Commodity-wise Domestic, International Prices and Arrivals at Different Centers

Pulses Sector- Domestic Highlights:

Rabi pulses sowing started with slower pace. Chana and Masur sowing in on in the states like Madhya Pradesh, U.P, and Rajasthan. Area coverage is around 20 to 25 % lower in the beginning of the sowing season. It may pick up soon with the opening of the weather. Rabi sowing data is awaited.

Crop condition of tur is very good so far and production may increase from our normal expectation in major growing states including Maharashtra. Early crop may hit in the second half of Nov in Sholapur and Bijapur districts. There is plenty of old stock in private hands while import from the African countries are on amid weak. All these factors including govt.'s policy are helping prices keeping cool down at this point of time. Weather condition is good so far. As demand is expected to improve, prices may stay steady at current level or slightly improve this week. Supply side would increase in Dec, so the spike is not expected in the near to medium term. Myanmar is offering Tur at \$795, down by\$5 from the previous week. Tur is being traded at 6400, up from 6200 in the previous week. It may move up slightly by 200 if demand continues to improve.

Sowing of Masur has started increasing and may improve further. The sowing activities would continue in Bihar and U.P. till 15 of Nov while in M.P.,it may end by then. Higher rains in the producing region like Bihar and U.P. at the time of sowing have delayed Masur sowing by 15 days. There is water logging in the low land in M.P. too. Area under Masur is likely to increase by 5-7 % this year due to good price at the time of sowing. Quotes in Canada have decreased by \$20 to \$1080 and it may decrease more as competition between Canada and Australia is likely to increase. Australian crop is to be harvested and may hit India in Dec .Apart from this supply from the imported Masur continues. So any spike is unlikely at this point of time. Stock at ports is ample. If demand improves, slight increase in price might be seen. Masur in Kanpur market is being traded at 7600, may move up further by 200 in coming weeks. It is being traded at 7225 at Mumbai. As the imported stock is ample, spike is unlikely in the cash market.

Arrival of Urad has not been up to the mark while quality coming into markets is not good. As availability of FAQ quality is comparative low, prices are ruling at higher level. Import volume too is low due to lower availability in Myanmar. So prices of Urad may continue to rule at higher level. Harvesting is over now. While demand too is weak. If demand improves for FAQ & SQ quality, prices may move up by 200-300 in the coming weeks. Import flow would remain limited as old stock in Myanmar is low (around 1 lakh MT) and new crop would be available only in March-2022. Myanmar is offering Urad FAQ & SQ at \$870 and 900, basis Indian ports. FAQ quality creased by \$30 while SQ by \$10 from the previous week. The overall tone for fair average quality seems firm in the medium term. As prices are ruling higher, Rabi area in South India may increase by 10 %.Due to excess moisture level in the field, sowing may be delayed by 10 to 15 days this year.

Slight increase in prices has been seen in the cash Moong market due to commencement of procurement. Kharif harvesting is over. Rabi sowing is about to start while arrival pace from Kharif crop is normal. It would increase further after Diwali. Moong prices in major markets are ruling at 6000 to 6800, depending on quality of the crop. Supply side is at comfortable level and prices may continue to rule in the range of 6300-6800. Farmers would prefer to sell their produce to govt.'s agencies as it is ruling below MSP in various markets. Moong Chamki is being traded at 6700 in Jaipur market. Myanmar is offering Moong at \$930 to 1000 per MT ,basis Indian ports. Steady to slightly weak trend may prevail in the cash Moong markets in coming weeks. Import flow is on and availability in Myanmar is higher. So any unexpected rise in the cash market is unlikely at this point of time.

Chana cash market traded down as stockists are releasing stock sensing continuous release from Central Pool. Sowing has started and farmers have covered 5.67 lakh ha so far against 7.86 lakh ha last year. State-wise sowing data is awaited. Area under Chana may decrease by 10% this year as farmers in Rajasthan, Madhya Pradesh and U.P. are shifting to Mustard, Masur from Chana this year due to higher prevailing prices of Mustard and Masur. The overall sentiment is weak. Nafed has ample stock while import from LDC countries continue. Demand is weak despite festive season. Chana prices stayed steady at 5200-5250 in Delhi market. Chana sourced from Russia and Tanzania is being sold at 4800 & 5000 at Mumbai. There is ample stock of Chana in domestic market and prices are expected to rule range bound. If demand improves, slight recovery might be seen in coming weeks. Supply side is ample. Mills are buying based on needs.

Global Market Updates:

Lentils production in Canada is expected to decline by 37% to 1.8 MMT this year due to lower yield received in Western Canada due to drought like condition during flowering to maturity stages. Red Lentils production may decline to 1.3 MMT this year. The share of green Lentils may be 0.3 MMT out of total production. Despite lower production total supply would decrease by 28% due to higher carrying stock. However, export too would decrease by 18% to 1.9 MMT in 2021-22. Average price for the year may hover in the range of \$1050 per MT.

Lentils production in the US is expected to decline by 31% to 0.23 Mt in 2021-22. Despite higher area coverage production would decrease due to the low yield realization and higher abandonment. US may export 2 lakh MT Lentils in 2021-22. The major buyers are EU, Canada, India and Mexico.

Dry Peas production in Canada is expected to decline by 45% to 2.52 MMT in 2021-22 due to lower yield realized in the western Canada. The main growing states like Alberta and Saskatchewan. These two states would contribute 2.3 MMT. Canada had produced 4.59 MMT last year. Yield has decreased from 2.73 to 1.68 tonne per ha this year. As crop size is lower than last year by 45%, export are expected to decline to 2.3 MMT from 3.58 MMT last year. Total supply would decline from 4.91 to 3.09 MMT this year. It would drag prices up from \$340 to \$580 per Tonne. The projected price is the average for the year.

Field Pea market continued to trade firm due to rapid disappearance of peas from North American farms. If US growers are active to sell like Canadian farmers, supply would be tight in coming weeks. Though overall deliveries by Canadian growers so far this season is down from last year, the proportion remaining on farms that may be available to markets has dropped from 62% of total on-farm stocks at this time last year to around 49%. It may push price up.

As per the latest release by Australia Bureau of Statistics, Lentils export from Australia posted a smart gain in August-2021 to 119440 MT, up by 93% exported in July-2021. Australia had exported 61892 MT in July-2021. So far Australia has exported total 796,239 MT in the ongoing season against 604,690 MT last year till August-2020. India emerged as a top buyer in Aug, buying 61,415 MT, followed by Bangladesh at 24,271 MT and UAE at 22,758 MT. India may remain major buyers in Sep and Oct too.

Field Pea export from Canada increased in August-2021 to 114,798 MT, higher by 38% from July when 83,201 MT was exported. Canada had exported 127,488 MT in Aug-2021. China, US and Venezuela were major buyers in Aug-2021, importing 52,904, 27,468 & 7,411 MT respectively. Demand from China continues and US too would continue to import for feed industries.

The Agriculture Ministry Of Pakistan has estimated kharif Moong production 2021-22 at 2.53 lakh MT against the annual domestic demand of 1.75 to 1.80 lakh MT. Production forecast for Chickpeas and Lentils has been increased slightly.

Global Lentils market traded weak as exporters have now shifted their attention to sell and find markets for the newly harvested crop. According to Statistics Canada production has been pegged at 18.02 lakh MT against 28.68 lakh MT last year. Market sees this production no a little bit optimistic and may be revised down further by 1 lakh MT. Final survey report is yet to come. The federal yield estimate for Saskatchewan was 948 pounds per seeded acre, while the provincial agriculture department thinks they will be closer 817 pounds. If exporters starts selling actively, prices may decline further. In the Indian market Lentils prices have decreased to 7300-7400 from 7500-7600.

According to ABARES (Australian Bureau of Agricultural and Resource Economics and Sciences), Chickpea production in Australia is estimated to be 8,44,000 tonnes in 2021-22 according to September update. Last year's production was 7,33,000 tonnes while June 2021-22 estimate was 7,33,000 tonnes. Lentil's production in Australia is projected to be 6,39,000 tonnes against last years production of 6,34,000 tonnes while June 2021-22 estimate was 5,89,000 tonnes.

According to September update, US lentil Production is estimated to be 0.57 LMT in 2021 against 3.36 LMT in 2020 which is 83% reduction and US Chickpea production is projected at 0.77 LMT in 2021 against 1.97 LMT in 2020 which is 60% reduction. The production is less due to drought condition prevailing in US.

According to Agriculture and Agri Food Canada (AAFC) August report, the production of lentil is projected at 18.85 lakh tonnes for 2021-22. July production estimate was 27.50 lakh tonnes while last year's production was 28.68 lakh tonnes. Huge decline in lentil production due to weather and drought. The end stock for season 2021-22 is expected to be only 50,000 tonnes against 4 lakh tonnes last year. Market expects production of Canadian lentil not more than 15 lakh tonnes.

According Agriculture and Agri Food Canada (AAFC) August report, the production of Chickpea is projected at 0.87 lakh tonnes for 2021-22. July production estimate was 1.26 lakh tonnes while last year's production was 2.14 lakh tonnes. Decline in production is due to weather and drought.

In Manitoba grasshopper population thrive in some area due to hot and dry conditions. It is an additional threat to the pulses production along with heat wave condition. Due to prolonged record breaking heat this summer has deteriorated crop growing conditions in Alberta. Alberta and Saskatchewan government doubled low yield appraisal threshold for farmers who salvage cereal/pulse crop as feed. Saskatchewan, Alberta and Manitoba are major lentil growing states in Canada.

The heat damage to crops is broader in Manitoba, Saskatchewan, Alberta. As middle of Jul U.S. Department of Agriculture rated subsoil moisture in the state as 80% short to very short. Lentil production in Canada may decrease by 50% from normal 24-25 LMT to 12-13 LMT this year. In Saskatchewan lentil crop condition was 18%

good, 40% fair and 42% poor till last week. Crop is in pod filling stage and facing extreme moisture loss. The current quotes for lentil are at \$750. It may move up to \$800-850.

Weekly Outlook: *-Pulses are likely to trade steady to slightly firm in next week.*

Pulses-Wise Scenario:

Chana

Current Scenario:

Chana cash market traded down by 2.5% last week from Rs.5280 to Rs.5150 in Delhi market. Market may stay steady at the current level or Chana cash market is likely to recover once again with the help of emerging demand for the dal and besan in Diwali. Sowing has started and farmers have covered 5.67 lakh ha so far against 7.86 lakh ha last year. Area under Chana may decrease by 10% this year as farmers in Rajasthan, Madhya Pradesh and U.P. are shifting to Mustard from Chana this year due to higher prevailing prices of Mustard. This year sowing has delayed by 2 to 3 weeks due to high soil moisture. Right now demand is weak and millers are buying as per their need only. Also new contract for Chana is suspended in futures market. Despite hope for recovery soon, Nafed have ample stock to control the price. Release by nafed is likely to continue till new crop comes in the market and it would cap any spike in the cash market. Apart from this Chana from the south African countries would continue to enter into India. The overall tone seems steady to weak in the short term.

Import flow would remain restricted as duty plus cess is 60%. Import flow may continue from the least developed countries as they enjoys benefit of zero duty. As per private source, around 15,926 MT of Chana has been imported in August month. Following graph illustrates chana price movement in different markets:

Peas (Matar):

Market Recap:

Peas prices have slipped by 1.36% to Rs. 5790 from Rs. 5870 under the week under review in Kanpur market. As import is not allowed, stock in the domestic market is depleting fast. Stocks are either with stockists or with traders. 100% of Harvesting has completed in Canada but import is not possible due to the import restrictive policy by India. In Canada production of Peas is expected to be 25.27 Lakh tonnes this year against last year's production of 45.94 lakh tonnes. Govt is not going to allow peas import in the near to medium term. Overall tone remains firm.

Following chart shows price movement in various markets:

Current Market Dynamics & Outlook: In Kanpur market peas was quoted at Rs 5700-6000 per qtl last week. In Mumbai market, there was no quote for yellow peas as stock has been exhausted. There is no quotes for imported peas as availability is almost nil.

Spread With Chana:

Spread between Chana and Peas, at Kanpur market continued to remain in negative zone. Gap has been decreased by Rs 40 to Rs. 500 from previous Rs. 560. Spread is expected to remain in the negative zone in coming week too on relative movement in Chana prices. Overall outlook seems steady to slightly firm in the near term.

Lentils (Masoor):

Market Recap:

In Kanpur markets prices of Masur have slipped by 2.5% from Rs 7775 to Rs 7850. Imported Masoor at Mumbai is available at Rs. 7,150-7,250/qtl. Harvesting of lentils have completed in Canada. Crop from Australia will start coming in November month. However, no forward deals have been reported from there as of now. Private traders are not interested to buy lentils at higher quotes offered by Canada. Around 3.75 lakh MT of Masoor is available at port currently and Australian crop is expected to be in market in November so it will help in continuous availability. Quotes for Canada have decreased by \$20. Canada is offering lentils at \$1080 per MT for new crop while current Australian quotes for lentils are \$1060-1075 per MT. There is no deals from Black Sea Region as of now despite relaxation regarding phytosanitary issues for sixth months till Dec. Demand for masur dal got disrupted due to high prices prevailed earlier. The import duty on Lentils originating or exported from US has been increased from 20% to 30% with effect from 17th september 2021. However the basic custom duty for all other origins (including Australia,Canada) stays same at 10. Arrival of Moong and Urad is expected to increase and as tur & Chana dal is available at competitive price, price sensitive consumers are shifting to a cheaper option. So lentil cash market would not improve in coming weeks. Sowing of Masur in India would start from next week. Sowing condition is favorable and prices are ruling higher, so, area may increase this year.

Current Scenario:

Prices are expected to remain weak in the coming week as demand for Masoor is low due to higher prices and availability of other pulses at cheaper rates. Govt may try to increase supply through contracting deals to supply pulses. The short term outlook seems steady to slightly weak.

Red colour shows the imported Masur price

Market Outlook: Prices may trade steady to slightly weak.

Pigeon Pea (Tur/Toor):

Crop condition of tur is very good so far and production may increase from our normal expectation in major growing states including Maharashtra. Crop is in good condition and the recent rains may boost up yield for the late shown crop. Under prevailing good weather conditions crop size may increase. Early arrivals are expected during second week of November from Bijapur (Karnataka) and adjoining Solapur (Maharashtra). Lemon Tur is being offered at Rs 5,925 – 6,000 per quintal in Mumbai market. As supply side is ample with incoming import and good crop condition so far would not allow a spike in the Tur market in coming weeks. Tur from Mozambique is being offered at 5600-5800 due to poor quality. Quality of Tur in South African countries except Sudan is not good this year. The medium term outlook seems weak as import would continue till Jan-2022. Prices may slip below MSP during peak arrival season, given the normal weather condition. Import will continue from Malawi and Mozambique. Harvesting is being done in Aug-Sept so import will increase from Oct month from these countries. Tur prices in Gulbarga market are traded in the range of Rs. 6200-6450 per quintal.

Current Market Dynamics & Outlook:

Lemon Tur is available at Rs.5,925-6,000/qrtl at Mumbai port. As per trade sources, India has imported 83,134 MT in Sep. So far India has imported total 2,45,134 MT from April to Sep-2021. Supply side is at comfortable level. So any spike in cash market is unlikely. Range bound movement is expected this week.

Black Matpe (Urad):

Arrival of Urad has not been up to the mark while quality coming into markets is not good. As availability of FAQ quality is comparatively low, prices are ruling at higher level. Import volume too is low due to lower availability in Myanmar. So prices of Urad may continue to rule at higher level. Harvesting is over now. While demand too is weak. If demand improves for FAQ & SQ quality, prices may move up by 200-300 in the coming weeks. As prices are ruling higher, Rabi area in South India may increase by 10%. In Chennai and Mumbai market Urad prices were Rs. 6,800-6,900/qtl and 6,825-7,000/qtl in review week. Urad harvesting is completed majorly in Maharashtra while it is still going on in Madhya Pradesh, Rajasthan, Uttar Pradesh and Gujarat and has just started in Odisha and Jharkhand. New Urad crop arriving in Rajasthan and Madhya Pradesh is of poor quality with high moisture content of 14-16%. Nominal losses in yield amounting to 5 to 8% are estimated so far in various states due to heavy rains after cyclone Gulab. Urad traded steady last week. Lack of demand and poor quality of new Urad arriving in market is building a pressure on market. Also there is continuous supply from Myanmar. Myanmar is offering Urad FAQ at \$870 and SQ at \$990. Demand is picking up. India would import 2.5 lakh MT Urad from Myanmar as a MoU has been signed between the two govt for next five years starting from April-2021. It would ensure better supply side in the market.

Current Market Dynamics & Outlook:

Major Urad crop comes in kharif season. Farmers have covered 39.43 lakh ha so far slightly up from 38.65 lakh ha last year till date. As availability in Myanmar too is low and so any big decline is not expected before the new crop hits the market. India imported around 2,79,377 MT urad in from April to Sep-2021. Import is free now, so when parity turns in favour of India, the volume of import may increase.

Market Outlook: Overall tone seems steady to slightly weak in the short term.

Green Gram (Moong):

Market Recap:

Slight increase in prices has been seen in the cash Moong market due to commencement of procurement. Kharif harvesting is over. Rabi sowing is about to start while arrival pace from Kharif crop is normal. The harvesting of Moong is almost over in all major states. As quality of Moong coming into markets is poor, pressure is building on price. Moong traded in the range of 6000-6900 in major. Impact of Cyclone Gulab is visible and 2 to 3 % crop has been lost in Maharashtra and Karnataka. As on 17th Sep 21, area coverage under Moong is 35.25 lakh ha against 35.38 lakh ha same period last year. Import flow would continue due to Moong being in the free import list till Dec-2021. Imports may continue to land at Indian ports till January 2022 as per the extended time frame for import. Myanmar is offering Moong Anna Shewar at \$930 and Moong Pedi Shewar at \$1000 and Pokako at \$1030 per MT. Moong prices in Jaipur market has traded in the range of Rs.6700-6800 per quintal.

Market Outlook - Any unexpected rise in the cash market is unlikely at this point of time. The short term outlook seems steady to slightly weak in Moong.

Rabi Sowing Progress as on 29 Oct 2021

Rabi Pulses Area Coverage as on 29 Oct 2021
