Commodity-wise Domestic, International Prices and Arrivals at Different Centers

Pulses Sector- Domestic Highlights:

After the End-of-Financial-Year tasks, most of the markets have opened and the normal trade resumed last week. All pulses cash market traded up. Urad and Masur increased smartly during the week while Moong, Tur and Chana inched up marginally. Masur traded up by 2 to 3.5 % last week in the range of Rs 7000 to 7300 per qtl. And Urad in the range of Rs 6750 to 7050. Moong traded down by 1 to 5 %.

Arrivals from the rabi crops are likely to increase from mid-April, by then farmers would be able to finish 80-85% of the wheat harvest, currently going on in full swing. Millers, stockists and private trades too have restarted fresh buying now. Apart from it, procurement drive by state agencies may remain supportive to all pulses markets in coming weeks. The overall inner tone seems firm for the week.

The C&F quotes in Myanmar have decreased by 5 to 10 % after the disrupted supply from Myanmar due to water festival and rising fuel costs. FAQ Urad and Tur are currently quoted at \$ 930 and 890 per MT for the ready delivery. As the duration of import timing has increased, the CnF quotes in Myanmar may decrease by the last week of April. Traders in Myanmar are working out the modalities of their Forex holdings.

NAFED has procured around 4.56 Lakh MT Bengal Gram so far and the volume may go up quickly as arrivals are expected to increase.

Summer Urad sowing continued to gain momentum in all states except Madhya Pradesh. Farmers have covered 2.84 lakh ha as on 08th April-2022. It is up by 55.81 % from the last year same time. The normal area under summer Urad is 3.82 lakh ha. The major growing states are Tamil Nadu, M.P. and Uttar Pradesh.

Farmers have covered 6.12 lakh ha under summer Moong so far, down by 4.12 % from 6.38 lakh ha last year same time. M.P. is a major growing state, where it is down by 83 % so far.

Chana cash market traded up by 1 to 1.5 % in various markets except Delhi due to the normal trading activities. Trades remained engaged in settling accounts at the year end. Fresh buying and the ongoing procurement activities may push up price further. Govt agencies have already procured 4.56 LMT Chana so far. Chana in various markets is trading in the range of Rs 4800-5150. It may move up towards MSP level in the weeks ahead.

The extended timeline for Tur import for a year up-to 31st March -2023 has capped the upward movement in cash market. Regular supply from the overseas is expected now as per requirement throughout the year. The slight increase seen last week was due to disrupted supply from Myanmar. With this changed import policy, stockists of Tur may hold their Tur stocks for a longer time and release based on the prices. It would ensure a regular supply from the overseas and local stockists. So, any spike is unlikely. Normal trade is expected, at a range of Rs 200- 250 up or down from current prices, in the coming weeks. The other price driving forces would be the sowing area and Monsoon rains. If farmers shift some area to Soybean, price rise may be higher. Mostly cash markets traded up by 1 to 2% last week to Rs 6300 to 6600 per Qtl. Myanmar quotes are up at \$880-890 per Tonne, basis Indian ports.

The main reason of spike in Urad markets seen during last week is mainly attributed to supply disruption in Myanmar due to water festival and the increasing freight cost. Market should cool down by the end of this month,

once the supply resumes in Myanmar. Sensing the short supply and increasing prices of Urad in the local markets, govt. had extended the import timeline for Urad to 31st March-2023. It would ensure a regular supply as per the requirement from Myanmar and help to cap upward momentum. The medium-term outlook would depend on sowing area under Kharif season and the monsoon rains. If farmers shift area to other lucrative crops, price may move beyond our expected level of Rs 6600-7000. Price of Urad have increased by 3 to 5.5% in various markets to Rs 6600-6900. It may increase by Rs 100-200 more and should stabilize. Myanmar is quoting FAQ Urad at \$930, up by \$90 from last week.

Moong market traded down as expected last week and declined by 1 to 5 % in various markets. New arrivals, ample stocks in Central pool and weak demand helped market to ease. Summer sowing is smooth. The only concern is a rising temperature, which may affect yield of the summer crop. Ample availability in the Central pool, the arrival from Rabi crop and the smooth sowing in summer season have pressurized the Moong cash market. The medium-term outlook would depend on Kharif area and rains frequency throughout the monsoon season. The short-term outlook seems steady to slightly weak. Moong (FAQ) cash market traded in the range of Rs 7000 to 7200 per qtl. After Rabi arrival from summer crop is expected from May. Import volume remains restricted due to ban.

Against all expectations, Masur cash markets continued to trade up by 2 to 3.5 % last week. The reason behind uptrend is mainly attributed to low arrivals, stockists active buying and the increasing cost of import. As Canada and Australia have increased quotes from \$960 to 980 per MT, costing of import has gone up. Apart from it, ready stock at Canadian ports has come down. Farmers in Uttar Pradesh are engaged in wheat harvesting, so prices have increased. Local arrival is expected to improve and a downward correction of Rs 100-200 is expected by end April. However, the overall tone seems strong. Maximum stocks from mandis are going to go-downs, so tight supply side seems very much in the cash market. Masur is being traded at in the range of Rs 7000 to 7300 per qtl. It should decrease by Rs 100-200

Global Market Updates:

U.S. Department of Agriculture (USDA) in its recent report, has estimated that growers are likely to sow around 788,000 acres area under the Lentils, as per the preliminary sowing intension, up by 11 percent from 708,000 acres last year and also well above from 523,000 acres from 2020. With 580,000 acres estimated sown area, Montana remaining the most important producing region where sowing was noticed in 530,000 acres last year followed by North Dakota where sowing intension would increase from 120,000 acres to 140,000 acres.

Recent report from U.S. Department of Agriculture (USDA) reveals that Chickpea area is likely to fall by 18 percent to 303,600 acres as growers are not less interest to sow Chickpea in a big way. However, small Chickpea area is estimated to increase from 2021 by 5 percent to 62,100 acres. Area under the large Chickpea in 2022 is estimated to be at 241,500 acres down by 22 percent from previous year.

The Canadian Grain Commission (CGC) has reported that around 4,800 MT lentils were loaded for export through licensed facilities in February. As per the Commission, 53,000 MT lentil was shipped the same month last year, while movement is down from the 7,200 MT shipped the previous month. With adding this quantity, the bulk loadings for the Marketing Year reached to 4,14,200 MT, compared to 6,06,100 MT last season.

Canada Agriculture & Agri Food Canada has published its preliminary production forecast for 2022-23 on 21st Jan-2022 for Lentil, Chickpea and Field Pea. As per the latest forecast Lentil production may increase by 55.66 % to 2.5 MMT in 2022-23 against 1.60 MMT in 2021-22. The likely yield realization has been increased to 1.41 tonne per ha for 2022-23 against 0.91 tonne per ha in 2021-22. It may have a softening impact on the global Lentil markets in the medium to long term.

The production forecast for Field Pea (Dry Peas) too is up by 48.55 % to 3.8 MMT for 2022-23 against 2.58 MMT in 2021-22. Yield forecast has been increased to 2.36 tonne per ha for 2022-23 against 1.51 tonne per ha in 2021-22. The severe drought condition had affected all pulses yield last year. The higher production prospects may cap upward movement in the global market in the medium term.

The initial production forecast for Chickpeas for 2022-23 too has been increased by 64.47% to 125 thousand MT against 76 thousand MT last year. Yearly average price forecast has been revised down to \$860 per MT in 2022-23 against \$1065 for 2021-22. Yield has been revised up to 1.51 tonne per ha for 2022-23 against 1.04 tonne in 2021-22

According to latest update from Australian Bureau of Agricultural and Resource Economics and Sciences (ABARES) Chickpea production in Australia is estimated as 10.04 lakh tonnes for 2021-22 as compared to last year's production of 7.33 lakh tonnes. Area under Chickpea has been increased this year in Australia from 5.07 lakh ha to 6.33 lakh ha.

According to latest update from Australian Bureau of Agricultural and Resource Economics and Sciences (ABARES) lentils production in Australia is estimated as 6.56 lakh tonnes for 2021-22 as compared to last year's production of 6.34 lakh tonnes. Area under lentils this year stands at 3.9 lakh ha as compared to last year's acreage of 3.68 lakh ha.

As per the latest Abares estimate Lentil production in Australia pegged at 6.39 lakh MT in 2021-22. The Pulses Australia sees it at 7.10 lakh MT. The 10 year's average production for Lentils is 4.24 lakh MT. Indian buyers may take interest in Australian Lentils. No deals have been struck so far. However, containers issue and higher freight would keep the import costing high in 2022 too. Major growing states like Queensland and northern NSW, containers availability is still low, and no path to bulk export exists because shipping slots are fully booked. This means scope for immediate export in bulk volume is limited. Prices have come down to a certain extent and growers may prefer to hold stock for better price.

Weekly Outlook: - Steady to slightly firm tone may prevail this week.

Pulses-Wise Scenario:

Chana

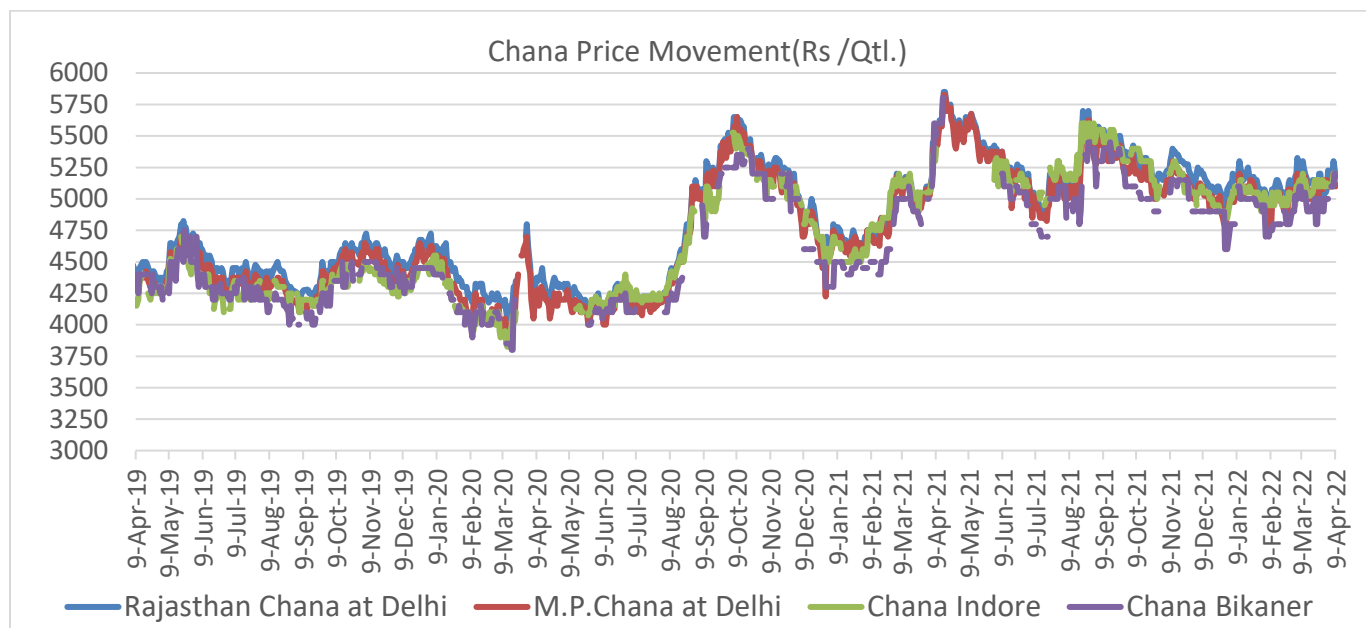

Current Scenario:

Chana cash market continued to inch up by around 1% during the week under review. The main reason behind it is mainly attributed to the ongoing procurement drive and the buyings by private trades. Apart from it, demand for dal has started improving. NAFED has procured over 4.65 lakh MT Chana till the first week of April-2022. Under the prevailing market fundamentals, prices of Chana may continue to inch up towards MSP. Maximum Chana stocks coming in to markets is either going to the private go-downs or central Pool. As arrival is comparatively lower, firm tone may prevail in the market.

However, ample availability in the Central Pool and good carryin would not allow the cash market to increase beyond a certain level. After the procurement drive, NAFED would start selling again and it would cap upward momentum in the market. Besides, in the monsoon season demand gets weak. It starts improving again from July end when the festive season starts. As the prices of Chana is ruling below MSP in various markets, the volume of procurement may move up to 20 LMT and even higher. Import from the LDC (Least Developed Countries) continues at Rs 4600-4700 per qtl. Desi Chana in various market is trading in the range of Rs 4900-5175. It may move up by rs 100 150 in the near term. All these factors would limit the scope of spike even in the medium term.

Outlook for the week: Steady to slightly firm tone may prevail till the procurement drive continues.
