Commodity-wise Domestic, International Prices and Arrivals at Different Centers

Pulses Sector- Domestic Highlights:

Most of the major cash markets remained closed due to End-of-Financial-Year tasks and the normal trade is likely to resume only from the mid of the week. All pulses cash market traded low except Masur. Timeline extension given to Urad and Tur import to March-2023 (for a year) last week, has had a cooling impact on the cash market prices. Masur traded up by 2 to 3 % last week in the range of Rs 7650 to 7100 per qtl.

Arrival from the rabi crops is likely to increase from mid-April, by then farmers would be able to finish 70-75% of the wheat harvest, currently going on in full swing. Millers, stockists and private trades too may start fresh buying now. Apart from it, procurement drive by state agencies may support all pulses markets in coming weeks. The overall inner tone seems firm for the week.

The C&F quotes in Myanmar have decreased by 1.5 to 2.25 % after an extended time frame of Tur and Urad import. FAQ Urad and Tur are currently quoted at \$ 840 per MT for the ready delivery. As the duration of import timing has increased, the CnF quotes in Myanmar may stay steady.

Nafed has procured around 2.66 Lakh MT Bengal Gram so far and the volume may go up quickly as arrivals are expected to increase.

Summer Urad sowing continued to gain momentum in all states except Madhya Pradesh. Farmers have covered 2.60 lakh ha as on 01st April-2022. It is up by 72 % from the last year same time. The normal area under summer Urad is 3.82 lakh ha. The major growing states are Tamil Nadu, M.P. and Uttar Pradesh.

Farmers have covered 5.54 lakh ha under summer Moong so far, up by 34.79 % from 4.113 lakh ha last year same time. M.P. is a major growing state, where it is down by 32 % so far.

Chana cash market traded down by 1 to 2 % in various markets due to sluggish trading activities. Trades remained engaged in settling accounts at the year end. The normal trade is expected to resume by mid of the week. Fresh buying is expected from trades amid the ongoing procurement drive. It may push up Chana price to some extent. Govt agencies have already procured 2.66 LMT Chana so far. Chana in various markets is trading in the range of Rs 4700-5100. It may move up towards MSP level in the weeks ahead.

The extended timeline for Tur import for a year up-to 31st March -2023 has capped the upward movement in cash market. Regular supply from the overseas is expected now as per the requirement throughout the year. With this changed import policy, stockists of Tur may hold their Tur stocks for a longer time and release based on the prices. It would ensure a regular supply from the overseas and local stockists. So, any spike is unlikely. Normal trade is expected, at a range of Rs 200 250 up or down from current prices, in the coming weeks. The other price driving forces would be the sowing area and Monsoon rains. If farmers shift some area to Soybean, price rise may be higher. Mostly cash markets traded down by 1 to 2% last week to Rs 6250 to 6500 per Qtl. Myanmar quotes are stable at \$830-840 per Tonne, basis Indian ports.

Sensing the short supply and increasing prices of Urad in the local markets, govt. extended the import timeline for Urad to 31st March-2023. It would ensure a regular supply as per the requirement from Myanmar and help to cap upward momentum. Inner tone in the cash market has weakened and stable movement is expected right now.

The medium-term outlook would depend on sowing area under Kharif season and the monsoon rains. If farmers shift area to other lucrative crops, price may move beyond our expected level of Rs 6200-6600. Price of Urad have decreased by 1 to 3 % in various markets to Rs 6350-6650. It may decrease by Rs 100 more and should stabilize. Myanmar is quoting FAQ Urad at \$840, down by \$10 from last week.

Moong market could not maintain its firm momentum and declined by 1 to 2 % in various markets. Disrupted trading activities due to March closing and weak demand helped market to ease like other pulses, barring Masur. Ample availability in the Central pool, the arrival from Rabi crop and the smooth sowing in summer season have pressurized the Moong cash. The medium-term outlook would depend on Kharif area and rains frequency throughout the monsoon season. The short-term outlook seems steady to slightly weak. Moong (FAQ) cash market traded in the range of Rs 7100 to 7400 per qtl. After Rabi arrival from summer crop is expected from May. Import volume remains restricted due to ban.

Against all expectations, Masur cash markets traded up by 1 to 3 % last week. The reason behind uptrend is mainly attributed to low arrivals, stockists active buying and the increasing cost of import. As Canada and Australia have increased quotes from \$945 to 960 per MT, costing of import has gone up. Apart from it, ready stock at Canadian ports has come down. Farmers in Uttar Pradesh are engaged in wheat harvesting, so prices have increased. Local arrival is expected to improve and a downward correction of Rs 100-200 is expected by mid April. However, the overall tone seems strong. Maximum stocks from mandis are going to go-downs, so tight supply side seems very much in the cash market. Masur is being traded at in the range of Rs 6500 to 7100 per qtl. It should decrease by Rs 100-200.

Recent report from U.S. Department of Agriculture (USDA) reveals that Chickpea area is likely to fall by 18 percent to 303,600 acres as growers are not less interest to sow Chickpea in a big way. However, small Chickpea area is estimated to increase from 2021 by 5 percent to 62,100 acres. Area under the large Chickpea in 2022 is estimated to be at 241,500 acres down by 22 percent from previous year.

The Canadian Grain Commission (CGC) has reported that around 4,800 MT lentils were loaded for export through licensed facilities in February. As per the Commission, 53,000 MT lentil was shipped the same month last year, while movement is down from the 7,200 MT shipped the previous month. With adding this quantity, the bulk loadings for the Marketing Year reached to 4,14,200 MT, compared to 6,06,100 MT last season.

Canada Agriculture & Agri Food Canada has published its preliminary production forecast for 2022-23 on 21st Jan-2022 for Lentil, Chickpea and Field Pea. As per the latest forecast Lentil production may increase by 55.66 % to 2.5 MMT in 2022-23 against 1.60 MMT in 2021-22. The likely yield realization has been increased to 1.41 tonne per ha for 2022-23 against 0.91 tonne per ha in 2021-22. It may have a softening impact on the global Lentil markets in the medium to long term.

The production forecast for Field Pea (Dry Peas) too is up by 48.55 % to 3.8 MMT for 2022-23 against 2.58 MMT in 2021-22. Yield forecast has been increased to 2.36 tonne per ha for 2022-23 against 1.51 toone per ha in 2021-22. The severe drought condition had affected all pulses yield last year. The higher production prospects may cap upward movement in the global market in the medium term.

The initial production forecast for Chickpeas for 2022-23 too has been increased by 64.47% to 125 thousand MT against 76 thousand MT last year. Yearly average price forecast to has been revised down to \$860 per MT in 2022-23 against \$1065 for 2021-22. According to latest update from Australian Bureau of Agricultural and Resource Economics and Sciences (ABARES) Chickpea production in Australia is estimated as 10.04 lakh tonnes for 2021-22 as compared to last year's production of 7.33 lakh tonnes. Area under Chickpea has been increased this year in Australia from 5.07 lakh ha to 6.33 lakh ha.

According to latest update from Australian Bureau of Agricultural and Resource Economics and Sciences (ABARES) lentils production in Australia is estimated as 6.56 lakh tonnes for 2021-22 as compared to last year's production of 6.34 lakh tonnes. Area under lentils this year stands at 3.9 lakh ha as compared to last year's acreage of 3.68 lakh ha.

As per the latest Abares estimate Lentil production in Australia pegged at 6.39 lakh MT in 2021-22. The Pulses Australia sees it at 7.10 lakh MT. The 10 year's average production for Lentils is 4.24 lakh MT. Indian buyers may take interest in Australian Lentils. No deals has been struck so far. However, containers issue and higher freight would keep the import costing high in 2022 too. Major growing states like Queensland and northern NSW, containers availability is still low, and no path to bulk export exists because shipping slots are fully booked. This means scope for immediate export in bulk volume is limited. Prices have come down to a certain extent and growers may prefer to hold stock for better price.

Weekly Outlook: - Steady to slightly weak tone may prevail this week.
