Commodity-wise Domestic, International Prices and Arrivals at Different Centers

Pulses Sector- Domestic Highlights:

All India Kharif pulses sown area continued to recover as expected and was up by 1.94 % to 139.64 lakh ha against 136.98 lakh ha last year as on 10th Sep-2021. Arhar area is up by 3.88 % to 49.84 lakh ha so far while Moong bean is slightly down by 0.31 % to 35.10 lakh ha. Urad bean area recovered slowly and is slightly up by 1.49 % to 38.89 lakh ha against 38.32 lakh ha last year till date. Despite higher production forecast in the 4th Adv Est., prices of Urad, Tur, Lentils and Moong continued to rule at higher level. As arrival of Urad, Moong have started increasing prices are expected to soften. Even Masur, Tur & Chana have either steady or slightly traded down due to steady demand. Quotes in Myanmar too have soften for Tur Urad & Moong while Quotes in global Canadian Masur market stayed steady at \$1110 while Australian quotes too stayed steady at \$1060-1070 per MT.

Lentils cash market stayed steady at 7900 in Kanpur market while imported Lentil in Mumbai decreased slightly to 7550 from the previous week 7650. Demand has weakened at the prevailing prices in the local markets. If prices continued to trade firm, consumers of Masur dal may shift to Tur dal and it may cap uptrend in Masur dal market despite lower availability and import flow in the global market. Production in Canada is expected at around 18.85 lakh MT this year against 28.68 lakh MT last year, as per the latest release by Agriculture & Agri-Food Canada. Australian (Nugget) red lentils is available at cheaper price, but may move up in tandem with Canadian prices. With last year carryout of 4 lakh MT, Canada would not be able to export 20 lakh MT this year against 24 lakh Mt last year. Supply side would remain tight in global market and so prices would remain at higher level. Around 2 lakh MT imported Masur is available at Indian ports, including Mundra right now. Demand for Masur dal may squeeze in India and the consumer may shift to Chana and Tur dal in coming month.

Kharif Moong sowing is almost over now and area seems similar at last year. The major concern for the Moong and Urad crop is rains during harvesting stage. It has already slowed down harvesting process in Rajasthan, Maharashtra, Madhya Pradesh and Gujarat. If it continues, quality issue would surface. Arrival is low due to recent rains and it may slow down for another week. As of now there is no reports of damage, infestation for the Moong crop. Rains volume in Sep. remains crucial for the moong crop. Indian farmers have covered 35.10 lakh ha against 35.21 lakh ha last year till 10th Sep-2021. Normal area under Kharif Moong is 33.48 lakh ha. Under normal condition 16 to 18 lakh MT crop is expected this year. Moong prices in Rajasthan moved up by 200 to 7000 in Jaipur market. It may decrease more as arrivals are expected to increase if weather opens up. Myanmar is offering Moong (Anna Seva) at \$860, Pokako at \$890 and Pedisheva at \$910. As availability is likely to increase, prices of Moong may Soften until procurement starts.

Urad area continued to recover during last four weeks and has crossed last year's level by 1.49% till 10th Sep-2021 to 38.89 lakh ha. Sowing is almost over now. Harvesting has started in Madhya Pradesh, Maharashtra, Gujarat and Rajasthan Yield is expected to be slightly lower than yearly average. As crop s matured now, rains in Rajasthan, Madhya Pradesh, Gujarat and Maharashtra may affect the standing crop and it may damage quality of the grain. As of now there is no report of any major losses except in Ashok Nagar region of M.P. due to Mosaic infestation. M.P. contributes 30-35 % in total kharif production. Overall crop size in M.P. may decrease by 3 to 5 %. Rains have been received in Sagar Panna, Vidisha, Tikamgarh, Ashoknagar, Damoh, Mandsor and Neemuch in M.P. and Kota, Baran, Bundi and Jhalawar in Rajasthan, the main growing belts. Next 15 to 20 days are very crucial for the standing Urad crop. Stakeholder needs to have a close eye on it. As arrivals are expected to increase, prices would soften in coming weeks. Prices of Urad increased by 4.24% to 7056 in Mumbai and Chennai combined. If

weather opens up price should soften in coming weeks. Import may continue as Myanmar has 1.5 lakh MT old stock. Myanmar is offering FAQ Urad at \$913 and SQ at \$1075.

As of now Tur crop is in good condition and the recent rains are considered to be beneficial to the standing crop. Area under tur has moved up to 49.84 lakh ha and may touch at 50 lakh ha. Under normal condition production may cross 40 lakh MT. demand is expected to increase as consumer may shift from Masur ,Urad to Tur & Chana. Indian consumers are price sensitive and their shifting may support Chana and Tur prices to some extent in coming weeks. Weather condition during Sep,Oct & Nov are crucial for the Tur crop. As of now supply and demand side seems balanced. Myanmar is offering Tur at \$867,down by \$13 basis Indian ports. At this price importers would not prefer to buy in bulk volume as the new crop is two and a half month away. Nafed too has stock (2.5 to 2.75 lakh MT) that can be released if prices starts to move up before new arrival starts. So steady to slightly firm tone might be seen in the coming weeks. Under prevailing condition no spike is expected. Price of Tur in Gulbarga market increased by 0.60 % to 6685.It may improve further as demand is likely to increase.

Chana cash market could not sustain its firm tempo and decreased by 0.40 % to 5402 on all India basis. Market may dip by Rs 100-200 more as demand is stable right now but is expected to improve from the second fortnight of Sep and by then it may start improving again. Nafed has stock and its continuous release at regular interval would not allow cash Chana market to move beyond a certain level. Supply side is ample and the fresh demand for besan and dal is awaited. If consumers of Masur and Urad dal move towards Chana & Tur dal, prices should recover by 200 to 300. Festive demand may restart again and it may support Chana to some extent. In Delhi market Chana traded down by Rs 100 to Rs 5475 while in Jaipur market it decreased by 100 to 5250.The overall tone remains firm.

Global Market Updates:

According to Agriculture and Agri Food Canada (AAFC) August report, the production of lentil is projected at 18.85 lakh tonnes for 2021-22. July production estimate was 27.50 lakh tonnes while last year's production was 28.68 lakh tonnes. Huge decline in lentil production due to weather and drought. The end stock for season 2021-22 is expected to be only 50,000 tonnes against 4 lakh tonnes last year. Market expects production of Canadian lentil not more than 15 lakh tonnes.

According Agriculture and Agri Food Canada (AAFC) August report, the production of Chickpea is projected at 0.87 lakh tonnes for 2021-22. July production estimate was 1.26 lakh tonnes while last year's production was 2.14 lakh tonnes. Decline in production is due to weather and drought.

In Manitoba grasshopper population thrive in some area due to hot and dry conditions. It is an additional threat to the pulses production along with heat wave condition. Due to prolonged record breaking heat this summer has deteriorated crop growing conditions in Alberta. Alberta and Saskatchewan government doubled low yield appraisal threshold for farmers who salvage cereal/pulse crop as feed. Saskatchewan, Alberta and Manitoba are major lentil growing states in Canada.

The heat damage to crops is broader in Manitoba, Saskatchewan, Alberta. As middle of Jul U.S. Department of Agriculture rated subsoil moisture in the state as 80% short to very short. Lentil production in Canada may decrease by 50% from normal 24-25 LMT to 12-13 LMT this year. In Saskatchewan lentil crop condition was 18% good, 40% fair and 42% poor till last week. Crop is in pod filling stage and facing extreme moisture loss. The current quotes for lentil are at \$750. It may move up to \$800-850.

Australia's first crop production forecast for a current season for five major pulses including chickpeas, fieldpeas and lentils released by Pulse Australia (PA), it is 2.28 Mt which is 23% below the 2.96 Mt produced last year. Chickpea area is forecast to increase by 11% to 5.65 lakh ha with production estimate 6.62 LMT. Forecasted area for peas is 2.38 lakh ha with production estimate of 2.7 LMT while forecasted area for lentils is 3.04 lakh ha with production estimate of 4.54 LMT. Australia's production is down this year on dry conditions.

Global field peas market traded firm on increasing fear of low production in the North America. Most of the producing region is facing dry and hot conditions, resulting in deteriorating crop ratings and accelerating plant development in parts of the growing area. Grain size may be small and the yield low. Export movement has slowed down. Buyers are in a wait and watch mood.

Chickpeas market too traded up due to doubt over yields and quality in Canada and the US. However, desi chickpeas traded low due to poor demand from Pakistan and the Asian countries. It has affected chickpeas value in Australia too. India is not taking interest to buy Chana as prices have come down here below minimum support price.

Area planted for all chickpeas for the 2021 crop year is estimated at 341,000 acres, up 26% from the previous year, according to the USDA's annual seeded area report. Area harvested is forecast at 334,600 acres, 27% above 2020. Small chickpea area planted is estimated at 67,000 acres, up 38% from 2020. Area harvested for small chickpeas is forecast at 65,600 acres, a 37% increase from 2020. Area planted for large chickpeas in 2021 is estimated at 274,000 acres, a 24% increase from the previous year. Large chickpeas area harvested is forecast at 269,000 acres, a 25% increase from 2020.

The seeded area under dry peas is expected to be slightly higher at 1750 thousand ha in 2021-22 against 1722 thousand ha last year in Canada. However, yield may decline from 2.73 to 2.57 t/ha this year due to average yield expectation owing to the expected un conducive weather conditions. So, the production is forecast to decrease from 4594 to 4400 thousand tonnes this year. Total supply and the export figure too may decrease from 4927 to 4790 and 3800 to 3700 thousand tonnes respectively. However domestic use may increase from 827 to 840 thousand tonnes this year. The carryout to decrease from 300 to 250 thousand tonnes.

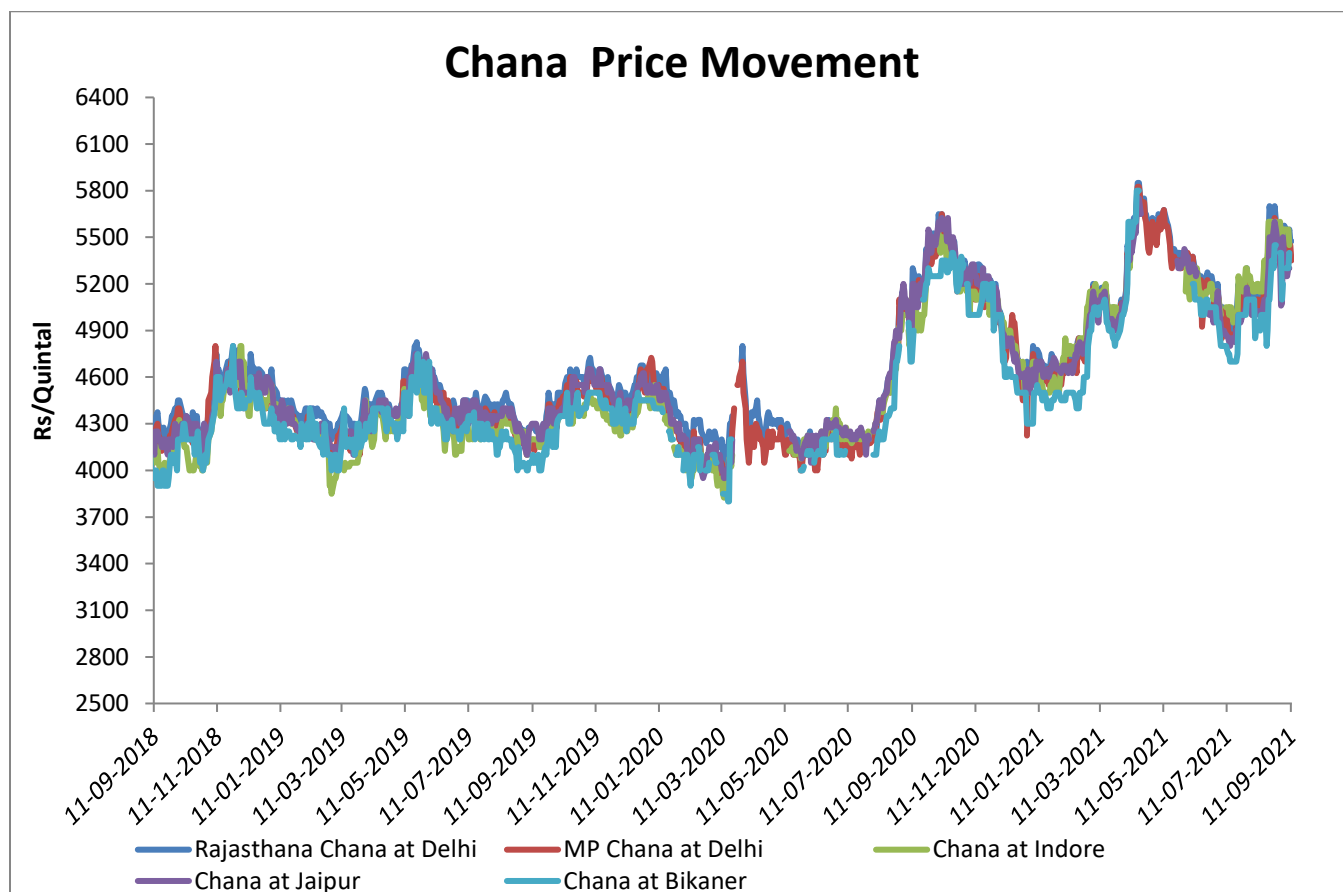

Lentils production in Canada is expected to decrease from 28.68 in 2020-21 to 2.7 MMT in 2021-22 due to slightly lower area & yield. Export too are expected to decrease by 2 lakh MT to 25 lakh MT in 2021-22. Total supply is expected to decrease from 31.82 to 29.25 lakh MT due to likely lower production in 2021-22. Against it domestic usage. However, domestic use would decrease from 3.27 to 2.75 lakh MT in 2021-22. So carryout stock would stay at same as last year at 1.5 MT. Average yearly price is expected to be in the range of \$ 585 per MT. For 2020-21 it is \$ 600 per MT.

Weekly Outlook: -Pulses are likely to trade steady to slightly firm in Sept.

Pulses-Wise Scenario:
Chana
Current Scenario:

Chana cash market is likely to recover once again with the help of emerging demand for the dal and besan in the festive season despite downward pressure seen in the review week. The current downward movement is a temporary phenomenon and will not last long. Mills may start buying in bulk volume again while stockists are unwilling to release stock at this point of time. Despite hope for recovery soon, Nafed will on the driving having ample stock to control the price. Release by Nafed is likely to continue and it would cap any spike in the cash market. With improvement in prices farmers too may start releasing stock as they would be in need of money for rabi sowing. Apart from this Chana from the south African countries would continue to enter into India. Supply side seems balanced right now. Chana price may recover by Rs.200 and may cross 5400 by the end of the month.

Import flow would remain restricted as duty plus cess is 60%. Import flow may continue from the least developed countries as they enjoy benefit of zero duty. Following graph illustrates chana price movement in different markets:

Chana Weekly Technical Analysis: September Expiry (NCDEX)

Technical Commentary:

- Decreasing price & decrease in OI indicate weak momentum in futures market.
- RSI is decreasing and indicates weak buying strength.
- Prices closed below 9 and 18 days EMAs, volume has gone down.
- Candlestick chart hints weak momentum.

Strategy: Sell on Rise

Supports & Resistances			S1	S2	PCP	R1	R2
Chana	NCDEX	Sep	5050	5000	5093	5200	5250
Weekly Trade Call*			Call	Entry	T1	T2	SL
Chana	NCDEX	Sep	Sell	5100	5030	5010	5135

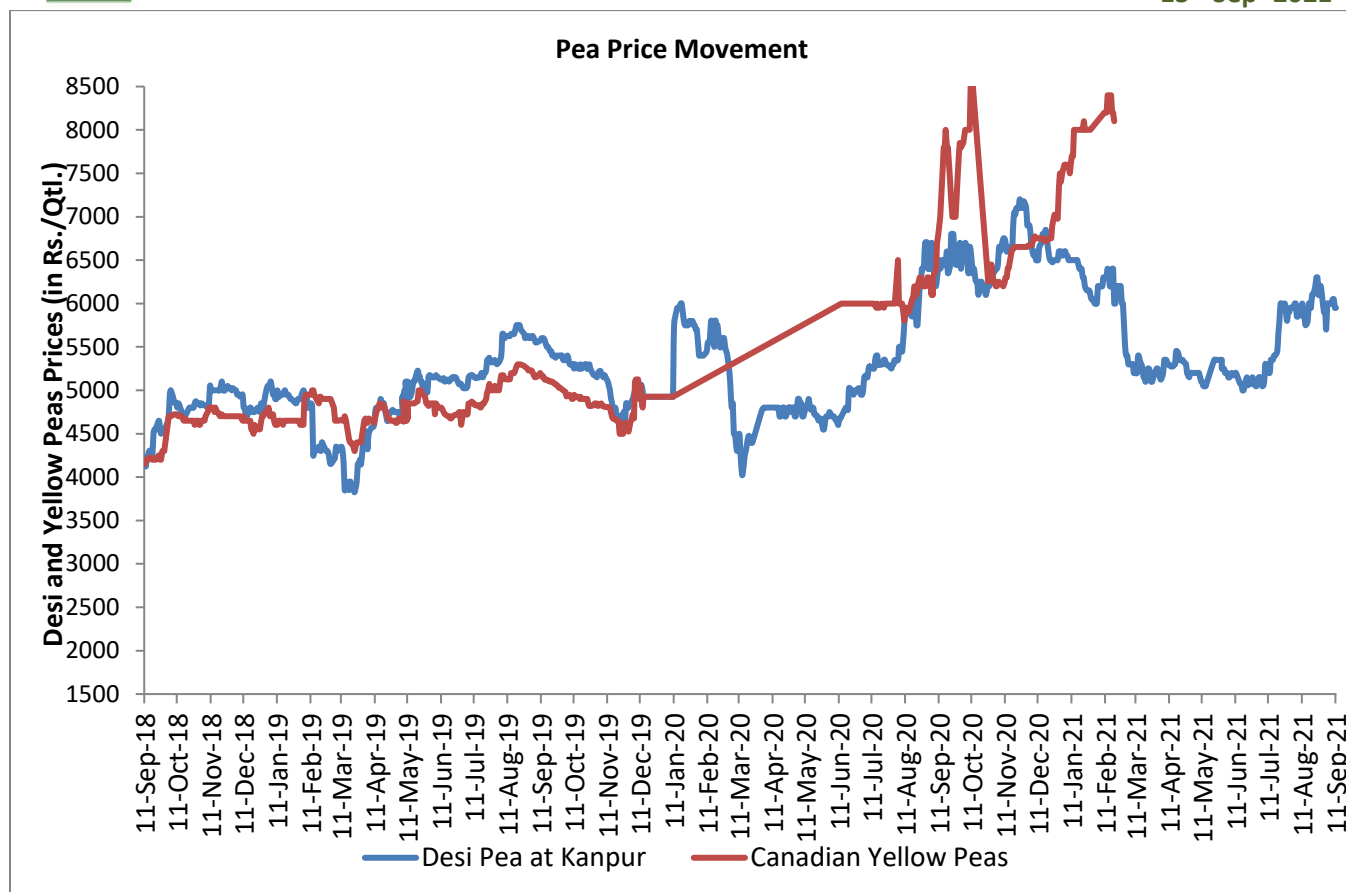

- Do not carry forward stock for next week.

Peas (Matar):

Market Recap:

After a declining trend peas cash market started recovering once again taking cue from the improved chana market in last few weeks. Prices have increased by Rs. 100 to 6000 from the previous week. As import is not allowed, stock in the domestic market is depleting fast. Stocks are either with stockists or with traders. Harvesting has started in Canada and import is not possible due to the import restrictive policy by India. Govt is not going to allow peas import in the near to medium term. Overall tone remains firm.

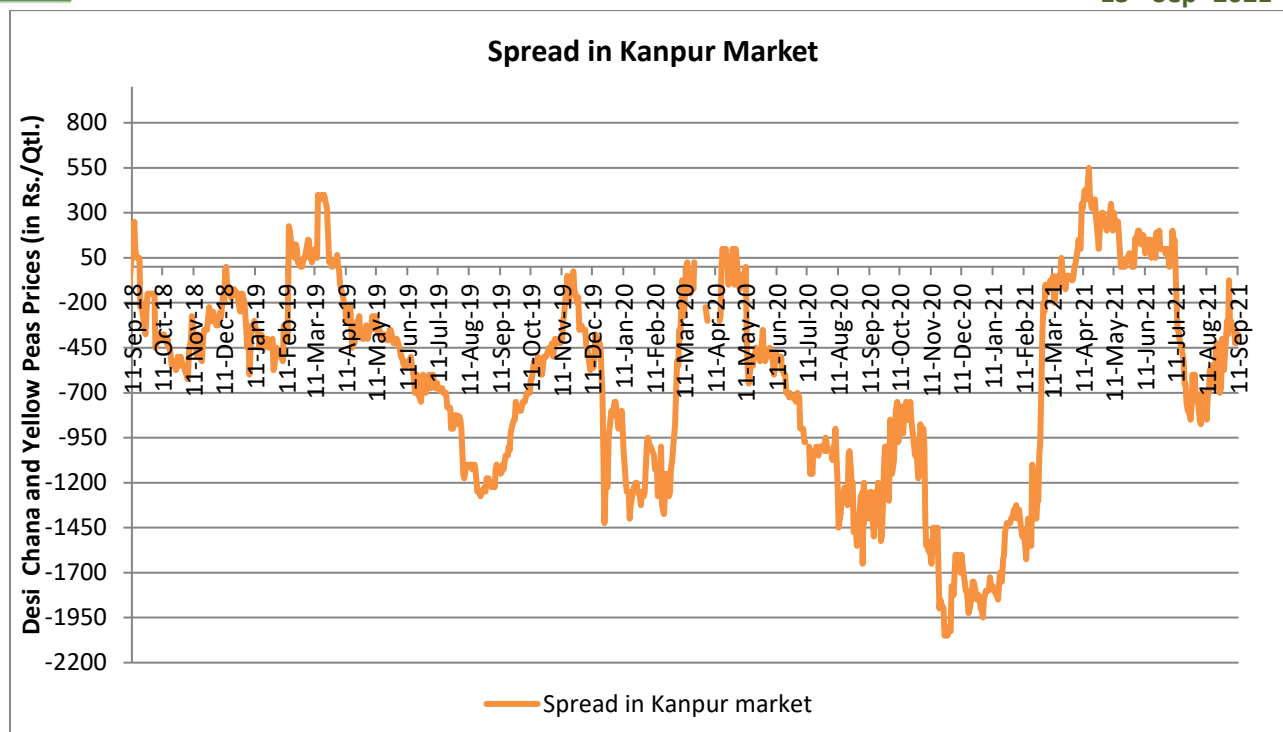

Following chart shows price movement in various markets:

Current Market Dynamics & Outlook: In Kanpur market peas was quoted at Rs 5950 per qtl on Saturday. Overall, all India average weekly price was up by Rs 100 to Rs 6000 per qtl. In Mumbai market, there was no quote for yellow peas as stock has been exhausted. There is no quotes for imported peas as availability is almost nil.

Spread With Chana:

Spread between Chana and Peas, at Kanpur market continued to remain in negative zone. Gap has decreased slightly to Rs 375 now. Spread is expected to remain in the negative zone in Sep too on relative movement in Chana prices. Overall outlook seems steady to slightly firm in the near term.

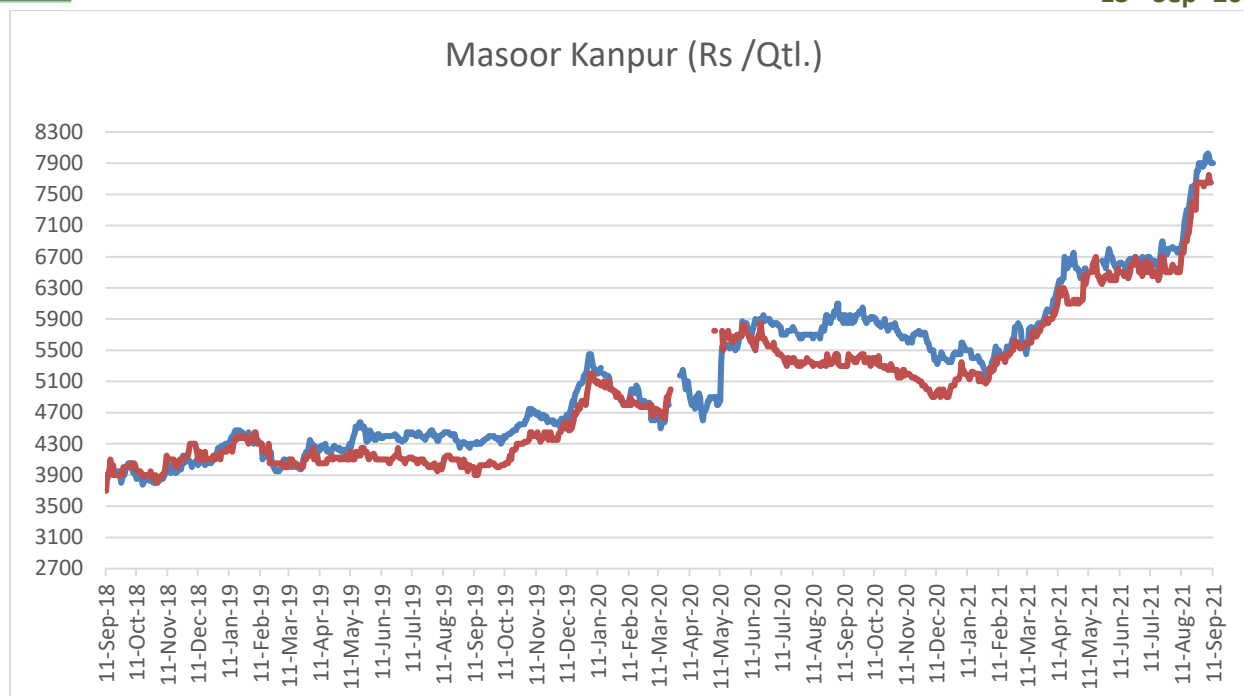

Lentils (Masoor):

Market Recap:

The cash Masur market traded down by 1.25 % at Rs 7900 in Kanpur market while imported stock traded at Rs 7550 in Mumbai market. Demand is yet to increase. Government has reduced the duty on Masur from 10% to 0 while cess has been reduced to 10 % now from 20 % . This means now importers have to pay 10 % as cess. As crop size in Canada is small, import cost would continue to move up in the coming months Sep onward supply from Canada may start from the new crop. But it would not help market to decrease much as expected right now.

Current Scenario:

Market is bound to move up. Govt may try to increase supply through contracting deals to supply pulses. However, any immediate relief is unlikely at this point of time due to the low production size this year in India. Supply side is tight.

Red colour shows the imported Masur price

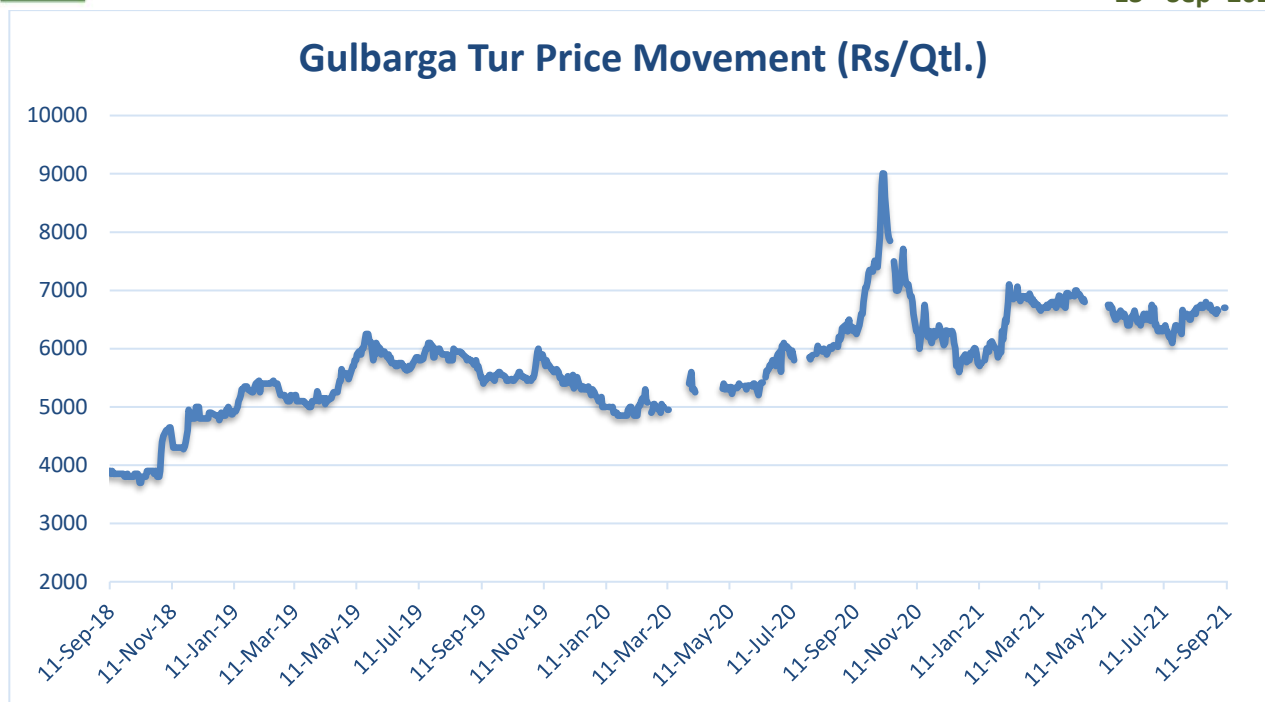

Market Outlook: Prices may trade steady to slightly firm.

Pigeon Pea (Tur/Toor):

Crop condition of Tur is normal to good so far and yield is expected to increase in major growing states. Tur price in Gulbarga market. Prices increased last week by 1.55 % to 6700. As supply side is balanced and demand is likely to improve, prices may recover again. Demand from mills have started improving and the new crop would hit the Indian markets in the end December. However, heavy rains in post monsoon season may damage crop as the september and October are the flowering time for Tur crop. Weather condition would remain crucial in Sep-Oct for Tur crop. Increased rains frequency in the fag end of the monsoon season may increase concern over the final size of the crop. If rains continues, situation may be deteriorat. It may support Tur price in coming weeks. Tur in Gulberga market traded at Rs 6650- 6700 per qtl and may touch to Rs 6900-7000. In Mumbai it is being traded at 6550.

Current Market Dynamics & Outlook:

Lemon Tur is available at Rs.6550/qtl at Mumbai port. The import flow is expected to increase in Sep as few importers who had purchased earlier may hit Indian port this month. India imported 37149.81 MT in July. So far India has imported total 82716.36 MT from April to July-2021. Supply side is at comfortable level. So any spike in cash market is unlikely.

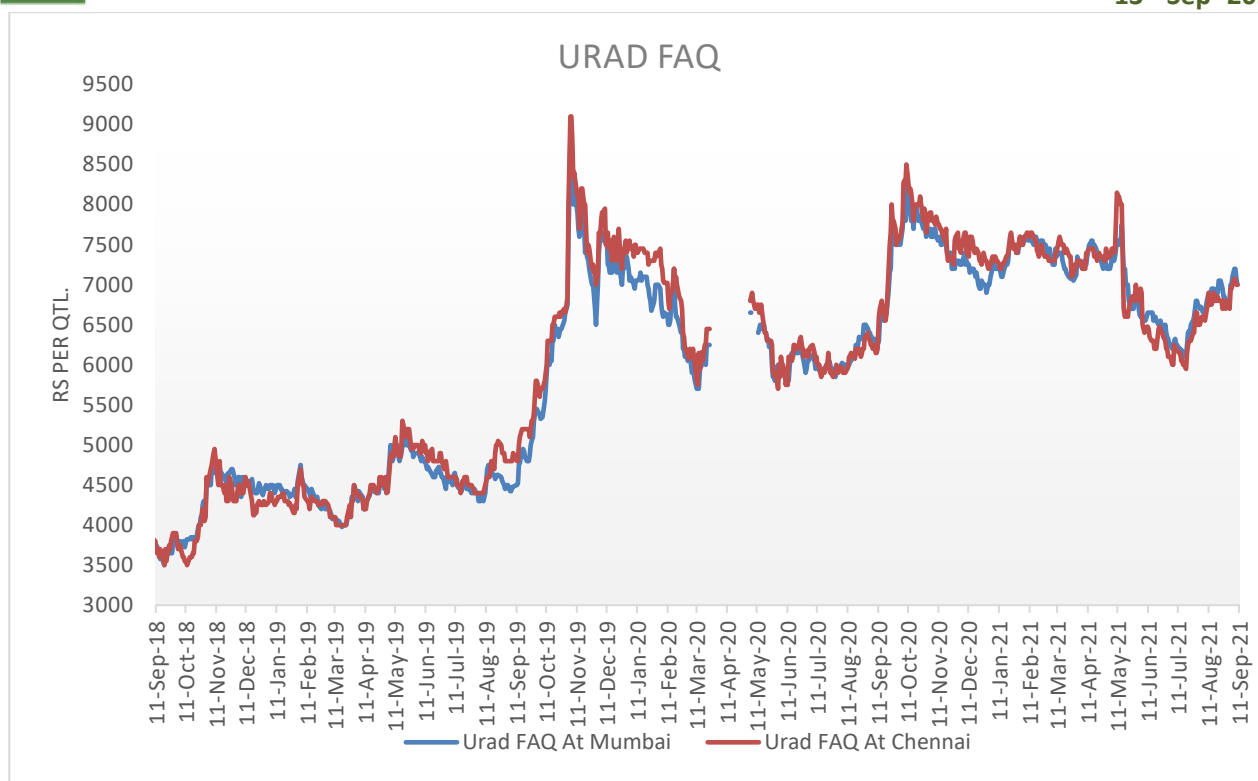

Black Matpe (Urad):

In Chennai and Mumbai market Urad prices were 100-150 to 7000-7050/qtl and 7000-7100/qtl. The uptrend is likely to continue as rains expected this week may damage standing crop ready to be harvested. The low stock at port and limited volume of import too is pushing prices up. As prices of Urad are already up and harvesting has commenced, so limited scope is for any spike at this level. Weather remains crucial and stakeholders need to have a close eye on weather condition in major growing belt. Some damage has already been reported from Kota, Baran and Ashok Nagar region. Imported Urad traded at Rs. 7000-7100 at Mumbai while the local crop in Tamil Nadu traded at Rs 7000-7050. Myanmar is offering Urad FAQ at \$913 and SQ at \$1075. Demand is picking up. India would import 2.5 lakh MT Urad from Myanmar as a MoU has been signed between the two govt for next five years starting from April-2021. Apart from this 1 lakh MT Tur too would be imported with similar condition that has been set for Malawi. It would ensure better supply side in the market.

Current Market Dynamics & Outlook:

Major Urad crop comes in kharif season. Farmers have covered 38.89 lakh ha so far slightly up from 38.32 lakh ha last year till date. As availability in Myanmar too is low and so any big decline is not expected before the new crop hits the market. The ongoing rains have potential to damage crop ready to be harvested. India imported around 1,46,339 MT urad in from April to July-2021. Import is free now, so when parity turns in favour of India, the volume of import may increase.

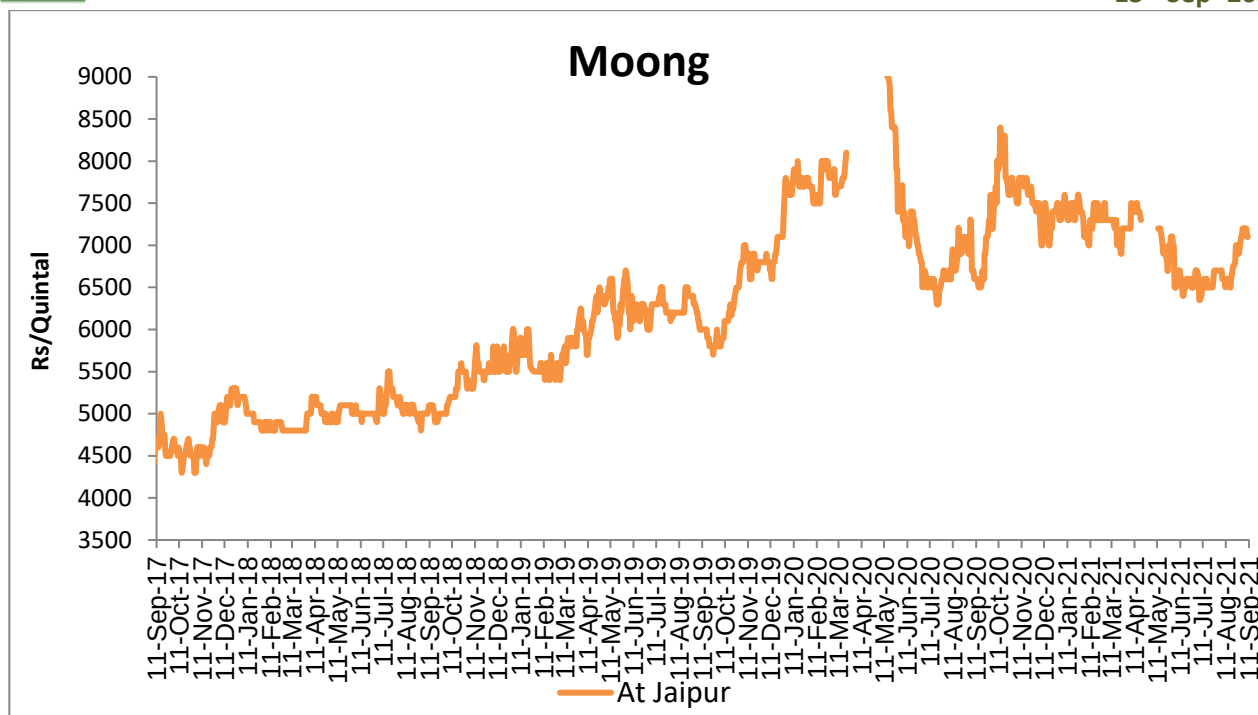

Market Outlook: Urad Prices are likely to show steady to slightly firm momentum this week.

Green Gram (Moong):

Market Recap:

Due to area loss in Karnataka and Maharashtra by flooding Moong may trade up in coming weeks. Import volume is low while demand is yet to improve. The production prospects have deteriorated. So, firm sentiment is expected in the cash moong market this week too.

Market Outlook: Moong prices are likely to trade steady to firm in the near term.
