Commodity-wise Domestic, International Prices and Arrivals at Different Centers

Pulses Sector- Domestic Highlights:

All India Rabi pulses area was down by 0.92 % to 152.62 lakh ha as on 31st Dec-2021 despite a good recovery was seen during the last four weeks for Masur & Chana. Farmers have covered 107.69 lakh ha under Chana so far, up by 1.90 % from last year. Lentil area continues to recover and moved up by 1.64 % to 16.76 against 15.49 lakh ha. However, Urad area was down by 11.96 % to 5.66 lakh ha. Moong area too was down by 32.41 % to 2.29 lakh ha. Field pea area was down by 4.99 % to 9.61 lakh ha. The concern over Urad, Moong and field pea remains same as it was before, as sowing may continue hardly 10 days from now except Moong. Rabi Moong area is likely to recover as the sowing duration is longer and May continue till Jan-2022. By the end of Feb, summer sowing for Moong starts.

Tur crop continues to trade under pressure with increasing arrivals in major markets of Maharashtra and Karnataka. Tur quality is normal to good and the pace of arrival defies the concern of major losses due to Nov-Dec rains. Import flow continues from South African countries and Myanmar. New crop in Myanmar is being quoted at \$725 and it may decrease below \$700 as the new crop is almost ready for harvesting in Myanmar. The crop condition is good and the size of the crop is said to be around 2.5 to 2.75 lakh MT. As import would continue, supply side in India is likely to increase further in coming weeks. Lemon Tur at Mumbai port is being sold at 5800 while desi Tur in Gulbarga market is being offered at 6100. The declining trend might be capped due to the procurement drive. As prices are ruling below MSP, Nafed and other state agencies would be able to procure Tur in large quantity and it may push up prices to the MSP level of 6300 once again. As new crop have started coming in in bulk volume, supply side would ease. India would harvest of 40 lakh MT Tur this year. Import would continue till June.

Sensing the tight supply, Government has extended the free import policy of Urad with bill of lading dated on or before 31st Mar 2022 and import should be cleared from customs on or before 30th June 2022. This may help check the spiralling prices in the domestic market to some extent. Expectation of good import volume from Myanmar from the new crop, hardly one and a half month away from now and decreased quotes there (\$830 for FAQ & 930 for SQ) within a week have put pressure on the domestic markets. It may decrease further by \$40-50 in the coming months. Prices of Urad in Mumbai have decreased by 2.60% to 6460 for FAQ while SQ in Delhi decreased by 2.76% to 7130. Import flow may continue to June-2022 and it would ease supply side. So, weak tone may prevail in the cash Urad market despite the low Rabi area coverage. Farmers have covered only 5.66 lakh ha, down by 11.76% so far. It is around 62.40 % from the normal area coverage. Steady to slightly firm tone might be seen this week as the Rabi area coverage is below expectation. Total crop size might decline by 50 to 60 thousand MT from the previous estimate of 23.19 lakh MT (Kharif & Rabi combined).

The government has allowed the import of moong (green gram) to continue without quantitative restrictions under "free" category until March 31 next year. Besides, importers can continue to take physical delivery until June 30, 2022 if bill of lading is issued by March. In May 2021, Tur, Urad and Moong has kept into free import regime category till 31st October 2021. Later on this limit got extended for Tur and Urad. Now all the three pulses including Moong has included in free import again till 31st March 2022. Rabi Moong has been sown on 2.29 lakh ha so far as compared to 3.39 lakh ha last year, down by 32.41%. Normal area for Moong for Rabi and summer crops combined stands at 9.41 lakh ha. Supply side is at comfortable level and prices are expected to stay at current level (6200-6700). In Jaipur market prices have decreased to 6500 from 7000. Good crop condition in Myanmar and good availability in local market and weak demand have put pressure on Moong price. Prices have improved

with the procurement drive by 5.14 % to 6560. Range bound movement is expected this week despite the low area coverage. Recovery may continue for Rabi area.

As expected, area under Masur continued to recover smartly during the past three-four weeks and it increased by 0.27 lakh ha to 16.76 lakh ha. It is up by 1.64 % from last year same time. There is reports from Uttar Pradesh and Bihar that pea farmers are shifting some area from pea to Masur. As the Masur sowing season is almost over now, the sowing season may end with 17 lakh ha. Crop condition is good so far with higher area coverage, production size may improve from 11.91 to 13 lakh MT ,given the normal weather condition so far. Decreasing temperature at night is good for the growth of standing crop. Prices of Masur have decreased by 0.06 % to 7315 in Kanpur. Masur price may come down to 7100 in coming weeks. Arrival is coming from old stock despite slower pace of import. Supply from Canada would be tighter as the production estimate has been revised down to 16 .02 lakh MT from the previous 18.06 lakh MT.As the demand is weak, prices may decrease to 7000-7050 this week.

The pressure on Chana market continues with increasing supply from the old stock from the central pool as well as private stock. Apart from it area coverage has improved by 1.90 % to 107.69 lakh ha. As weather condition is congenial to Chana crop, production may cross 100 lakh MT. Demand is not improving as per expectation while the new season may start with 18 lakh MT carry in. It would continue to ease supply. Prices of Chana may continue to trade in the range of 4700-5200,at various centres. The overall tone seems weak. Demand for Besan is yet to pick up. The season may end up with 110 lakh ha.Some losses have been reported in Maharashtra due to rains and hailstorm in Maharashtra but the loss might be make up with good crop condition in other states and higher area coverage in Gujarat(30% up).Area in Maharashtra is up by 8.59 % to 23.89 lakh ha. So there is no concern over production front right now.

Global Market Updates:

According to latest update from Canada Agriculture & Agri Food Canada,production of lentil has been revised down to 16.06 lakh MT, down by around 2 lakh MT from Nov-21 estimate.Canada had produced 28.68 lakh MT last year.As production size has decreased drastically this year,carryin is bound to decline from 4.06 lakh MT to 50,000 MT.Export would decrease to 17 lakh MT against23.26 lakh MT last year.As the supply side would remain tight,yearly average price might rule in the range of \$1070-1090 per MT in 2022.

According to latest update from Canada Agriculture & Agri Food Canada, production of feld pea has been revised down to 22.58 lakh MT, down by 23.36 lakh MT from 2020-21. As availability is low, prices of Peas may rule near \$600 throughout 2022.Total supply would decline to 28.09 against 49.10 lakh MT last year.

According to latest update from Australian Bureau of Agricultural and Resource Economics and Sciences (ABARES) Chickpea production in Australia is estimated as 10.04 lakh tonnes for 2021-22 as compared to last year's production of 7.33 lakh tonnes. Area under Chickpea has been increased this year in Australia from 5.07 lakh ha to 6.33 lakh ha.

According to latest update from Australian Bureau of Agricultural and Resource Economics and Sciences (ABARES) lentils production in Australia is estimated as 6.56 lakh tonnes for 2021-22 as compared to last year's production of 6.34 lakh tonnes. Area under lentils this year stands at 3.9 lakh ha as compared to last year's acreage of 3.68 lakh ha.

Global Lentils market continues to ease due to weak seasonal demand in the domestic as well as international markets.The difference between Green and Red lentils is widening and it has gone up to \$260 per MT against

\$116 last season. This means supply side of green Lentils would continue to be tight in coming months. Availability of Australian crop has increased and the pressure seems to continue on Red Lentils price.

The harvesting of pulses winter crop in Australia is running smoothly and is helping in meeting the strong demand in the global market despite the low availability of containers. As per the latest updates by Pulses Australia, the prospect for export from Australia is very good because of low production in Canada this year. Indian buyers were reluctant to buy in volume from Canada in the beginning of Nov. as they were aware of the bumper Australian crop. The production estimates for the Australian pulses has been published. As per the latest estimates Australian would harvest 8.44 lakh MT Chickpeas in 2021-22 (Abares estimate) while Pulses Australia sees it at 8.70 lakh MT. The 10 years production average is 7.89 lakh MT. Chickpeas availability in the global market would increase and it may ensure stability in price in the global market.

As per the latest Abares estimate Lentils production in Australia pegged at 6.39 lakh MT in 2021-22. The Pulses Australia sees it at 7.10 lakh MT. The 10 year's average production for Lentils is 4.24 lakh MT. Indian buyers may take interest in Australian Lentils. No deals has been struck so far. However, containers issue and higher freight would keep the import costing high in 2022 too. Major growing states like Queensland and northern NSW, containers availability is still low, and no path to bulk export exists because shipping slots are fully booked. This means scope for immediate export in bulk volume is limited. Prices have come down to a certain extent and growers may prefer to hold stock for better price.

The Field Peas production in Australia may decrease from 10 years average of 2.8 lakh MT to 2.5 lakh MT in 2021-22, as per the latest fig. published by Abares. Australia Pulses sees it at 3.20 lakh MT. Export demand for the Australian Peas may increase as availability in Canada is down while prices are ruling higher. Malaysia & China would continue to import peas from Australia.

Agriculture and Agri Food Canada (AAFC) has finalised the production of lentils in Canada at 18.02 lakh tonnes for 2021-22 as per recent November reports. Production is lowered by 10.66 lakh tonnes from last year's production of 28.68 lakh tonnes.

Field peas import in Spain increased by 268 % to 58127 MT in Sep-2021, as per the latest update by Eurostat data. Spain had imported 15778 MT in Aug. Total import from Jan to Sep reached at 116257 MT against 132195 MT last year same time. Russia supplied 49970 MT in Sep, followed by Ukraine at 7591 MT.

As per the latest update by Statistics Canada, Green Peas export from Canada declined in Sep-2021 to 9890 MT against 17437 MT in Aug. Canada has exported total 27327 MT during the marketing year. It is down by 29% from last year till Sep. The UAE was the biggest importer, buying 3,573 MT, followed by Colombia, taking 2,184 MT and Philippines at 865 MT.

So far during this marketing year added to a weaker trend, with green pea export shipments from Canada were well down, plunging relative to the previous month in September, judging from available statistics from Statistics Canada. Export sales during the month totaled 9,890 metric tons (MT), down from 17,437 MT the previous month. This boosted shipments so far during the marketing year to 27,327, down 29% last year. United Arab Emirates was the biggest consumer, buying 3,573 MT. Colombia was the second most important importer taking 2,184 MT, followed by Philippines at 865 MT.

The IGC is going to include Lentils, Chickpeas and Dry beans in the Council's definition of grains under Article 2(1) (e) of the grains Trade Convention. This means that now the IGC secretaria will expand its market information for Pulses. Actually, pulses trades are continuously increasing throughout the world and has expanded with good pace and reached at 16 to 17 million MT in last 5 years. Right now the IGC is providing updates on Pulses trade and production estimates in the Grain Market Report on a bimonthly basis. Apart from it S&D balances are

published for major exporters for Pulses like Lentils, Dry Peas and Chickpeas. Now FoB prices matrix too would be included.

Weekly Outlook: *-Pulses are likely to trade mixed this week.*

Pulses-Wise Scenario:

Chana

Current Scenario:

Restriction on Chana futures, ample availability of old stock, continuous release by Nafed and the similar area coverage as last year so far amid weak demand and congenial weather condition in major growing area continue to put pressure on the Chana cash market. Demand is not improving amid increasing fear of the lockdown again due to increasing cases of Omicron. Stockists are releasing its stock. So overall sentiments seems weak right now. As of now farmers have covered around 107 lakh ha up by 2% as compared to previous year. Sowing may end with 108-109 lakh ha. Under the prevailing condition the crop size might cross 100 lakh MT. The overall tone seems weak in the short to medium term. Mostly market is trading below MSP. And may continue to rule at same level till March-2022. Market may get support when procurement drive would start from mid March-April. Weather conditions in Jan, Feb and Mar-2022 too would be crucial for price trend and the market participants need to have a close eye on it.

Import flow would remain restricted as duty plus cess is 60%. Import flow may continue from the least developed countries as they enjoys the benefit of zero duty. As per private source, around 40641 MT of Chana has been imported in November month. Following graph illustrates chana price movement in different markets:

Peas (Matar):

Market Recap:

Decreasing Chana prices have put an excessive pressure on pea market and it has decreased by 50 to 5940 from 5990 last week despite import ban, the low availability of local stock and the similar local production prospects as was seen last year. Farmers have covered 9.61 lakh ha, down by 5.04% so far. Normal area under pea is 8.03 lakh ha. the area may end up with 10 lakh ha. So availability would not increase in 2022 too. The new crop is expected by end Feb-2022. As other pulses like Chana is available at lower price and the consumers have shifted from Matar to Chana, demand is likely to be subdued in coming weeks. So, any spike in Pes market is unlikely in the coming weeks.

Peas prices have slipped by Rs 40 to Rs. 5940 from Rs. 5990 under the week under review in Kanpur market. As import is not allowed, stock in the domestic market is depleting fast. Stocks are either with stockists or with traders. 100% of Harvesting has completed in Canada but import is not possible due to the import restrictive policy by India. In Canada production of Peas is expected to be 28.09 Lakh tonnes this year against last year's production of 49.10 lakh tonnes. Australia is expected to harvest 2.61 LMT of peas in 2021-22 against last year's production of 2.94 LMT as per latest updates by ABARES. Govt is not going to allow peas import in the near to medium term. Peas market may trade steady to slightly weak.

Following chart shows price movement in various markets:

Current Market Dynamics & Outlook: In Kanpur market peas was quoted at Rs 5800 per qtl last week. In Mumbai market, there was no quote for yellow peas as stock has been exhausted. There is no quotes for imported peas as availability is almost nil.

Spread With Chana:

Spread between Chana and Peas, at Kanpur market continued to remain in negative zone. Gap has been increased by Rs 20 to Rs. 775 from previous Rs. 755. Spread is expected to remain in the negative zone in coming week too on relative movement in Chana prices. Overall outlook seems steady to slightly weak in the near term.

Lentils (Masoor):

Market Recap:

In Kanpur markets prices of Masur was traded in the range of Rs 7400 -7425 per quintal. Imported Masoor at Mumbai is available at Rs. 7,150-7,200/qtl. As expected, area under Masoor continued to recover smartly during the week under review and it increased to 16.76 lakh ha. It is up by 1.66% from last year same time. There is reports from Uttar Pradesh and Bihar that pea farmers are shifting some area from pea to Masur. As the Masoor sowing season has entered in last phase now, the pace of sowing may decline in the coming weeks. Price may stay steady to slightly up as quotes in Canada has increased to \$960 per MT from the previous \$945 during last weeks. Demand is weak. Availability at ports is said to be around 2 lakh MT. Overall sentiment remains firm as the cost of import is higher so masoor may continue to trade at higher level.

Current Scenario:

Prices are expected to come improve as crop size in Canada has been reduced again to 16.06 lakh MT. Canada have increased quotes from \$945 to \$975 per MT basis Indian port.

Market Outlook: Prices may trade steady to slightly firm.

Pigeon Pea (Tur/Toor):

Arrivals from the new Tur crop is expected to increase in Karnataka and Maharashtra by the end of this month. Weather condition is good in the major producing districts of both the states. Quality coming into markets of Amravati, Solapur in Maharashtra and Raichur and Gulbarga in Karnataka is normal to good, having 13 to 14% moisture level. Demand is stable and mills and stockists are waiting for Tur with lower moisture content. The report of crop loss in Karnataka is likely to be compensated by higher yield in Maharashtra. Continuous supply is there from African countries. Imported Tur in Mumbai is being traded at Rs 5700- 5825. In Gulbarga market it is being traded at 6000-6450. Nafed is expected to start Tur procurement at MSP in Maharashtra from next week. Online registration for the same has started from 20th Dec 21. Tur procurement target in Maharashtra has set at 2.71 lakh tonnes. Karnataka government has stated registration for Tur procurement from 15th Dec 21 and target set at 2.5 lakh tonnes. Sentiment remains weak until the procurement drive starts. Government has extended the free import policy of Tur with bill of lading dated on or before 31st Mar 2022 and import should be cleared from customs on or before 30th June 2022.

Current Market Dynamics & Outlook:

Lemon Tur is available at Rs.5,850- 6,100/qtl at Mumbai port. As per trade sources, India has imported 96,397 MT in November. So far India has imported total 4,79,268 MT from April to Nov-2021. Supply side is at comfortable level. So any spike in cash market is unlikely. Range bound movement is expected this week

Black Matpe (Urad):

Farmers have covered 5.66 lakh ha area under Urad this year so far, down by 11.93% from last year till 31st Dec 21. Sowing has got delayed by 15 days and sowing will be done by end of December. As sowing has got delayed, it may limit acreage increase by 4 to 5% despite attractive prices prevailing in the market. Import flow too has been low amid tight supplies and quality loss in the Kharif season. Also demand is weak. So, prices may trade steady this week too and may improve slightly in the coming weeks. FAQ Urad is being traded at Rs. 6400- 6500 in Mumbai market while in Chennai local crop is being traded at Rs. 6200-6300 per quintal. If demand improves then prices may recover. Myanmar is offering Urad FAQ at \$795 and SQ at \$885.

Current Market Dynamics & Outlook:

Major Urad crop comes in kharif season. As availability in Myanmar too is low and so any big decline is not expected before the new crop hits the market. India imported around 3,98,106 MT urad in from April to Nov-2021. Government has extended the free import policy of Urad with bill of lading dated on or before 31st Mar 2022 and import should be cleared from customs on or before 30th June 2022. Import is free now, so when parity turns in favour of India, the volume of import may increase.

Market Outlook: Overall tone seems steady to slightly firm in the short term.

Green Gram (Moong):

Market Recap:

Rabi Moong has been sown on 2.291 lakh ha so far as compared to 3.388 lakh ha last year. Normal area for Moong for Rabi and summer crops combined stands at 9.41 lakh ha. Sowing activities in southern states have disturbed due to rainfall. Sowing of Moong can be done till fortnight of the January so recent rains doesn't affect area much. Area will be covered later on when fields get dried up and will be ready for sowing. If weather conditions will be bad continuous in next month also then it may affect Rabi sowing of Moong. Prices in Jaipur market are ruling in the range of 6500 to 6800, depending on the quality of the crop. Mills are not buying in bulk volume as demand for dal is weak. Import flow would continue due to Moong being in the free import list till Dec-2021. Imports may continue to land at Indian ports till January 2022 as per the extended time frame for import. Myanmar is offering Moong Anna Shewar at \$880 and Moong Pedi Shewar at \$875 and Pokako at \$980 per MT.

Market Outlook - Any unexpected rise in the cash market is unlikely at this point of time. The short term outlook seems steady to slightly firm in Moong.

Rabi Sowing Progress as on 31 Dec 2021:

Rabi Pulses Acreage as on 31 Dec 2021						
S. No.	Crop	Normal Area	% of Normal for whole season	Acreage (lakh ha)		% Change over 2020
