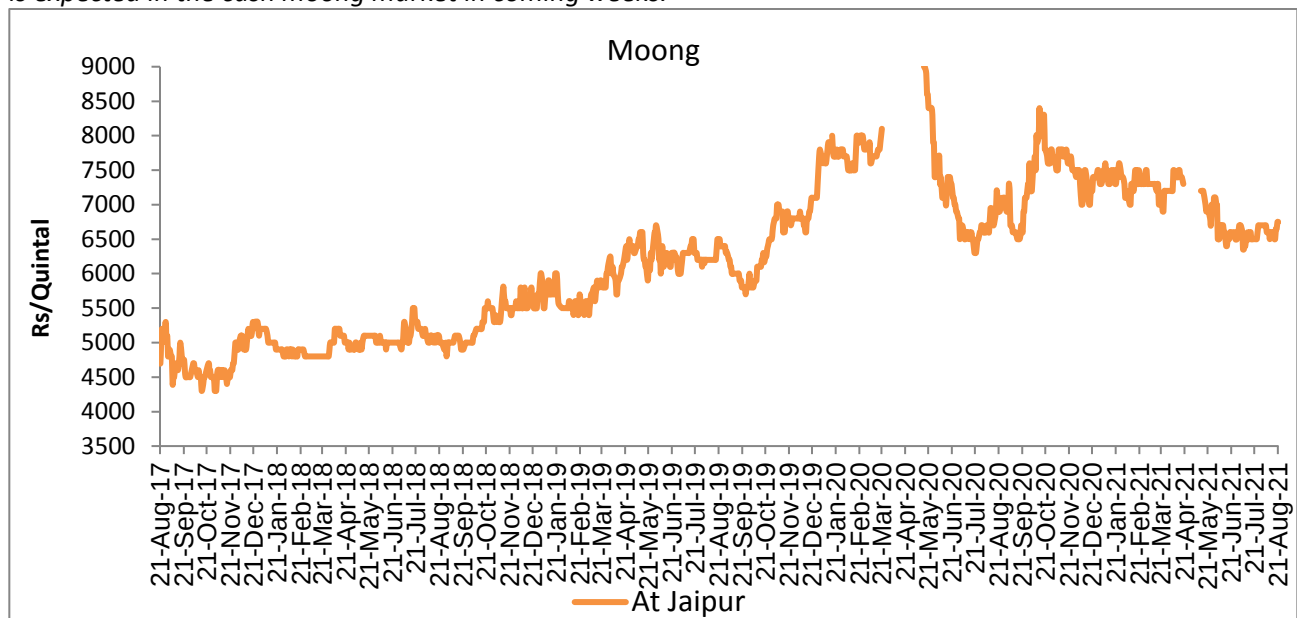

Market Outlook: Urad Prices are likely to show steady to slightly firm momentum this week.

Green Gram (Moong):

Market Recap:

Due to area loss in Karnataka and Mharashtra by flooding Moong may trade up in coming weeks. Import volume is low while demand is yet to improve. The production prospects have deteriorated. So, firm sentiment is expected in the cash moong market in coming weeks.

Market Outlook: Moong prices are likely to trade steady to firm in the near term.

Kharif Pulses Coverage Area Coverage As on 20th Aug-2021					
Crop	Season's Normal Area	% of normal for the whole season	Area sown in Lakh ha		% Change Over 2020
			2021	2020
