Commodity-wise Domestic, International Prices and Arrivals at Different Centers

Pulses Sector- Domestic Highlights:

Pulses market continued to recover as expected last week due to ongoing conflict between Russia and Ukraine despite the increasing arrivals in India from local Rabi crops. The conflict may continue for longer time and the supply chain will continue to be disrupted as the European Countries have started imposing sanctions on Russia and a new geo-politic scenario is emerging. It may continue to affect the supply-demand chain in coming months. All pulses except Masur have moved up last week. Crude Oil prices have already begun to move up and will affect the transit costs in international trade. The involvement of other countries may add fuel to the fire on commodity prices world wide as the supply chain would remain disrupted.

Summer Urad sowing has started gaining momentum in states like West Bengal and Tamil Nadu despite 20 % low area coverage in Karnataka and Assam. Farmers have covered 0.858 thousand ha as on 04th March-2022. It is up by 20 % from the last year same time. The normal area under summer Urad is 1.48 lakh ha. The major growing states are M.P., Assam and Uttar Pradesh.

Farmers have covered 1.163 lakh ha under summer Moong so far, up by 13.57 % from 1.024 lakh ha last year same time.

Arrivals have started increasing in various markets and would continue to increase in coming weeks. Sowing of Chana is over now and it stands at 114.27 lakh ha, up by 4.48 %, despite less area coverage in major states like Rajasthan, Chhattisgarh, Jharkhand & Karnataka. The overall price outlook indicates it will remain comfortable for consumers in the near to medium term as the crop size may exceed 104 lakh MT against 97 lakh MT last year. Apart from this, the import flow from the least developed countries increased to 2.25 Lakh MT in 11 months against 1.65 lakh MT last year. This year up to Mar-2022, total Chana import volume may increase to 3 lakh MT. Improvement in demand, likely procurement drive from mid-March may support cash market to some extent at the current level. Weather condition is normal so far. Supply side would continue to increase. In Bikaner Chana prices traded firm at Rs 5000 last week. It may increase by Rs 100-150 soon. In other markets, prices of Chana increased by 1 to 3 %.

Tur cash market traded up due to the increased quotes in Myanmar and active buying activities by mills just ahead of Holi. Tur prices in various markets increased by 1 to 2.5 % in A.P. and M.P. markets while it traded slightly down in Gulbarga and Mumbai markets. The highest increase was seen in Indore markets where it moved up by 200 to Rs 6600. In Gulbarga market it is being traded at Rs 6650. As per Agriwatch estimates, crop size of Tur is 37.11 lakh MT, revised down from 40.22 lakh MT. Quotes in Myanmar has gone up to \$825, up by \$20 from last week. Freight has gone up due to the increasing fuel price and other logistic issues due to the ongoing conflicts between Russian and Ukraine. Availability is good in Myanmar and African countries. So, sudden spike is unlikely. Buyers, mills & stockists have started buying again and it may lend support at the current level. The import flow, weather condition, the ongoing conflicts in the Black Sea region are crucial and have the potency to change the prevailing undertone. The overall tone is steady to slightly firm during the current week. Crop of Tanzania, Malawi and Mozambique is available in the range of Rs. 5450-5600 in Mumbai. But the shipment may be disrupted if the conflict between Russia and Ukraine extends for the longer period. Fuel cost may go up and resultantly freight too would continue to move up. The arrival pace is yet to pick up as farmers are unwilling to release stock in anticipation of price rise. The overall tone remains steady to slightly firm this week.

Urad cash markets continued to recover during last weeks. It moved up by Rs 150 to Rs 6450 in Mumbai market and Rs 100 to 6300 in Chennai market. Recovery in Urad cash market is unlikely to continue despite the quotes in Myanmar continue to increase. It has increased by \$15 to \$795 per MT during last 8 days. Notably, Myanmar is harvesting bumper crop this year and the export availability is said to be around 7 to 7.5 LMT. It will continue to pressurize Urad market in the local market. If the current import policy continues, import would continue to take place till June-2022. Apart from it, arrivals from the south Indian states are expected from the next week. So, the traders, stockists and mills are very wary of bulk buying. All these factors may cap uptrend. The price gap between the imported & local crops is contracting and it may settle and stabilize near Rs6200-6600, depending on the quality of the crop. Demand has started picking up due to festive demand. This year the local production has been pegged at 22.91 lakh MT crop against 24.19 lakh MT last year. The import volume may increase to over 5.25 lakh MT against 3.20 last year during Aug to Jul (MY). The overall tone seems steady to slightly firm this week. The weekly average price increased in Mumbai by 2.38 % to Rs 6450 and Chennai by Rs 1.61 % 6300 last week.

Moong market could not maintain its firm momentum as the import flow from Myanmar at very competitive prices during Dec and Jan, ample stock (over 3 lakh MT) in the central pool and the depressed prices in Indian markets encouraged Ministry of Commerce and Industry to place Moong from Free to restricted import list from immediate effect. Stock availability is good and the Rabi arrival is expected from this week. It would continue to check cash market movement despite restricted import. There was a fear in the market that if prices continue to rule below MSP by Rs600-1000, farmers may reduce area in Kharif season. Right now, availability is good and the current move may support Moong market to some extent. Supply side is at comfortable level and prices are expected to stay at current level (6000-6800). With this move the declining trend in the market may stop. Prices in Jaipur Market were quoted in the range of Rs6000-6600. Demand is weak and the summer area is running up by 13.57 % to 1.16 lakh ha and is likely to pick up from the next week.

Despite the downward correction in cash masoor markets and good production prospects, prices are still ruling above MSP and it may continue to rule above MSP the entire year too. Sensing the tight supply side and the high prevailing price in the global markets, the Ministry of Commerce and Industry has extended the import time line on Zero duty from Canada & Australia to 30th Sep-2022. Earlier the zero duty time line was 31st March-2022. The duty on US origin Lentil would be 11% now. It may cap the possibility of any upsurge in the market. Masur in Kanpur market traded down by 4.96 % to 6700 while in Mumbai market it traded down by 3.68 % to 6550. It may move down to 6300-6400 in the coming weeks.

Arrivals have started increasing and after Holi, prices might decrease to 6300-6400 level. As crop condition is good so far, bumper production (13 LMT) is expected this year under the normal weather condition. Stockists have started releasing old stoc. Apart from this, the production forecast for Canada lentils for 2022-23 has been increased to 25 lakh MT against 16.06 lakh MT in 2021-22 in the initial estimate of Agriculture and Agri-Food Canada (AAFC). Stock at Indian ports are above 2 lakh MT while around 45 thousand is expected in end Feb-2022. So, supply side is likely to be in comfortable zone and it will limit any upward momentum in coming weeks. AAFC has projected average yearly price to decrease to \$725 per MT in 2022-23 from \$1080 in 2021-22. Sentiments remain weak.

Global Market Updates:

Canada Agriculture & Agri Food Canada has published its preliminary production forecast for 2022-23 on 21st Jan-2022 for Lentil, Chickpea and Field Pea. As per the latest forecast Lentil production may increase by 55.66 % to 2.5 MMT in 2022-23 against 1.60 MMT in 2021-22. The likely yield realization has been increased to 1.41 tonne per ha for 2022-23 against 0.91 tonne per ha in 2021-22. It may have a softening impact on the global Lentil markets in the medium to long term.

The production forecast for Field Pea (Dry Peas) too is up by 48.55 % to 3.8 MMT for 2022-23 against 2.58 MMT in 2021-22. Yield forecast has been increased to 2.36 tonne per ha for 2022-23 against 1.51 tonne per ha in 2021-22. The severe drought condition had affected all pulses yield last year. The higher production prospects may cap upward movement in the global market in the medium term.

The initial production forecast for Chickpeas for 2022-23 too has been increased by 64.47% to 125 thousand MT against 76 thousand MT last year. Yearly average price forecast to have been revised down to \$860 per MT in 2022-23 against \$1065 for 2021-22. Yield has been revised up to 1.51 tonne per ha for 2022-23 against 1.04 tonne in 2021-22

According to latest update from Australian Bureau of Agricultural and Resource Economics and Sciences (ABARES) Chickpea production in Australia is estimated as 10.04 lakh tonnes for 2021-22 as compared to last year's production of 7.33 lakh tonnes. Area under Chickpea has been increased this year in Australia from 5.07 lakh ha to 6.33 lakh ha.

According to latest update from Australian Bureau of Agricultural and Resource Economics and Sciences (ABARES) lentils production in Australia is estimated as 6.56 lakh tonnes for 2021-22 as compared to last year's production of 6.34 lakh tonnes. Area under lentils this year stands at 3.9 lakh ha as compared to last year's acreage of 3.68 lakh ha.

Global Lentils market continues to ease due to weak seasonal demand in the domestic as well as international markets. The difference between Green and Red lentils is widening and it has gone up to \$260 per MT against \$116 last season. This means supply side of green Lentils would continue to be tight in coming months. Availability of Australian crop has increased and the pressure seems to continue on Red Lentils price.

The production estimates for the Australian pulses has been published. As per the latest estimates Australian would harvest 8.44 lakh MT Chickpeas in 2021-22 (Abares estimate) while Pulses Australia sees it at 8.70 lakh MT. The 10 years production average is 7.89 lakh MT. Chickpeas availability in the global market would increase and it may ensure stability in price in the global market.

As per the latest Abares estimate Lentils production in Australia pegged at 6.39 lakh MT in 2021-22. The Pulses Australia sees it at 7.10 lakh MT. The 10 year's average production for Lentils is 4.24 lakh MT. Indian buyers may take interest in Australian Lentils. No deals have been struck so far. However, containers issue and higher freight would keep the import costing high in 2022 too. Major growing states like Queensland and northern NSW, containers availability is still low, and no path to bulk export exists because shipping slots are fully booked. This means scope for immediate export in bulk volume is limited. Prices have come down to a certain extent and growers may prefer to hold stock for better price.

The Field Peas production in Australia may decrease from 10 years average of 2.8 lakh MT to 2.5 lakh MT in 2021-22, as per the latest fig. published by Abares. Australia Pulses sees it at 3.20 lakh MT. Export demand for the Australian Peas may increase as availability in Canada is down while prices are ruling higher. Malaysia & China would continue to import peas from Australia.

Weekly Outlook: - steady to firm tone may prevail this week.

Pulses-Wise Scenario:
Chana
Current Scenario:

Chana price traded up by 1 to 3 % during the week under review. Procurement drive, mill's buying interest and slower pace of arrival have helped market to go up. As availability from new and old crop is higher, the current uptrend is unlikely to continue. Pressure of arrival is expected to build up after Holi. The overall tone seems steady to slightly firm.

New arrivals have already been started in Maharashtra, M.P. and A.P., followed by Rajasthan from the next week. It will pick up in the second fortnight and continue to increase throughout March-April. Tanzania origin Chana in Mumbai market recovered slightly by 1.1 % to 4600 over the previous week. The medium-term sentiment remains weak as crop condition throughout the major growing regions is normal to good so far. Weather conditions in March are crucial and it may affect the inner tone in the market.

Following graph illustrates chana price movement in different markets:

Chana % Price Fluctuation Over Previous Week					
Markets	Today	Week Ago	Month Ago	Year Ago	% Ch. Over
	05.03.22	26.02.22	05.02.22	05.03.21	26-Feb-22
Delhi Chana(Raj)	5300	5150	5050	5175	2.91
Bikaner Chana	5000	4900	4950	5050	2.04
Indore Chana	5100	5050	5000	5150	0.99
Tan.Chana	4600	4550	4450	4700	1.10
Price Projection For Bikaner During March-2022 (4800-5250)					

Outlook for the week: Steady to slightly firm tone may prevail under the normal weather condition.

Peas (Matar):
Market Recap:

Arrival pressure has started building up on peas markets and it may continue throughout March and April. Prices of peas in Kanpur market decreased by 9 % last week and may slip further by 3 to 4 % in the near term. Desi peas quoted at Rs 5100 while white peas at Rs5000. The decline was seen around Rs500 per qtl. Last week. New crop is coming into markets of M.P. and U.P. Prices of pea may decrease further down by 200-300 as stockists are releasing old stock sensing arrival pressure to continue.

Farmers had covered 10.18 lakh ha this year, down by 1.93 % from last year. They had shifted some peas area to other crops like Mustard, Wheat and Lentils in Uttar Pradesh, Assam and Bihar. As import of pea remains restricted, global price would not affect price movement much at the arrival time. Availability in global market would increase as Canada has increased production forecast for 2022-23 to 3.80 MMT from 2.25 MMT for 2021-22. Even Australia production size for 2021-22 has been pegged at 2.61 LMT slightly down from 2.94 LMT estimated in Dec-2021 forecast. At availability of green pea is improving from local crop, price of pea should ease and may move down to 4600-4800 again by end-March.

Current Market Dynamics & Outlook: Weak sentiment may prevail. Bumper Chana crop would continue to pressurize peas price too.

Yellow & White Peas % Price Fluctuation Over Previous Week					
Markets	Today	Week Ago	Month Ago	Year Ago	% Ch. Over
	05.03.22	26.02.22	05.02.22	05.03.21	26-Feb-22
Kanpur Desi Peas	5100	5600	6100	5300	-8.93
Kanpur White Peas	5000	5500	5900	6000	-9.09
Price Projection For Kanpur Desi During March-2022 (4600-5150)					

Lentils (Masoor):

Market Recap:

Prices of Masoor in various markets continued to move south way and the declining trend may continue in the coming weeks. Good recovery in area coverage during last 4-5 weeks and the favorable weather conditions in main growing region ensured the good crop size this year. Arrivals have already started and may increase by mid March. Under the normal weather condition 13 LMT crop is expected. The arrival timing may be longer till May this year as the sowing time extended by one month this year. Apart from it, as per the preliminary sowing intension in Canada, crop size may increase to 25 LMT in 2022-23 against 16 LMT in 2021-22. It would ease supply side. Availability of 2.5 LMT Masur at ports and 1 to 1.25 LMT is expected in Feb and Mar-2022 may pressurize cash market further. Masur traded down by 5 % to 6700 in Kanpur market and 3.68 % to 6550 in Mumbai market. It traded down by 5.71 % to Rs 6600 in Raipur market. With increased area coverage by 4.31% to 17.64 lakh ha and the normal crop condition so far, production size is likely to move up from 11.91 LMT(AW estimates) to 12.5 to 13 LMT this year, if weather remains favorable during Mar too. It may encourage stockists/importers to release stock in Feb and it may continue to impact the prevailing inner tone in the market.

Current Scenario:

Prices are expected to stay stable or slightly weak. Demand too has decreased ahead of the new crop. Price should decrease by Rs200-300 more in next 15-25 days from now..

Market Outlook: Prices may trade steady to slightly weak

Lentil % Price Fluctuation Over Previous Week					
Markets	Today	Week Ago	Month Ago	Year Ago	% Ch. Over
	05.03.22	26.02.22	05.02.22	05.03.21	26-Feb-22
Kanpur	6700	7050	7300	5750	-4.96
Mumbai	6550	6800	6900	5600	-3.68
Raipur	6600	7000	7050	5500	-5.71
Ashok Nagar	6300	6600	6800	5600	-4.55
Price Projection For Kanpur During March-2022 (6400-6900)					

Pigeon Pea (Tur/Toor):

Tur cash market traded mixed during the week despite disturbance in Black Sea Region , increasing freight cost and slower pace of import. Agriwatch has pegged production at 37 LMT. Quality of crop coming into markets is also poor as rains during maturity stages had affected the quality of the crop.Plenty of old stock is still available and it may cap uptrend in the near term. Continuous supply is there from African countrie and Myanmar.Imported Tur in Mumbai traded down by 1.19 % to Rs 6200-6225 per qtl. In Gulbarga market it traded down by0.66 % to at Rs 6600-6650. Overall sentiment remains weak for Tur in the short term. Quotes in Myanmar is stable at \$825 per MT , basis Indian ports due to increasing fuel cost.

Government has extended the free import policy of Tur with bill of lading dated on or before 31st Mar 2022 and import should be cleared from customs on or before 30th June 2022.So supply side seems at comfortable level in the coming weeks.

Current Market Dynamics & Outlook:

Lemon Tur is available at Rs.6200-6250/qtl at Mumbai port.Range bound movement expected this week as buyers are waitingfor the impact of Ukraine and Russia conflict and fuel cost to stabilize. India has imported 96,397 MT in November. So far India has imported total 5.78 LMT MT from April to Dec-2021 and around 1.25 to 1.50 lakh MT is expected in two months. With incoming domestic arrivals and expected import in Feb ,Mar and Apr, supply side would continue to increase.The short term outlook is weak while medium term outlook would depend on the size of import volume March onward.

Outlook For the week: Market may trade stable or slightly firm.

Tur % Price Fluctuation Over Previous Week					
Markets	Today	Week Ago	Month Ago	Year Ago	% Ch. Over
	05.03.22	26.02.22	05.02.22	05.03.21	26-Feb-22
Gulbarga	6650	6700	6650	6750	-0.75
Kadapa(A.P.)	6250	6200	6200	6700	0.81
Indore	6600	6300	6300	6700	4.76
Mumbai	6225	6300	6100	6400	-1.19
Price Projection For Gulbarga During March-2022 (6450-6850)					

Black Matpe (Urad):

Urad cash markets continued to recover during last weeks. It moved up by Rs 150 to Rs 6450 in Mumbai market and Rs 100 to 6300 in Chennai market. Recovery in Urad cash market is unlikely to continue despite the quotes in Myanmar continue to increase. It has increased by \$15 to \$795 per MT during last 8 days. Notably, Myanmar is harvesting bumper crop this year and the export availability is said to be around 7 to 7.5 LMT. It will continue to pressurize Urad market in the local market. If the current import policy continues, import would continue to take place till June-2022. Apart from it, arrivals from the south Indian states are expected from the next week. So, the traders, stockists and mills are very wary of bulk buying. All these factors may cap uptrend. The price gap between the imported & local crops is contracting and it may settle and stabilize near Rs6200-6600, depending on the quality of the crop. Demand has started picking up due to festive demand.

This year the local production has been pegged at 22.91 lakh MT crop against 24.19 lakh MT last year. The import volume may increase to over 5.25 lakh MT against 3.20 last year during Aug to Jul (MY). The overall tone seems steady to slightly firm this week. The weekly average price increased in Mumbai by 2.38 % to Rs 6450 and Chennai by Rs 1.61 % 6300 last week

Current Market Dynamics & Outlook:

India imported around 4.61 MT Urad in from April to Dec-2021 and 1.00 LMT is expected in Feb & Mar-2022. It would keep supply side at comfortable level. Government has extended the free import policy of Urad with bill of lading dated on or before 31st Mar 2022 and import should be cleared from customs on or before 30th June 2022. Import is free now, so when parity turns in favour of India, the volume of import may increase.

Market Outlook: Overall tone seems steady to slightly firm in the short term to medium term .

Outlook For The Week: Steady to firm movement expected this week

Price Projection For Tamil Nadu During March-2022 (6150-6550)					

Green Gram (Moong):
Market Recap:

Moong market could not maintain its firm momentum as the import flow from Myanmar at very competitive prices during Dec and Jan, ample stock (over 3 lakh MT) in the central pool and the depressed prices in Indian markets encouraged Ministry of Commerce and Industry to place Moong from Free to restricted import list from immediate effect. Stock availability is good and the Rabi arrival is expected from this week. It would continue to check cash market movement despite restricted import. There was a fear in the market that if prices continue to rule below MSP by Rs600-1000, farmers may reduce area in Kharif season. Right now, availability is good and the current move may support Moong market to some extent.

Supply side is at comfortable level and prices are expected to stay at current level (6000-6800). With this move the declining trend in the market may stop. Prices in Jaipur Market were quoted in the range of Rs6000-6600. Demand is weak and the summer area is running up by 13.57 % to 1.16 lakh ha and is likely to pick up from the next week.

Market Outlook - Any unexpected rise in the cash market is unlikely at this point of time. The short-term outlook seems steady in Moong market.

Outlook for the week: Stable to slightly firm tone expected this week.
