Commodity-wise Domestic, International Prices and Arrivals at Different Centers

Pulses Sector- Domestic Highlights:

Slight recovery in Pulses market might be seen due to ongoing conflict between Russia and Ukraine despite the increasing arrivals in India from local Rabi crop. The conflict may continue for longer time and supply chain might be disrupted as the NATO group of countries have started imposing sanctions on Russia. All pulses market may move up by INR 100-200 this week. The involvement of other countries may add fuel to the fire on commodity prices world wide as the supply chains are disrupted.

Summer Urad sowing has started gaining momentum in states like West Bengal, Tamil Nadu, Chhattisgarh and Karnataka. Farmers have covered 0.657 thousand ha as on 25th Feb-2022. It is down by 7.07 % from the last year same time. The normal area under summer Urad is 2.64 lakh ha. The major growing states are M.P., Chhattisgarh, Assam and West Bengal.

Farmers have covered 0.773 lakh ha under summer Moong so far, down by 12.26 % from 0.881 lakh ha last year same time.

Sowing of Chana is over now and the final area recorded up by 3.85 % to 114.27 lakh ha despite less area coverage in major states like Rajasthan, Chhattisgarh, Jharkhand & Karnataka. The overall price outlook indicates comfortable for consumers in the near to medium term as the crop size may exceed 104 lakh MT against 97 lakh MT last year. Apart from this, the import flow from the least developed countries increased to 2.25 Lakh MT in 10 months against 1.50 lakh MT last year. This year up to Mar-2022, total Chana import volume may increase to 3 lakh MT. Improvement in demand, likely procurement drive from mid-March may support cash market to some extent at the current level. Weather condition is normal so far. Supply side would continue to increase. In Bikaner Chana prices stayed steady at Rs 4800 last week. It may increase by Rs 100-150 soon.

Despite downward revision of Tur production to 37.11 from the previous AW estimate of 40.22 lakh MT for MY 2021-22, almost steady quotes in Myanmar to \$815 during last week, supported by improved arrivals, the good crop size (2.50 lakh MT) and the continuous flow of import in Jan and Feb may cap upward momentum in Tur cash market. Buyers, mills & stockists are expected to start buying again in a couple of weeks when moisture level is expected to decline to 12 from 13-14% right now. Availability of old stock amid new arrivals are likely to restrict the north way movement in the near to medium term under normal condition. The import flow, weather condition and the expected buying activities are crucial and have the potency to change the prevailing undertone. The overall tone is steady to slightly firm during the current week. Crop of Tanzania, Malawi and Mozambique is available in the range of Rs. 5400-5500 in Mumbai. But the shipment may be disrupted if the conflict between Russia and Ukraine extends for the longer period. Fuel cost may go up and resultantly freight too. In Gulbarga market it is trading up by 1.52% to Rs 6300-6700. The arrival pace is yet to pick up as farmers are unwilling to release stock in anticipation of price rise. The overall tone remains steady to slightly firm this week.

Urad cash markets continued to recover during last weeks. It moved up by Rs 100 to Rs 6300 in Mumbai market and Rs 200 to 6200 in Chennai market. Recovery in Urad cash market is unlikely to continue despite the quotes in Myanmar continue to increase. It has increased by \$20 to \$780 per MT during last 8 days. Notably, Myanmar is harvesting bumper crop this year and the export availability is said to be around 7 to 7.5 LMT. It will continue to pressurize Urad market in the local market. If the current import policy continues, import would continue to take place till June-2022. Apart from it, arrivals from the south Indian states are expected to start soon. So, the traders,

stockists and mills are very cautious to go for bulk buying. All these factors may cap uptrend. The price gap between the imported & local crops is contracting and it may settle and stabilize near Rs6000-6500, depending on the quality of the crop. Demand is yet to pick up. This year the local production has been pegged at 22.91 lakh MT crop against 24.19 lakh MT last year. The import volume may increase to over 5.25 lakh MT against 3.20 last year during Aug to Jul (MY). The overall tone seems steady to slightly firm this week. The weekly average price increased in Mumbai by 1.61 % to Rs 6300 and Chennai by Rs 2.06 % 6200 last week.

Moong prices continue to trade steady to slightly firm in the local markets as the import flow from Myanmar at very competitive price during Dec and Jan, ample stock (over 3 lakh MT) in the central pool and the depressed prices in Indian markets encouraged Ministry of Commerce and Industry to place Moong from Free to restricted import list from immediate effect. Markets see it a good move as it would support cash market. There was a fear in the market that if prices continue to rule below MSP by Rs600-1000, farmers may reduce area in Kharif season. Right now, availability is good and the current move may support Moong market to some extent. Supply side is at comfortable level and prices are expected to stay at current level (6000-6800). With this move the declining trend in the market may stop. Prices in Jaipur Market were quoted in the range of Rs5600-6600. Demand is weak and the summer area is running lower by 12.26% to 0.773 lakh ha. It is likely to pick up from the next week.

Despite the downward correction in cash masoor markets and good production prospects, prices are still ruling above MSP and it may continue to rule above MSP the entire year too. Sensing the tight supply side and the high prevailing price in the global markets, the Ministry of Commerce and Industry has extended the import time line on Zero duty from Canada & Australia to 30th Sep-2022. Earlier the zer duty time line was 31st March-2022. The duty on US origin Lentil would be 11% now. It may cap the possibility of any upsurge in the market. Masur in Kanpur market traded up by 0.71% to 7050 while in Mumbai market it traded down by 5.56 % to 6800. It may move down to 6400-6500 in the coming weeks.

When the new crop starts hitting the markets of Madhya Pradesh in earnest, Lentil prices might decrease to 6500-6600 level by mid-March-2022. Lentil in Mumbai and Kanpur markets are being traded at Rs6800 & 7050 per qtl. respectively. As crop condition is good so far, bumper production (13 LMT) is expected this year under the normal weather condition. Stockists are expected to start releasing old stock before the new crop hits the market in plenty. Apart from this, the production forecast for Canada lentils for 2022-23 has been increased to 25 lakh MT against 16.06 lakh MT in 2021-22 in the initial estimate of Agriculture and Agri-Food Canada (AAFC). Stock at Indian ports are above 2 lakh MT while around 45 thousand is expected in end Feb-2022. So, supply side is likely to be in comfortable zone and it will limit any upward momentum in coming weeks. AAFC has projected average yearly price to decrease to \$725 per MT in 2022-23 from \$1080 in 2021-22. Sentiments remain weak

Global Market Updates:

Canada Agriculture & Agri Food Canada has published its preliminary production forecast for 2022-23 on 21st Jan-2022 for Lentil, Chickpea and Field Pea. As per the latest forecast Lentil production may increase by 55.66 % to 2.5 MMT in 2022-23 against 1.60 MMT in 2021-22. The likely yield realization has been increased to 1.41 tonne per ha for 2022-23 against 0.91 tonne per ha in 2021-22. It may have a softening impact on the global Lentil markets in the medium to long term.

The production forecast for Field Pea (Dry Peas) too is up by 48.55 % to 3.8 MMT for 2022-23 against 2.58 MMT in 2021-22. Yield forecast has been increased to 2.36 tonne per ha for 2022-23 against 1.51 toonne per ha in 2021-

22. The severe drought condition had affected all pulses yield last year. The higher production prospects may cap upward movement in the global market in the medium term.

The initial production forecast for Chickpeas for 2022-23 too has been increased by 64.47% to 125 thousand MT against 76 thousand MT last year. Yearly average price forecast to has been revised down to \$860 per MT in 2022-23 against \$1065 for 2021-22. Yield has been revised up to 1.51 tonne per ha for 2022-23 against 1.04 toonne in 2021-22

According to latest update from Australian Bureau of Agricultural and Resource Economics and Sciences (ABARES) Chickpea production in Australia is estimated as 10.04 lakh tonnes for 2021-22 as compared to last year's production of 7.33 lakh tonnes. Area under Chickpea has been increased this year in Australia from 5.07 lakh ha to 6.33 lakh ha.

According to latest update from Australian Bureau of Agricultural and Resource Economics and Sciences (ABARES) lentils production in Australia is estimated as 6.56 lakh tonnes for 2021-22 as compared to last year's production of 6.34 lakh tonnes. Area under lentils this year stands at 3.9 lakh ha as compared to last year's acreage of 3.68 lakh ha.

Global Lentils market continues to ease due to weak seasonal demand in the domestic as well as international markets. The difference between Green and Red lentils is widening and it has gone up to \$260 per MT against \$116 last season. This means supply side of green Lentils would continue to be tight in coming months. Availability of Australian crop has increased and the pressure seems to continue on Red Lentils price.

The production estimates for the Australian pulses has been published. As per the latest estimates Australian would harvest 8.44 lakh MT Chickpeas in 2021-22 (Abares estimate) while Pulses Australia sees it at 8.70 lakh MT. The 10 years production average is 7.89 lakh MT. Chickpeas availability in the global market would increase and it may ensure stability in price in the global market.

As per the latest Abares estimate Lentils production in Australia pegged at 6.39 lakh MT in 2021-22. The Pulses Australia sees it at 7.10 lakh MT. The 10 year's average production for Lentils is 4.24 lakh MT. Indian buyers may take interest in Australian Lentils. No deals has been struck so far. However, containers issue and higher freight would keep the import costing high in 2022 too. Major growing states like Queensland and northern NSW, containers availability is still low, and no path to bulk export exists because shipping slots are fully booked. This means scope for immediate export in bulk volume is limited. Prices have come down to a certain extent and growers may prefer to hold stock for better price.

The Field Peas production in Australia may decrease from 10 years average of 2.8 lakh MT to 2.5 lakh MT in 2021-22, as per the latest fig. published by Abares. Australia Pulses sees it at 3.20 lakh MT. Export demand for the Australian Peas may increase as availability in Canada is down while prices are ruling higher. Malaysia & China would continue to import peas from Australia.

Weekly Outlook: -Slight recovery is expected in the market this week.

Pulses-Wise Scenario:
Chana
Current Scenario:

Chana price recovered slightly during the week under review. Procurement drive, mill's buying interest and slower pace of arrival have helped market to recover. As availability from new and old crop is higher, the current uptrend is unlikely to continue. Pressure of arrival is expected to start by the end of this month. The overall tone seems weak in coming days.

New arrivals have already been started in Maharashtra, M.P. and A.P., followed by Rajasthan from the next week. It will pick up by end-Feb and continue to increase throughout March-April. Recovery that was seen this week is temporary and market may trade range bound despite the plan of ample procurement Tanzania origin Chana in Mumbai market recovered slightly % to 4900 over the previous week. The medium-term sentiment remains weak as crop condition throughout the major growing regions is normal to good so far. Weather conditions in March are crucial and it may affect the inner tone in the market.

Following graph illustrates chana price movement in different markets:

Outlook for the week: Steady to slightly firm tone may prevail under the normal weather condition.

Peas (Matar):

Market Recap:

As expected by Agriwatch last week, the pea cash market could not sustain its firm momentum and declined considerably just ahead of the new local crop, arriving in markets of M.P. and U.P. It declined by 1.45 % to Rs 5800 in Kanpur market, 1.75 % to Rs 6000 in Dabra market and stayed steady to Rs 7800 in Delhi market. Prices of yellow peas in Delhi market are still higher as it is old imported stock. Prices of pea may move further down by 200-300 as stockists are willing to release stock before the new crop hits in the market and the arrival pressure builds up.

Farmers have covered 10.18 lakh ha this year so far, down by 1.93 % from last year. They had shifted some peas area to other crops like Mustard, Wheat and Lentils in Uttar Pradesh, Assam and Bihar. Sowing is over now. As import of pea remains restricted, global price would not affect price movement much. Availability in global market would increase as Canada has increased production forecast for 2022-23 to 3.80 MMT from 2.25 MMT for 2021-22. Even Australia production size for 2021-22 has been pegged at 2.61 LMT slightly down from 2.94 LMT estimated in Dec-2021 forecast. At availability of green pea is improving from local crop, price of pea should ease and may move down to 5400-5500 again by end-Feb.

Current Market Dynamics & Outlook: Weak sentiment may prevail and the cash market may move down to 5400-5500 soon

Lentils (Masoor):

Market Recap:

Prices of Masoor in various markets traded down and may continue to decrease in the coming weeks. Good recovery in area coverage during last 4-5 weeks and the favorable weather conditions in main growing region so far hint good crop size this year. Arrival has already started and may increase by the end of this month. Under the normal weather condition 13 LMT crop is expected. The new crop may hit market by the end of this month and the

arrival timing may be longer till May this year as the sowing time extended by one month this year. Apart from it, as per the preliminary sowing intension in Canada, crop size may increase to 25LMT in 2022-23 against 16 LMT in 2021-22. It would ease supply side. Availability of 2.5 LMT Masur at ports and 1 to 1.25 LMT is expected in Feb and Mar-2022 may pressurize cash market further despite weather conditions in the next two months would be very crucial to the final crop size this year.

Masur traded down by 2.65% to 7050 in Kanpur market and 4.17% to 6900 in Mumbai market. It traded up by 1.50% to 6850 in Indore market. With increased area coverage by 4.31% to 17.64 lakh ha and the normal crop condition so far, production size is likely to move up from 11.91 LMT (AW estimates) to 12.5 to 13 LMT this year, if weather remains favorable during Feb-Mar too. It may encourage stockists/importers to release stock in Feb and it may impact the prevailing inner tone in the market.

Current Scenario:

Prices are expected to stay stable or slightly weak. Demand too has decreased ahead of the new crop. Price should come down to 650-0660 in next 15-25 days under the normal climatic condition.

Market Outlook: Prices may trade steady to slightly weak

Pigeon Pea (Tur/Toor):

Yield realized from the new Tur crop in Maharashtra & Karnataka has increased fear of a smaller crop size than the normal expectation. Market participants expects it similar to last year. Quality of crop coming into markets is also poor. Demand is stable and mills and stockists are waiting for Tur with lower moisture content. Recent rains and expected lower production has pushed up market in the last week. However, the firm momentum is unlikely to continue. Continuous supply is there from African countries. Imported Tur in Mumbai traded up by 1.80 % to Rs

6200-6250 per qtl. In Gulbarga market it traded up by 2.31 % to at Rs 6600-6750. Overall sentiment remains firm for Tur in the short to medium term. This week it may trade stable to slightly weak as the stockists/ mills are avoiding bulk purchase and waiting for the bulk shipment from Myanmar vessels are being loaded. Quotes in Myanmar is stable at \$820 per MT , basis Indian ports due to increasing fuel cost.

Government has extended the free import policy of Tur with bill of lading dated on or before 31st Mar 2022 and import should be cleared from customs on or before 30th June 2022. So supply side seems at comfortable level in the coming weeks.

Current Market Dynamics & Outlook:

Lemon Tur is available at Rs.6200/qtl at Mumbai port. It may go up to 6300-6350 As per trade sources, India has imported 96,397 MT in November. So far India has imported total 5.78 LMT MT from April to Dec-2021 and around 1.25 to 1.50 lakh MT is expected in two months. With incoming domestic arrivals and expected import in Feb ,Mar and Apr, supply side would continue to increase. The short term outlook is weak while medium term outlook would depend on the size of import volume March onward.

Outlook For the week: Market may trade stable or slightly firm.

Black Matpe (Urad):

Continuous improvement in Rabi Urad area and a good import prospect from Myanmar has continued to suppress the prevailing inner tone in the Urad cash market. Farmers have covered 8.16 lakh ha area under Urad this year so far, down by 1.99 % from last year till 4th Feb 2022. Sowing has got delayed by 15-20 days and will be done by mid of Feb. As sowing has got delayed, it may limit acreage increase by 4 to 5% despite attractive prices prevailing in the market. Import flow too has been low amid tight supplies and quality loss in the Kharif season. Also demand is weak. So, prices may trade steady to slightly weak this week too. FAQ Urad is being traded at Rs. 6200-6250 per qtl. in Mumbai market while in Chennai local crop is being traded at Rs. 6150 per quintal. If demand improves then prices may recover (unlikely this week). Myanmar is offering Urad FAQ at \$765 and SQ at \$815 per MT respectively.

Current Market Dynamics & Outlook:

India imported around 4.61 MT Urad in from April to Dec-2021 and 1.00 LMT is expected in Feb & Mar-2022. It would keep supply side at comfortable level. Government has extended the free import policy of Urad with bill of lading dated on or before 31st Mar 2022 and import should be cleared from customs on or before 30th June 2022. Import is free now, so when parity turns in favour of India, the volume of import may increase.

Market Outlook: Overall tone seems steady to slightly firm in the short term to medium term.

Outlook For The Week: Steady to firm movement expected this week

Green Gram (Moong):
Market Recap:

Slight recovery is expected with placing Moong from free to restricted import list. As of now Moong sowing is less and got delayed due to excess soil moisture in southern part of the country due to rains during start of the sowing season. Rabi Moong has been sown on 4.77 lakh ha so far as compared to 6.61 lakh ha last year. Normal area for Moong for Rabi and summer crops combined stands at 9.41 lakh ha. If weather conditions will be bad continuous in Feb also then it may affect Rabi sowing of Moong. Prices in Jaipur market are ruling in the range of Rs. 6000 to 6500 per qtl, depending on the quality of the crop.

Mills are not buying in bulk volume as demand for dal is weak. Import flow would continue due to Moong being in the free import list till March-2022. Imports may continue to land at Indian ports till January 2022 as per the extended time frame for import. Myanmar is offering Moong Anna Shewar at \$810 and Moong Pedi Shewar at \$885 and Pokako at \$845 per MT. Apart from it Nafed has around 3.4 LMT Moong and is in a position to control Moong price as and when prices move up. Price of Moong (FAQ) stayed steady in Indore at Rs 6800, down by 1.41% in Delhi to 7000. However in Jalgaon the decline was higher by 3.55% to Rs 6800. Moong market is likely to remain stable in March.

Market Outlook - Any unexpected rise in the cash market is unlikely at this point of time. The short-term outlook seems steady in Moong market.

Outlook for the week: Stable to slightly firm tone expected this week.
