Commodity-wise Domestic, International Prices and Arrivals at Different Centers

Pulses Sector- Domestic Highlights:

Pulses cash markets traded down last week as demand for Holi was over with the increasing arrivals from Rabi crops like Bengal Gram, Lentil and Green Moong. However, Black Gram prices continued to trade firm due to the delayed arrival from the Rabi crop and the low volume of import from Myanmar.

The markets are waiting to see if the govt will extend the BL date for Black Gram (Urad) import to 30th June. If it happens so, the prevailing bullish sentiment for Urad may change. The overall situation on the price front seems mixed for the short term. The medium-term outlook except Chana and Moong seems firm as the fuel cost is going up amid other logistical issues.

Nafed has procured around 1.1Lakh MT Bengal Gram so far and the volume may go up quickly as arrivals have started increasing.

Summer Urad sowing continued to gain momentum in all states including Chhattisgarh. Farmers have covered 1.374 lakh ha as on 18th March-2022. It is up by 50 % from the last year same time. The normal area under summer Urad is 1.57 lakh ha. The major growing states are M.P., Assam and Uttar Pradesh.

Farmers have covered 1.86 lakh ha under summer Moong so far, up by 9.85 % from 1.70 lakh ha last year same time. M.P. is a major growing state, but the sowing data is not in the public domain so far.

Chana arrivals have started increasing in various markets and would continue to increase in coming weeks. Farmers had covered 114.27 lakh ha last year, up by 4.48 % from the previous year despite less area coverage in major states like Rajasthan, Chhattisgarh, Jharkhand & Karnataka. The overall price outlook indicates comfortable for consumers in the near to medium term as the crop size may exceed 104 lakh MT against 97 lakh MT last year. Apart from this, the import flow from the least developed countries increased to 2.25 Lakh MT in 11 months against 1.65 lakh MT last year. This year up to Mar-2022, total Chana import volume may increase to 3 lakh MT, including Kabuli Chana. Improvement in demand, the ongoing procurement drive may lend support to cash market to some extent at the current level. Decision of halting auction by NAFED too would help market to recover. Weather condition is normal so far. Supply side would continue to increase. Chana markets traded down by 2 to 3 % (Rs 4900-5125) in various markets last week. Steady to slightly firm tone may prevail.

Tur cash market traded weak by 0.75 to 0.80 % to Rs 6350 to 6600 last week except Indore where prices increased by Rs 3.88 % to Rs 6700. The shortage of ready stock and demand for mills continued to support Tur cash market in Indore. Prices of Tur may slip by Rs 150 to 200 as the quotes in Myanmar decreased by \$20 to \$ 800. Market is waiting for changes in import policy. If BL date is extended for Tur too, prices may decrease by Rs 200-300, otherwise it may continue to trade steady to slightly firm. As per Agriwatch estimates, crop size of Tur is 37.11 lakh MT, revised down from 40.22 lakh MT. Quotes in Myanmar has decreased to \$810, up by \$20 from last week. However, it may go up again as the fuel cost is going up. Availability is good in Myanmar and African countries. So, sudden spike is unlikely. Buyers, mills & stockists may enter into market again once the decision on the BL date gets cleared. The import flow, weather condition, the ongoing conflicts in the Black Sea region are still crucial and have the potency to change the prevailing undertone. The Crop of Tanzania, Malawi and Mozambique is available in the range of Rs. 5400-5500 in Mumbai. But the shipment may be disrupted if the conflict between Russia and Ukraine extends for the longer period. Arrivals in markets have decreased.

The short supply in Urad cash market and the normal demand after Holi may continue to push up cash market further. Import that is coming to ports are going into godowns and market is facing shortage of Urad at this point of time. If the BL date is extended, import would be on requirement basis. It may help market to pressurize the stockists to release stock and ease supply side as the import opportunity will be there. Urad moved up by 0.77 % to Rs 6550 in Mumbai market while it stayed steady to Rs 6300 in Chennai market. This year the export availability in Myanmar is said to be around 6 to 6.5 LMT. It may cap the current upward momentum in local Urad market if the BL date is extended. The traders, stockists and mills are very cautious to go for bulk buying right now and waiting for govt's move on BL date. This year the local production has been pegged at 22.91 lakh MT crop against 24.19 lakh MT last year. The import volume may increase to over 5.25 lakh MT against 3.20 last year during Aug to Jul (MY). The overall tone seems steady to slightly firm this week.

Moong market continued to trade firm as offtake from the mills continues amid restricted import. It may trade steady in coming weeks. Market is aware of the fact that availability is higher in central pool and NAFED is in a position to control market by starting release of Moong whenever required. So, private participants are unwilling stock in bulk volume. Rabi arrival is expected from this week. It would continue to check cash market movement. Procurement drive may help market to maintain its current level. With increasing flow of rabi arrivals prices of Moong may stay steady to slightly weak in coming weeks. Supply side is at comfortable level and prices are expected to stay at current level (6200-7200). Prices in Jaipur Market were quoted in the range of Rs6700-7100. Arrival from the summer crop is expected from Mid-April-May.

Masur market could not maintain its firm momentum last week as the arrival pressure started building up after Holi as expected. Prices decreased by 4.44% to Rs6450 in Kanpur market. It traded down by 1.10% to Rs6725 in Mumbai. Under the prevailing global scenario Masur price may continue to rule above MSP the entire year despite good crop size this year. Sensing the tight supply side and the high prevailing price in the global markets, the Ministry of Commerce and Industry has extended the import time line on Zero duty from Canada & Australia to 30th Sep-2022. Earlier the zero-duty time line was 31st March-2022. The duty on US origin Lentil would be 11% now. It may cap the possibility of any upsurge in the market.

Arrivals have started increasing and after Holi prices might decrease to 6300-6500 level. As crop condition is good so far, bumper production (12 LMT) is expected this year. Stockists have started releasing old stock. Apart from this, the production forecast for Canada lentils for 2022-23 has been increased to 25 lakh MT against 16.06 lakh MT in 2021-22 in the initial estimate of Agriculture and Agri-Food Canada (AAFC). Stock at Indian ports are above 2 lakh MT while around 45 thousand is expected in end Feb-2022. So, supply side is likely to be in comfortable zone and it will limit any upward momentum in coming weeks. AAFC has projected average yearly price to decrease to \$725 per MT in 2022-23 from \$1080 in 2021-22. Sentiments remain weak for the rest of March.

Global Market Updates:

According to the sources, over the past week, international field pea markets continued to improve on news of feed shortages in some destinations like China, Bangladesh & EU that supported the market sentiments. Due to sanctions against Russia and the effective closure of many transportation links with the Ukraine have reportedly created an immediate shortage of product that have forced some compound feed manufacturers to increase the proportion of peas used in their blends. As both the Ukraine and Russia have been major suppliers of feed grains to the region, feed pea values in the European Union have reached record levels this month. As import is restricted, India is not importing field peas.

Lentil markets finished on a firm note during the week on anticipation of improved export demand outside North America and Canada through the balance of the Marketing Year and possible into the post-harvest shipping period. As availability of stocks with farmers are limited, the green lentils are showing more strength than red. As per the sources, exporters expectation of improved demand over the short to medium term, kept the red lentils prices firm during the week. At present, the lentils FAQ rate is \$915 which is expected to increase to \$940 to \$950 in coming future

Canada Agriculture & Agri Food Canada has published its preliminary production forecast for 2022-23 on 21st Jan-2022 for Lentil, Chickpea and Field Pea. As per the latest forecast Lentil production may increase by 55.66 % to 2.5 MMT in 2022-23 against 1.60 MMT in 2021-22. The likely yield realization has been increased to 1.41 tonne per ha for 2022-23 against 0.91 tonne per ha in 2021-22. It may have a softening impact on the global Lentil markets in the medium to long term.

The production forecast for Field Pea (Dry Peas) too is up by 48.55 % to 3.8 MMT for 2022-23 against 2.58 MMT in 2021-22. Yield forecast has been increased to 2.36 tonne per ha for 2022-23 against 1.51 toonne per ha in 2021-22. The severe drought condition had affected all pulses yield last year. The higher production prospects may cap upward movement in the global market in the medium term.

The initial production forecast for Chickpeas for 2022-23 too has been increased by 64.47% to 125 thousand MT against 76 thousand MT last year. Yearly average price forecast to has been revised down to \$860 per MT in 2022-23 against \$1065 for 2021-22. Yield has been revised up to 1.51 tonne per ha for 2022-23 against 1.04 toonne in 2021-22

According to latest update from Australian Bureau of Agricultural and Resource Economics and Sciences (ABARES) Chickpea production in Australia is estimated as 10.04 lakh tonnes for 2021-22 as compared to last year's production of 7.33 lakh tonnes. Area under Chickpea has been increased this year in Australia from 5.07 lakh ha to 6.33 lakh ha.

According to latest update from Australian Bureau of Agricultural and Resource Economics and Sciences (ABARES) lentils production in Australia is estimated as 6.56 lakh tonnes for 2021-22 as compared to last year's production of 6.34 lakh tonnes. Area under lentils this year stands at 3.9 lakh ha as compared to last year's acreage of 3.68 lakh ha.

As per the latest Abares estimate Lentils production in Australia pegged at 6.39 lakh MT in 2021-22. The Pulses Australia sees it at 7.10 lakh MT. The 10 year's average production for Lentils is 4.24 lakh MT. Indian buyers may take interest in Australian Lentils. No deals has been struck so far. However, containers issue and higher freight would keep the import costing high in 2022 too. Major growing states like Queensland and northern NSW, containers availability is still low, and no path to bulk export exists because shipping slots are fully booked. This means scope for immediate export in bulk volume is limited. Prices have come down to a certain extent and growers may prefer to hold stock for better price.

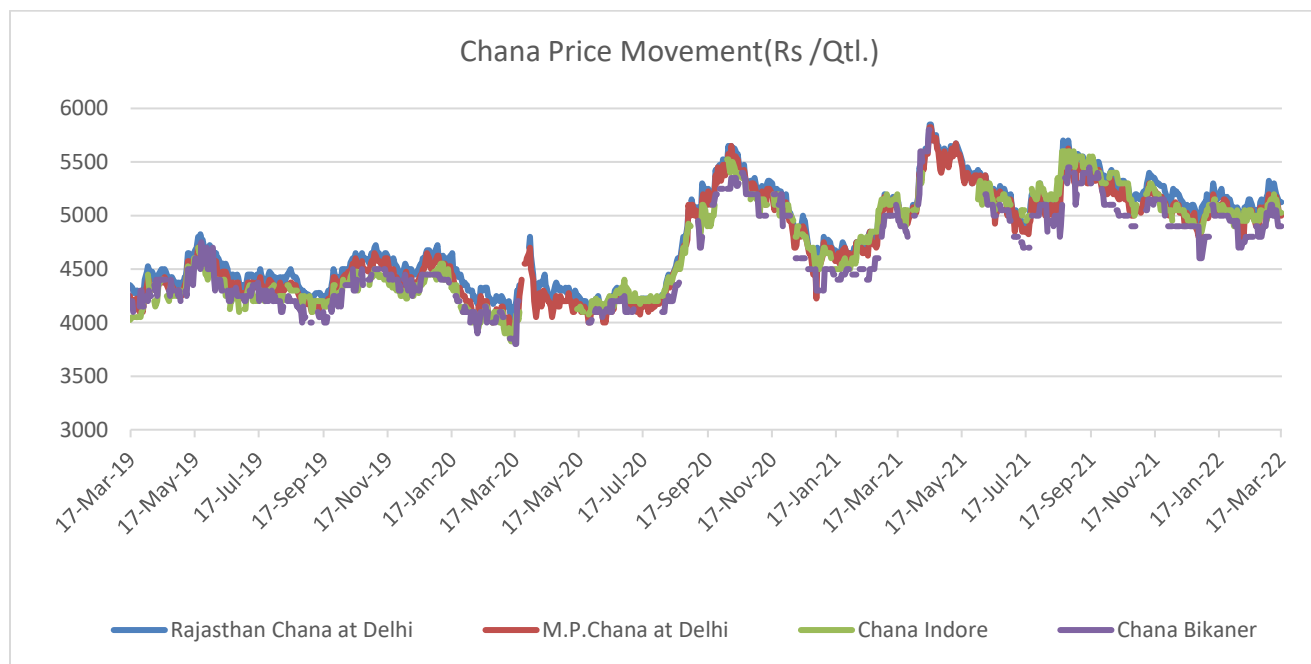

Weekly Outlook: - Steady to slightly weak tone may prevail this week.

Pulses-Wise Scenario:
Chana
Current Scenario:

With increasing arrival in major states prices of Chana traded down by 2 to 3.5 % in various markets despite the ongoing procurement drive in M.P., Rajasthan, Maharashtra, A.P. and Gujarat. As the procurement drive has just started in major states , prices of Chana is expected to recover. It may move up by 2 to 4 % in couple of week. Demand for Besan is likely to go up as the marriage season is about to start from April. It may push up price. NAFED has already stopped selling through auction of old crop. It too remains supportive to Chana cash market. Chana prices in various markets are ruling in the range of Rs4900-5150 and it may move towards MSP level with the increasing pace of procurement.Govt. and various state agencies have procured around 1.20 lakh MT Chana so far against the set target of 25 LMT.
