Commodity-wise Domestic, International Prices and Arrivals at Different Centers

Pulses Sector- Domestic Highlights:

Rabi sowing is over now except for Moong and Urad where it may continue till March to end -May under the summer season. Final Rabi sowing acreage for Chana and Masur is higher by 3.85 and 4.32% respectively this year despite the slower beginning and arrivals are expected to increase by mid-Feb. Arrivals of new Chana in Maharashtra and Masur in M.P. has been reported in limited quantities and quality wise condition of seed is good so far. Farmers have covered 168.27 lakh ha under pulses till 4th Feb-2022. Urad and Moong area stands at 8.17 and 5.13 lakh ha, down by 1.92 and 27 % respectively. Chana and lentil area stand at 114.27 lakh ha and 17.64 lakh ha. Weather condition is good so far and the prospect of bumper crop seems on the card under the prevailing weather condition. The inner tone in pulses market has weakened now.

Sowing of Chana is over now and area is up by 3.85 % to 114.27 lakh ha despite less area coverage in major states like Rajasthan, Chhattisgarh, Jharkhand & Karnataka. Loss in area in these states was well covered by states like Maharashtra and Gujarat (up by 8.43 % & 34.45%) respectively. The overall price outlook indicates comfortable for consumers in the near to medium term as the crop size may exceed 104 lakh MT against 97 lakh MT last year. Apart from this, the import flow from the least developed countries increased to 2.06 Lakh MT in 9 months against 1.40 lakh MT last year. This year up to Mar-2022, total Chana import volume may increase to 3 lakh MT. The sluggish demand, continuous sale by Nafed below 4850 and the new arrivals in Mha and M.P., may continue to pressurize Chana cash market under normal weather condition. Supply side would continue to increase. In Bikaner Chana prices decreased by Rs200 to 4700. It may move down to Rs 4400-4500 by the end of this month.

The downward revision of Tur production to 37.11 from the previous AW estimate of 40.22 lakh MT for MY 2021-22, steady quotes in Myanmar at \$800 during last week despite new arrivals, the good crop size (2.50 lakh MT), likely the low import volume in Feb & March, delayed arrivals, slow harvesting due to the ongoing winter rains may keep tur price well supported at current level. Buyers, mills & stockists are expected to start buying again in a couple of weeks when moisture level is expected to decline to 12 from 14-15% right now. Apart from it, the procurement drive would continue to support the local market price and negate the impact of lemon Tur availability at 6050-6100 in Mumbai. If weather turns rough and extends its phase & damage matured crop standing at the fields in Gujarat, M.P., U.P., & Bihar, the price rise might be 200 to 300 from the current level at the mandis for whole pulse. The import flow, weather condition and the expected buying activities are crucial and might be a price driving force in the coming weeks. The overall tone is steady to slightly weak in the short term. Crop of Tanzania Malawi and Mozambique is available in the range of Rs. 5400-5600 in Mumbai. The arrival pace is yet to pick up as farmers are unwilling to release stock in anticipation of price rise.

Urad cash market continued to trade under pressure as area continues to recover. Now it is 1.92% down from last year same time. Good import prospects from Myanmar and continuous release by stockists have weakened the inner tone in the market. Availability in Myanmar is expected to be over 6.5 -7.5 lakh MT, and the extended import timeline by India till June-2022 from the previous deadline of March-2022 would ensure ample availability in India. Apart from it, arrivals from the south Indian states are expected to start from the end Feb. The new crop from Myanmar too would hit India in March. So, the traders, stockists and mills are very cautious to go for bulk buying. All these factors are pushing prices down. The price gap between the imported & local crops is contracting and it may settle and stabilize after a decline by 100- 200 more. Demand is yet to pick up. This year the local

production has been pegged at 22.91 lakh MT crop against 24.19 lakh MT last year. The import volume may increase to over 5.25 lakh MT against 3.20 last year during Aug to Jul (MY). The overall tone seems steady to slightly weak. Prices decreased in Mumbai by 5% to Rs 6100 and Chennai by Rs 4% 5900 last week.

Despite the slow recovery in Rabi area coverage, pressure on Moong price continues. Slack demand, ample availability of stock with Nafed (over 3 lakh MT old and new) and continuous imports are keeping prices suppressed. Forward trade in Tanzania has been struck at 5600-5700 and it would hit Indian market in March. By then the Rabi crop, followed by the summer crop, too would start. Import would continue and would keep market well supplied. Supply side is at comfortable level and prices are expected to stay at current level (6000-6800). Downward movement is expected this week too and market may decrease by 200 from the current level. Availability of poor quality Moong in domestic markets, import flow, good availability in Myanmar and the restricted buying by mills would continue to pressurize Moong market despite good quantity (around 1.6 lakh MT (kharif new)) purchased by Nafed. Prices of Moong may slip by 100-200 more from the current level. FAQ quality is being traded at 6700 in Indore.

Masur cash market continued to trade southward direction and it may continue. New arrival has started in M.P. in limited quantity. Area coverage is up by 4.32% and quality of new crop coming into markets are good. As crop condition is good so far, bumper production (13 LMT) is expected this year under the normal weather condition. The arrival is expected from end February this year, the declining movement might be limited during couple of weeks. Stockists are expected to start releasing old stock before the new crop hits the market. Apart from this, the production forecast for Canada lentils for 2022-23 has been increased to 25 lakh MT against 16.06 lakh MT in 2021-22 in the initial estimate of Agriculture and Agri-Food Canada (AAFC). Stock at Indian ports are around 2 lakh MT while around 45 thousand is expected in Feb-2022. So supply side is likely to be in comfortable zone and it will limit any upward momentum in coming weeks. This week market traded down by 4.58% to 6775 in Indore while the other market eased proportionally. Under prevailing condition spike in Lentil market is unlikely until and unless weather turns rough in the major growing regions. AAFC has projected average yearly price to decrease to \$725 per MT in 2022-23 from \$1080 in 2021-22. In Kanpur market it traded down by Rs 250 to 7300. Under the prevailing condition prices of Masur may decrease by 800-1000 by the end March and may touch 6200-6400 from the current level.

Matar price traded down with new arrivals in Madhya Pradesh. Arrival is likely to increase in states like Uttar Pradesh and West Bengal soon. The downward pressure might be seen on matar prices taking cue from weak pulses market. Matar in Kanpur market traded down by 1.64% to Rs 6000 while in Dabra market it decreased by 5.88 % to 4800. Sentiment remains weak.

Global Market Updates:

Canada Agriculture & Agri Food Canada has published its preliminary production forecast for 2022-23 on 21st Jan-2022 for Lentil, Chickpea and Field Pea. As per the latest forecast Lentil production may increase by 55.66 % to 2.5 MMT in 2022-23 against 1.60 MMT in 2021-22. The likely yield realization has been increased to 1.41 tonne per ha for 2022-23 against 0.91 tonne per ha in 2021-22. It may have a softening impact on the global Lentil markets in the medium to long term.

The production forecast for Field Pea (Dry Peas) too is up by 48.55 % to 3.8 MMT for 2022-23 against 2.58 MMT in 2021-22. Yield forecast has been increased to 2.36 tonne per ha for 2022-23 against 1.51 tonne per ha in 2021-

22. The severe drought condition had affected all pulses yield last year. The higher production prospects may cap upward movement in the global market in the medium term.

The initial production forecast for Chickpeas for 2022-23 too has been increased by 64.47% to 125 thousand MT against 76 thousand MT last year. Yearly average price forecast to has been revised down to \$860 per MT in 2022-23 against \$1065 for 2021-22. Yield has been revised up to 1.51 tonne per ha for 2022-23 against 1.04 toonne in 2021-22

According to latest update from Australian Bureau of Agricultural and Resource Economics and Sciences (ABARES) Chickpea production in Australia is estimated as 10.04 lakh tonnes for 2021-22 as compared to last year's production of 7.33 lakh tonnes. Area under Chickpea has been increased this year in Australia from 5.07 lakh ha to 6.33 lakh ha.

According to latest update from Australian Bureau of Agricultural and Resource Economics and Sciences (ABARES) lentils production in Australia is estimated as 6.56 lakh tonnes for 2021-22 as compared to last year's production of 6.34 lakh tonnes. Area under lentils this year stands at 3.9 lakh ha as compared to last year's acreage of 3.68 lakh ha.

Global Lentils market continues to ease due to weak seasonal demand in the domestic as well as international markets. The difference between Green and Red lentils is widening and it has gone up to \$260 per MT against \$116 last season. This means supply side of green Lentils would continue to be tight in coming months. Availability of Australian crop has increased and the pressure seems to continue on Red Lentils price.

The production estimates for the Australian pulses has been published. As per the latest estimates Australian would harvest 8.44 lakh MT Chickpeas in 2021-22 (Abares estimate) while Pulses Australia sees it at 8.70 lakh MT. The 10 years production average is 7.89 lakh MT. Chickpeas availability in the global market would increase and it may ensure stability in price in the global market.

As per the latest Abares estimate Lentils production in Australia pegged at 6.39 lakh MT in 2021-22. The Pulses Australia sees it at 7.10 lakh MT. The 10 year's average production for Lentils is 4.24 lakh MT. Indian buyers may take interest in Australian Lentils. No deals has been struck so far. However, containers issue and higher freight would keep the import costing high in 2022 too. Major growing states like Queensland and northern NSW, containers availability is still low, and no path to bulk export exists because shipping slots are fully booked. This means scope for immediate export in bulk volume is limited. Prices have come down to a certain extent and growers may prefer to hold stock for better price.

The Field Peas production in Australia may decrease from 10 years average of 2.8 lakh MT to 2.5 lakh MT in 2021-22, as per the latest fig. published by Abares. Australia Pulses sees it at 3.20 lakh MT. Export demand for the Australian Peas may increase as availability in Canada is down while prices are ruling higher. Malaysia & China would continue to import peas from Australia.

The IGC is going to include Lentils, Chickpeas and Dry beans in the Council's definition of grains under Article 2(1) (e) of the grains Trade Convention. This means that now the IGC secretaria will expaand its market information for Pulses. Actually, pulses trades are continuously increasing throughout the world and has expanded with good pace and reached at 16 to 17 million MT in last 5 years. Right now the IGC is providing updates on Pulses trade and production estimates in the Grain Market Report on a bimonthly basis. Apart from it S&D balances are published for major exporters for Pulses like Lentils, Dry Peas and Chickpeas. Now FoB prices matrix too would be included.

Weekly Outlook: -Pulses are likely to trade weak this week.

Pulses-Wise Scenario:

Chana

Current Scenario:

Sowing of Chana is over now as reported on 4th Feb-2022 and it is up by 4.14 % to 114.95 lakh ha so far. Normally sowing ends by mid-Jan, but this year good moisture level in fields and intermittent rains helped farmers to use some fallow lands too for Chana and the sowing time extended by two weeks. As sowing coverage is above the normal market expectation, crop size may move up by 7 to 8 lakh MT to 104-108 lakh MT this year against 97 lakh MT last year. As availability is ample in the central pool, import flow is good, spike in the market is unlikely. Downward pressure on Chana price may continue. Chana may decrease from 200-300 in coming weeks.

New arrivals have already been started in Maharashtra, M.P. and A.P., followed by Rajasthan from the next week. It will pick up by end-Feb and continue to increase throughout March-April. Prices of Chana have started declining in all major markets. It declined by 1. % to Rs 5025 in Delhi market, while it decreased by 1.0 % to 4950 in Bikaner and 0.99% to 5000 in Indore. Tanzania origin Chana in Mumbai market decreased by 5.05 % to 4700 over the previous week. Sentiment remain weak as crop condition throughout the major growing regions is normal to good so far. Weather conditions in Feb and March are crucial and it may affect the inner tone in the market. This weak Chana may extend its downward move by 100-150.

Following graph illustrates chana price movement in different markets:

Outlook for the week: Steady to slightly weak tone may prevail under the normal weather condition.

Peas (Matar):

Market Recap:

As expected by Agriwatch last week, the pea cash market could not sustain its firm momentum and declined considerably just ahead of the new local crop, arriving in markets of M.P. and U.P. It declined by 1.64 % to Rs 6000 in Kanpur market, 5.88 % to Rs 4800 in Dabra market and stayed steady to Rs 7800 in Delhi market. Prices of yellow peas in Delhi market are still higher as it is old imported stock. Prices of pea may move further down by 200-300 as stockists are willing to release stock before the new crop hits in the market and the arrival pressure builds up.

Farmers have covered 10.18 lakh ha this year so far, down by 1.93 % from last year. They had shifted some peas area to other crops like Mustard, Wheat and Lentils in Uttar Pradesh, Assam and Bihar. Sowing is over now. As import of pea remains restricted, global price would not affect price movement much. Availability in global market would increase as Canada has increased production forecast for 2022-23 to 3.80 MMT from 2.25 MMT for 2021-22. Even Australia production size for 2021-22 has been pegged at 2.61 LMT slightly down from 2.94 LMT estimated in Dec-2021 forecast. At availability of green pea is improving from local crop, price of pea should ease and may move down to 5400-5500 again by end-Feb.

Current Market Dynamics & Outlook: Weak sentiment may prevail and the cash market may move down to 5400-5500 soon

Lentils (Masoor):

Market Recap:

Prices of Masoor in various markets traded down and may continue to decrease in the coming weeks. Good recovery in area coverage during last 4-5 weeks and the favorable weather conditions in main growing region so far hint good crop size this year. Arrival has already started and may increase by the end of this month. Under the normal weather condition 13 LMT crop is expected. The new crop may hit market by the end of this month and the arrival timing may be longer till May this year as the sowing time extended by one month this year. Apart from it, as per the preliminary sowing intension in Canada, crop size may increase to 25LMT in 2022-23 against 16 LMT

in 2021-22. It would ease supply side. Availability of 2.5 LMT Masur at ports and 1 to 1.25 LMT is expected in Feb and Mar-2022 may pressurize cash market further despite weather conditions in the next two months would be very crucial to the final crop size this year.

Masur traded down by 2.99% to 7300 in Kanpur market and 4.17% to 6900 in Mumbai market. It traded down by 4.58% to 6775 in Indore market. With increased area coverage by 4.31% to 17.64 lakh ha and the normal crop condition so far, production size is likely to move up from 11.91 LMT (AW estimates) to 12.5 to 13 LMT this year, if weather remains favorable during Feb-Mar too. It may encourage stockists/importers to release stock in Feb and it may impact the prevailing inner tone in the market.

Current Scenario:

Prices are expected to stay stable or slightly weak. Demand too has decreased ahead of the new crop. Price should come down to 6500 in next 15-25 days under the normal climatic condition.

Market Outlook: Prices may trade steady to slightly weak

Pigeon Pea (Tur/Toor):

Yield realized from the new Tur crop in Maharashtra & Karnataka has increased fear of a smaller crop size than the normal expectation. Market participants expect it similar to last year. Quality of crop coming into markets is also poor. Demand is stable and mills and stockists are waiting for Tur with lower moisture content. Recent rains and expected lower production has pushed up market in the last week. However, the firm momentum is unlikely to continue. Continuous supply is there from African countries. Imported Tur in Mumbai traded up by 0.83 % to Rs 6050-6100 per qtl. In Gulbarga market it traded up by 2.31 % to at Rs 6600-6650. Overall sentiment remains weak for Tur in the short to medium term. This week it may trade stable to slightly weak as the stockists/mills are avoiding bulk purchase and waiting for the bulk shipment from Myanmar vessels are being loaded. Quotes in Myanmar are stable at \$800 per MT, basis Indian ports. Apart from it, Government has extended the free import policy of Tur with bill of lading dated on or before 31st Mar 2022 and import should be cleared from customs on or before 30th June 2022. So supply side seems at comfortable level in the coming weeks.

Current Market Dynamics & Outlook:

Lemon Tur is available at Rs.6100/qtl at Mumbai port. As per trade sources, India has imported 96,397 MT in November. So far India has imported total 5.78 LMT MT from April to Dec-2021 and around 1.25 to 1.50 lakh MT is expected in two months. With incoming domestic arrivals and expected import in Feb, Mar and Apr, supply side would continue to increase. The short term outlook is weak while medium term outlook would depend on the size of import volume March onward.

Outlook For the week: Market may trade stable or slightly weak.

Black Matpe (Urad):

Continuous improvement in Rabi Urad area and a good import prospect from Myanmar has continued to suppress the prevailing inner tone in the Urad cash market. Farmers have covered 8.16 lakh ha area under Urad this year so far, down by 1.99 % from last year till 4th Feb 2022. Sowing has got delayed by 15-20 days and will be done by mid of Feb. As sowing has got delayed, it may limit acreage increase by 4 to 5% despite attractive prices prevailing in the market. Import flow too has been low amid tight supplies and quality loss in the Kharif season. Also demand is weak. So, prices may trade steady to slightly weak this week too. FAQ Urad is being traded at Rs. 6100-6150 per qtl. in Mumbai market while in Chennai local crop is being traded at Rs. 5950 per quintal. If demand improves then prices may recover (unlikely this week). Myanmar is offering Urad FAQ at \$805, down by \$5 from last week and offering SQ at \$895 which is down by \$20 as compared to the last week.

Current Market Dynamics & Outlook:

India imported around 4.61 MT Urad in from April to Dec-2021 and 1.00 LMT is expected in Feb & Mar-2022. It would keep supply side at comfortable level. Government has extended the free import policy of Urad with bill of lading dated on or before 31st Mar 2022 and import should be cleared from customs on or before 30th June 2022. Import is free now, so when parity turns in favour of India, the volume of import may increase.

Market Outlook: Overall tone seems steady to slightly weak in the short term to medium term under the normal weather condition.

Outlook For The Week: *Steady to weak movement expected this week*

Green Gram (Moong):

Market Recap:

As of now Moong sowing is less and got delayed due to excess soil moisture in southern part of the country due to rains during start of the sowing season. Rabi Moong has been sown on 4.77 lakh ha so far as compared to 6.61 lakh ha last year. Normal area for Moong for Rabi and summer crops combined stands at 9.41 lakh ha. If weather conditions will be bad continuous in Feb also then it may affect Rabi sowing of Moong. Prices in Jaipur market are ruling in the range of Rs. 6000 to 6500 per qtl, depending on the quality of the crop.

Mills are not buying in bulk volume as demand for dal is weak. Import flow would continue due to Moong being in the free import list till March-2022. Imports may continue to land at Indian ports till January 2022 as per the extended time frame for import. Myanmar is offering Moong Anna Shewar at \$880 and Moong Pedi Shewar at \$875 and Pokako at \$980 per MT. Apart from it Nafed has around 3.4 LMT Moong and is in a position to control Moong price as and when prices move up. Price of Moong (FAQ) stayed steady in Indore at Rs 6800, down by 1.41% in Delhi to 7000. However in Jalgaon the decline was higher by 3.55% to Rs 6800. Moong market is likely to remain steady to slightly in Feb -2022

Market Outlook - Any unexpected rise in the cash market is unlikely at this point of time. The short-term outlook seems steady in Moong market.

Outlook for the week: Stable to slightly weak tone expected this week.

Rabi Sowing Progress as on 04th Feb 2022:

Rabi Pulses Acreage as on 04 Feb 2022						
S. No.	Crop	Normal Area	% of Normal for whole season	Acreage (lakh ha)		% Change over 2021
				2022	2021
