Pulses Sector- Domestic Highlights:

All India Rabi pulses area is almost similar to last year as of now despite a good recovery was seen during last two weeks. Farmers have covered 129.74 lakh ha as on 10th Dec-2021. It was 129.28 lakh ha last year on 10th Dec-2020. Chana area is up by 2.44 % to 92.89 lakh ha against 90.68 lakh ha last year. Lentils is still down area too moved up by 4.86 % to 14.89 against 14.20 lakh ha. However, Urad area was down by 10.84 % to 3.70 lakh ha. Moong area too was down by 28.26 % to 0.88 lakh ha. Field peas area was down by 5.08 % to 8.60 lakh ha. The concern over Urad and field peas remains as it was, as sowing may continue hardly 10 to 15 days from now.

New arrivals of Tur in Karnataka and Maharashtra are expected to increase from the third week of December. The moisture level in the crop is high at 14 to 16 % against the normal of 11 to 12%. Demand is stable and mills and stockists are waiting for Tur having low moisture content. The report of crop loss in Karnataka is likely to be compensated by higher yields in Maharashtra. In Karnataka crop loss is expected to be 15-20%. On the other hand, crop in Maharashtra is good and yield may increase by 9-12%. In other states crop conditions are good so far. Prices should improve as the procurement may start in Karnataka soon. In Gulbarga market tur is being traded at Rs 6000-6350. It is up by 100 from the last week. Due to cloudy weather, high moisture level in air and lack of sunshine, crop in some patches of some districts of Maharashtra is infested with pest attack. But effect on yield is not much as weather condition is normal since last week.

Urad sowing in major Rabi growing states like Andhra Pradesh and Tamil Nadu is still late due to excessive rains that had happened in South India in the last few weeks. Few major growing districts of Andhra Pradesh have witnessed water logging in many fields, due to which 10-15% losses are expected. It may drive Urad prices up in the coming days. Farmers have covered 3.70 lakh ha area under Urad this year so far, down by 10.84 % from last year till 10th Dec 21. Sowing of Rabi Urad in South India is yet to pick up. Normal Rabi Urad area is 9.07 lakh ha. As sowing has got delayed, it may limit acreage increase by 4 to 5% despite attractive prices prevailing in the market. Urad price at Mumbai is ruling at 6950 while 6850 in Tamil Nadu. Prices have decreased by 100 as demand is low. It may improve again as soon as demand improves.

Rabi Moong has been sown on 0.88 lakh ha so far as compared to 1.23 lakh ha last year. Normal area for Moong for Rabi and summer crops combined stands at 9.41 lakh ha. Sowing of Moong can be done till first fortnight of the January so rains during early post-monsoon period are not likely to affect the overall acreage much. Area will be covered later on when fields get dried up and become ready for sowing. If weather conditions continue to remain poor throughout December, it may affect Rabi sowing of Moong. Prices of Moong improved slightly last week in expectation of demand from mills in the northern and central India. Prices in Jaipur market are ruling in the range of Rs. 6,400 to 6,900 depending on the quality of the crop. Steady tone may prevail in the Moong market.

As expected, area under Masur continued to recover smartly during the last week and it increased by 0.69 lakh ha to 14.89 lakh ha. It is up by 4.86 % from last year same time. Despite good recovery it may end up with last year's level, as some of Masur growing area in Bihar and West Bengal are still under water and sowing is not possible there. As the Masur sowing season has entered in last phase now, the pace of sowing may decline in the coming weeks. As weather conditions are good in U.P. and M.P., yield is expected to be normal. Decreasing temperature at night is good for the growth of standing crop. Prices of Masur have decreased by 100 to 7500 in Kanpur while it is being traded at 7300 in Mumbai. Price may stay steady to slightly down as quotes in Canada has decreased to \$986.50 per MT from the previous \$1030 during last two weeks.

Chana area continued to recover during the last week too and farmers have covered 92.89 lakh ha against 90.68 lakh ha last year as on 10th Dec-2021. It is 2.44 % higher than last year. Now the pace may decrease as area is bound to decrease in M.P. and Rajasthan due to higher usage of Chana land for Mustard this year. Prices are steady as supply side is at comfortable level. More down side movement seems limited as demand is yet to pick up. Chana in Delhi market is ruling near 5150-5250. If demand improves, slight recovery is expected. The distribution of free Chana till March -2022 may cap uptrend in the cash Chana market.

Global Market Updates:

The harvesting of pulses winter crop in Australia is running smoothly and is helping in meeting the strong demand in the global market despite the low availability of containers. As per the latest updates by Pulses Australia, the prospect for export from Australia is very good because of low production in Canada this year. Indian buyers were reluctant to buy in volume from Canada in the beginning of Nov. as they were aware of the bumper Australian crop. The production estimates for the Australian pulses has been published. As per the latest estimates Australian would harvest 8.44 lakh MT Chickpeas in 2021-22 (Abares estimate) while Pulses Australia sees it at 8.70 lakh MT. The 10 years production average is 7.89 lakh MT. Chickpeas availability in the global market would increase and it may ensure stability in price in the global market.

As per the latest Abares estimate Lentils production in Australia pegged at 6.39 lakh MT in 2021-22. The Pulses Australia sees it at 7.10 lakh MT. The 10 year's average production for Lentils is 4.24 lakh MT. Indian buyers may take interest in Australian Lentils. No deals has been struck so far. However, containers issue and higher freight would keep the import costing high in 2022 too. Major growing states like Queensland and northern NSW, containers availability is still low, and no path to bulk export exists because shipping slots are fully booked. This means scope for immediate export in bulk volume is limited. Prices have come down to a certain extent and growers may prefer to hold stock for better price.

The Field Peas production in Australia may decrease from 10 years average of 2.8 lakh MT to 2.5 lakh MT in 2021-22, as per the latest fig. published by Abares. Australia Pulses sees it at 3.20 lakh MT. Export demand for the Australian Peas may increase as availability in Canada is down while prices are ruling higher. Malaysia & China would continue to import peas from Australia.

Agriculture and Agri Food Canada (AAFC) has finalised the production of lentils in Canada at 18.02 lakh tonnes for 2021-22 as per recent November reports. Production is lowered by 10.66 lakh tonnes from last year's production of 28.68 lakh tonnes.

Field peas import in Spain increased by 268 % to 58127 MT in Sep-2021, as per the latest update by Eurostat data. Spain had imported 15778 MT in Aug. Total import from Jan to Sep reached at 116257 MT against 132195 MT last year same time. Russia supplied 49970 MT in Sep, followed by Ukraine at 7591 MT.

As per the latest update by Statistics Canada, Green Peas export from Canada declined in Sep-2021 to 9890 MT against 17437 MT in Aug. Canada has exported total 27327 MT during the marketing year. It is down by 29% from

last year till Sep. The UAE was the biggest importer, buying 3,573 MT, followed by Colombia, taking 2,184 MT and Philippines at 865 MT.

So far during this marketing year added to a weaker trend, with green pea export shipments from Canada were well down, plunging relative to the previous month in September, judging from available statistics from Statistics Canada. Export sales during the month totaled 9,890 metric tons (MT), down from 17,437 MT the previous month. This boosted shipments so far during the marketing year to 27,327, down 29% last year. United Arab Emirates was the biggest consumer, buying 3,573 MT. Colombia was the second most important importer taking 2,184 MT, followed by Philippines at 865 MT.

The IGC is going to include Lentils, Chickpeas and Dry beans in the Council's definition of grains under Article 2(1) (e) of the grains Trade Convention. This means that now the IGC secretaria will expand its market information for Pulses. Actually, pulses trades are continuously increasing throughout the world and has expanded with good pace and reached at 16 to 17 million MT in last 5 years. Right now the IGC is providing updates on Pulses trade and production estimates in the Grain Market Report on a bimonthly basis. Apart from it S&D balances are published for major exporters for Pulses like Lentils, Dry Peas and Chickpeas. Now FoB prices matrix too would be included.

Global Lentils market continues to trade under pressure. Indian buying is limited while bumper crop in Australia has increased the pressure on Canadian Lentils. There is a gossip in the market that Indian importers had imported Lentils in May-June taking advantage of low duty and now they are selling it at cheaper price, asking prices for Canadian origin product. Pressure may continue as long as India remains out of the Canadian market. Lentils stock at Indian ports are said to be around 3.75 lakh MT. Apart from it local market has stock of 4 lakh MT. So, the available stock is sufficient to meet the requirement for four months. In March new local crop would be available. So, the urgency of buying at the higher cost has mitigated.

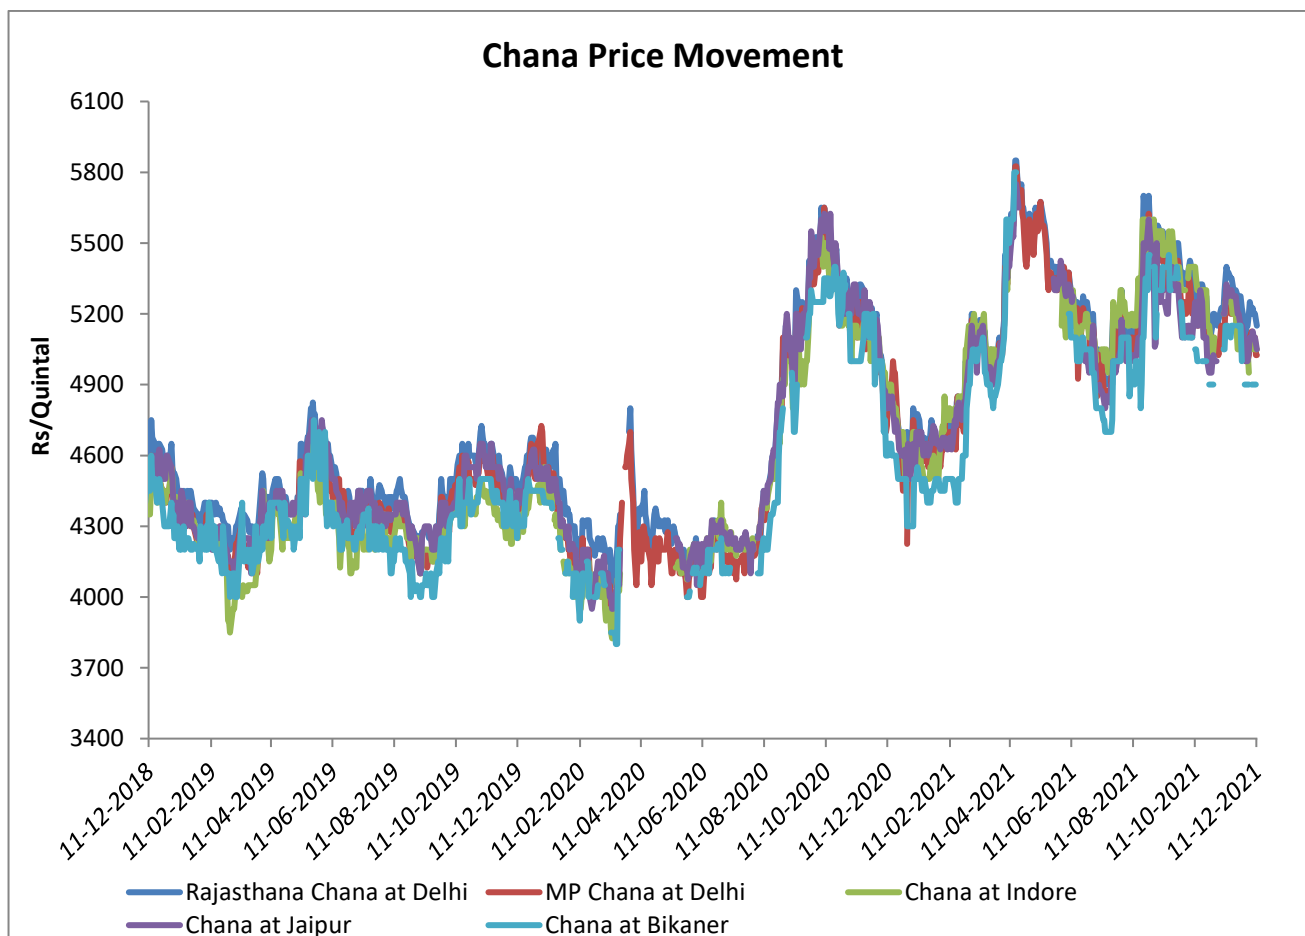

Lentils production in Canada is expected to decline by 37% to 1.8 MMT this year due to lower yield received in Western Canada due to drought like condition during flowering to maturity stages. Red Lentils production may decline to 1.3 MMT this year. The share of green Lentils may be 0.3 MMT out of total production. Despite lower production total supply would decrease by 28% due to higher carrying stock. However, export too would decrease by 18% to 1.9 MMT in 2021-22. Average price for the year may hover in the range of \$1050 per MT.

Weekly Outlook: -Pulses are likely to trade steady to slightly firm in next week.

Pulses-Wise Scenario:
Chana
Current Scenario:

Chana cash market traded up by 0.39% last week from Rs.5170 to Rs.5190 in Delhi market. Market may stay steady at the current level or Chana cash market is likely to improve with increasing demand. Area under Gram may decrease this year despite a good recovery during last two weeks. As of now farmers have covered 92.89 lakh ha against 90.68 lakh ha last year as on 10th Dec 2021. Area coverage may end up with 106 to 108 lakh ha against 116 lakh ha last year. Right now demand is weak and millers are buying as per their need only. Also new contract for Chana is suspended in futures market. Despite hope for recovery soon, Nafed have ample stock to control the price. Release by nafed is likely to continue till new crop comes in the market and it would cap any spike in the cash market. The overall tone seems steady to weak in the short term.

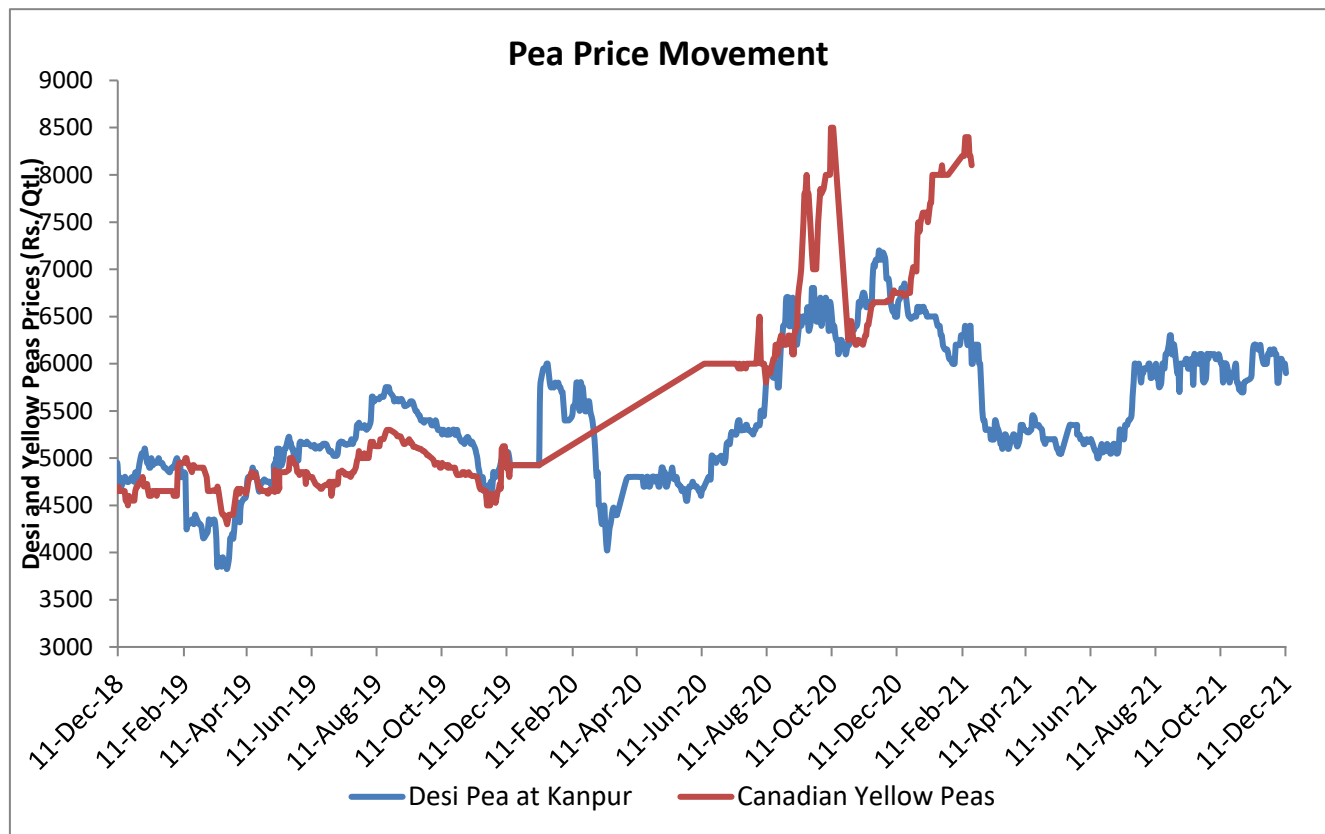

Import flow would remain restricted as duty plus cess is 60%. Import flow may continue from the least developed countries as they enjoy benefit of zero duty. As per private source, around 46,548 MT of Chana has been imported in October month. Following graph illustrates chana price movement in different markets:

Peas (Matar):
Market Recap:

Peas prices have slipped by 0.17% to Rs. 6000 from Rs. 6016 under the week under review in Kanpur market. As import is not allowed, stock in the domestic market is depleting fast. Stocks are either with stockists or with traders. 100% of Harvesting has completed in Canada but import is not possible due to the import restrictive policy by India. In Canada production of Peas is expected to be 25.27 Lakh tonnes this year against last year's production of 45.94 lakh tonnes. Australia is expected to harvest 2.5 LMT of peas in 2021-22 against last year's production of 2.94 LMT as per latest updates by ABARES. Govt is not going to allow peas import in the near to medium term. Overall tone remains firm.

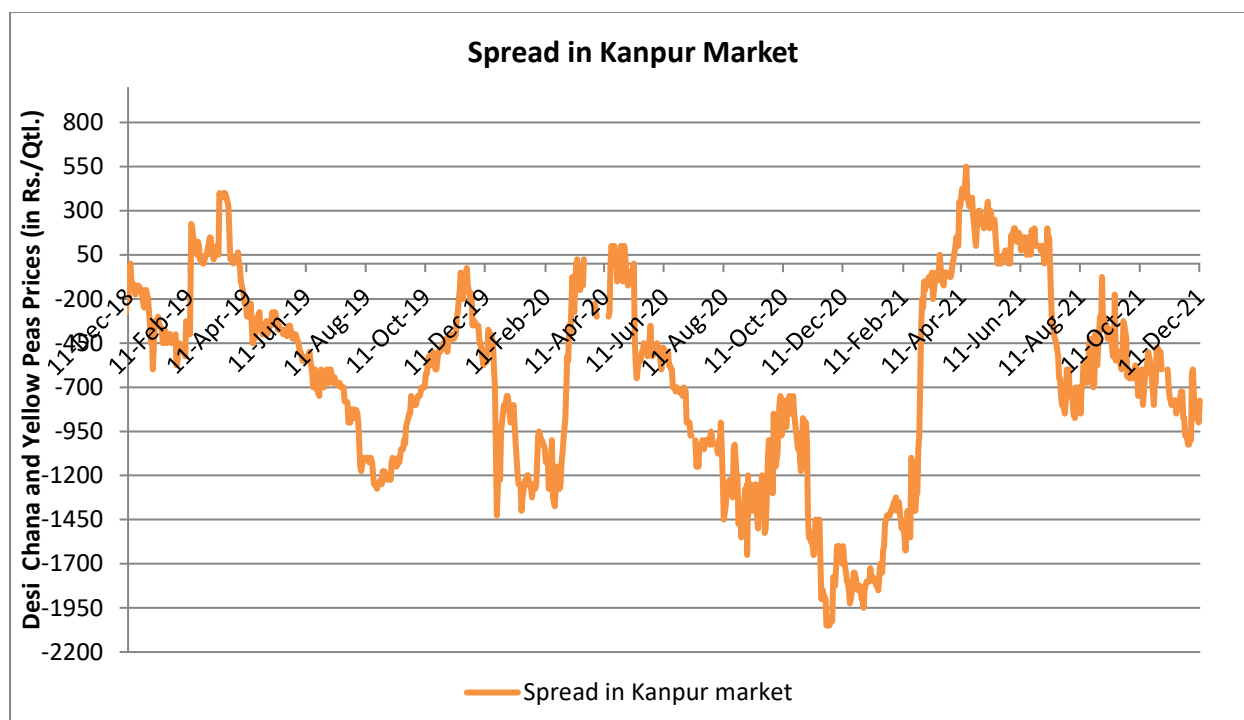

Following chart shows price movement in various markets:

Current Market Dynamics & Outlook: In Kanpur market peas was quoted at Rs 5800-5950 per qtl last week. In Mumbai market, there was no quote for yellow peas as stock has been exhausted. There is no quotes for imported peas as availability is almost nil.

Spread With Chana:

Spread between Chana and Peas, at Kanpur market continued to remain in negative zone. Gap has been increased by Rs 30 to Rs. 840 from previous Rs. 870. Spread is expected to remain in the negative zone in coming week too on relative movement in Chana prices. Overall outlook seems steady to slightly firm in the near term.

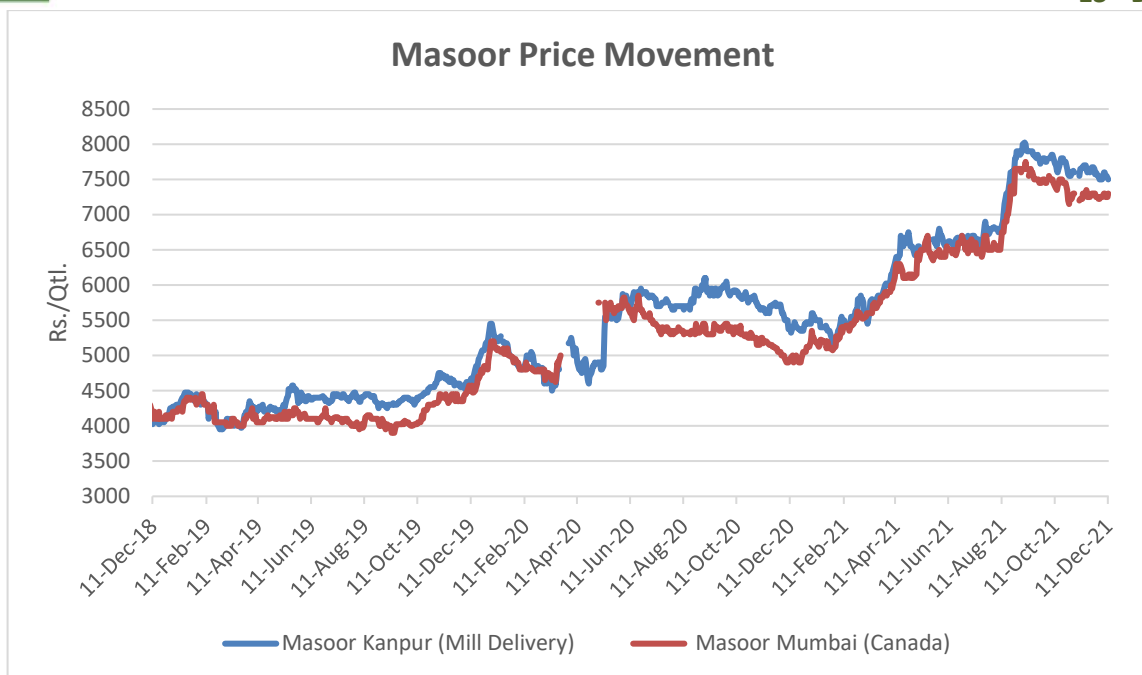

Lentils (Masoor):

Market Recap:

In Kanpur markets prices of Masur was traded in the range of Rs 7500-7600 per quintal. Imported Masoor at Mumbai is available at Rs. 7,250-7,300/qtl. As expected, area under Masoor continued to recover smartly during the week under review and it increased by 1.86 lakh ha last week to 14.88 lakh ha. It is up by 4.84 % from last year same time. Despite good recovery it may end up with last year's level, as some of Masoor growing area in Bihar is still under water and sowing is not possible there. As the Masoor sowing season has entered in last phase now, the pace of sowing may decline in the coming weeks. Overall sentiment remains steady to firm as the cost of import is higher so masoor may continue to trade at higher level.

Current Scenario:

Prices are expected to come down as Canada have reduced quotes from previous \$1030 to \$986 per MT basis Indian port.

Red colour shows the imported Masur price

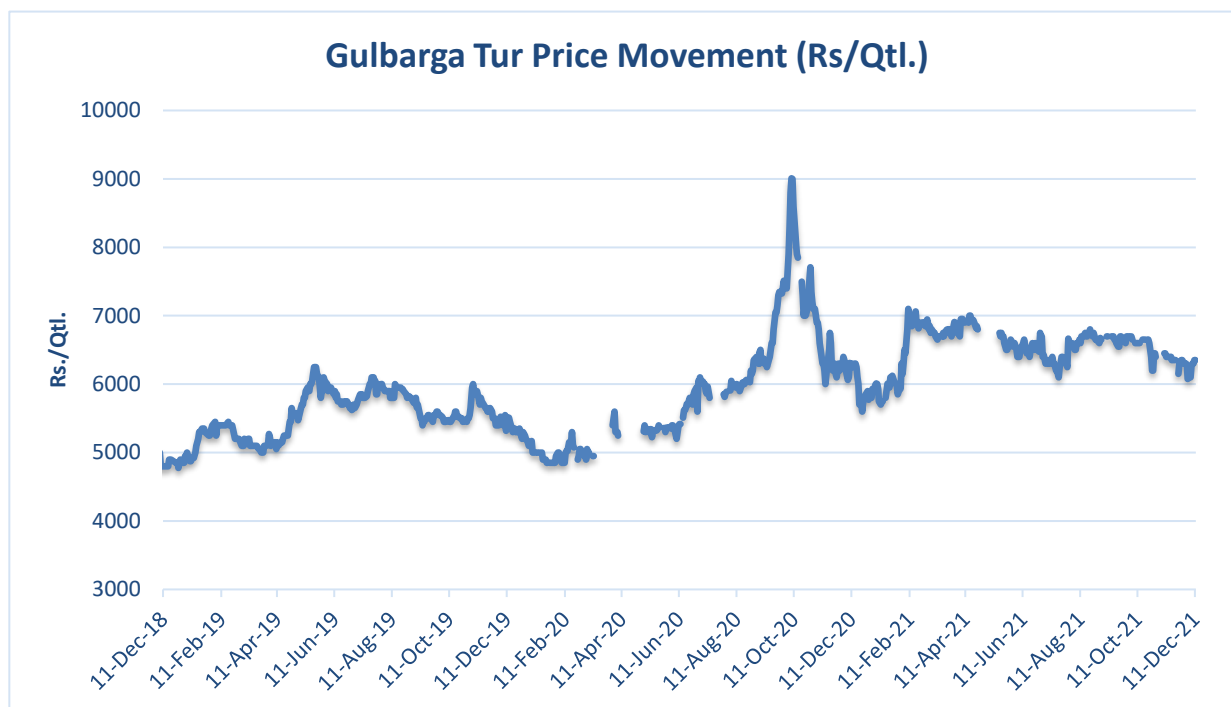

Market Outlook: Prices may trade steady to weak.

Pigeon Pea (Tur/Toor):

Arrival of Tur has increased in Solapur and crop quality is good. Right now moisture content is high. The moisture level in the crop is high at 18 to 20% against the normal of 12 to 13%. Demand is stable and mills and stockists are waiting for Tur with lower moisture content. The report of crop loss in Karnataka is likely to be compensated by higher yield in Maharashtra. In Karnataka crop loss is expected to be 15-20%. Crop in Maharashtra is good and yield may increase by 12-15%. Continuous supply is there from African countries. Imported Tur in Mumbai is being traded at Rs 5950- 6100. In Gulbarga market it is being traded at 6300-6350. Karnataka Government has decided to commence procurement drive from 15th of Dec-2021. They has fixed procurement quantity at 2.5 lakh MT and each farmer would sell 15 Qtl. Tur at MSP. The procurement drive would continue till 15th of March-2022.

Current Market Dynamics & Outlook:

Lemon Tur is available at Rs.5,950- 6,100/qtl at Mumbai port. As per trade sources, India has imported 1,66,292 MT in Oct. So far India has imported total 4,11,426 MT from April to Oct-2021. Supply side is at comfortable level. So any spike in cash market is unlikely. Range bound movement is expected this week.

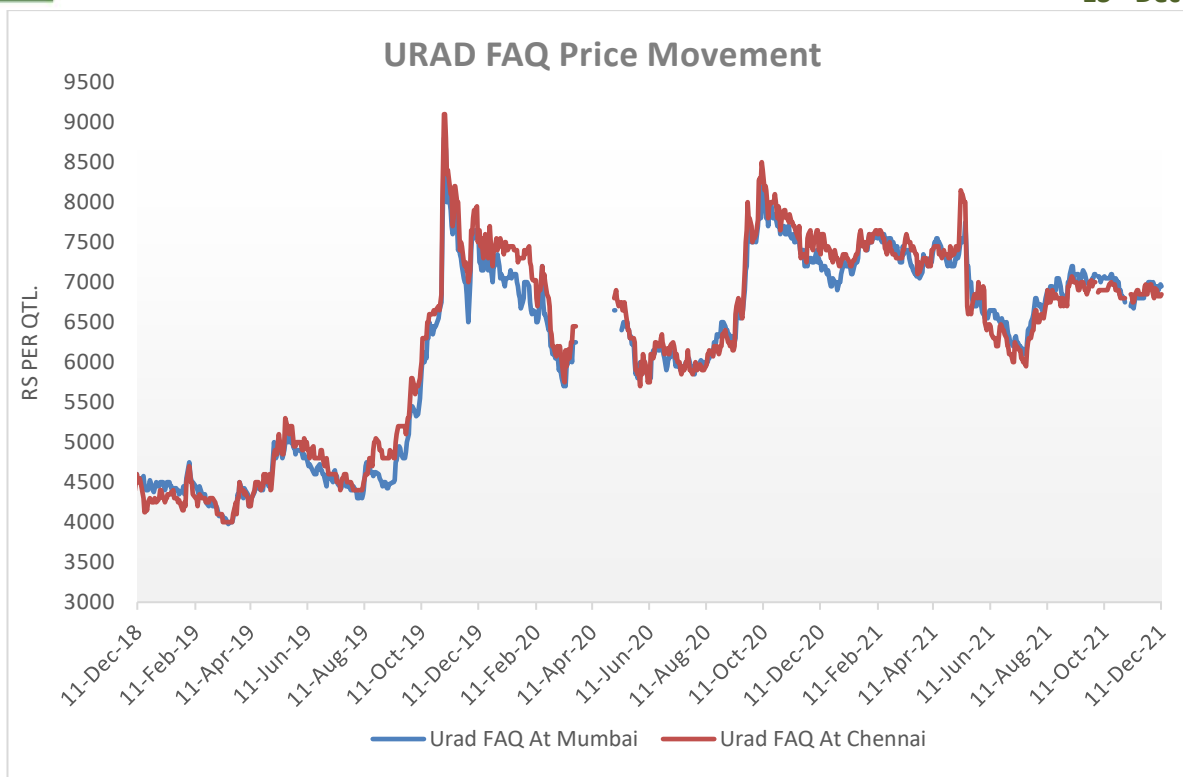

Black Matpe (Urad):

Farmers have covered 3.70 lakh ha area under Urad this year so far, down by 10.8% from last year till 10th Dec 21. Sowing has got delayed by 15 days and sowing will be done by end of December. As sowing has got delayed, it may limit acreage increase by 4 to 5% despite attractive prices prevailing in the market. Import flow too has been low amid tight supplies and quality loss in the Kharif season. Also demand is weak. So, prices may trade steady this week too and may improve slightly in the coming weeks. FAQ Urad is being traded at Rs. 6900-7000 in Mumbai market while in Chennai local crop is being traded at Rs. 6825-6900 per quintal. If demand improves then prices may recover. Myanmar is offering Urad FAQ at \$865 and SQ at \$965.

Current Market Dynamics & Outlook:

Major Urad crop comes in kharif season. As availability in Myanmar too is low and so any big decline is not expected before the new crop hits the market. India imported around 3,48,505 MT urad in from April to Oct-2021. Import is free now, so when parity turns in favour of India, the volume of import may increase.

Market Outlook: Overall tone seems steady to slightly firm in the short term.

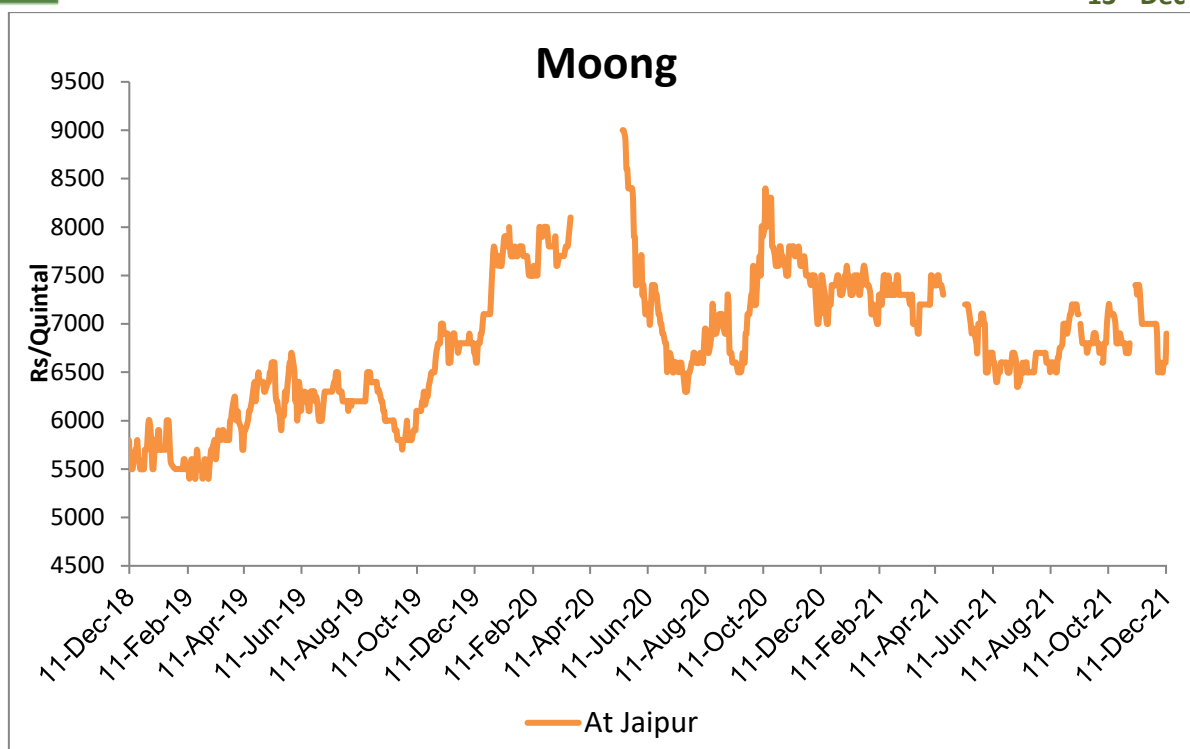

Green Gram (Moong):

Market Recap:

Rabi Moong has been sown on 0.88 lakh ha so far as compared to 1.23 lakh ha last year. Normal area for Moong for Rabi and summer crops combined stands at 9.41 lakh ha. Sowing activities in southern states have disturbed due to rainfall. Sowing of Moong can be done till fortnight of the January so recent rains doesn't affect area much. Area will be covered later on when fields get dried up and will be ready for sowing. If weather conditions will be bad continuous in next month also then it may affect Rabi sowing of Moong. Prices in Jaipur market are ruling in the range of 6500 to 6900, depending on the quality of the crop. Mills are not buying in bulk volume as demand for dal is weak. Import flow would continue due to Moong being in the free import list till Dec-2021. Imports may continue to land at Indian ports till January 2022 as per the extended time frame for import. Myanmar is offering Moong Anna Shewar at \$880 and Moong Pedi Shewar at \$1000 and Pokako at \$980 per MT.

Market Outlook - Any unexpected rise in the cash market is unlikely at this point of time. The short term outlook seems steady to slightly firm in Moong.
