Commodity-wise Domestic, International Prices and Arrivals at Different Centers

Pulses Sector- Domestic Highlights:

All India Rabi pulses area recovered during last week, as expected. Farmers have covered 97.53 lakh ha as on 26th Nov-2021. It was 94.02 lakh ha last year on 26th Nov-2020. Chana area is up by 7.36 % to 70.01 lakh ha against 65.21 lakh ha last year. Unexpectedly, Lentils area too recovered last week. However it is still down by 1.17 % to 10.94 against 11.07 lakh ha. Urad area was up by 2.55 % to 2.41 lakh ha. Moong area too was down by 25 % to 0.45 lakh ha. Field peas area was down by 0.69 % to 7.18 lakh ha. Sowing activities would continue to improve this week too.

Standing Tur crops on around 7.5 lakh ha have been affected in Karnataka and Andhra Pradesh due to recent excess rains. Harvesting has got delayed due to rainfall and cloudy weather from last week at producing belt and forecast of rain for next week will affect quality of crop. Tur crop is reportedly affected in some districts of Karnataka. However Gulbarga district did not receive rains but there crop is affected due to excessive fog condition. Vessel carrying 24,000 MT of Mozambique Tur and 520 MT of Malawi Tur had discharged on 24th Nov 21 from Mozambique. While another vessel carrying 17,700 MT of Mozambique Tur is expected to arrive at Mumbai port on 27th Nov, 21. Around 25,000 MT from Mozambique and 10,000 MT from Malawi and Sudan too is expected by the end of this month. The imports would continue till Jan-2022 amid higher local arrivals. This would ease supply side in the coming weeks.

As Rabi Urad is mainly grown in southern states of the country, sowing activities were hampered due to recent rainfall and cloudy weather. Farmers have covered 2.41 lakh ha area under Urad this year so far, up by 2.55 % from last year till 26th Nov 21. Sowing of Rabi Urad in South India is yet to pick up. Normal Rabi Urad area is 9.07 lakh ha. As sowing has got delayed, it may limit acreage increase by 4 to 5 % despite attractive prices prevailing in the market. Yield(Kharif) from the Chandausi line is weak. The number of grains in the pods is low despite good looking crop. Arrival from Chandausi line would continue for next week. After that, no crop is expected before Feb-2022. Import flow too has been low amid tight supplies and quality loss in the Kharif season. So, prices may trade steady this week too and may improve slightly in the coming weeks.

Prices of Moong could not sustain its upward momentum and decreased again due to weak offtake by mills and the private trades in all major markets including Jaipur. Prices in Jaipur market are ruling in the range of 6500 to 7000, depending on the quality of the crop. Mills are not buying in bulk volume as demand for dal is weak. As demand is low right now, prices are ruling below MSP in markets outside Rajasthan where procurement is yet to start. Supply is at comfortable level and prices may continue to rule in the range of Rs 6,300-7000. Farmers would prefer to sell their produce to government agencies as the market price is below MSP. Rabi sowing of Moongbean has started and farmers have covered 0.45 lakh ha as on 26 November 2021- which is down by 25.00% same time last year. Normal area under rabi Moong, including summer acreage is 9.41 lakh ha. Sowing activities in southern states have disturbed due to rainfall.

Masur sowing recovered during last week and farmers have covered 10.94 lakh ha, down by 1.17% from 11.07 lakh ha last year till 26 th Nov 21. Normal area for Masur stands at 13.9 lakh ha. Area in M.P. increased by 46% while it decreased in Uttar Pradesh by 20% due to water logging condition in growing districts like Chitrakoot, Jhansi, Lalitpur. Area in Bihar is likely to decrease this year due to excess soil moisture in low land area. Quotes in the overseas market are steady and may decrease as the Australian crop is expected to hit the market by end of

November, which presents an alternative to imports from Canada. Agriwatch expects 1.5 lakh MT import from Australia.

Chana area has recovered during end Nov and farmers have covered 70.01 lakh ha against 65.21 lakh ha last year as on 27th Nov-2021. It is 7.36 % higher than last year. Prices are steady as supply side is at comfortable level. More down side movement seems limited as demand is yet to pick up. Chana in Delhi market is ruling near 5100-5200. If demand improves, slight recovery is expected. The distribution of free Chana till March -2022 may cap uptrend in the cash Chana market.

Global Market Updates:

The harvesting of pulses winter crop in Australia is running smoothly and is helping in meeting the strong demand in the global market despite the low availability of containers. As per the latest updates by Pulses Australia, the prospect for export from Australia is very good because of low production in Canada this year. Indian buyers were reluctant to buy in volume from Canada in the beginning of Nov. as they were aware of the bumper Australian crop. The production estimates for the Australian pulses has been published. As per the latest estimates Australian would harvest 8.44 lakh MT Chickpeas in 2021-22 (Abares estimate) while Pulses Australia sees it at 8.70 lakh MT. The 10 years production average is 7.89 lakh MT. Chickpeas availability in the global market would increase and it may ensure stability in price in the global market.

As per the latest Abares estimate Lentils production in Australia pegged at 6.39 lakh MT in 2021-22. The Pulses Australia sees it at 7.10 lakh MT. The 10 year's average production for Lentils is 4.24 lakh MT. Indian buyers may take interest in Australian Lentils. No deals has been struck so far. However, containers issue and higher freight would keep the import costing high in 2022 too. Major growing states like Queensland and northern NSW, containers availability is still low, and no path to bulk export exists because shipping slots are fully booked. This means scope for immediate export in bulk volume is limited. Prices have come down to a certain extent and growers may prefer to hold stock for better price.

The Field Peas production in Australia may decrease from 10 years average of 2.8 lakh MT to 2.5 lakh MT in 2021-22, as per the latest fig. published by Abares. Australia Pulses sees it at 3.20 lakh MT. Export demand for the Australian Peas may increase as availability in Canada is down while prices are ruling higher. Malaysia & China would continue to import peas from Australia.

Agriculture and Agri Food Canada (AAFC) has finalised the production of lentils in Canada at 18.02 lakh tonnes for 2021-22 as per recent November reports. Production is lowered by 10.66 lakh tonnes from last year's production of 28.68 lakh tonnes.

Field peas import in Spain increased by 268 % to 58127 MT in Sep-2021, as per the latest update by Eurostat data. Spain had imported 15778 MT in Aug. Total import from Jan to Sep reached at 116257 MT against 132195 MT last year same time. Russia supplied 49970 MT in Sep, followed by Ukraine at 7591 MT.

As per the latest update by Statistics Canada, Green Peas export from Canada declined in Sep-2021 to 9890 MT against 17437 MT in Aug. Canada has exported total 27327 MT during the marketing year. It is down by 29% from

last year till Sep. The UAE was the biggest importer, buying 3,573 MT, followed by Colombia, taking 2,184 MT and Philippines at 865 MT.

So far during this marketing year added to a weaker trend, with green pea export shipments from Canada were well down, plunging relative to the previous month in September, judging from available statistics from Statistics Canada. Export sales during the month totaled 9,890 metric tons (MT), down from 17,437 MT the previous month. This boosted shipments so far during the marketing year to 27,327, down 29% last year. United Arab Emirates was the biggest consumer, buying 3,573 MT. Colombia was the second most important importer taking 2,184 MT, followed by Philippines at 865 MT.

The IGC is going to include Lentils, Chickpeas and Dry beans in the Council's definition of grains under Article 2(1) (e) of the grains Trade Convention. This means that now the IGC secretaria will expand its market information for Pulses. Actually, pulses trades are continuously increasing throughout the world and has expanded with good pace and reached at 16 to 17 million MT in last 5 years. Right now the IGC is providing updates on Pulses trade and production estimates in the Grain Market Report on a bimonthly basis. Apart from it S&D balances are published for major exporters for Pulses like Lentils, Dry Peas and Chickpeas. Now FoB prices matrix too would be included.

Global Lentils market continues to trade under pressure. Indian buying is limited while bumper crop in Australia has increased the pressure on Canadian Lentils. There is a gossip in the market that Indian importers had imported Lentils in May-June taking advantage of low duty and now they are selling it at cheaper price, asking prices for Canadian origin product. Pressure may continue as long as India remains out of the Canadian market. Lentils stock at Indian ports are said to be around 3.75 lakh MT. Apart from it local market has stock of 4 lakh MT. So, the available stock is sufficient to meet the requirement for four months. In March new local crop would be available. So, the urgency of buying at the higher cost has mitigated.

Lentils production in Canada is expected to decline by 37% to 1.8 MMT this year due to lower yield received in Western Canada due to drought like condition during flowering to maturity stages. Red Lentils production may decline to 1.3 MMT this year. The share of green Lentils may be 0.3 MMT out of total production. Despite lower production total supply would decrease by 28% due to higher carrying stock. However, export too would decrease by 18% to 1.9 MMT in 2021-22. Average price for the year may hover in the range of \$1050 per MT.

Lentils production in the US is expected to decline by 31% to 0.23 Mt in 2021-22. Despite higher area coverage production would decrease due to the low yield realization and higher abandonment. US may export 2 lakh MT Lentils in 2021-22. The major buyers are EU, Canada, India and Mexico.

Dry Peas production in Canada is expected to decline by 45% to 2.52 MMT in 2021-22 due to lower yield realized in the western Canada. The main growing states like Alberta and Saskatchewan. These two states would contribute 2.3 MMT. Canada had produced 4.59 MMT last year. Yield has decreased from 2.73 to 1.68 tonne per ha this year. As crop size is lower than last year by 45%, export are expected to decline to 2.3 MMT from 3.58 MMT last year. Total supply would decline from 4.91 to 3.09 MMT this year

Weekly Outlook: -Pulses are likely to trade steady to slightly firm in next week.

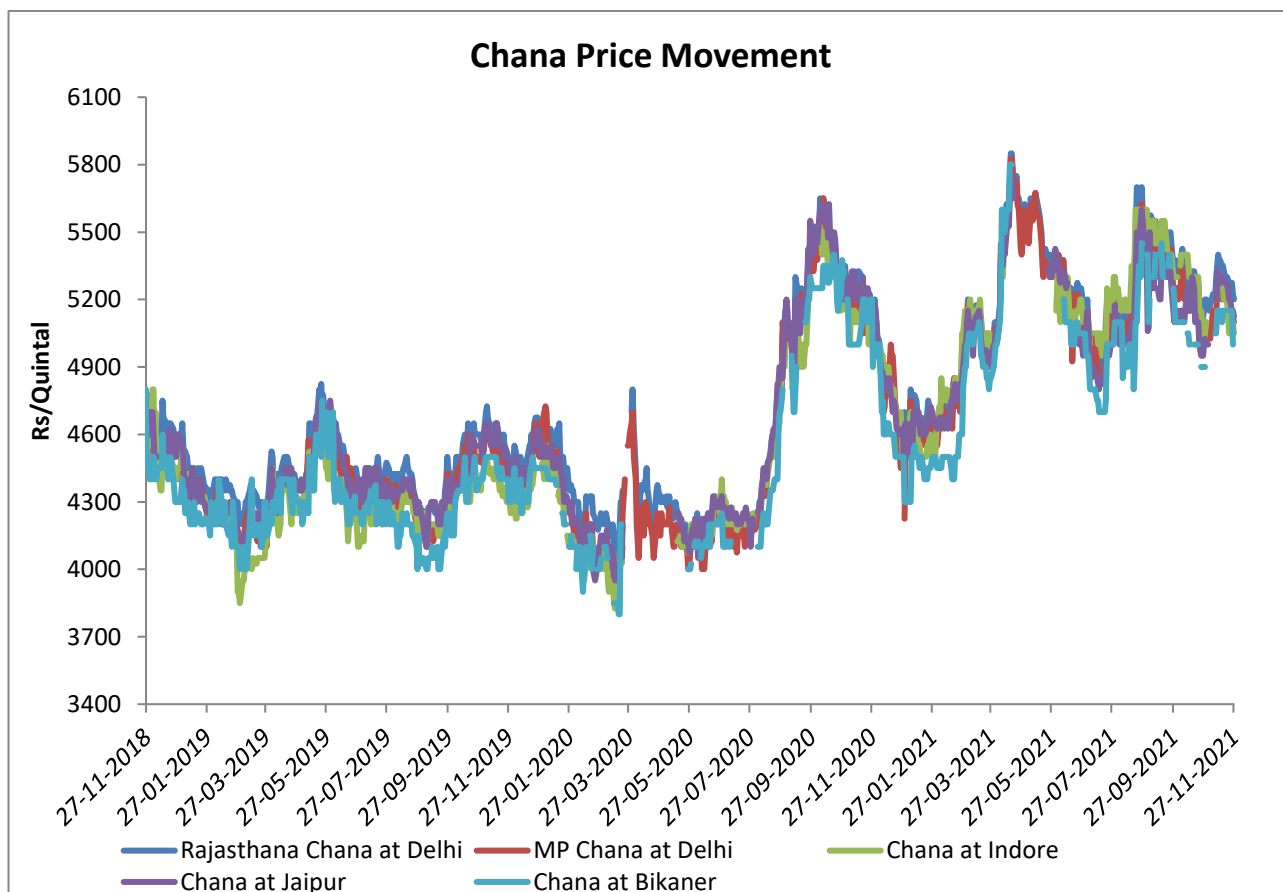

Pulses-Wise Scenario:

Chana

Current Scenario:

Chana cash market traded down by 1.41% last week from Rs 5325 to Rs.5250 in Delhi market. Market may stay steady at the current level or Chana cash market is likely to improve with increasing demand. Some states will distribute 1 kg Chana with free ration till March-22 so it will also cap any chances of uptrend in Chana cash market. Sowing has started and farmers have covered 70.01 lakh ha so far against 65.21 lakh ha last year as on 26 Nov 2021. Right now demand is weak and millers are buying as per their need only. Also new contract for Chana is suspended in futures market. Despite hope for recovery soon, Nafed have ample stock to control the price. Release by nafed is likely to continue till new crop comes in the market and it would cap any spike in the cash market. The overall tone seems steady to weak in the short term.

Import flow would remain restricted as duty plus cess is 60%. Import flow may continue from the least developed countries as they enjoy benefit of zero duty. As per private source, around 15,926 MT of Chana has been imported in August month. Following graph illustrates chana price movement in different markets:

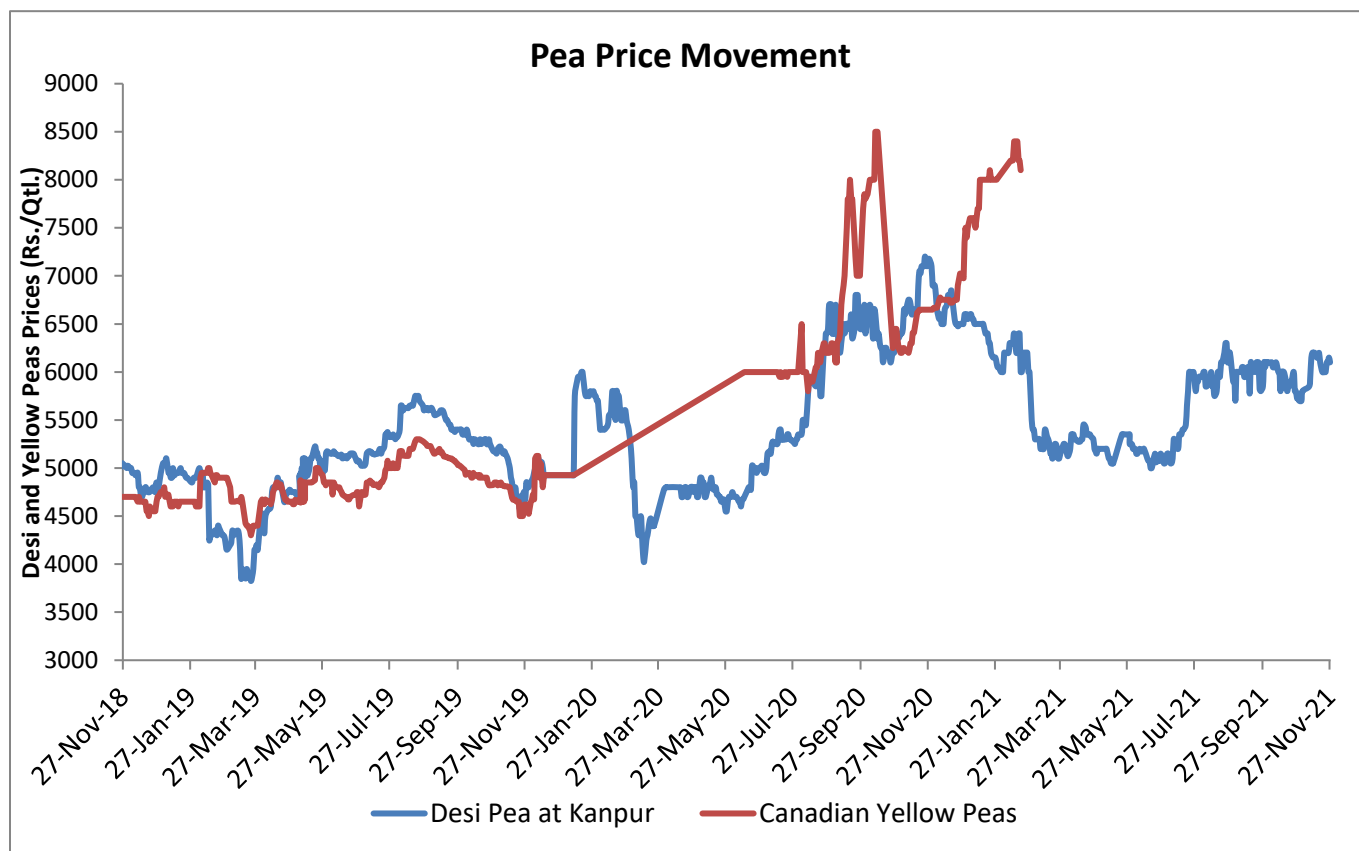

Peas (Matar):

Market Recap:

Peas prices have increased by 0.74% to Rs. 6075 from Rs. 6120 under the week under review in Kanpur market. As import is not allowed, stock in the domestic market is depleting fast. Stocks are either with stockists or with traders. 100% of Harvesting has completed in Canada but import is not possible due to the import restrictive policy by India. In Canada production of Peas is expected to be 25.27 Lakh tonnes this year against last year's production of 45.94 lakh tonnes. Australia is expected to harvest 2.5 LMT of peas in 2021-22 against last year's production of 2.94 LMT as per latest updates by ABARES. Govt is not going to allow peas import in the near to medium term. Overall tone remains firm.

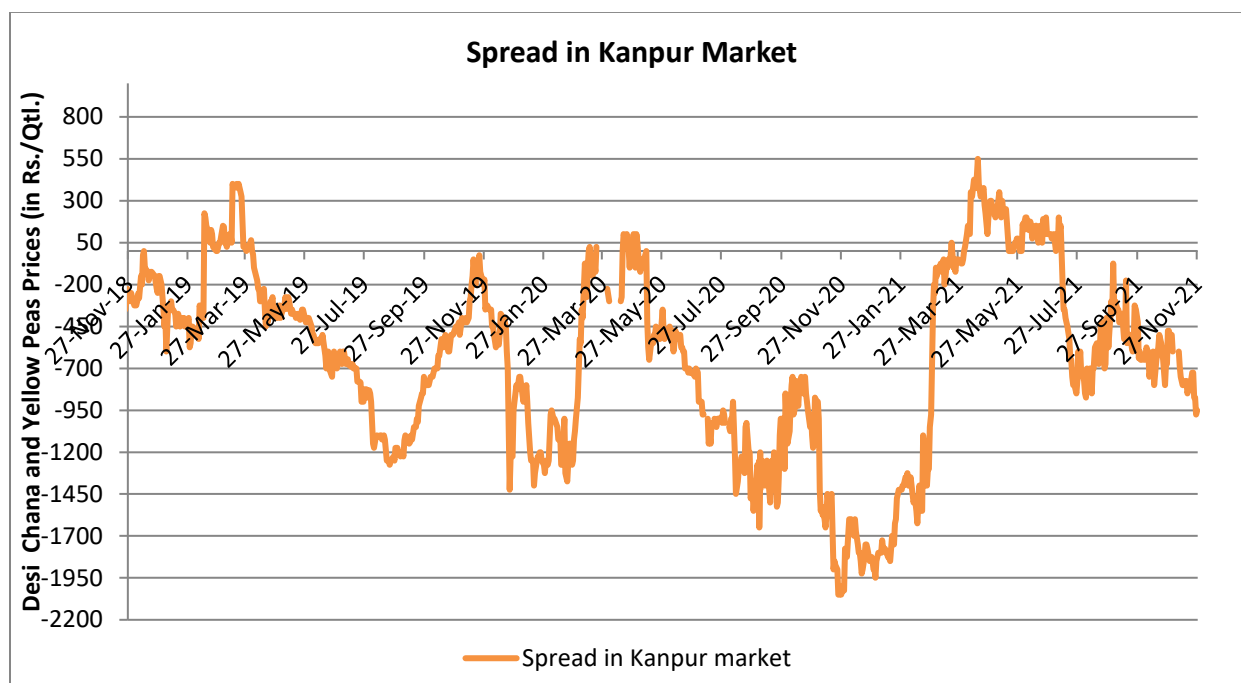

Following chart shows price movement in various markets:

Current Market Dynamics & Outlook: In Kanpur market peas was quoted at Rs 6000-6150 per qtl last week. In Mumbai market, there was no quote for yellow peas as stock has been exhausted. There is no quotes for imported peas as availability is almost nil.

Spread With Chana:

Spread between Chana and Peas, at Kanpur market continued to remain in negative zone. Gap has been increased by Rs 50 to Rs. 855 from previous Rs. 805. Spread is expected to remain in the negative zone in coming week too on relative movement in Chana prices. Overall outlook seems steady to slightly firm in the near term.

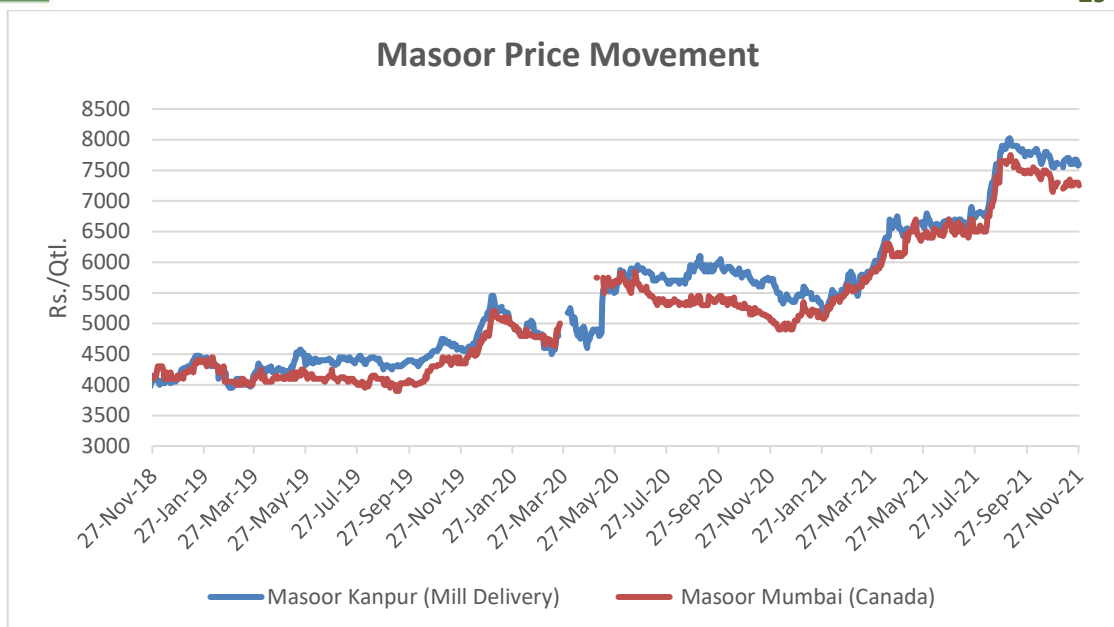

Lentils (Masoor):

Market Recap:

In Kanpur markets prices of Masur were steady at Rs 7640 per quintal. Imported Masoor at Mumbai is available at Rs. 7,250-7,300/qtl. The sowing of Masur has entered into last phase now and there is a fear in the market that the area may decrease from last year by 5-8%. Despite, Favorable weather conditions area in Uttar Pradesh and Bihar is down by 11% & 22% respectively. Even in the West Bengal area is down by 4%. However, among major growing states like Madhya Pradesh area is up by 16% to 4.61 lakh ha. It may touch 5 lakh ha this year by 15th Dec-2021. Farmers have covered 10.94 lakh ha so far against 11.07 lakh ha last year. The normal area under Masur is 13.90 lakh ha. As doubt regarding sowing still persists in Uttar Pradesh and Bihar as fields were underwater in both states at the beginning of the sowing. The next 15 days is very crucial from the sowing point of view.

Current Scenario:

Prices are expected to remain steady to firm in the coming week as demand for Masoor is low due to higher prices and availability of other pulses at cheaper rates. Prices will be dependent upon how sowing progresses further.

Red colour shows the imported Masur price

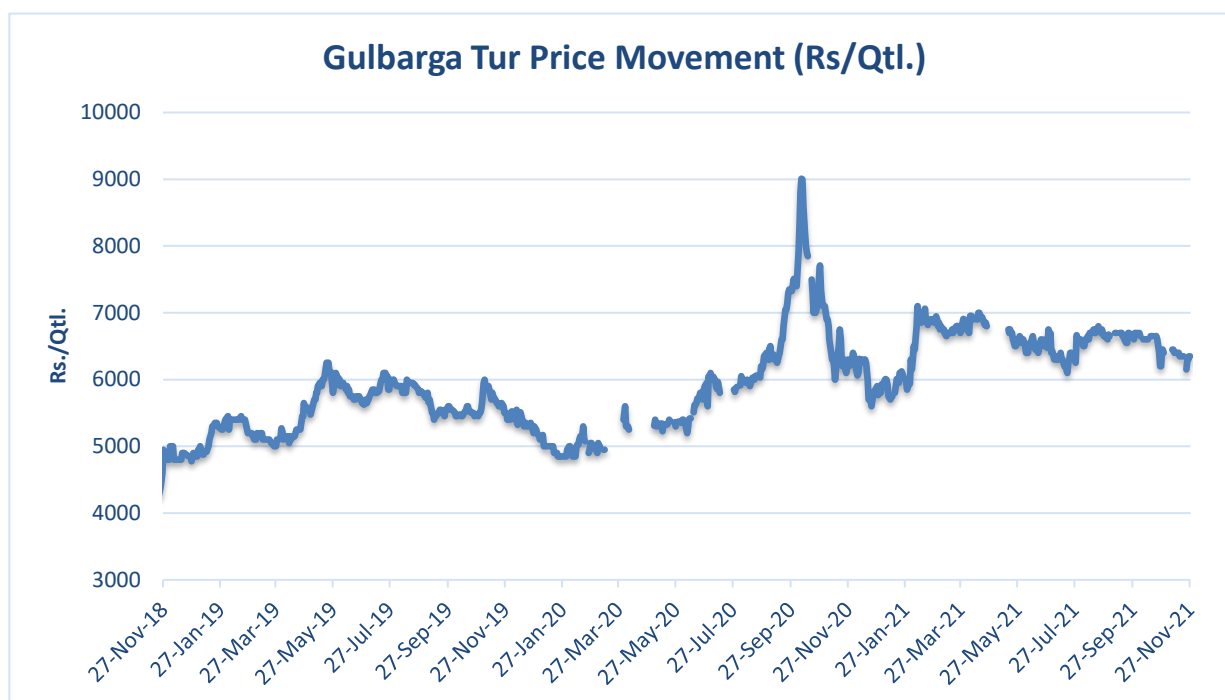

Market Outlook: Prices may trade steady to firm.

Pigeon Pea (Tur/Toor):

Harvesting and arrivals of new Tur crop got delayed due to rainfall and cloudy weather from last few weeks at producing belt and forecast of rain for next week will affect quality of crop. Tur crop is reportedly affected in some districts of Karnataka. However Gulbarga, which is major Tur producing district, did not received rains but there crop is affected due to excessive fog condition. Quality loss too is possible in South India. The crop condition is good in other states barring some districts of Maharashtra, Karnataka and Andhra Pradesh. So the likely losses may be mitigated by good crop conditions in major growing belts. Prices of Tur may move slightly up due to delayed arrivals to a certain extent in the near term. Tur prices in Gulbarga market are traded in the range of Rs. 6300-6350 per quintal. Lemon Tur is being offered at Rs 5,850 – 6,000 per quintal in Mumbai market.

Current Market Dynamics & Outlook:

Lemon Tur is available at Rs.5,850-6,000/qtl at Mumbai port. As per trade sources, India has imported 1,66,292 MT in Oct. So far India has imported total 4,11,426 MT from April to Oct-2021. Supply side is at comfortable level. So any spike in cash market is unlikely. Range bound movement is expected this week.

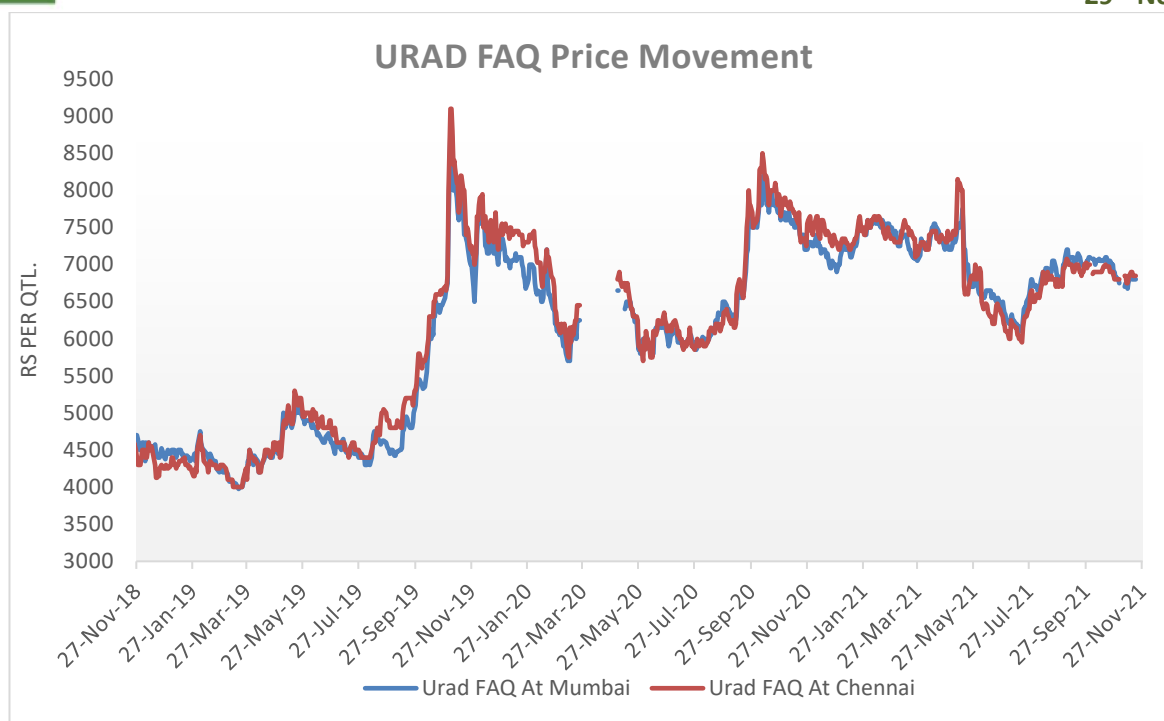

Black Matpe (Urad):

Urad sowing in major Rabi growing states like Andhra Pradesh and Tamil Nadu got hampered due to excessive rains in South India for the last few weeks. Continuous rains have raised concerns regarding sowing coverage this rabi season in South India. The major Urad growing districts in Andhra Pradesh are Krishna, Kurnool, Prakasham Srikakulam, Guntur, Vizianagaram and Godavari. In these districts, there is water logging in many fields, so it would be very difficult to estimate losses until the weather gets clear. It may drive Urad prices up in the coming days. In current condition 20-30% losses can be seen. *FAQ Urad is being traded at Rs. 6800- 7000 in Mumbai market while in Chennai local crop is being traded at Rs. 6850-6975 per quintal. If demand improves then prices may recover. Myanmar is offering Urad FAQ at \$915 and SQ at \$1020.*

Current Market Dynamics & Outlook:

Major Urad crop comes in kharif season. As availability in Myanmar too is low and so any big decline is not expected before the new crop hits the market. India imported around 3,48,505 MT urad in from April to Oct-2021. Import is free now, so when parity turns in favour of India, the volume of import may increase.

Market Outlook: *Overall tone seems steady to slightly firm in the short term.*

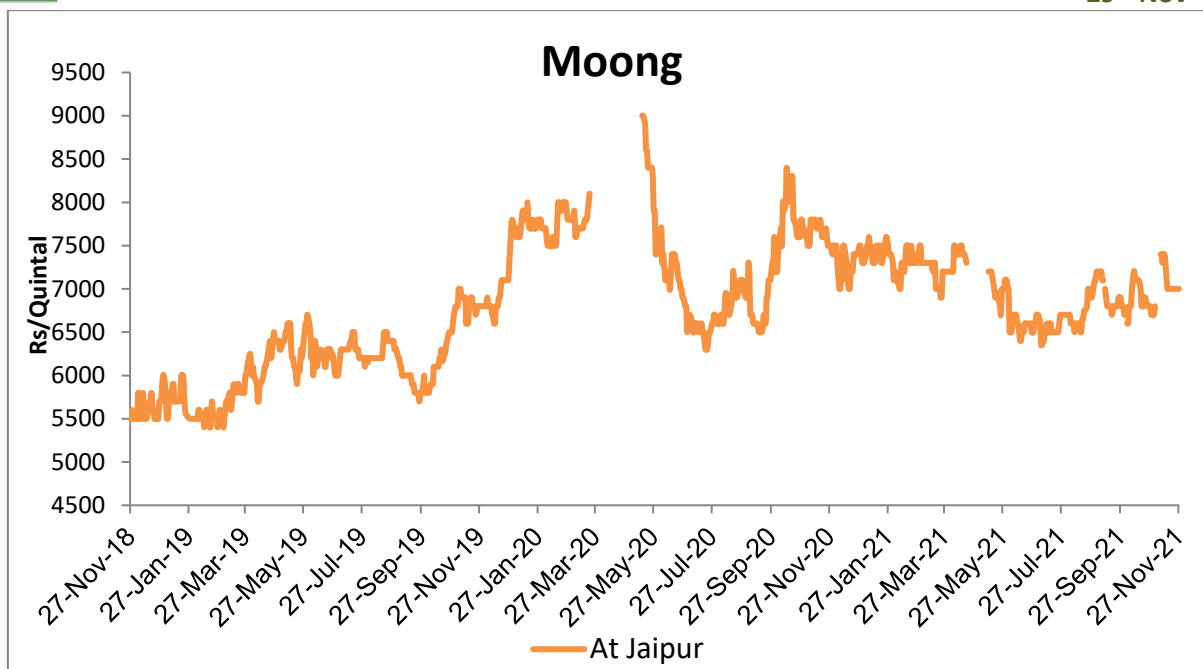

Green Gram (Moong):

Market Recap:

Moong has been sown on 0.45 lakh ha so far as compared to 0.60 lakh ha last year. Normal area for Moong including Rabi and summer stands at 9.41 lakh ha. Andhra Pradesh, Tamil Nadu and Telangana collectively covered 0.264 lakh ha till now. Sowing of Moong can be done till fortnight of the January so recent rains doesn't affect area much. Area will be covered later on when fields get dried up and will be ready for sowing. If weather conditions will be bad continuous in next month also then it may affect Rabi sowing of Moong. Moong traded at Rs 7000 per quintal in Jaipur market last week. Import flow would continue due to Moong being in the free import list till Dec-2021. Imports may continue to land at Indian ports till January 2022 as per the extended time frame for import. Myanmar is offering Moong Anna Shewar at \$930 and Moong Pedi Shewar at \$1000 and Pokako at \$980 per MT.

Market Outlook - Any unexpected rise in the cash market is unlikely at this point of time. The short term outlook seems steady to slightly firm in Moong.

Rabi Sowing Progress as on 26 Nov 2021

Rabi Pulses Acreage as on 26 Nov 2021
