Commodity-wise Domestic, International Prices and Arrivals at Different Centers

Pulses Sector- Domestic Highlights:

All India Kharif pulses sown area is up by 2.05 % to 140.72 lakh ha against 137.89 lakh ha last year as on 17th Sep-2021. Arhar area is up by 3.82 % to 50.02 lakh ha so far while Moong lags by 0.37 % to 35.25 lakh ha. Urad bean area recovered slowly and is up by 2.02 % to 39.43 lakh ha against 38.65 lakh ha last year till date. Quotes for Canadian Masur decreased slightly by \$10 at \$1100-1105 and Australian quotes decreased by \$5 to \$1065-1070 per MT. Myanmar quotes for Urad, Tur & Moong declined slightly last week. Myanmar quoted Moong at \$860 to 900 per MT, Tur at \$855 and Urad FAQ & SQ at \$960 & \$1120 per MT. Urad, Moong & Tur quotes decreased by \$20 to 30 during the week under review.

Tur is in vegetative to flowering stages in different states and arrivals will start in December and peak in January. There were heavy rains due to cyclone Gulab in Odisha, Andhra Pradesh, Telangana, Chhattisgarh, Maharashtra and Gujarat from 26th September to 30th September. Rainfall in Maharashtra still continues. Tur crop can withstand waterlogging for four to six days, so losses so far have been nominal at 2-3% in Maharashtra, Odisha as well as Gujarat. Further heavy rainfall is forecast for Maharashtra and some rainfall is also expected in Gujarat and Karnataka. In case of particularly heavy falls and waterlogging, the losses in tur crop may escalate. Tur crop now requires bright sunny weather for the setting of fruits and ripening stage. Prices of Tur has been stable during the week at 6400-6700 in various market. Range bound movement is expected this week.

As around 50% sowing delayed by 10 to 15 days in major Moong growing states due to erratic behaviour of rains, yield expectation is lower in Maharashtra, Karnataka and Odisha and there is a quality issue in Rajasthan too. Rajasthan is the largest moong producing state accounting for approximately 60% of the Kharif acreage. Crop conditions were good in most of the state until before cyclone Gulab, but excess rains over the last week of September have raised some concerns about quality and the yield may also decline marginally. Yield losses to the extent of 2-3% from normal are also anticipated in Maharashtra, Karnataka and Odisha. Weather condition in Gujarat, South Indian states, Odisha, Bihar and West Bengal over the next 10 days remain crucial and excess rains may cause some further losses to yield. Myanmar is offering Moong (Anna Seva) at \$900, Pokako at \$1000 and Pedisheva at \$1000. The short to medium term outlook seems weak. Moong prices are ruling under pressure. Prices decreased by Rs200 to 6700 in Jaipur market.

Urad harvesting was completed to a large extent in Maharashtra when heavy rainfall occurred during late September. The harvesting has progressed further, and is almost complete in the state by now. The harvesting is still ongoing in Madhya Pradesh, Rajasthan, Uttar Pradesh and Gujarat and has just started in Odisha and Jharkhand. Nominal losses in yield amounting to 2 to 5% are estimated so far in various states due to heavy rains after cyclone Gulab. However, the losses may increase if heavy rains continue. Heavy falls are predicted in states like Gujarat, Bihar, West Bengal, Sikkim, Tamil Nadu, Kerala and Karnataka over next few days. The impact going ahead may be severe in the states where the harvesting is not yet complete. The first fortnight of October remains very crucial for the yield and size of the Kharif crop. Prices ruled steady to slightly firm and may continue to rule firm. Myanmar is offering urad at \$930 and \$1090 for FAQ & SQ variety, slightly up from the previous week.

Lentils cash market traded slightly down by 0.20 % to 7410 in Mumbai market during the week under review. It decreased by 0.15 % to 7780 in Kanpur market. Demand for Masur dal got disrupted while importers at various ports are offering lentils at 7400-7450 against 7500-7550 during previous week. Two vessels having 30000-35000 MT are yet to be unloaded at ports. Arrivals of other Kharif pulses like Moong and Urad are expected to increase.

As Tur & Chana dal are available at competitive prices, price sensitive consumers are shifting to a cheaper option. Apart from this, importers may release stock faster than before as there is a feeling of uncertainty among trade community over possible changes in policies. So lentil cash market may decrease by 100 more this week. Importers are active in Canada, Australia and enquiry from Russia too have been seen during last two weeks. The short term outlook seems weak.

Chana cash market continued to trade weak and decreased by Rs 100 to 5200-5350 in Delhi. Market may trade range bound this week and may increase slightly in coming weeks as demand is expected to improve now. Nafed has stock and its continuous release at regular interval would not allow cash Chana market to move beyond a certain level. Supply side is ample and the fresh demand for besan and dal is bound to increase. If consumers of Masur and Urad dal move towards Chana & Tur dal, prices should recover by 100 to 200. Festive demand may restart again and it may support Chana to some extent. In Jaipur market it traded at Rs 5100. The overall tone remains steady to slightly weak in the short term.

Global Market Updates:

According to ABARES (Australian Bureau of Agricultural and Resource Economics and Sciences), Chickpea production in Australia is estimated to be 8,44,000 tonnes in 2021-22 according to September update. Last year's production was 7,33,000 tonnes while June 2021-22 estimate was 7,33,000 tonnes. Lentil's production in Australia is projected to be 6,39,000 tonnes against last years production of 6,34,000 tonnes while June 2021-22 estimate was 5,89,000 tonnes.

According to September update, US lentil Production is estimated to be 0.57 LMT in 2021 against 3.36 LMT in 2020 which is 83% reduction and US Chickpea production is projected at 0.77 LMT in 2021 against 1.97 LMT in 2020 which is 60% reduction. The production is less due to drought condition prevailing in US.

According to Agriculture and Agri Food Canada (AAFC) August report, the production of lentil is projected at 18.85 lakh tonnes for 2021-22. July production estimate was 27.50 lakh tonnes while last year's production was 28.68 lakh tonnes. Huge decline in lentil production due to weather and drought. The end stock for season 2021-22 is expected to be only 50,000 tonnes against 4 lakh tonnes last year. Market expects production of Canadian lentil not more than 15 lakh tonnes.

According Agriculture and Agri Food Canada (AAFC) August report, the production of Chickpea is projected at 0.87 lakh tonnes for 2021-22. July production estimate was 1.26 lakh tonnes while last year's production was 2.14 lakh tonnes. Decline in production is due to weather and drought.

In Manitoba grasshopper population thrive in some area due to hot and dry conditions. It is an additional threat to the pulses production along with heat wave condition. Due to prolonged record breaking heat this summer has deteriorated crop growing conditions in Alberta. Alberta and Saskatchewan government doubled low yield appraisal threshold for farmers who salvage cereal/pulse crop as feed. Saskatchewan, Alberta and Manitoba are major lentil growing states in Canada.

The heat damage to crops is broader in Manitoba, Saskatchewan, Alberta. As middle of Jul U.S. Department of Agriculture rated subsoil moisture in the state as 80% short to very short. Lentil production in Canada may decrease by 50% from normal 24-25 LMT to 12-13 LMT this year. In Saskatchewan lentil crop condition was 18% good, 40% fair and 42% poor till last week. Crop is in pod filling stage and facing extreme moisture loss. The current quotes for lentil are at \$750. It may move up to \$800-850.

Australia's first crop production forecast for a current season for five major pulses including chickpeas, fieldpeas and lentils released by Pulse Australia (PA), it is 2.28 Mt which is 23% below the 2.96 Mt produced last year. Chickpea area is forecast to increase by 11% to 5.65 lakh ha with production estimate 6.62 LMT. Forecasted area for peas is 2.38 lakh ha with production estimate of 2.7 LMT while forecasted area for lentils is 3.04 lakh ha with production estimate of 4.54 LMT. Australia's production is down this year on dry conditions.

Global field peas market traded firm on increasing fear of low production in the North America. Most of the producing region is facing dry and hot conditions, resulting in deteriorating crop ratings and accelerating plant development in parts of the growing area. Grain size may be small and the yield low. Export movement has slowed down. Buyers are in a wait and watch mood.

Chickpeas market too traded up due to doubt over yields and quality in Canada and the US. However, desi chickpeas traded low due to poor demand from Pakistan and the Asian countries. It has affected chickpeas value in Australia too. India is not taking interest to buy Chana as prices have come down here below minimum support price.

Area planted for all chickpeas for the 2021 crop year is estimated at 341,000 acres, up 26% from the previous year, according to the USDA's annual seeded area report. Area harvested is forecast at 334,600 acres, 27% above 2020. Small chickpea area planted is estimated at 67,000 acres, up 38% from 2020. Area harvested for small chickpeas is forecast at 65,600 acres, a 37% increase from 2020. Area planted for large chickpeas in 2021 is estimated at 274,000 acres, a 24% increase from the previous year. Large chickpeas area harvested is forecast at 269,000 acres, a 25% increase from 2020.

The seeded area under dry peas is expected to be slightly higher at 1750 thousand ha in 2021-22 against 1722 thousand ha last year in Canada. However, yield may decline from 2.73 to 2.57 t/ha this year due to average yield expectation owing to the expected un conducive weather conditions. So, the production is forecast to decrease from 4594 to 4400 thousand tonnes this year. Total supply and the export figure too may decrease from 4927 to 4790 and 3800 to 3700 thousand tonnes respectively. However domestic use may increase from 827 to 840 thousand tonnes this year. The carryout to decrease from 300 to 250 thousand tonnes.

Lentils production in Canada is expected to decrease from 28.68 in 2020-21 to 2.7 MMT in 2021-22 due to slightly lower area & yield. Export too are expected to decrease by 2 lakh MT to 25 lakh MT in 2021-22. Total supply is expected to decrease from 31.82 to 29.25 lakh MT due to likely lower production in 2021-22. Against it domestic usage. However, domestic use would decrease from 3.27 to 2.75 lakh MT in 2021-22. So carryout stock would stay at same as last year at 1.5 MT. Average yearly price is expected to be in the range of \$ 585 per MT. For 2002-21 it is \$ 600 per MT.

Weekly Outlook: -Pulses are likely to trade steady to slightly firm in next week.

Pulses-Wise Scenario:
Chana
Current Scenario:

Chana cash market traded weak and decreased by Rs 100 to Rs.5350 per quintal in Delhi market. Market may stay steady at the current level or Chana cash market is likely to recover once again with the help of emerging demand for the dal and besan in Dussehra and Diwali. Right now demand is weak and millers are buying as per their need only. Also new contract for Chana is suspended in futures market. Despite hope for recovery soon, Nafed have ample stock to control the price. Release by nafed is likely to continue and it would cap any spike in the cash market. With improvement in prices farmers too may start releasing stock as they would be in need of money for rabi sowing. Apart from this Chana from the south African countries would continue to enter into India. If consumers of Masur and Urad dal move towards Chana & Tur dal, prices might recover by 200 to 300. The overall tone seems steady to weak in the short term.

Import flow would remain restricted as duty plus cess is 60%. Import flow may continue from the least developed countries as they enjoys benefit of zero duty. As per private source, around 15,926 MT of Chana has been imported in August month. Following graph illustrates chana price movement in different markets:

Chana Weekly Technical Analysis: October Expiry (NCDEX)

Technical Commentary:

- Decreasing prices & decreasing OI indicates long liquidation in futures market.
- RSI is decreasing indicates weak buying strength in market.
- Prices closed below 9 and 18 days EMAs, volume increases slightly in review week.
- Candlestick chart hints weak momentum.

Strategy: Sell on Rise

Supports & Resistances			S1	S2	PCP	R1	R2
Chana	NCDEX	Oct	5030	4980	5075	5180	5230
Weekly Trade Call*			Call	Entry	T1	T2	SL
Chana	NCDEX	Oct	Sell	5080	5010	4990	5115

- Do not carry forward stock for next week.

Peas (Matar):

Market Recap:

Peas prices have improved slightly by Rs. 60 to Rs. 6050 from Rs. 5990 under the week under review. As import is not allowed, stock in the domestic market is depleting fast. Stocks are either with stockists or with traders. 98% of Harvesting has completed in Canada on 13th September but import is not possible due to the import restrictive policy by India. Govt is not going to allow peas import in the near to medium term. Overall tone remains firm.

Following chart shows price movement in various markets:

Current Market Dynamics & Outlook: In Kanpur market peas was quoted at Rs 6200 per qtl on Saturday. In Mumbai market, there was no quote for yellow peas as stock has been exhausted. There is no quotes for imported peas as availability is almost nil.

Spread With Chana:

Spread between Chana and Peas, at Kanpur market continued to remain in negative zone. Gap has increased by Rs 110 to Rs. 590 from previous Rs. 490. Spread is expected to remain in the negative zone in coming week too on relative movement in Chana prices. Overall outlook seems steady to slightly firm in the near term.

Lentils (Masoor):

Market Recap:

The Masur cash market traded down by 0.20 % to Rs 7410/qtl. in Kanpur market while imported stock traded at Rs 7400-7550/qtl in Mumbai market. Two vessels have reached port containing 30000-35000 MT and remain unloaded. Harvesting of lentils have completed in Canada and harvesting of Australian lentils will start this month. Demand for masur dal got disrupted due to high prices prevailed earlier. The import duty on Lentils originating or exported from US has been increased from 20% to 30% with effect from 17th september 2021. However the basic custom duty for all other origins (including Australia,Canada) stays same at 10%. As crop size in Canada as well as US is small, import cost would continue to move up in the coming months. Sep onward supply from Canada may start from the new crop. Arrival of Moong and Urad is expected to increase and as tur & Chana dal is available at competitive price, price sensitive consumers are shifting to a cheaper option. So lentil cash market would not improve in coming weeks.

Current Scenario:

Market is bound to move down slightly. Govt may try to increase supply through contracting deals to supply pulses. Demand got disrupted for Masoor dal due to comparatively higher prices. The short term outlook seems weak.

Red colour shows the imported Masur price

Market Outlook: Prices may trade steady to slightly firm.

Pigeon Pea (Tur/Toor):

Tur crop is in vegetative to flowering stage in different states and arrivals will start in December. There were heavy rains due to cyclone Gulab in Odisha, Andhra Pradesh, Telangana, Chhattisgarh, Maharashtra and Gujarat from 26th September to 30th September. So losses of 2-3% in Maharashtra, Odisha as well as Gujarat. Tur crop can withstand waterlogging for four to six days, so losses so far have been nominal at 2-3% in Maharashtra, Odisha as well as Gujarat. Tur prices in Gulbarga market increased last week by 0.90 % to 6680. Demand from mills have started improving. Weather condition would remain crucial in Oct for Tur crop as crop now requires bright sunny weather for the setting of fruits and ripening stage. In Mumbai market Burmese Tur lemon is traded at Rs 6300 – 6350/qtl.

Current Market Dynamics & Outlook:

Lemon Tur is available at Rs.6300-6350/qtl at Mumbai port. As per trade sources, India imported 79,285.27 MT in Aug. So far India has imported total 1,62,001.63 MT from April to Aug-2021. Supply side is at comfortable level. So any spike in cash market is unlikely.

Black Matpe (Urad):

In Chennai and Mumbai market Urad prices were to Rs. 7000-7100/qrtl and 6900-7000/qrtl in review week. With the opening of weather arrivals are expected to increase. Urad harvesting is completed majorly in Maharashtra while it is still going on in Madhya Pradesh, Rajasthan, Uttar Pradesh and Gujarat and has just started in Odisha and Jharkhand. Nominal losses in yield amounting to 2 to 5% are estimated so far in various states due to heavy rains after cyclone Gulab. Urad traded weak last week. Lack of demand and poor quality of new Urad arriving in market is building a pressure on market. Also there is continuous supply from Myanmar. New Urad crop arriving in Rajasthan and Madhya Pradesh is of poor quality. Myanmar is offering Urad FAQ at \$930 and SQ at \$1090. Demand is picking up. India would import 2.5 lakh MT Urad from Myanmar as a MoU has been signed between the two govt for next five years starting from April-2021. Apart from this 1 lakh MT Tur too would be imported with similar condition that has been set for Malawi. It would ensure better supply side in the market.

Current Market Dynamics & Outlook:

Major Urad crop comes in kharif season. Farmers have covered 39.43 lakh ha so far slightly up from 38.65 lakh ha last year till date. As availability in Myanmar too is low and so any big decline is not expected before the new crop hits the market. India imported around 2,01,393 MT urad in from April to Aug-2021. Import is free now, so when parity turns in favour of India, the volume of import may increase.

Market Outlook: Overall tone seems weak in the short term.

Green Gram (Moong):

Market Recap:

As on 17th Sep 21, area coverage under Moong is 35.25 lakh ha against 35.38 lakh ha same period last year. Rains at this time of harvesting can hit the quality of crop. Intermittent rains in Uttar Pradesh, Madhya Pradesh during last two-three days have affected Urad and Moong crops to some extent and quality issue is bound to surface in both the states. Yield losses to the extent of 2-3% from normal are anticipated in Maharashtra, Karnataka and Odisha. With the ongoing showers of rains yield loss might be reported from Rajasthan. Moong prices in Rajasthan moved down by Rs 200 to Rs 6700 per qtl. in Jaipur market during the week under review and may move down further with the increase in arrivals. Import volume is low while demand is yet to improve. The short term outlook seems firm in Moong.

Market Outlook: Moong prices are likely to trade steady to firm in the near term.

Kharif Pulses area as on 17th Sep-2021
