Commodity-wise Domestic, International Prices and Arrivals at Different Centers

Pulses Sector- Domestic Highlights:

All India Kharif pulses sown area continued to recover as expected and was up by 2.05 % to 140.72 lakh ha against 137.89 lakh ha last year as on 17th Sep-2021. Arhar area is up by 3.82 % to 50.02 lakh ha so far while Moong bean is slightly down by 0.37 % to 35.25 lakh ha. Urad bean area recovered slowly and is slightly up by 2.02 % to 39.43 lakh ha against 38.65 lakh ha last year till date. Quotes in Myanmar too have soften for Tur Urad & Moong while Quotes in global Canadian Masur market stayed steady at \$1110-20 while Australian quotes increased by \$5 to \$1065-1077 per MT. Myanmar quotes for Urad, Tur & Moong declined slightly to \$930(FAQ) & \$1090(SQ) for Urad \$900 for Tur and \$900 to 930 per MT basis Indian ports.

Lentils cash market traded slightly down by 0.90 % to 7871 in Kanpur market during the week under review. Demand for Masoor dal got disrupted while importers at various ports are offering lentils at 7500-7550 against 7600-7650 during previous week. Two vessels having 30000-35000 MT are expected to hit Indian ports by the end of this month. Arrivals of other Kharif pulses like Moong and Urad are expected to increase. As Tur & Chana dal is available at competitive price, price sensitive consumers are shifting to a cheaper option. Apart from it importers may release stock faster than before as there is a feeling of uncertainty among trade community over govt's action. So lentil cash market may decrease by 100 more this week. Importers are active in Canada, Australia and enquiry from Russia too are being seen during last one week. Fundamentally, inner tone is strong but demand remains unsupportive to the cash market right now.

Kharif Moong sowing is almost over now and area seems similar at last year. The major concern for the Moong and Urad crop is rains during harvesting stage. Heavy rains in Uttar Pradesh during last two-three days have affected Urad and Moong crop and quality issue is bound to surface in Hamirpur, Kanpur and Hamirpur region. Around 5 to 10 % quality damage have been reported from M.P. & Maharashtra. With the ongoing showers of rains yield loss might be reported from Rajasthan. Arrival is low due to recent rains and it may slow down for another week. Rains volume in Sep. remains crucial for the moong crop. Indian farmers have covered 35.25 lakh ha against 35.38 lakh ha last year till 17th Sep-2021. Normal area under Kharif Moong is 33.48 lakh ha. Under normal condition 16 to 18 lakh MT crop is expected this year. Moong prices in Rajasthan moved down by 300 to 6700 in Jaipur market during the week under review.. It may decrease more as arrivals are expected to increase if weather opens up. Myanmar is offering Moong (Anna Seva) at \$860, Pokako at \$890 and Pedisheva at \$910. As availability is likely to increase, prices of Moong may Soften until procurement starts.

Urad area continued to recover and has crossed last year's level by 2.02 % till 17th Sep-2021 to 39.43 lakh ha. Sowing is almost over now. Harvesting has started in Madhya Pradesh, Maharashtra, Gujarat and Rajasthan. Yield is expected to be 2 to 4% lower than yearly average as per the initial report received from various markets. As crop is matured and passing through the harvesting stage, rains in Rajasthan, Madhya Pradesh, Gujarat, Uttar Pradesh and Maharashtra may affect its quality further. M.P. contributes 30-35 % in total kharif production. Overall crop size in M.P. may decrease by 3 to 5 %. Next 10 to 15 days are very crucial for the standing Urad crop. Stakeholder needs to have a close eye on it. As arrivals are expected to increase, prices would soften in coming weeks. Prices of Urad stayed slightly firm in Mumbai and steady in Chennai. If weather opens up price should soften in coming weeks. Import may continue as Myanmar has 1.25 lakh MT old stock. Myanmar is offering FAQ Urad at \$930 and SQ at \$1090. Overall tone seems weak.

As of now weather remains favourable for Tur crop. Area under tur has moved up to 50.02 lakh ha and have touched at 50 lakh ha. as expected. Under normal condition production may cross 40 lakh MT. Demand is expected to increase as consumer may shift from Masur ,Urad to Tur & Chana. Indian consumers are price sensitive and their shifting may support Chana and Tur prices to some extent in coming weeks. Weather condition during Sep, Oct & Nov are crucial for the Tur crop. As of now supply and demand side seems balanced. Myanmar is offering Tur at \$900, up by \$23 from the previous week basis Indian ports. At this price importers would not prefer to buy in bulk volume as the new crop is two and a half month away. Nafed too has stock (2.5 to 2.75 lakh MT) that can be released if prices starts to move up before new arrival starts. So steady to slightly firm tone might be seen in the coming weeks. Under prevailing condition no spike is expected. Price of Tur in Gulbarga market increased by 0.50 % to 6600.

Chana cash market traded firm and increased by Rs 100 to 5500 in Delhi. Market may stay steady at the current level as demand is stable right now but is expected to improve soon. Nafed has stock and its continuous release at regular interval would not allow cash Chana market to move beyond a certain level. Supply side is ample and the fresh demand for besan and dal is awaited. If consumers of Masur and Urad dal move towards Chana & Tur dal, prices should recover by 200 to 300. Festive demand may restart again and it may support Chana to some extent. In Jaipur market it traded at Rs 5400. The overall tone remains firm in the medium term

Global Market Updates:

According to ABARES (Australian Bureau of Agricultural and Resource Economics and Sciences), Chickpea production in Australia is estimated to be 8,44,000 tonnes in 2021-22 according to September update. Last year's production was 7,33,000 tonnes while June 2021-22 estimate was 7,33,000 tonnes. Lentil's production in Australia is projected to be 6,39,000 tonnes against last years production of 6,34,000 tonnes while June 2021-22 estimate was 5,89,000 tonnes.

According to September update, US lentil Production is estimated to be 0.57 LMT in 2021 against 3.36 LMT in 2020 which is 83% reduction and US Chickpea production is projected at 0.77 LMT in 2021 against 1.97 LMT in 2020 which is 60% reduction. The production is less due to drought condition prevailing in US.

According to Agriculture and Agri Food Canada (AAFC) August report, the production of lentil is projected at 18.85 lakh tonnes for 2021-22. July production estimate was 27.50 lakh tonnes while last year's production was 28.68 lakh tonnes. Huge decline in lentil production due to weather and drought. The end stock for season 2021-22 is expected to be only 50,000 tonnes against 4 lakh tonnes last year. Market expects production of Canadian lentil not more than 15 lakh tonnes.

According Agriculture and Agri Food Canada (AAFC) August report, the production of Chickpea is projected at 0.87 lakh tonnes for 2021-22. July production estimate was 1.26 lakh tonnes while last year's production was 2.14 lakh tonnes. Decline in production is due to weather and drought.

In Manitoba grasshopper population thrive in some area due to hot and dry conditions. It is an additional threat to the pulses production along with heat wave condition. Due to prolonged record breaking heat this summer has deteriorated crop growing conditions in Alberta. Alberta and Saskatchewan government doubled low yield appraisal threshold for farmers who salvage cereal/pulse crop as feed. Saskatchewan, Alberta and Manitoba are major lentil growing states in Canada.

The heat damage to crops is broader in Manitoba, Saskatchewan, Alberta. As middle of Jul U.S. Department of Agriculture rated subsoil moisture in the state as 80% short to very short. Lentil production in Canada may decrease by 50% from normal 24-25 LMT to 12-13 LMT this year. In Saskatchewan lentil crop condition was 18% good, 40% fair and 42% poor till last week. Crop is in pod filling stage and facing extreme moisture loss. The current quotes for lentil are at \$750. It may move up to \$800-850.

Australia's first crop production forecast for a current season for five major pulses including chickpeas, fieldpeas and lentils released by Pulse Australia (PA), it is 2.28 Mt which is 23% below the 2.96 Mt produced last year. Chickpea area is forecast to increase by 11% to 5.65 lakh ha with production estimate 6.62 LMT. Forecasted area for peas is 2.38 lakh ha with production estimate of 2.7 LMT while forecasted area for lentils is 3.04 lakh ha with production estimate of 4.54 LMT. Australia's production is down this year on dry conditions.

Global field peas market traded firm on increasing fear of low production in the North America. Most of the producing region is facing dry and hot conditions, resulting in deteriorating crop ratings and accelerating plant development in parts of the growing area. Grain size may be small and the yield low. Export movement has slowed down. Buyers are in a wait and watch mood.

Chickpeas market too traded up due to doubt over yields and quality in Canada and the US. However, desi chickpeas traded low due to poor demand from Pakistan and the Asian countries. It has affected chickpeas value in Australia too. India is not taking interest to buy Chana as prices have come down here below minimum support price.

Area planted for all chickpeas for the 2021 crop year is estimated at 341,000 acres, up 26% from the previous year, according to the USDA's annual seeded area report. Area harvested is forecast at 334,600 acres, 27% above 2020. Small chickpea area planted is estimated at 67,000 acres, up 38% from 2020. Area harvested for small chickpeas is forecast at 65,600 acres, a 37% increase from 2020. Area planted for large chickpeas in 2021 is estimated at 274,000 acres, a 24% increase from the previous year. Large chickpeas area harvested is forecast at 269,000 acres, a 25% increase from 2020.

The seeded area under dry peas is expected to be slightly higher at 1750 thousand ha in 2021-22 against 1722 thousand ha last year in Canada. However, yield may decline from 2.73 to 2.57 t/ha this year due to average yield expectation owing to the expected uncondusive weather conditions. So, the production is forecast to decrease from 4594 to 4400 thousand tonnes this year. Total supply and the export figure too may decrease from 4927 to 4790 and 3800 to 3700 thousand tonnes respectively. However domestic use may increase from 827 to 840 thousand tonnes this year. The carryout to decrease from 300 to 250 thousand tonnes.

Lentils production in Canada is expected to decrease from 28.68 in 2020-21 to 2.7 MMT in 2021-22 due to slightly lower area & yield. Export too are expected to decrease by 2 lakh MT to 25 lakh MT in 2021-22. Total supply is expected to decrease from 31.82 to 29.25 lakh MT due to likely lower production in 2021-22. Against it domestic usage. However, domestic use would decrease from 3.27 to 2.75 lakh MT in 2021-22. So carryout stock would stay at same as last year at 1.5 MT. Average yearly price is expected to be in the range of \$ 585 per MT. For 2002-21 it is \$ 600 per MT.

Weekly Outlook: -Pulses are likely to trade steady to slightly firm in Sept.

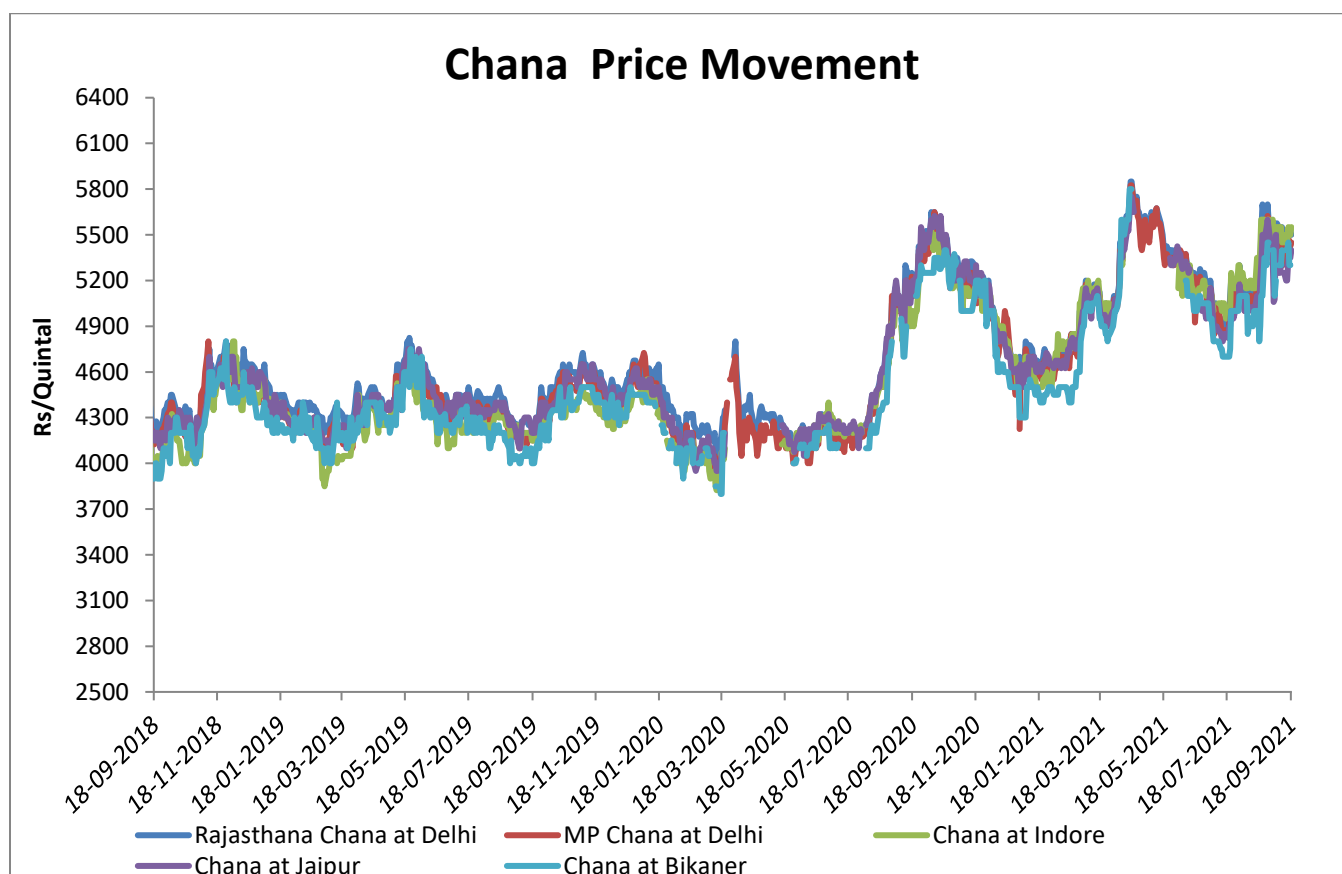

Pulses-Wise Scenario:

Chana

Current Scenario:

Chana cash market traded firm and increased by Rs. 100 to Rs. 5500 in Delhi market. Chana cash market is likely to recover once again with the help of emerging demand for the dal and besan in the festive season despite downward pressure seen in the review week. Mills may start buying in bulk volume again while stockists are unwilling to release stock at this point of time. Despite hope for recovery soon, Nafed will on the driving having ample stock to control the price. Release by nafed is likely to continue and it would cap any spike in the cash market. With improvement in prices farmers too may start releasing stock as they would be in need of money for rabi sowing. Apart from this Chana from the south African countries would continue to enter into India. Supply side seems balanced right now. If consumers of Masur and Urad dal move towards Chana & Tur dal, prices should recover by 200 to 300. The overall term remains firm for medium term.

Import flow would remain restricted as duty plus cess is 60%. Import flow may continue from the least developed countries as they enjoys benefit of zero duty. Following graph illustrates chana price movement in different markets:

Chana Weekly Technical Analysis: October Expiry (NCDEX)

Technical Commentary:

- Increasing price & steady moment in OI indicate firm momentum in futures market.
- RSI is steady and indicates steady buying strength.
- Prices closed below 9 and 18 days EMAs, volume has gone down.
- Candlestick chart hints firm momentum.

Strategy: Buy on Dip

Chana	NCDEX	Sep	Buy	5205	5275	5295	5170

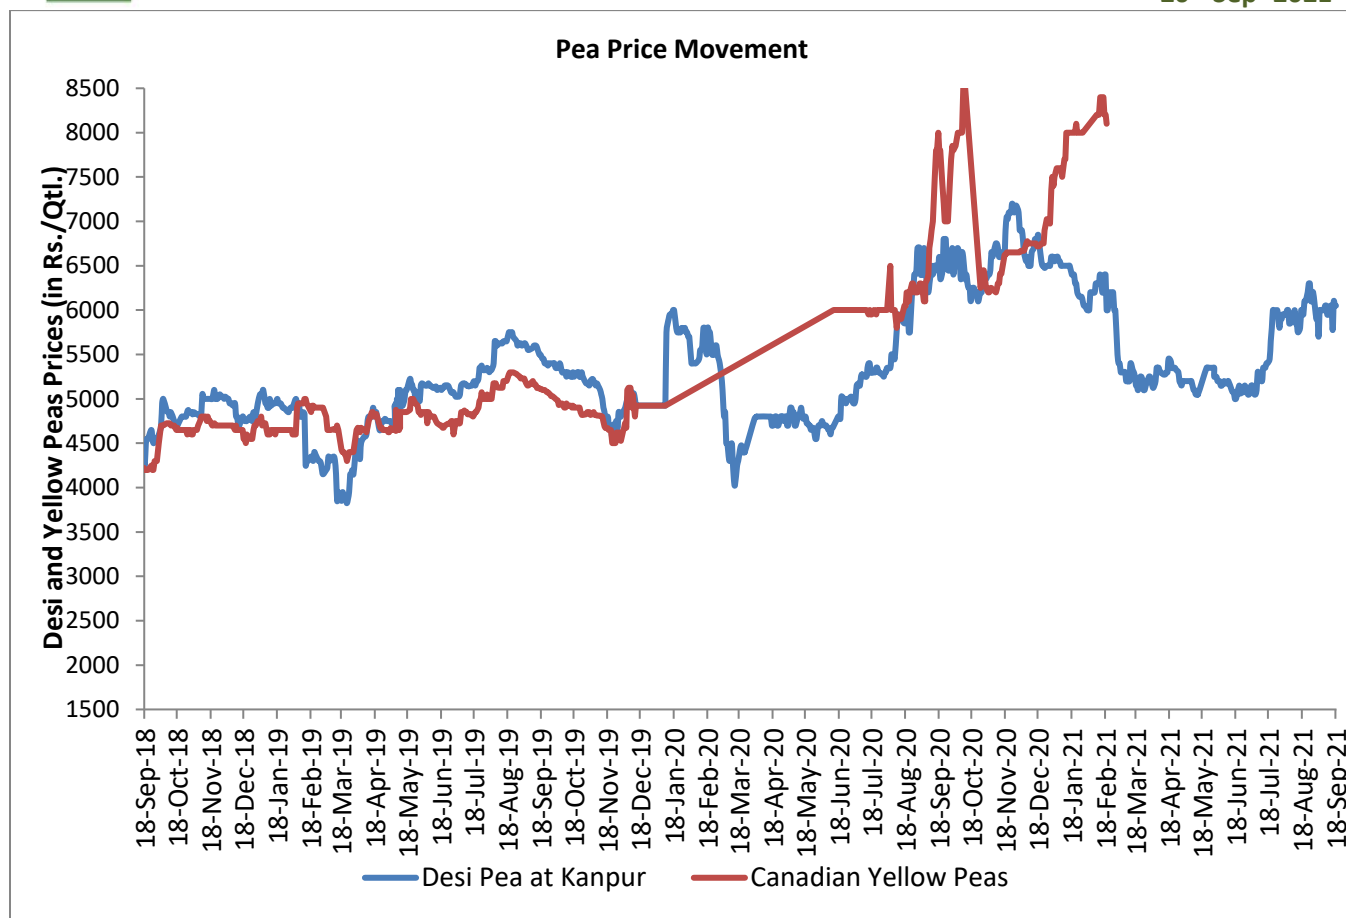

- Do not carry forward stock for next week.

Peas (Matar):

Market Recap:

After a declining trend peas cash market started recovering once again taking cue from the improved chana market in last few weeks. Prices have increased slightly to Rs. 6012 from the previous week. As import is not allowed, stock in the domestic market is depleting fast. Stocks are either with stockists or with traders. 98% of Harvesting has completed in Canada on 13th September but import is not possible due to the import restrictive policy by India. Govt is not going to allow peas import in the near to medium term. Overall tone remains firm.

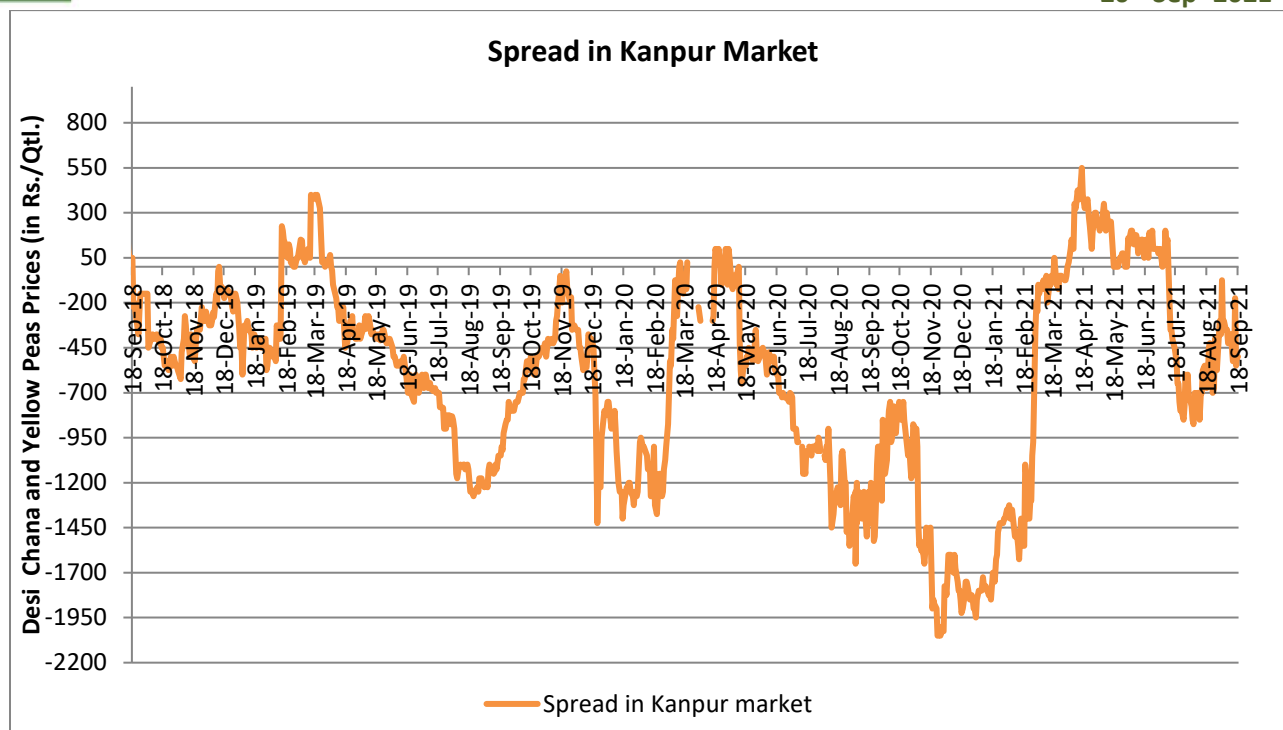

Following chart shows price movement in various markets:

Current Market Dynamics & Outlook: In Kanpur market peas was quoted at Rs 6050 per qtl on Saturday. Overall, all India average weekly price was up by Rs 100 to Rs 6000 per qtl. In Mumbai market, there was no quote for yellow peas as stock has been exhausted. There is no quotes for imported peas as availability is almost nil.

Spread With Chana:

Spread between Chana and Peas, at Kanpur market continued to remain in negative zone. Gap has increased slightly to Rs 500 as compared to previous week. Spread is expected to remain in the negative zone in coming week too on relative movement in Chana prices. Overall outlook seems steady to slightly firm in the near term.

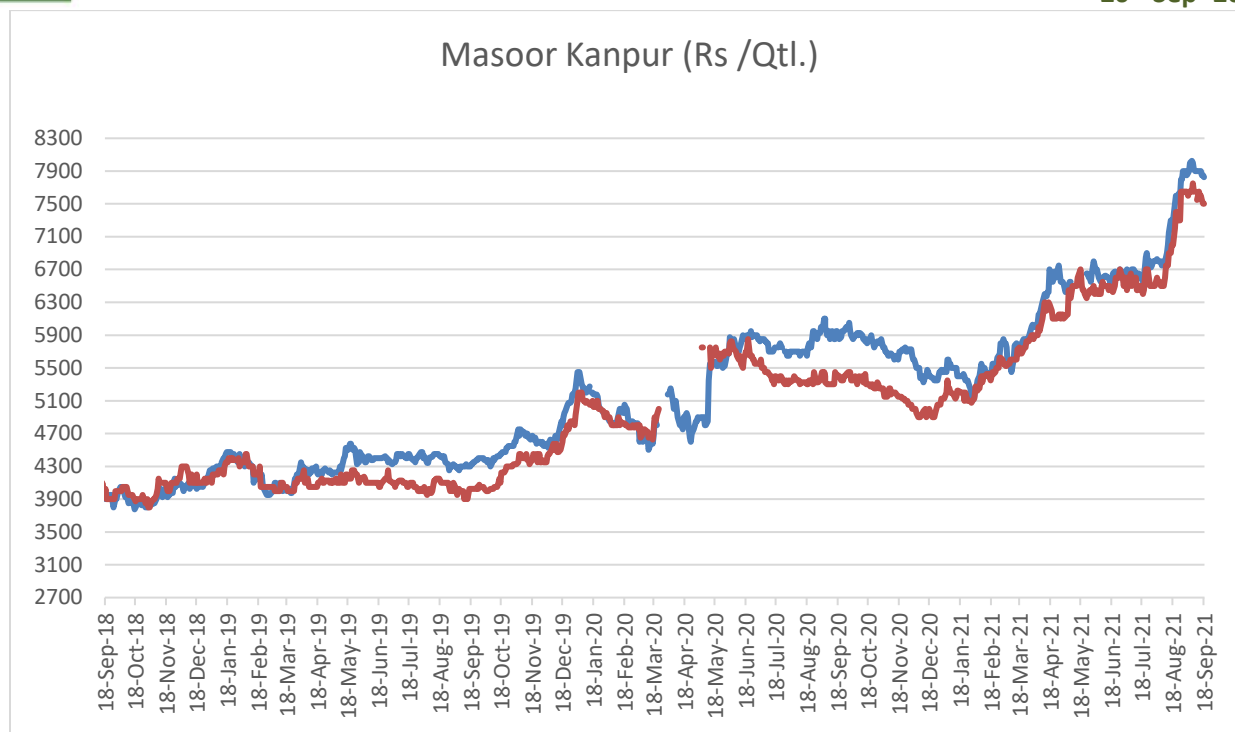

Lentils (Masoor):

Market Recap:

The cash Masur market traded down by 0.90 % at Rs 7871/qtl. in Kanpur market while imported stock traded at Rs 7500-7600/qtl in Mumbai market. Demand is yet to increase. The import duty on Lentils originating or exported from US has been increased from 20% to 30% with effect from 17th september 2021. However the basic custom duty for all other origins (including Australia,Canada) stays same at 10%. As crop size in Canada as well as US is small, import cost would continue to move up in the coming months. Sep onward supply from Canada may start from the new crop. As tur & Chana dal is available at competitive price, price sensitive consumers are shifting to a cheaper option. So lentil cash market may decrease by Rs. 100 more this week.

Current Scenario:

Market is bound to move down slightly. Govt may try to increase supply through contracting deals to supply pulses. Demand got disrupted for Masoor dal due to comparatively higher prices. Fundamentally, inner tone is strong but demand remains unsupportive to the cash market right now.

Red colour shows the imported Masur price

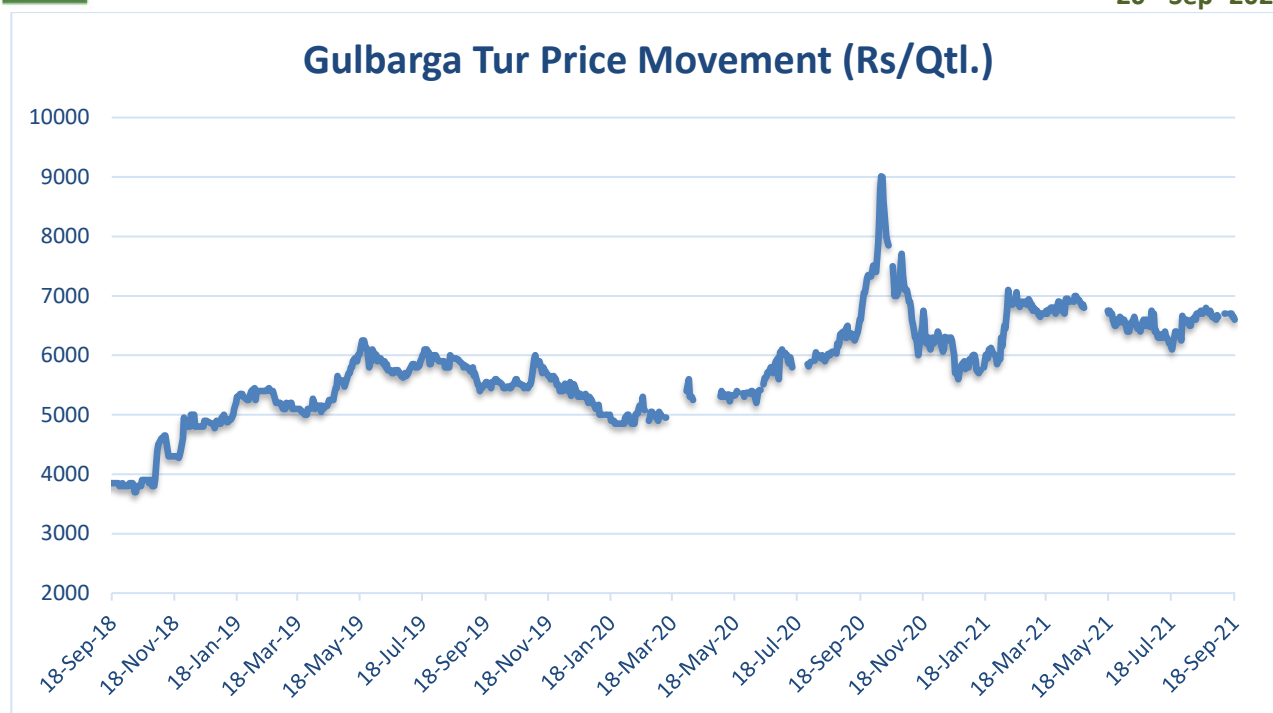

Market Outlook: Prices may trade steady to slightly firm.

Pigeon Pea (Tur/Toor):

Crop condition of Tur is normal to good so far and yield is expected to increase in major growing states. Rains at this time can trigger disease infestation in Tur crop. Tur prices in Gulbarga market increased last week by 0.50 % to 6600. As supply side is balanced and demand is likely to improve, prices may improve again. Demand from mills have started improving. If weather conditions favour then Tur crop arrival will start from mid November in Karnataka however pick arrivals will be seen in December onwards. Weather condition would remain crucial in Sep-Oct for Tur crop. Increased rains frequency in the Sep end of the monsoon season may increase concern over the final size of the crop. Rains in Sep-Oct may support Tur price in coming weeks. Tur in Gulbarga market traded at Rs 6600- 6700 per qtl. In Mumbai market Burmese Tur lemon is traded at Rs 6450 – 6500/qtl.

Current Market Dynamics & Outlook:

Lemon Tur is available at Rs.6450-6500/qtl at Mumbai port. The import flow is expected to increase in Sep as few importers who had purchased earlier may hit Indian port this month. India imported 37149.81 MT in July. So far India has imported total 82716.36 MT from April to July-2021. Supply side is at comfortable level. So any spike in cash market is unlikely.

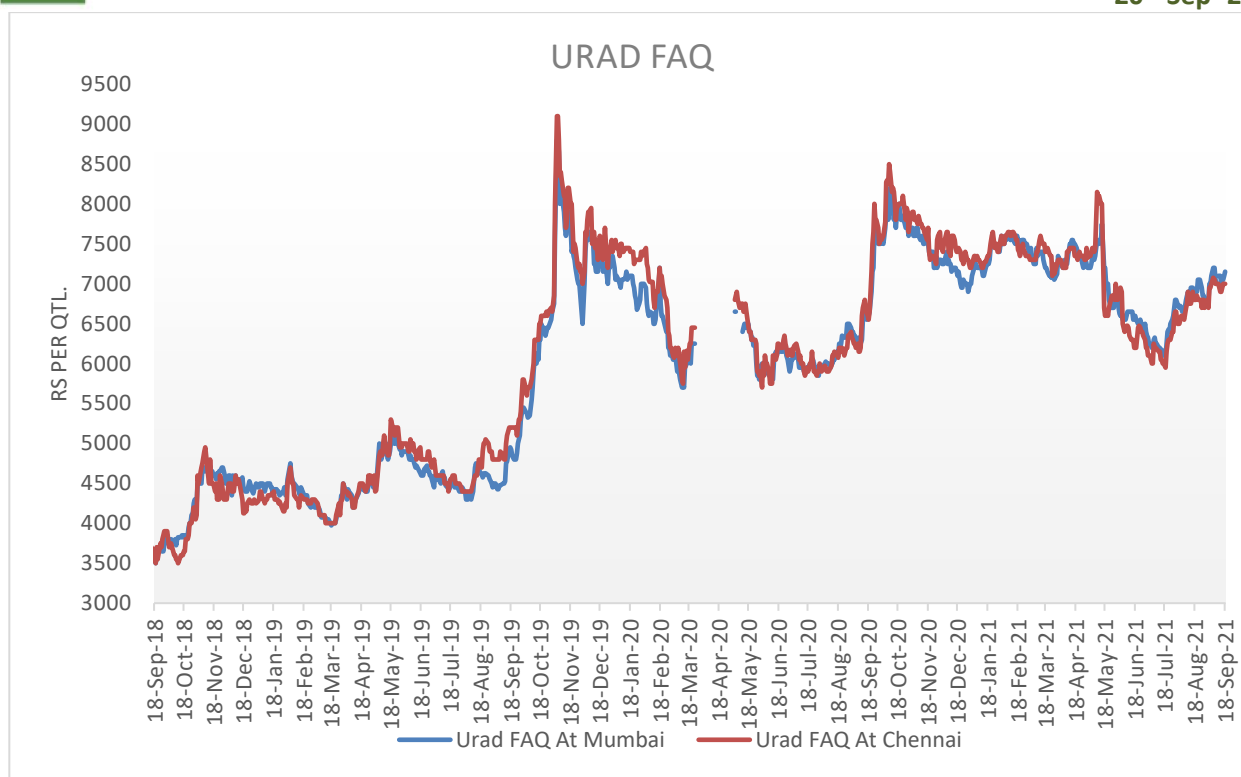

Black Matpe (Urad):

In Chennai and Mumbai market Urad prices were to Rs. 6900-7000/qtl and 7000-7150/qtl in review week. The uptrend is likely to continue as rains expected this week may damage standing crop ready to be harvested season. Sowing is almost over and harvesting has started in Madhya Pradesh, Maharashtra, Gujarat and Rajasthan. The low stock at port and limited volume of import too is pushing prices up. As prices of Urad are already up and harvesting has commenced, so limited scope is for any spike at this level. Weather remains crucial and stakeholders need to have a close eye on weather condition in major growing belt. Some damage has already been reported from Kota, Baran and Ashok Nagar region. Imported Urad traded at Rs. 7000-7150 at Mumbai while the local crop in Tamil Nadu traded at Rs 6900-7000. Myanmar is offering Urad FAQ at \$930 and SQ at \$1090. Demand is picking up. India would import 2.5 lakh MT Urad from Myanmar as a MoU has been signed between the two govt for next five years starting from April-2021. Apart from this 1 lakh MT Tur too would be imported with similar condition that has been set for Malawi. It would ensure better supply side in the market.

Current Market Dynamics & Outlook:

Major Urad crop comes in kharif season. Farmers have covered 39.43 lakh ha so far slightly up from 38.65 lakh ha last year till date. As availability in Myanmar too is low and so any big decline is not expected before the new crop hits the market. The ongoing rains have potential to damage crop ready to be harvested. India imported around 1,46,339 MT urad in from April to July-2021. Import is free now, so when parity turns in favour of India, the volume of import may increase.

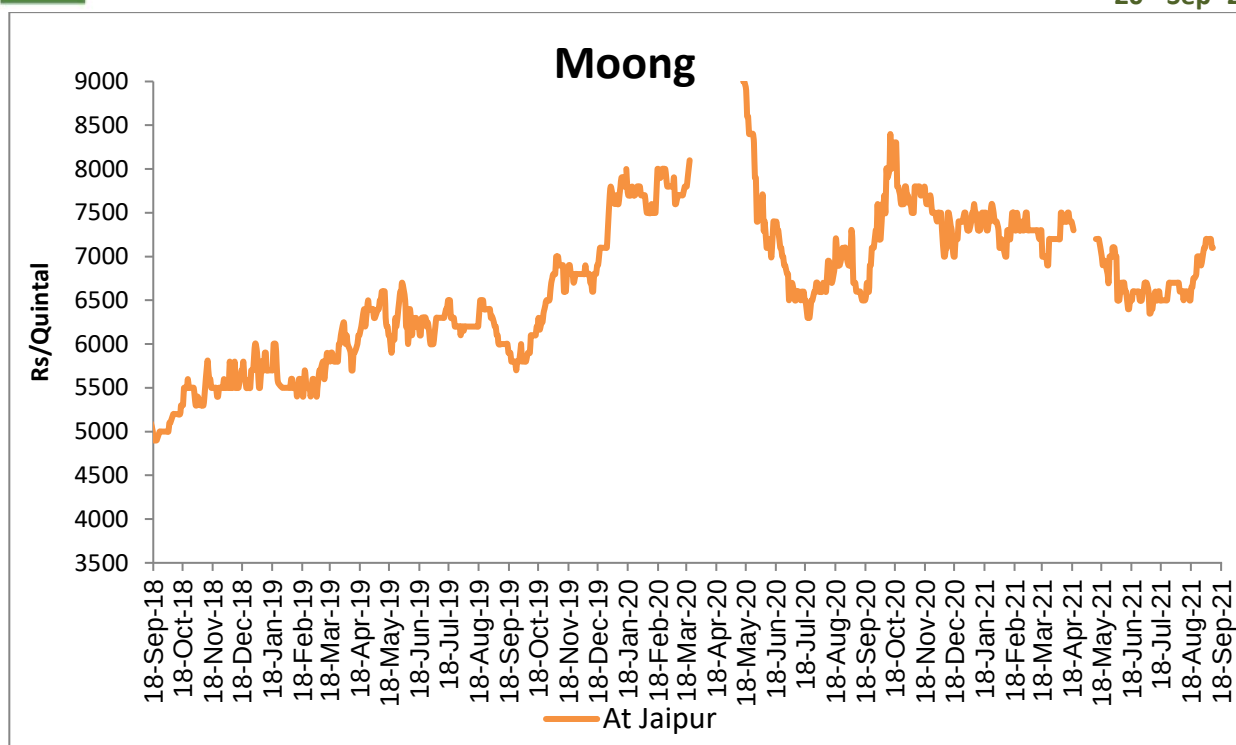

Market Outlook: Urad Prices are likely to show steady to slightly firm momentum this week.

Green Gram (Moong):

Market Recap:

As on 17th Sep 21, area coverage under Moong is 35.25 lakh ha against 35.38 lakh ha same period last year. Rains at this time of harvesting can hit the quality of crop. This time production may be less due to delayed sowing in Rajasthan which is major contributor and less rainfall in August month. Import volume is low while demand is yet to improve. The production prospects have deteriorated. So, firm sentiment is expected in the cash moong market this week too.

Market Outlook: Moong prices are likely to trade steady to firm in the near term.
