Pulses Sector- Domestic Highlights:

Rabi pulses sowing, except Moong and Urad, is almost over now. Total area coverage is 0.96% higher than last year to 166.42 lakh ha. Chana, Lentil & Lathyrus area are up by 3.85, 4.32 & 10.86 % respectively. Moong, Urad & Field Pea area remains a cause of concern. The summer Moong sowing may fill the gap for Rabi Moong. Despite some losses as reported during December due to heavy rains in Maharashtra, Karnataka & Gujarat, the overall condition of pulses crops seems normal to good and the supply side is expected to ease in the coming months. The current intermittent rains followed by good sunshine are beneficial to the standing crops. If wet weather condition extends and heavy rains/hailstorm occur it may cause damage to Chana, Lentil, Moong & Urad crops. Weather condition throughout February & March is crucial and may be a price driving factor in the coming weeks.

Chana area increased by 3.85% to 114.27 lakh ha despite less area coverage in major states like Rajasthan, Chhattisgarh, Jharkhand & Karnataka. Loss in area in these states was well covered by states like Maharashtra and Gujarat (up by 8.43 % & 34.45%) respectively. The overall price outlook indicates comfortable for consumers in the near to medium term as the crop size may exceed 104 lakh MT against 97 lakh MT last year. Apart from this, the import flow from the least developed countries increased to 2.06 Lakh MT in 9 months against 1.40 lakh MT last year. This year up to Mar-2022, total Chana import volume may increase to 3 lakh MT. The sluggish demand, continuous sale by Nafed below 5000 and the new arrivals, expected from 1st Feb-2022, may continue to pressurize Chana cash market under normal weather condition. Supply side would continue to increase.

The downward revision at Tur production front to 37.11 from the previous AW estimate of 40.22 lakh MT for MY 2021-22, steady quotes in Myanmar at \$800 during last week despite new arrivals, the good crop size (2.50 lakh MT), likely the low import volume in Feb & March, delayed arrivals, harvesting due to the ongoing winter rains may keep tur price well supported at current level. Buyers, mills & stockists are expected to start buying again in a couple of weeks when moisture level is expected to decline to 12 from 14-15% right now. Apart from it, the procurement drive would continue to support the local market price and negate the impact of lemon Tur availability at 6000-6050 in Mumbai. If weather turns rough and extends its current phase & damage matured crop standing at the fields in Gujarat, M.P., U.P. & Bihar, the price rise might be 200 to 300 from the current level at the mandis for whole pulse. The import flow, weather condition and the expected buying activities are crucial and might be a price driving force in the coming weeks. The overall tone is steady to slightly weak in the short term. Crop of Tanzania Malawi and Mozambique is available in the range of Rs. 5300-5600 in Mumbai.

Urad cash market continued to trade under pressure despite 4.28 % less Rabi area coverage so far and the eased supply side in domestic market. The reasons behind it are mainly attributed to good availability in Myanmar (expected crop size at 6.5 lakh MT), extended import timeline by India till June-2022 from the previous deadline of March-2022. Arrival from the south Indian states is expected to start from the end Feb. The new crop from Myanmar too would hit India in March. So, the traders, stockists and mills are very cautious to go for bulk buying. All these factors are pushing price down. The price gap between the imported & local crops is contracting and price may settle and stabilize after a decline by 100- 200 more. Demand is yet to pick up. This year the local production has been pegged at 22.91 lakh MT crop against 24.19 lakh MT last year. The import volume may increase to over 5.25 lakh MT against 3.20 last year during Aug to Jul (MY) The overall tone seems steady to slightly weak. Supply side would continue to ease.

Despite the slow recovery in Rabi area coverage, pressure on Moong price continues. Slack demand, ample availability of stock with Nafed (over 3 lakh MT old and new) and continuous imports are keeping prices suppressed. Forward trade in Tanzania has been struck at 5600-5700 and it would hit Indian market in March. By then the Rabi crop, followed by the summer crop, too would start. Import would continue and would keep market well supplied. Supply side is at comfortable level and prices are expected to stay at current level (6000-6800). Downward movement is expected this week and market may decrease by 200 from the current level. Availability of poor quality Moong in domestic markets, import flow, good availability in Myanmar and the restricted buying by mills would continue to pressurize Moong market despite good quantity (around 1.6 lakh MT (Kharif new)) purchased by Nafed. Prices of Moong may slip by 100-200 more from the current level.

Masur cash market could not maintain its firm momentum and softened slightly due to increased area coverage by 4.32% to 17.64 lakh ha. Sowing activities are almost over and area may end up at 17.75 lakh ha this year. As the crop condition in M.P., Uttar Pradesh is good so far, the production size may increase from 11.91 to 13 lakh MT this year under the normal weather condition. The new arrival is expected from end February this year, the declining movement might be limited during couple of weeks. Stockists are expected to start releasing old stock before the new crop hits the market. Apart from this, the production forecast for Canada lentils for 2022-23 has been increased to 25 lakh MT against 16.06 lakh MT in 2021-22 in the initial estimate of Agriculture and Agri-Food Canada (AAFC). Stock at Indian ports are around 2 lakh MT while around 45 thousand is expected in Feb-2022. So supply side is likely to be in comfortable zone and it will limit any upward momentum in coming weeks. This week market traded up 3% to 6775 in Indore while the other market eased slightly. Under prevailing condition spike in Lentil market is unlikely until and unless weather turns rough in the major growing regions. AAFC has projected average yearly price to decrease to \$725 per MT in 2022-23 from \$1080 in 2021-22. In Kanpur market it traded down by Rs175 to 7500-7550. Under the prevailing condition prices of Masur may decrease by 800-1000 by the end March.

Global Market Updates:

Canada Agriculture & Agri Food Canada has published its preliminary production forecast for 2022-23 on 21st Jan-2022 for Lentil, Chickpea and Field Pea. As per the latest forecast Lentil production may increase by 55.66 % to 2.5 MMT in 2022-23 against 1.60 MMT in 2021-22. The likely yield realization has been increased to 1.41 tonne per ha for 2022-23 against 0.91 tonne per ha in 2021-22. It may have a softening impact on the global Lentil markets in the medium to long term.

The production forecast for Field Pea (Dry Peas) too is up by 48.55 % to 3.8 MMT for 2022-23 against 2.58 MMT in 2021-22. Yield forecast has been increased to 2.36 tonne per ha for 2022-23 against 1.51 tonne per ha in 2021-22. The severe drought condition had affected all pulses yield last year. The higher production prospects may cap upward movement in the global market in the medium term.

The initial production forecast for Chickpeas for 2022-23 too has been increased by 64.47% to 125 thousand MT against 76 thousand MT last year. Yearly average price forecast has been revised down to \$860 per MT in 2022-23 against \$1065 for 2021-22. Yield has been revised up to 1.51 tonne per ha for 2022-23 against 1.04 tonne in 2021-22

According to latest update from Australian Bureau of Agricultural and Resource Economics and Sciences (ABARES) Chickpea production in Australia is estimated as 10.04 lakh tonnes for 2021-22 as compared to last

year's production of 7.33 lakh tonnes. Area under Chickpea has been increased this year in Australia from 5.07 lakh ha to 6.33 lakh ha.

According to latest update from Australian Bureau of Agricultural and Resource Economics and Sciences (ABARES) lentils production in Australia is estimated as 6.56 lakh tonnes for 2021-22 as compared to last year's production of 6.34 lakh tonnes. Area under lentils this year stands at 3.9 lakh ha as compared to last year's acreage of 3.68 lakh ha.

Global Lentils market continues to ease due to weak seasonal demand in the domestic as well as international markets. The difference between Green and Red lentils is widening and it has gone up to \$260 per MT against \$116 last season. This means supply side of green Lentils would continue to be tight in coming months. Availability of Australian crop has increased and the pressure seems to continue on Red Lentils price.

The harvesting of pulses winter crop in Australia is running smoothly and is helping in meeting the strong demand in the global market despite the low availability of containers. As per the latest updates by Pulses Australia, the prospect for export from Australia is very good because of low production in Canada this year. Indian buyers were reluctant to buy in volume from Canada in the beginning of Nov. as they were aware of the bumper Australian crop. The production estimates for the Australian pulses has been published. As per the latest estimates Australian would harvest 8.44 lakh MT Chickpeas in 2021-22 (Abares estimate) while Pulses Australia sees it at 8.70 lakh MT. The 10 years production average is 7.89 lakh MT. Chickpeas availability in the global market would increase and it may ensure stability in price in the global market.

As per the latest Abares estimate Lentils production in Australia pegged at 6.39 lakh MT in 2021-22. The Pulses Australia sees it at 7.10 lakh MT. The 10 year's average production for Lentils is 4.24 lakh MT. Indian buyers may take interest in Australian Lentils. No deals has been struck so far. However, containers issue and higher freight would keep the import costing high in 2022 too. Major growing states like Queensland and northern NSW, containers availability is still low, and no path to bulk export exists because shipping slots are fully booked. This means scope for immediate export in bulk volume is limited. Prices have come down to a certain extent and growers may prefer to hold stock for better price.

The Field Peas production in Australia may decrease from 10 years average of 2.8 lakh MT to 2.5 lakh MT in 2021-22, as per the latest fig. published by Abares. Australia Pulses sees it at 3.20 lakh MT. Export demand for the Australian Peas may increase as availability in Canada is down while prices are ruling higher. Malaysia & China would continue to import peas from Australia.

The IGC is going to include Lentils, Chickpeas and Dry beans in the Council's definition of grains under Article 2(1) (e) of the grains Trade Convention. This means that now the IGC secretaria will expand its market information for Pulses. Actually, pulses trades are continuously increasing throughout the world and has expanded with good pace and reached at 16 to 17 million MT in last 5 years. Right now the IGC is providing updates on Pulses trade and production estimates in the Grain Market Report on a bimonthly basis. Apart from it S&D balances are published for major exporters for Pulses like Lentils, Dry Peas and Chickpeas. Now FoB prices matrix too would be included.

Weekly Outlook: -Pulses are likely to trade weak this week.

Pulses-Wise Scenario:

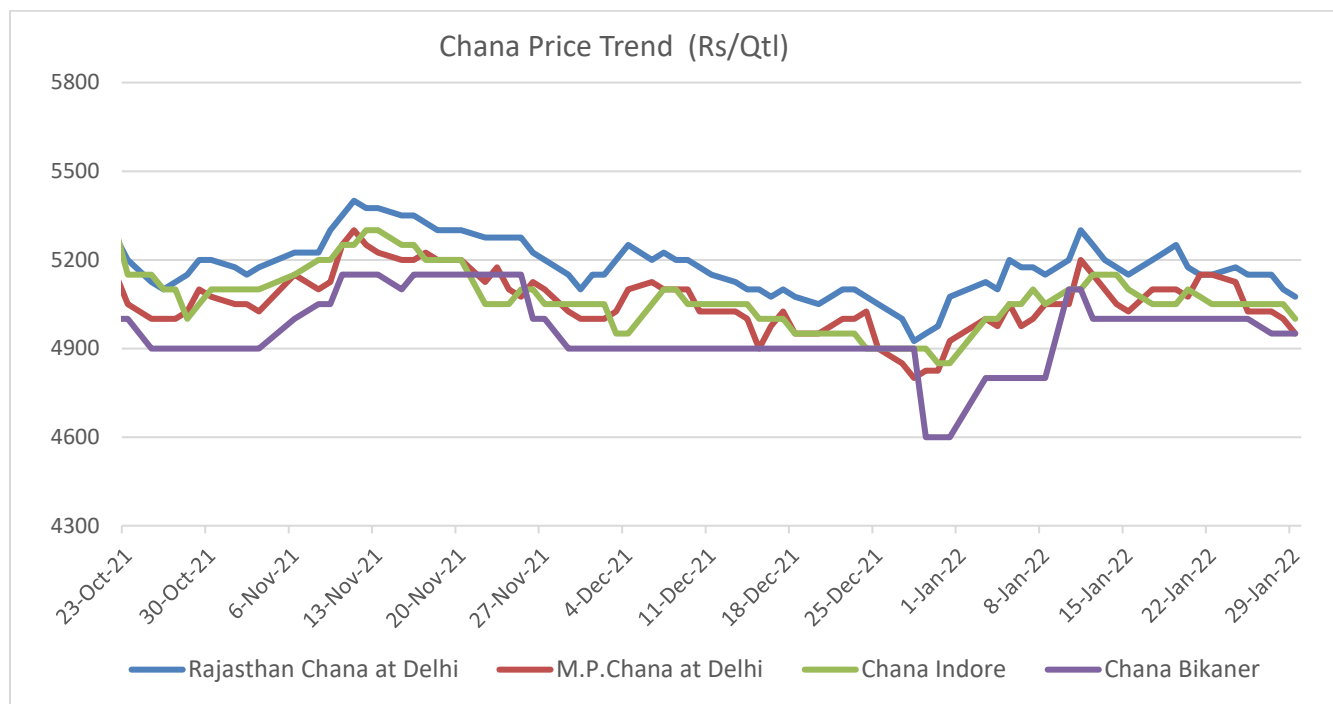

Chana

Current Scenario:

Sowing of Chana is almost over now and it is up by 3.85 % to 114.27 lakh ha so far. It may move up to 115 lakh ha as sowing continued till last week ending 28th Jan-2022. Normally sowing ends by mid-Jan, but this year good moisture level in fields and intermittent rains helped farmers to use some fallow lands too for Chana. As sowing coverage is above the normal market expectation, crop size may move up by 7 to 8 lakh MT to 104-108 lakh MT this year against 97 lakh MT last year. As availability is ample in central pool, import flow is good, spike in the market is unlikely. Downward pressure on Chana price may continue. Chana may decrease from 200-300 in coming weeks.

New arrivals are expected from the next week in Maharashtra and A.P., followed by M.P. and Rajasthan. It will pick up by mid-Feb and continue to increase throughout March-April. Prices of Chana have started declining in all major markets. It declined by 1.46 % to Rs 5075 in Delhi market, while it decreased by 1.0 % to 4950 in Bikaner and 0.99% to 5000 in Indore. Tanzania origin Chana in Mumbai market decreased by 0.55 % to 4550 over the previous week. Sentiment remain weak as crop condition throughout the major growing regions is normal to good so far. Weather conditions in Feb and March are crucial and it may affect the inner tone in the market. This weak Chana may extend its loss by 100-150.

Following graph illustrates chana price movement in different markets:

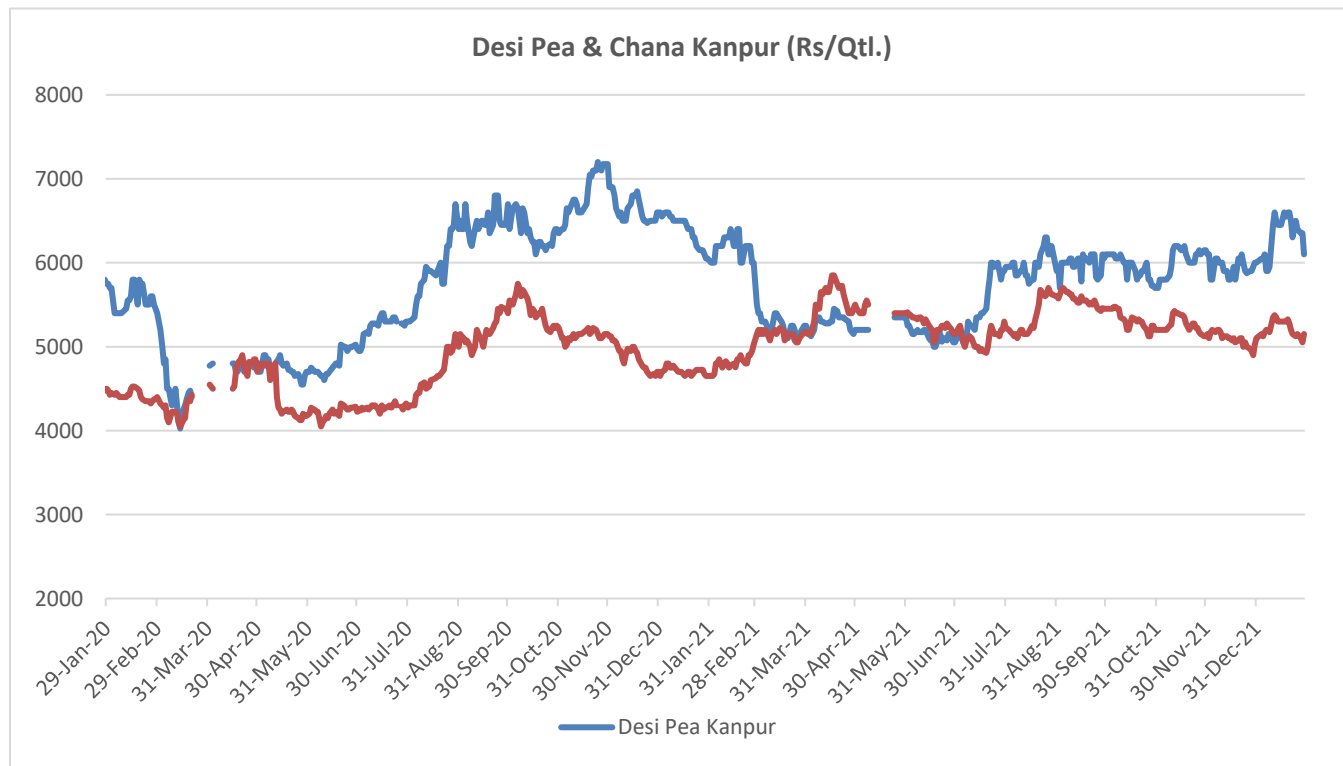

Outlook for the week: Steady to slightly weak tone may prevail under the normal weather condition.

Peas (Matar):

Market Recap:

As expected by Agriwatch last week, the pea cash market could not sustain its firm momentum and declined considerably just ahead of the new local crop. It declined by 6.15% to Rs 6100 in Kanpur market, 1.92% to Rs 5100 in Dabra market and 3.70% to Rs 7800 in Delhi market. Prices of yellow peas are still higher as it is old imported stock. Prices of pea may move further down by 200-300 as stockists are willing to release stock before the new crop hits in the market.

Farmers have covered 10.14 lakh ha this year so far, down by 2.11% from last year. They have shifted some peas area to other crops like Mustard, Wheat and Lentils in Uttar Pradesh, Assam and Bihar. As import of pea remains restricted, global price would not affect price movement much. Availability in global market would increase as Canada has increased production forecast for 2022-23 to 3.80 MMT from 2.25 MMT for 2021-22. Even Australia production size for 2021-22 has been pegged at 2.61 LMT slightly down from 2.94 LMT estimated in Dec-2021 forecast. At availability of green pea is improving from local crop, price of pea should ease and may move down to 5400-5500 again by end-Feb.

Current Market Dynamics & Outlook: Weak sentiment may prevail and the cash market may move down to 5400-5500 soon

Lentils (Masoor):

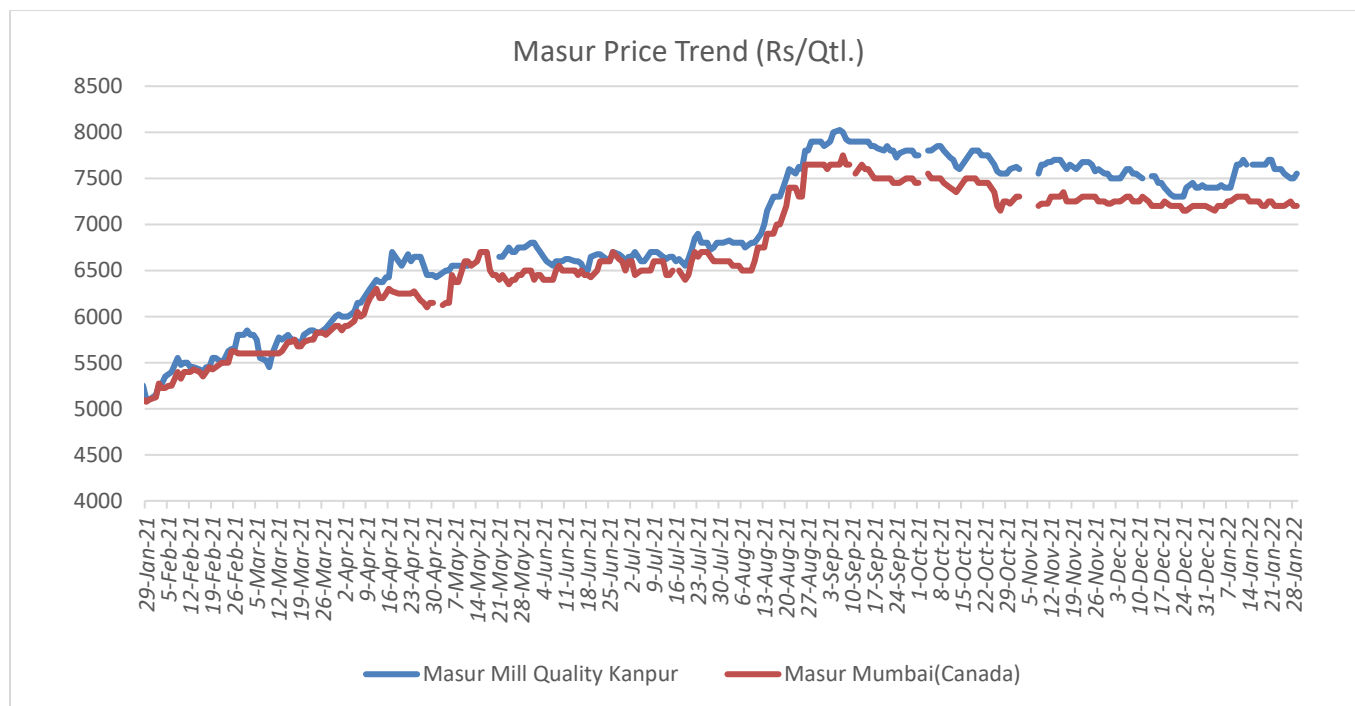

Market Recap:

Prices of Masoor in various markets traded down and may continue to decrease in the coming weeks. Good recovery in area coverage during last 4-5 weeks and the favorable weather conditions in main growing region so far hint good crop size this year. Under the normal weather condition 13 LMT crop is expected. The new crop may hit market by the end of this month and the arrival timing may be longer till May this year. Apart from it, as per the preliminary sowing intensification in Canada, crop size may increase to 25LMT in 2022-23 against 16 LMT in 2021-22. It would ease supply side. Availability of 2 LMT Masur at ports and 1 to 1.25 LMT is expected in Feb and Mar-2022 may pressurize cash market further despite weather conditions in two months would be very crucial to the final crop size this year.

Masur traded down by 0.65 % to 7600 in Kanpur market and 0.69% to 7200 in Mumbai market. However it traded up by 1.43% to 7100 in Indore market. With increased area coverage by 3.24% to 17.42 lakh ha and the normal crop condition so far, production size is likely to move up from 11.91 LMT (AW estimates) to 12.5 to 13 LMT this year, if weather remains favorable during Feb-Mar too. It may encourage stockists/importers to release stock in Feb and it may impact the prevailing inner tone in the market.

Current Scenario:

Prices are expected to stay stable or slightly weak. Demand too has decreased ahead of the new crop. Price should come down to 7000 in next 15 days under the normal climatic condition.

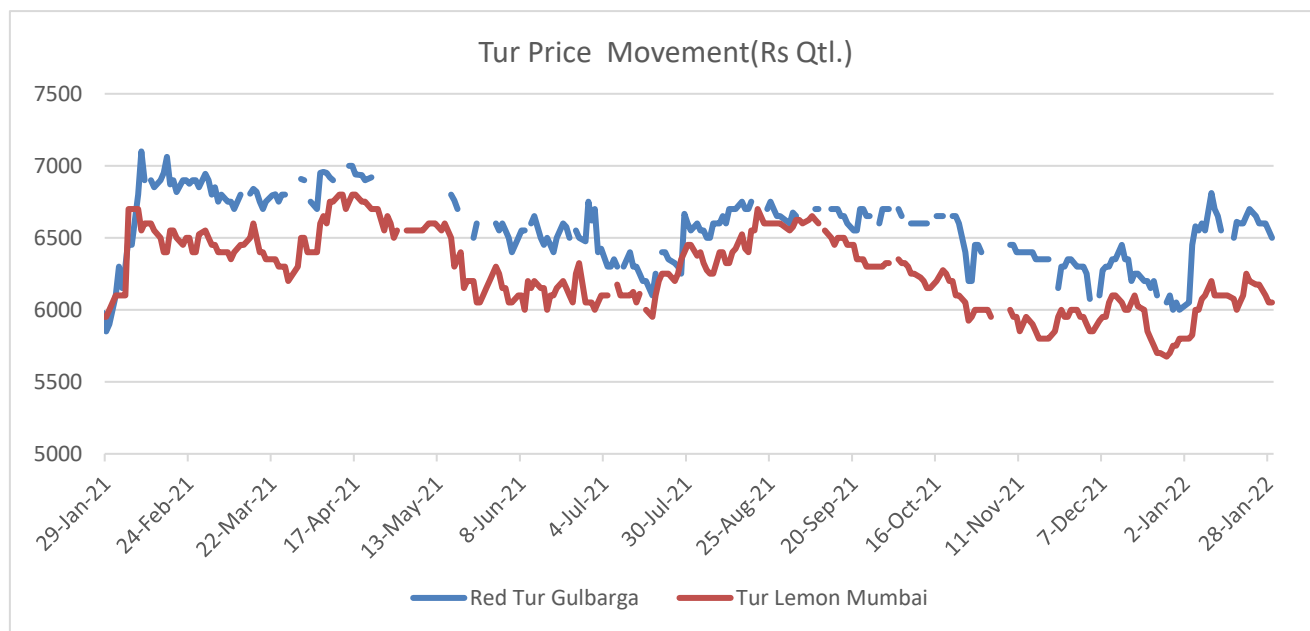

Market Outlook: Prices may trade steady to slightly weak

Pigeon Pea (Tur/Toor):

Yield realized from the new Tur crop in Maharashtra & Karnataka has increased fear of a smaller crop size than the normal expectation. Market participants expects it similar to last year. Quality of crop coming into markets is also poor. Demand is stable and mills and stockists are waiting for Tur with lower moisture content. Recent rains and expected lower production has pushed up market in the last week. However, the firm momentum is unlikely to continue. Continuous supply is there from African countries. Imported Tur in Mumbai traded down by 2.42 % to Rs 6000-6050 per qtl. In Gulbarga market it traded down by 2.99 % to at Rs 6400-6500. Overall sentiment remains weak for Tur in the short to medium term. This week it may trade stable to slightly weak as the stockists/ mills are avoiding bulk purchase and waiting for the bulk shipment from Myanmar vessels are being loaded. Quotes in Myanmar is stable at \$80 per MT, basis Indian ports. Apart from it Government has extended the free import policy of Tur with bill of lading dated on or before 31st Mar 2022 and import should be cleared from customs on or before 30th June 2022. So supply side seems at comfortable level in the coming weeks.

Current Market Dynamics & Outlook:

Lemon Tur is available at Rs.6009/qtl at Mumbai port. As per trade sources, India has imported 96,397 MT in November. So far India has imported total 5.78 LMT MT from April to Dec-2021 and around 1.25 to 1.50 lakh MT is expected in two months. With incoming domestic arrivals and expected import in Feb, Mar and Apr, supply side would continue to increase. The short term outlook is weak while medium term outlook would depend on the size of import volume March onward.

Outlook For the week: Market may trade stable or slightly weak.

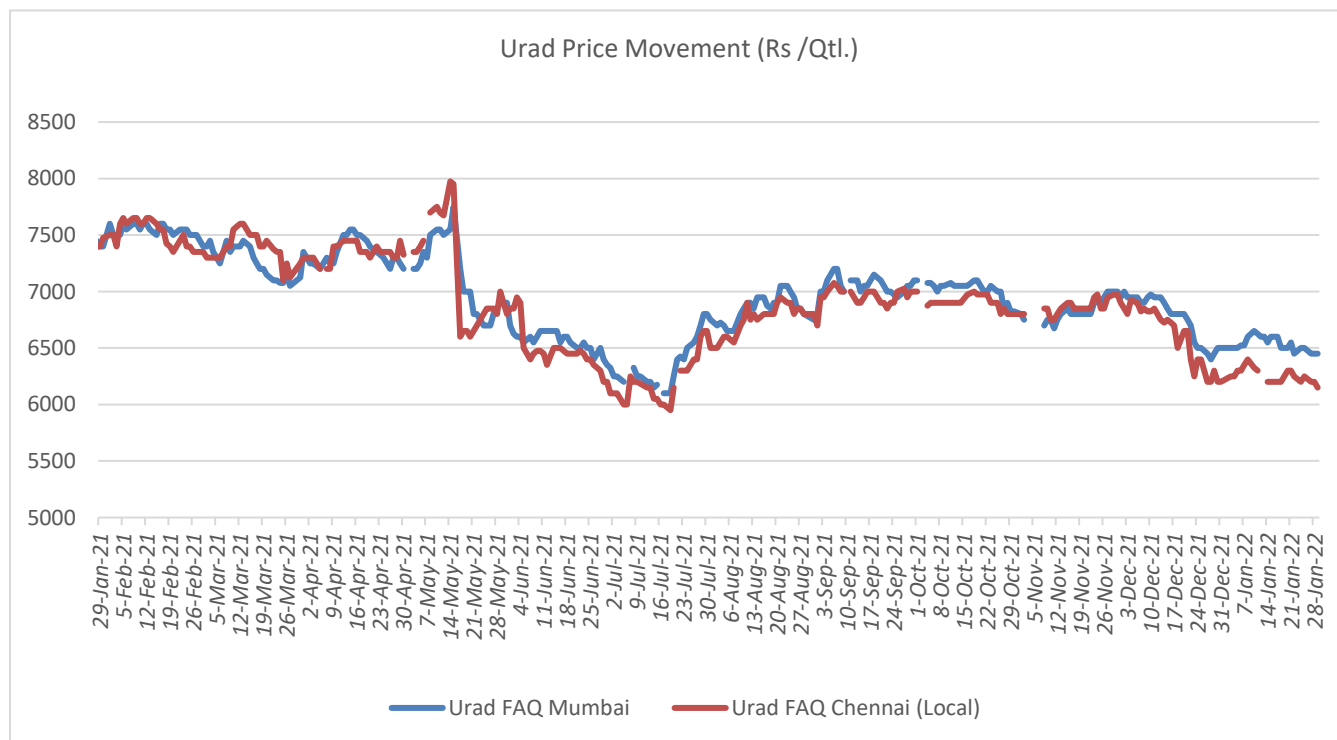

Black Matpe (Urad):

Continuous improvement in Rabi Urad area and a good import prospect from Myanmar has continued to suppress the prevailing inner tone in the Urad cash market. Farmers have covered 7.61 lakh ha area under Urad this year so far, down by 4.26 % from last year till 28th Jan 2022. Sowing has got delayed by 15-20 days and will be done by end of Jan. As sowing has got delayed, it may limit acreage increase by 4 to 5% despite attractive prices prevailing in the market. Import flow too has been low amid tight supplies and quality loss in the Kharif season. Also demand is weak. So, prices may trade steady to slightly weak this week too. FAQ Urad is being traded at Rs. 6400-6450 per qtl. in Mumbai market while in Chennai local crop is being traded at Rs. 6150 per quintal. If demand improves then prices may recover (unlikely this week). Myanmar is offering Urad FAQ at \$805, down by \$5 from last week and offering SQ at \$895 which is down by \$20 as compared to the last week.

Current Market Dynamics & Outlook:

India imported around 4.61 MT Urad in from April to Dec-2021 and 1.00 LMT is expected in Feb & Mar-2022. It would keep supply side at comfortable level. Government has extended the free import policy of Urad with bill of lading dated on or before 31st Mar 2022 and import should be cleared from customs on or before 30th June 2022. Import is free now, so when parity turns in favour of India, the volume of import may increase.

Market Outlook: Overall tone seems steady to slightly weak in the short term to medium term under the normal weather condition.

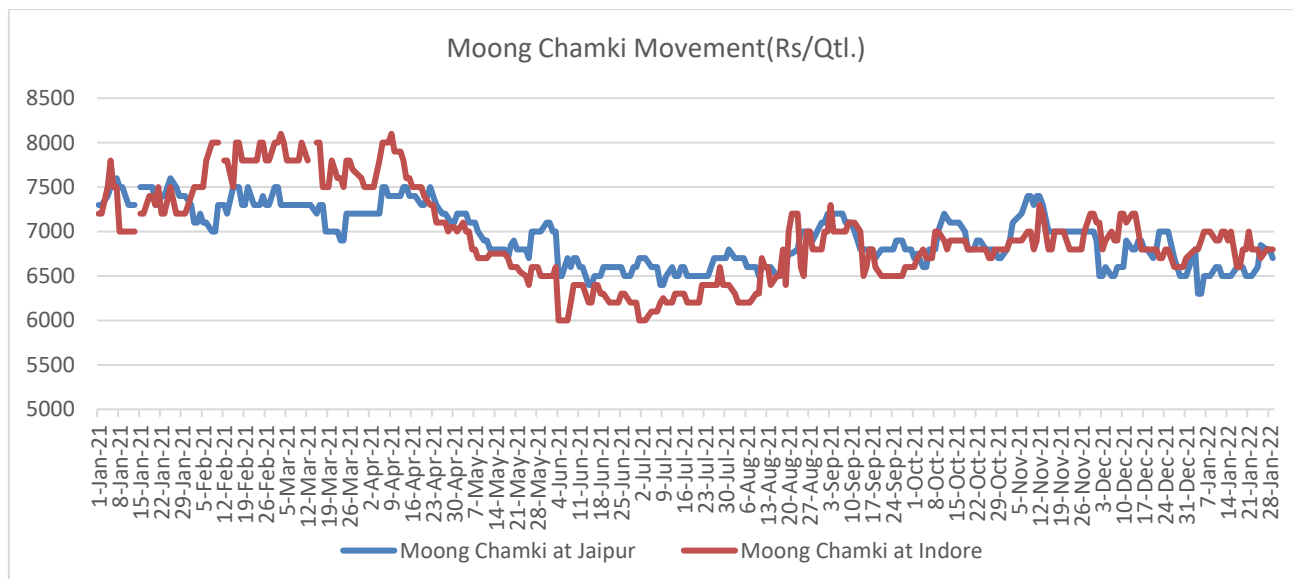

Outlook For The Week: Steady to weak movement expected this week

Green Gram (Moong):
Market Recap:

As of now Moong sowing is less and got delayed due to excess soil moisture in southern part of the country due to rains during start of the sowing season. Rabi Moong has been sown on 4.77 lakh ha so far as compared to 6.61 lakh ha last year. Normal area for Moong for Rabi and summer crops combined stands at 9.41 lakh ha. If weather conditions will be bad continuous in Feb also then it may affect Rabi sowing of Moong. Prices in Jaipur market are ruling in the range of Rs. 6000 to 6500 per qtl, depending on the quality of the crop.

Mills are not buying in bulk volume as demand for dal is weak. Import flow would continue due to Moong being in the free import list till March-2022. Imports may continue to land at Indian ports till January 2022 as per the extended time frame for import. Myanmar is offering Moong Anna Shewar at \$880 and Moong Padi Shewar at \$875 and Pokako at \$980 per MT. Apart from it Nafed has around 3.4 LMT Moong and is in a position to control Moong price as and when prices move up. Price of Moong (FAQ) stayed steady in Indore at Rs 6800, down by 1.41% in Delhi to 7000. However in Jalgaon the decline was higher by 3.55% to Rs 6800. Moong market is likely to remain steady to slightly in Feb -2022

Market Outlook - Any unexpected rise in the cash market is unlikely at this point of time. The short-term outlook seems steady in Moong market.

Outlook for the week: Stable to slightly weak tone expected this week.

Rabi Sowing Progress as on 28 Jan 2022:

Rabi Pulses Acreage as on 28 Jan 2022						
S. No.	Crop	Normal Area	% of Normal for whole season	Acreage (lakh ha)		% Change over 2021
				2022	2021	
1	Gram	95.66	119.45%	114.27	110.03	3.85%
