Commodity-wise Domestic, International Prices and Arrivals at Different Centers

Pulses Sector- Domestic Highlights:

All India Rabi pulses area recovered during last week, as expected. Farmers have covered 76.12 lakh ha as on 18th Nov-2021. It was 76.19 lakh ha last year on 18th Nov-2020. Chana area is up by 2.93% to 53.68 lakh ha against 52.15 lakh ha last year. Unexpectedly, Lentils area too recovered last week. It was up by 1.84 % to 8.84 against 8.68 lakh ha. However, Urad area was down by 26.78 % to 1.34 lakh ha. Moong area too was down by 35.90 % to 0.25 lakh ha. Field peas area was up by 2.14 % to 6.67 lakh ha. Sowing activities would continue to improve this week too. In the beginning of Nov continuous Holidays due to festive season, bad weather condition in Maharashtra and South Indian states affected the sowing activities. In short, the slow start of sowing may put a lid on hope for the higher Rabi area coverage this year.

Masur sowing recovered during last week, as expected and farmers have covered 8.84 lakh ha, up by 1.84% from 8.68 lakh ha last year. Normal area for Masur is 13.9 lakh ha. Recovery in area coverage may continue this week too. Area in M.P. increased by 45 % while it decreased in Uttar Pradesh by 20 %. Sowing in Bihar is not very encouraging. The next two weeks are very crucial for U.P. and Bihar from sowing point of view. Weekly average prices of Masur increased by 0.29 % to 7662.5 last week over previous week in Kanpur. It also increased by 0.76 % to 7290 in Mumbai. Importers have decreased Canadian Masur quotes from 7350 to 7250 last week. The higher prices of imported Masur may push up Masur price in Kanpur as the import flow is low while quotes in Canada is almost steady at \$985-1000 per MT, basis FoB. Prices in local market may move up slightly if demand improves. Australian crop is being harvested and may hit Indian ports at the end Dec. Govt.'s policy helped to contain Masur price. Area coverage in Bihar and U.P. may fall short by 15-20 % from last year.

The overall tur crop condition is good so far in all major growing states. It is in maturity states in Solapur and Bijapur region. The arrival from new crop started in Solapur and Bijapur region and may improve further in Dec. In other states crop is in flowering to pod filling states. There is no report of any infestation from other region too. Production prospects are good. As the harvesting/new arrivals are at hands, stockists too have started releasing old stock amid import flow from Myanmar. With regular import and likely new arrivals may pressurize Tur cash market in coming weeks. After Diwali demand for dal normally decreases and it continues till Dec. So, Agriwatch sees a downward correction in the market. The prices of Tur may come down below MSP in Dec under normal weather condition. The overall tone remains weak. Lemon Tur quotes in Myanmar steady at \$775 per MT during last 15 days. It may move down to \$725-750 by Dec end. In Gulbarga market prices decreased slightly by Rs100 to 6100-6300 last week. Imported Tur is being offered at 5800 in Mumbai. Supply side is likely to increase. Pressure on price might continue on the Tur market.

As expected Chana area would decrease this year as farmers shifted some area to other lucrative crops like Mustard, Cotton and others. Farmers have covered 53.68 lakh ha so far, up by 2.93% from last year same time. Demand for besan may improve in the coming weeks and so Agriwatch expects market to move up by 100 this week. Sowing activities are yet to pick up. As prices are ruling below MSP in many markets, area may decline to 103-104 lakh ha this year. Indian farmers had covered 109-lakh ha last year. Import from Tanzania is 1006 Dated and is being sold at 4850-4900 in Mumbai. Chana of Sudan origin is available at 4900. Millers in central & North India are buying based on their needs. As supply side is at comfortable level with ample stock (around 8.5 lakh MT) in the central pool, Agriwatch doesn't see any spike in the rest of Nov. Availability in global market is good with projected production in Australia at 9 lakh MT and Myanmar at 9-10 Lakh MT. Prices of Chana in domestic market is ruling near 4800-5300 and may move slightly up in expectation of good demand for besan in the winter season.

As expected, Rabi Urad area is not picking up as of now despite attractive prevailing prices. Farmers have covered 1.34 lakh ha area under Urad this year so far, down by 26.78% from last year till 18th Nov. Sowing of Rabi Urad in South India is yet to pick up. Normal Rabi Urad area is 9.07 lakh ha. High moisture level in the field and recent rains have slowed sowing activities. Sowing activities may improve from the next week. As sowing have got delayed, it may limit area increase by 4 to 5 % despite attractive prices prevailing in the market. Demand for Urad and Urad dal is not picking up .So prices are decreasing right now. Quotes in Myanmar have stayed steady at \$890 for FAQ & \$980 for SQ. New crop will be available in March while supply side would remain tight in domestic market. It would keep price well supported above MSP this year. FAQ Urad is being traded at 6750-6800 in Mumbai market while in Chennai local crop is being traded at 6850. Prices may stay steady this week as demand is poor. With improvement in demand prices may recover again by the end of this month.

Prices of Moong could not sustain its upward momentum and decreased again due weak offtake by mills and the private trades in all major markets including Jaipur. Prices in Jaipur market is ruling in the range of 6500 to 7000, depending on the quality of the crop. Mills are not buying in bulk volume as demand for dal is weak. Supply side is at comfortable level and prices may continue to rule in the range of 6500-7200. Farmers would prefer to sell their produce to govt.'s agencies as it is ruling below MSP in various markets. Moong Chamki is being traded at 7000 in Jaipur market. Myanmar is offering Moong at \$930 to 1000 per MT , basis Indian ports. Range bound movement is expected in the cash Moong markets in coming weeks. Import flow is on and availability in Myanmar is higher. So any unexpected rise in the cash market is unlikely at this point of time. Rabi sowing is yet to pick up. Farmers have covered 0.25 lakh ha so far against 0.39 lakh ha last year.. Normal area under rabi ,including summer is 9.41 lakh ha.

Global Market Updates:

The IGC is going to include Lentils, Chickpeas and Dry beans in the Council's definition of grains under Article 2(1) (e) of the grains Trade Convention. This means that now the IGC secretaria will expand its market information for Pulses. Actually, pulses trades are continuously increasing throughout the world and has expanded with good pace and reached at 16 to 17 million MT in last 5 years. Right now the IGC is providing updates on Pulses trade and production estimates in the Grain Market Report on a bimonthly basis. Apart from it S&D balances are published for major exporters for Pulses like Lentils, Dry Peas and Chickpeas. Now FoB prices matrix too would be included.

Global Lentils market continues to trade under pressure. Indian buying is limited while bumper crop in Australia has increased the pressure on Canadian Lentils. There is a gossip in the market that Indian importers had imported Lentils in May-June taking advantage of low duty and now they are selling it at cheaper price, asking prices for Canadian origin product. Pressure may continue as long as India remains out of the Canadian market. Lentils stock at Indian ports are said to be around 3.75 lakh MT. Apart from it local market has stock of 4 lakh MT. So, the available stock is sufficient to meet the requirement for four months. In March new local crop would be available. So, the urgency of buying at the higher cost has mitigated.

Lentils production in Canada is expected to decline by 37% to 1.8 MMT this year due to lower yield received in Western Canada due to drought like condition during flowering to maturity stages. Red Lentils production may decline to 1.3 MMT this year. The share of green Lentils may be 0.3 MMT out of total production. Despite lower

production total supply would decrease by 28% due to higher carrying stock. However, export too would decrease by 18% to 1.9 MMT in 2021-22. Average price for the year may hover in the range of \$1050 per MT.

Lentils production in the US is expected to decline by 31% to 0.23 Mt in 2021-22. Despite higher area coverage production would decrease due to the low yield realization and higher abandonment. US may export 2 lakh MT Lentils in 2021-22. The major buyers are EU, Canada, India and Mexico.

Dry Peas production in Canada is expected to decline by 45% to 2.52 MMT in 2021-22 due to lower yield realized in the western Canada. The main growing states like Alberta and Saskatchewan. These two states would contribute 2.3 MMT. Canada had produced 4.59 MMT last year. Yield has decreased from 2.73 to 1.68 tonne per ha this year. As crop size is lower than last year by 45%, export are expected to decline to 2.3 MMT from 3.58 MMT last year. Total supply would decline from 4.91 to 3.09 MMT this year. It would drag prices up from \$340 to \$580 per Tonne. The projected price is the average for the year.

Field Pea market continued to trade firm due to rapid disappearance of peas from North American farms. If US growers are active to sell like Canadian farmers, supply would be tight in coming weeks. Though overall deliveries by Canadian growers so far this season is down from last year, the proportion remaining on farms that may be available to markets has dropped from 62% of total on-farm stocks at this time last year to around 49%. It may push price up.

As per the latest release by Australia Bureau of Statistics, Lentils export from Australia posted a smart gain in August-2021 to 119440 MT, up by 93% exported in July-2021. Australia had exported 61892 MT in July-2021. So far Australia has exported total 796,239 MT in the ongoing season against 604,690 MT last year till August-2020. India emerged as a top buyer in Aug, buying 61,415 MT, followed by Bangladesh at 24,271 MT and UAE at 22,758 MT. India may remain major buyers in Sep and Oct too.

Field Pea export from Canada increased in August-2021 to 114,798 MT, higher by 38% from July when 83,201 MT was exported. Canada had exported 127,488 MT in Aug-2021. China, US and Venezuela were major buyers in Aug-2021, importing 52,904, 27,468 & 7,411 MT respectively. Demand from China continues and US too would continue to import for feed industries.

The Agriculture Ministry Of Pakistan has estimated kharif Moong production 2021-22 at 2.53 lakh MT against the annual domestic demand of 1.75 to 1.80 lakh MT. Production forecast for Chickpeas and Lentils has been increased slightly.

Global Lentils market traded weak as exporters have now shifted their attention to sell and find markets for the newly harvested crop. According to Statistics Canada production has been pegged at 18.02 lakh MT against 28.68 lakh MT last year. Market sees this production no a little bit optimistic and may be revised down further by 1 lakh MT. Final survey report is yet to come. The federal yield estimate for Saskatchewan was 948 pounds per seeded acre, while the provincial agriculture department thinks they will be closer 817 pounds. If exporters start selling actively, prices may decline further.

Weekly Outlook: -Pulses are likely to trade steady to slightly firm in next week.

Pulses-Wise Scenario:

Chana

Current Scenario:

Chana cash market traded down by Rs 20 last week from Rs 5300 to Rs.5320 in Delhi market. Market may stay steady at the current level or Chana cash market is likely to recover once again with the help of emerging demand for the dal and besan in Diwali. Sowing has started and farmers have covered 53.68 lakh ha so far against 52.15 lakh ha last year as on 19 Nov 2021. Area under Chana may decrease by 3-5% this year as farmers in Rajasthan, Madhya Pradesh and U.P. are shifting to Mustard from Chana this year due to higher prevailing prices of Mustard. Right now demand is weak and millers are buying as per their need only. Also new contract for Chana is suspended in futures market. Despite hope for recovery soon, Nafed have ample stock to control the price. Release by nafed is likely to continue till new crop comes in the market and it would cap any spike in the cash market. The overall tone seems steady to weak in the short term.

Import flow would remain restricted as duty plus cess is 60%. Import flow may continue from the least developed countries as they enjoys benefit of zero duty. As per private source, around 15,926 MT of Chana has been imported in August month. Following graph illustrates chana price movement in different markets:

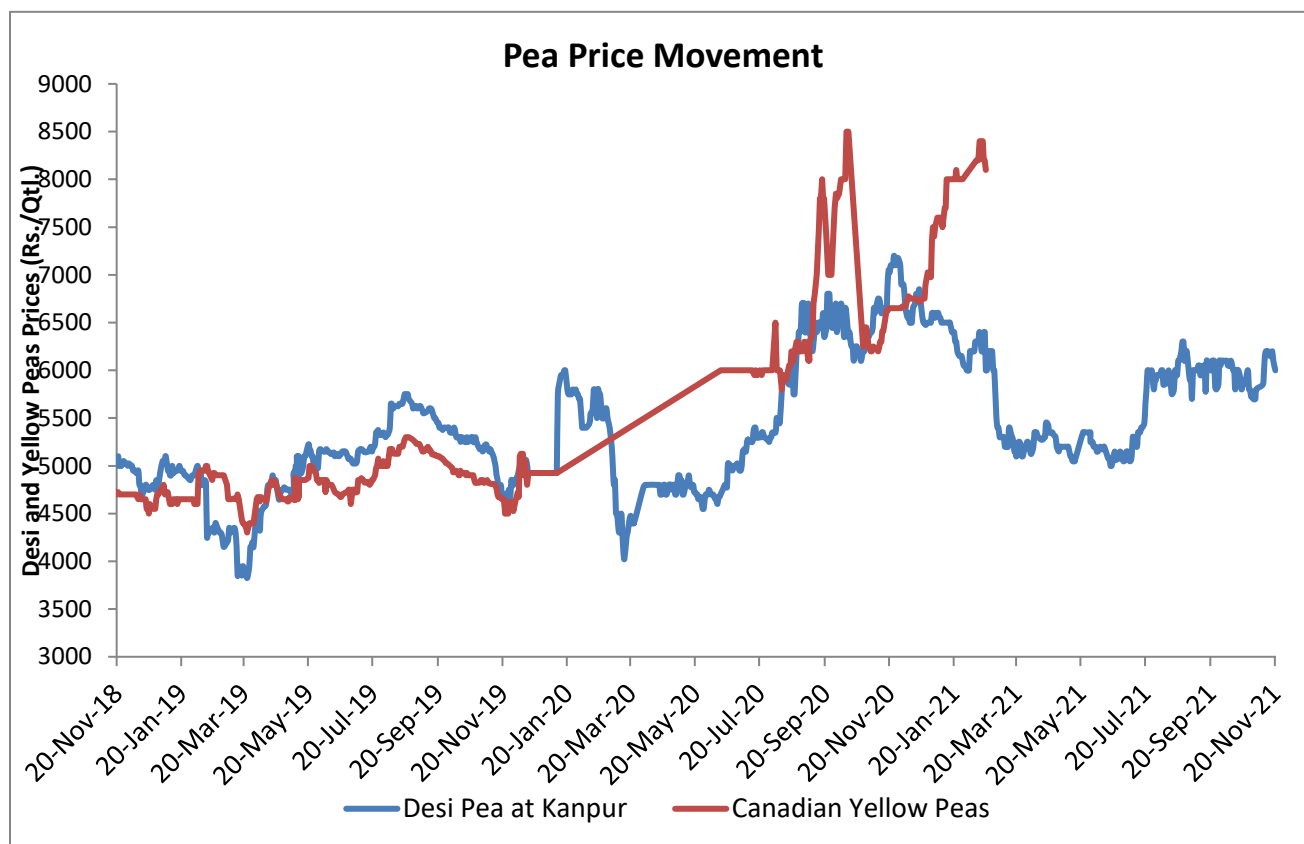

Peas (Matar):

Market Recap:

Peas prices have increased by 0.16% to Rs. 6100 from Rs. 6090 under the week under review in Kanpur market. As import is not allowed, stock in the domestic market is depleting fast. Stocks are either with stockists or with traders. 100% of Harvesting has completed in Canada but import is not possible due to the import restrictive policy by India. In Canada production of Peas is expected to be 25.27 Lakh tonnes this year against last year's production of 45.94 lakh tonnes. Govt is not going to allow peas import in the near to medium term. Overall tone remains firm.

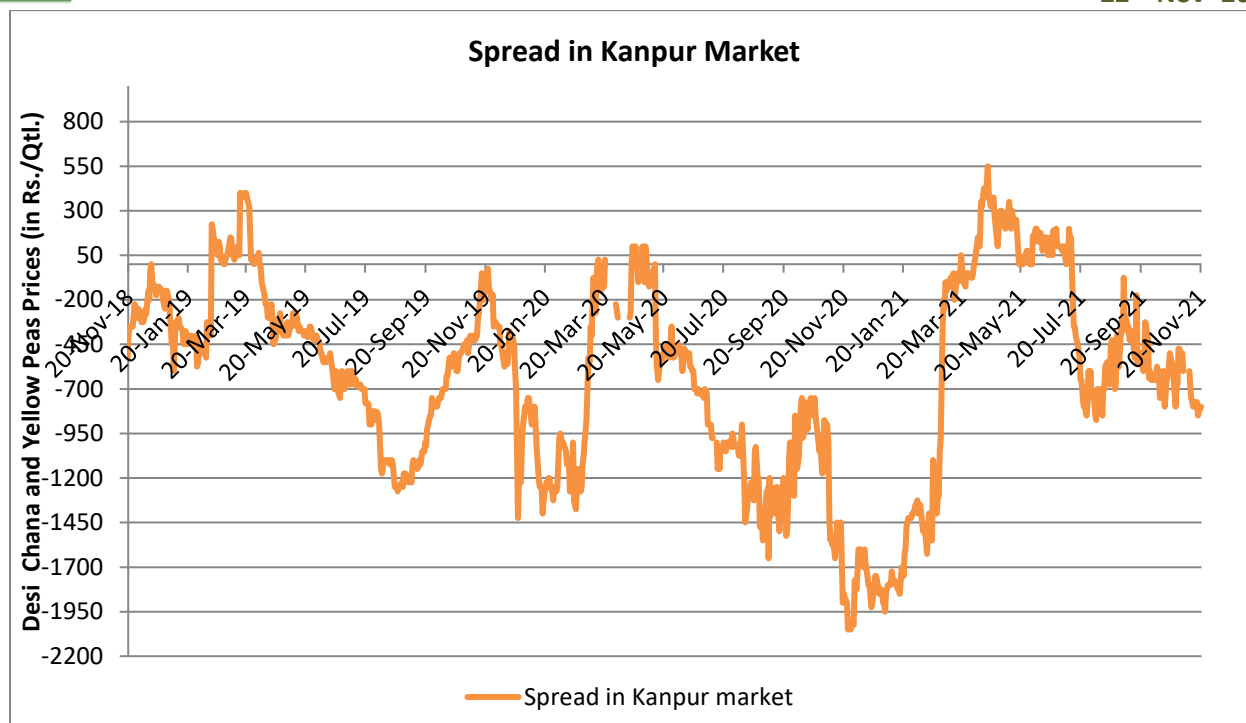

Following chart shows price movement in various markets:

Current Market Dynamics & Outlook: In Kanpur market peas was quoted at Rs 6000-6200 per qtl last week. In Mumbai market, there was no quote for yellow peas as stock has been exhausted. There is no quotes for imported peas as availability is almost nil.

Spread With Chana:

Spread between Chana and Peas, at Kanpur market continued to remain in negative zone. Gap has been increased by Rs 70 to Rs. 805 from previous Rs.735. Spread is expected to remain in the negative zone in coming week too on relative movement in Chana prices. Overall outlook seems steady to slightly firm in the near term.

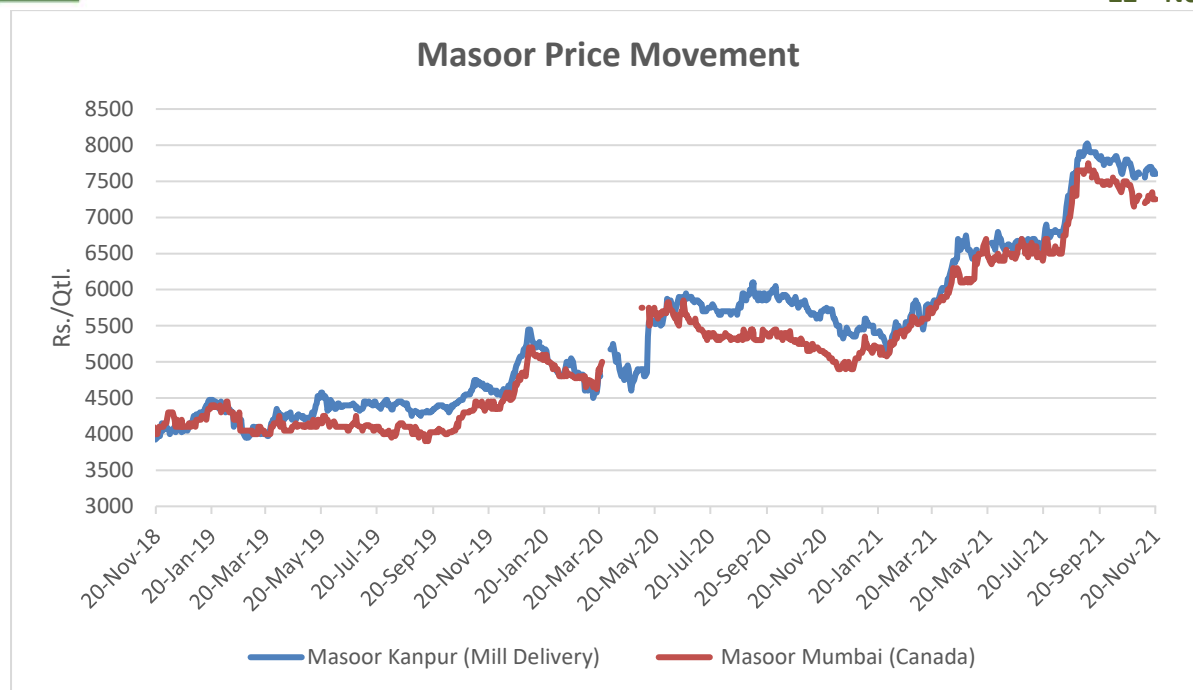

Lentils (Masoor):

Market Recap:

In Kanpur markets prices of Masur were steady at Rs 7650 per quintal. Imported Masoor at Mumbai is available at Rs. 7,250-7,350/qtl. Demand for masur dal got disrupted due to high prices prevailed earlier. Sowing condition is favorable and prices are ruling higher, so, area may increase this year. Masur sowing recovered during last week and farmers have covered 8.84 lakh ha, up by 1.82% from 8.68 lakh ha last year till 19 Nov 21. Normal area for Masur stands at 13.9 lakh ha. Area in M.P. increased by 46% while it decreased in Uttar Pradesh by 20% due to water logging conditions in growing districts like Chitrakoot, Jhansi, Lalitpur. Area in Bihar is likely to decrease this year due to excess soil moisture in low land areas.

Current Scenario:

Prices are expected to remain weak in the coming week as demand for Masoor is low due to higher prices and availability of other pulses at cheaper rates. Govt may try to increase supply through contracting deals to supply pulses. The short term outlook seems steady to slightly weak.

Red colour shows the imported Masur price

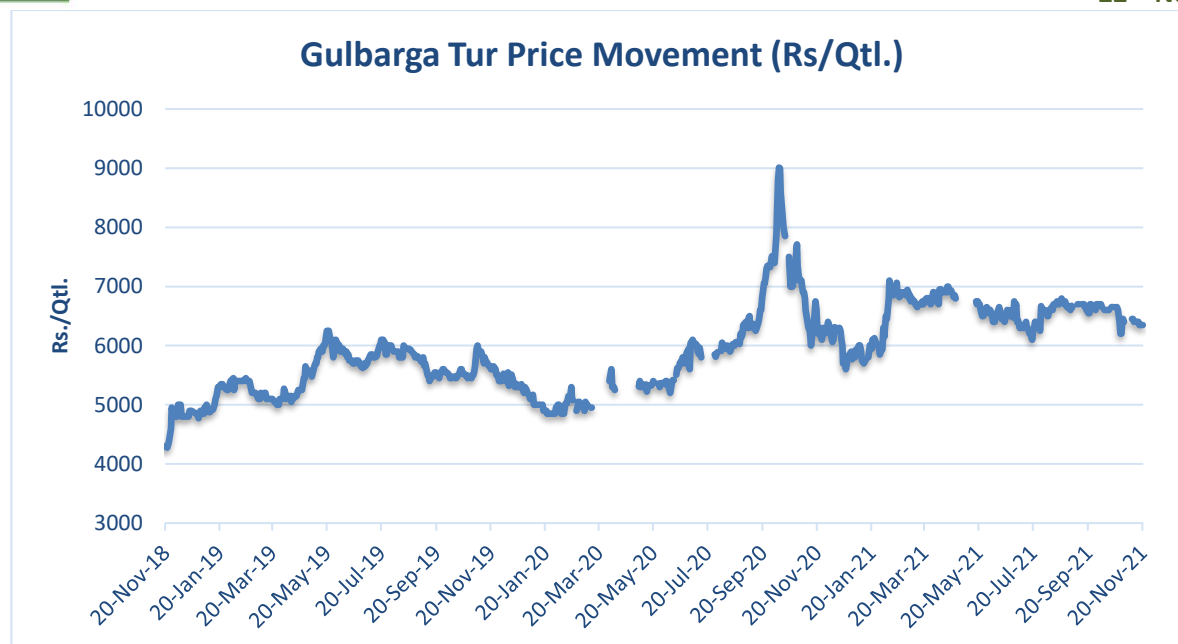

Market Outlook: Prices may trade steady to slightly weak.

Pigeon Pea (Tur/Toor):

Tur crop condition in Maharashtra and Karnataka is good while minor losses has been reported from some districts of Andhra Pradesh. In other states, crop condition is normal. The arrival from new crop has been started in Solapur and Bijapur region and may improve further in Dec. However crop is in flowering to pod filling stage in other states. Lemon Tur is being offered at Rs 5,800 – 5,900 per quintal in Mumbai market. As supply side is ample with incoming import and good crop condition so far would not allow a spike in the Tur market in coming weeks. Quality of Tur in South African countries except Sudan is not good this year. The medium term outlook seems weak as import would continue till Jan-2022. Prices may slip below MSP during peak arrival season, given the normal weather condition. Import will continue from Malawi and Mozambique. Tur prices in Gulbarga market are traded in the range of Rs. 6350-6400 per quintal.

Current Market Dynamics & Outlook:

Lemon Tur is available at Rs.5,800-5,900/qlt at Mumbai port. As per trade sources, India has imported 1,66,292 MT in Oct. So far India has imported total 4,11,426 MT from April to Oct-2021. Supply side is at comfortable level. So any spike in cash market is unlikely. Range bound movement is expected this week.

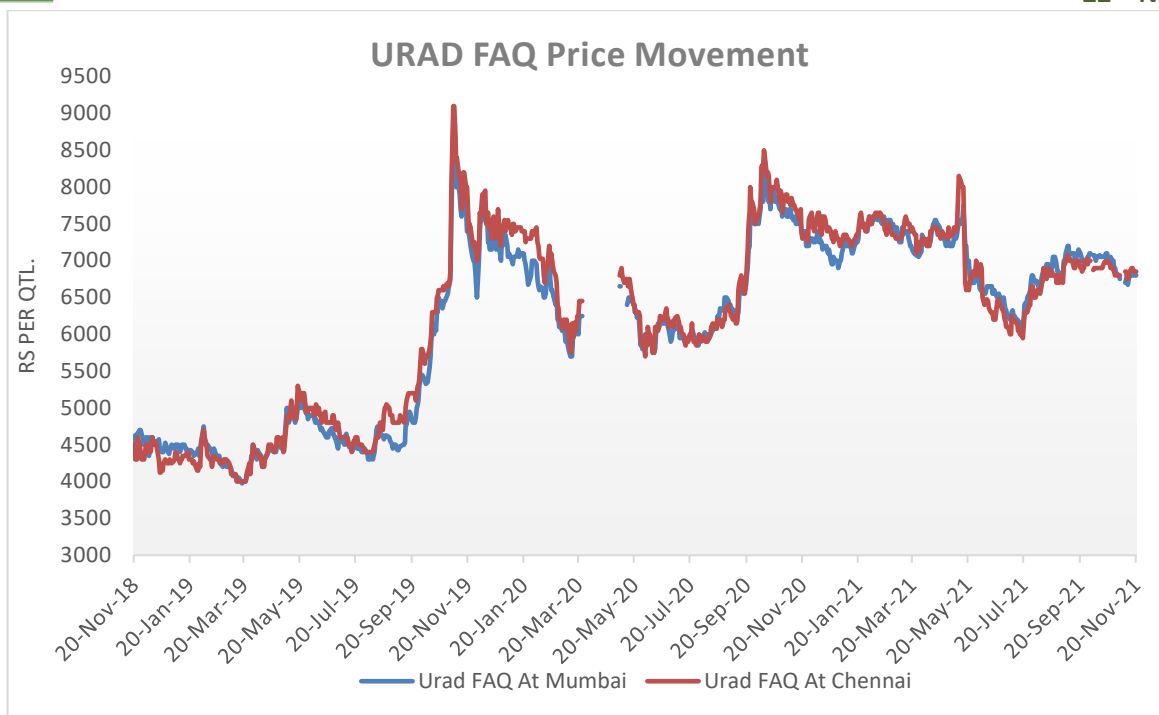

Black Matpe (Urad):

Sowing of Rabi Uradbean has started and so far 1.34 lakh ha has been sown against last year's acreage of 1.84 lakh ha till 19 Nov 21. Area under rabi Urad may increase by 4 to 5 % this year as prices are high and the import volume low. FAQ Urad is being traded at Rs. 6800- 6850 in Mumbai market while in Chennai local crop is being traded at Rs. 6850-6900 per quintal. If demand improves then prices may recover by the end of this month. Myanmar is offering Urad FAQ at \$895 and SQ at \$1010. India would import 2.5 lakh MT Urad from Myanmar as a MoU has been signed between the two govt for next five years starting from April-2021. It would ensure better supply side in the market.

Current Market Dynamics & Outlook:

Major Urad crop comes in kharif season. As availability in Myanmar too is low and so any big decline is not expected before the new crop hits the market. India imported around 3,48,505 MT urad in from April to Oct-2021. Import is free now, so when parity turns in favour of India, the volume of import may increase.

Market Outlook: Overall tone seems steady to slightly firm in the short term.

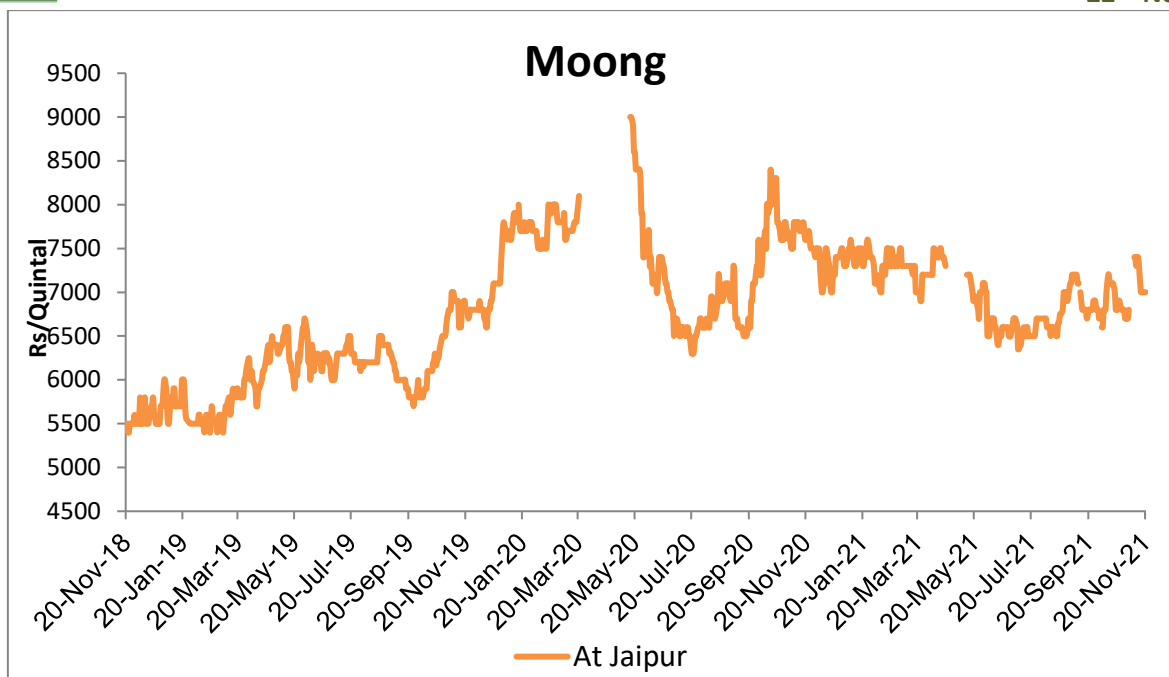

Green Gram (Moong):

Market Recap:

Sowing of Rabi Moongbean has been started and so far 0.25 lakh ha has been sown against last year's acreage of 0.39 lakh ha till 19 Nov 21. Moong traded at Rs 7000 per quintal in Jaipur market last week. Import flow would continue due to Moong being in the free import list till Dec-2021. Imports may continue to land at Indian ports till January 2022 as per the extended time frame for import. Myanmar is offering Moong Anna Shewar at \$930 and Moong Padi Shewar at \$1000 and Pokako at \$980 per MT.

Market Outlook - Any unexpected rise in the cash market is unlikely at this point of time. The short term outlook seems steady to slightly weak in Moong.

Rabi Sowing Progress as on 19 Nov 2021
