Commodity-wise Domestic, International Prices and Arrivals at Different Centers

Pulses Sector- Domestic Highlights:

Mostly cash pulses markets remained closed due to festive holidays during last week. Trade volumes too were recorded low amid the sluggish trading activities. All pulses, except Urad, traded low by 1 to 3 % during the week under review. The exception was only Urad which moved up by 1 to 4.5% to Rs 6850-7200 in various markets. As the prices of other pulses have eased, the upward momentum in Urad cash market may be limited this week. The normal trade is expected now.

The harvesting of Chana, Moong, Masur & Urad (Rabi) is nearing to an end now. Arrivals are expected to increase. The major concern is rising temperature and it may affect the summer Moong. The size of grains may shrink and resultantly the crop size too. Demand for dal is weak and is expected to increase with the start of marriage season.

No trade has been reported from Myanmar last week. It may resume by the end of this month. Traders in Myanmar are working out the modalities of their Forex holdings.

Summer Urad sowing continued to gain momentum in all states including Madhya Pradesh. Farmers have covered 3.21 lakh ha as on 15th April-2022. It is up by 73.34 % from the last year same time. The normal area under summer Urad is 3.86 lakh ha. The major growing states are Tamil Nadu, M.P. and Uttar Pradesh.

Farmers have covered 8.62 lakh ha under summer Moong so far, up by 28.10 % from 6.73 lakh ha last year same time. M.P. is a major growing state, where it has improved smartly by 28%. Recovery in area may minimize the impact of the rising temperature and the fear of small grain size.

Chana cash market could not maintain its firm momentum and traded down by 1 to 3% in various markets. The reason behind weak momentum was the continuous holidays during last week. Prices of Chana are expected to improve now as demand is bound to go up with the beginning of marriage season, the ongoing smooth procurement drive and the active buying by mills. Under the prevailing market fundamentals may move towards MSP level of Rs5230 soon. Beyond that level market may face resistance as there is ample old stocks and it will continue to enter into markets. Chana in various market is trading at Rs4850-5100. It may move up by Rs100-150 in the coming weeks.

Tur cash market too traded down by 1 to 3% to Rs 6200-6500 during the week under review. The low offtake, closure of markets and over 8 LMT import during last financial year pressurized Tur markets. Import volume was recorded at 35,000 MT in the first week of April, the first week of the new financial year. Availability is good and the prices may decrease further as the import flow would continue. Notably, the extended timeline for Tur import for a year up-to 31st March -2023 has capped the upward movement in cash market. Regular supply from the overseas is expected now as per requirement throughout the year. With this changed import policy, stockists of Tur may not hold their Tur stocks for a longer time. It would ensure a regular supply from the overseas and local stockists. So, any spike is unlikely. Normal trade is expected, at a range of Rs 200- 250 up or down from current prices, in the coming weeks. The other price driving forces would be the sowing area and Monsoon rains. If farmers shift some area to Soybean, price rise may be higher.

The cash Urad markets continued to trade up and increased by 1 to 4 % to Rs6850-7200 in various markets during the week under review. The main reasons of spike in Urad markets are mainly attributed to supply disruption in Myanmar due to water festival, tight supply side in domestic markets and the increasing freight cost. Market should cool down by the end of this month, once the supply resumes in Myanmar. Sensing the short supply and increasing prices of Urad in the local markets, govt. had extended the import timeline for Urad to 31st March-2023. It would ensure a regular supply as per the requirement from Myanmar and help to cap upward momentum. The medium-term outlook would depend on sowing area under Kharif season and the monsoon rains. If farmers shift area to other lucrative crops, price may move beyond our expected level of Rs 6600-7200. It may increase by Rs 100-200 more and should stabilize. No trade was reported in Myanmar last week. India imported around 6.11 lakh T Urad during last financial year against 3.34 lakh MT in 2020-21. The short term outlook is firm.

Moong market traded mixed during last week in various markets. Prices hover in the range of Rs 7000 to 7300. **New arrivals**, ample stocks in Central pool and weak demand helped market to trade range bound. Summer sowing is running smoothly and is up by 28 % so far. The only concern is a rising temperature, which may affect yield of the summer crop, grain size may be small. However, improvement in area may minimize the loss to some extent. Ample availability in the Central pool, the arrival from Rabi crop and the smooth sowing in summer season would continue to pressurize the Moong cash market. The medium-term outlook would depend on Kharif area and rains frequency throughout the monsoon season. The short-term outlook seems steady to slightly weak After Rabi arrival, summer crop is expected from May. Import volume remains restricted due to ban. India imported 1.95 LMT Moong during last financial year against 81,842 MT in 2020-21. In April-2022(first week) India imported around 3000 MT Moong.

Masur cash market could not maintain its firm momentum and followed the other pulses movement. It traded down by 1 to 3 % to Rs 6900-7250. It may decrease further by Rs100-150 as arrivals are expected to increase from this week with the opening of the markets. The current declining trend may be arrested as the costing of import has gone up and stockists are active. Canada and Australia have already increased quotes from \$960 to 980 per MT. Apart from it, ready stock at Canadian ports has come down. Wheat harvesting is over so farmers may start selling Masur again. Local arrival is expected to improve and a downward correction of Rs 100-200 is expected by end April. However, the overall tone seems strong. Maximum stocks from mandis are going to go-downs, so tight supply side seems very much in the cash market. Masur is being traded at in the range of Rs6900 to7250 per qtl.
