Commodity-wise Domestic, International Prices and Arrivals at Different Centres

Pulses Sector- Domestic Highlights:

Weak sentiments prevailed in cash Pulses market as the bulk buyers restricted their buying activities. Arrivals in markets have improved as the harvesting of wheat is over. Weak demand, improved arrivals and the crunch of cash flow have pressurized the pulses market. Pressure on price is likely continue this week too. The overall inner tone seems weak. Mostly pulses market traded down by 1 to 4% and may decrease by 1 to 2 % more from the current level.

The harvesting of Chana, Moong, Masur & Urad (Rabi) is nearing their end now. Arrivals are expected to increase. The major concern is rising temperature and it may affect the summer Moong. The size of grains may shrink and resultantly the crop size too. Arrival from the Summer crop is expected to start from this week. As the Ramadan month is over, demand may decrease further. Marriage season demand is yet to start.

New trade has been heard in Myanmar at discounted price. Urad FAQ &SQ were traded down by \$10& 35 to \$ 890 and 960 per MT and Tur by \$25 to \$840 per MT, basis Indian ports. Moong traded stable at \$800. The normal trade is expected from the first week of May.

Summer Urad sowing continued to gain momentum in all states including Madhya Pradesh. Farmers have covered 3.65 lakh ha as on 29th April-2022. It is up by 58 % from the last year same time. The normal area under summer Urad is 3.86 lakh ha. The major growing states are Tamil Nadu, M.P. and Uttar Pradesh.

Farmers have covered 15.11 lakh ha under summer Moong so far, up by 37.41 % from 10.99 lakh ha last year same time. M.P. is a major growing state, where it has improved smartly by 360 % to 7.71 lakh ha. Recovery in area may minimize the impact of the rising temperature and the fear of small grain size.

Chana cash market traded down by 1 to 2 % in various markets as the mills offtake decreased while the demand for Ramadan is over now. The reason behind weak momentum was the weak buying interest and poor offtake by mills during last week too. Prices of Chana are expected to improve now as demand is bound to go up with the beginning of marriage season and the ongoing smooth procurement drive. State agencies, including NAFED have procured around 11 LMT Chana so far. Under the prevailing market fundamentals Chana may move towards MSP level of Rs 5230 by end May. Beyond that level market may face resistance as there is ample old stocks and it will continue to enter into markets. Chana in various market is trading at Rs 4850-5100. It may move up by Rs100-150 in the coming weeks.

As expected, Tur cash market continued to trade weak and the pressure on price may continue. The low offtake, closure of markets and around 8.4 LMT import during last financial year pressurized Tur markets. Import volume was recorded at 55,000 MT in the last three weeks of April, the first three weeks of the new financial year. Availability is good and the prices may decrease further as the import flow would continue. Notably, the extended timeline for Tur import for a year up-to 31st March -2023 has capped the upward movement in cash market. Regular supply from the overseas markets is expected now as per requirement throughout the year. With this changed import policy, stockists of Tur may not hold their Tur stocks for a longer time. It would ensure a regular supply from the overseas and local stockists. So, any spike is unlikely. Normal trade is expected, at a range of Rs 100- 150 up or down from current prices, in the coming weeks. The other price driving forces would be the sowing

area and Monsoon rains. If farmers shift some area to Soybean, price rise may be higher. The normal Monsoon is expected this year too.

The cash Urad markets continued to trade low as the quotes in Myanmar continued to decrease. Urad FAQ offered at discount of \$10 while SQ at the discount of \$35 last week. Availability in Myanmar is ample and the better supply is expected in the coming weeks. Cash markets traded down by 2 to 3% and it may decline further by Rs100-200. The main reasons of decline are mainly attributed to decreased quotes in Myanmar due to buyer's unwillingness to buy at higher price, release by importers at discounted prices in domestic markets and the increasing summer area. Market should decline further by the end of this month, once the supply resumes in Myanmar. Sensing the short supply and increasing prices of Urad in the local markets, govt. had extended the import timeline for Urad to 31st March-2023. It would ensure a regular supply as per the requirement from Myanmar and help to cap upward momentum. The medium-term outlook would depend on sowing area under Kharif season and the monsoon rains. If farmers shift area to other lucrative crops, price may move beyond our expected level of Rs 6600-7200. It may increase by Rs 100-200 more and should stabilize. New trade was reported in Myanmar last week at \$890 & 960 for FAQ and SQ. India imported around 6.11 lakh T Urad during last financial year against 3.34 lakh MT in 2020-21. The short-term outlook is weak.

Moong cash market traded down by 2.0 To 3 % in various markets, as expected last week. Prices decreased in the range of Rs100-200 to Rs 6800 to 7000. New arrivals, ample stocks in Central pool and weak demand helped market to trade down. Summer sowing is running smoothly and is up by 37.41 % to 15.11 lakh ha. so far. The only concern is a rising temperature, which may affect yield of the summer crop, grain size may be small. However, improvement in area may minimize the loss to some extent. Ample availability in the Central pool, the arrival from Rabi crop and the smooth sowing in summer season would continue to pressurize the Moong cash market. The medium-term outlook would depend on Kharif area and rains frequency throughout the monsoon season. The short-term outlook seems steady to slightly weak after Rabi arrival, summer crop is expected from this week. Import volume remains restricted due to ban. India imported 1.95 LMT Moong during last financial year against 81,842 MT in 2020-21. In April-2022(first fortnight) India imported around 4500 MT Moong.

Masur cash market too traded either stable or decreased by 1.0 -3.0 % last week and followed the fall in other pulses. It traded down by Rs 75 to 100 to Rs 6800-7200. It may decrease further by Rs100-150 as arrivals are expected to increase from this week with the opening of the markets. The current declining trend may be arrested as the costing of import has gone up and stockists might be active again at decreased price. Canada and Australia have already increased quotes from \$960 to 980 per MT. Apart from it, ready stock at Canadian ports has come down. Wheat harvesting is over so farmers have started selling Masur again. Local arrival is expected to improve and a downward correction of Rs 100-200 is expected by mid-May. However, the overall tone seems strong. Maximum stocks from mandis are going to go-downs, so tight supply side seems very much in the cash market. Masur is being traded at in the range of Rs6800 to 7200 per qtl. As per the market source total stock at various ports is around 1.25 lakh MT.

Global Market Updates:

AS per recent report by Statistics Canada, farmers are likely to seed less Chickpea area this year to mere 175,200 acre down by 5.55% from 185,500 acre. Though, Chickpea area is estimated to be down, production (mainly Kabuli) is expected to increase by 33.65% to 110,000 tonne from 82,300 tonne on higher yield. Moreover, carry-

over stock in Canada is estimated to decrease from 306,300 tonne to 187,000 during 2022-23 as local consumption and export demand during the Marketing Year 2020-21 remained same when yield was impacted heavily by drought.

According to 'Agriculture and Agri-Food Canada (AAFC)' recent report, area seeded for Pea in Canada for the period of 2022-23, is expected to increase by 6.30% to 16.50 lakh hectare from previous year (2021-22) area of 15.46 lakh hectare. New figure is down from 2020-21 seeded area of 17.22 lakh hectare. It means Pea production in Canada to surge marginally from its previous production but overall output could not surpass the 2020-21 production volume.

As per the 'Agriculture and Agri-Food Canada (AAFC)' recent report, Lentils output in Canada is estimated to surge by 35.76% to 25 lakh tonne in 2022-23 much higher from its last year (2021-22) production of 16.06 lakh tonne. However, it is still lower from 2020-21 crop by 14% when the production was 28.68 lakh tonne. Good return, hope of better realisation has helped the sown area to increase.

'Agriculture and Agri-Food Canada (AAFC)' recent report reveals, Pea output in Canada is expected to increase by 40% to 38 lakh tonne in 2022-23 from previous year (2021-22) output of 22.58 lakh tonne. However, the production is still lower from 2020-21 output of 45.94 lakh tonne. Better realisation and hope of good return than other cash crop, helped in increasing seeded area.

As per the Australia Bureau of Statistics report, Lentils export decreased by 26 percent to 99,286 metric tonne in February-2022 from 135,079 metric tonne in January. In the current Marketing Year, period till February so far, total export remained 327,270 metric tonne down 3.9 percent from 340,530 metric tonne previous Marketing Year. With the buying 38,691 metric tonne, Bangladesh emerged as top importer in February followed by Turkey and United Arab Emirates with buying 19,500 metric tonne and 14,915 metric tonne respectively.

Data released by Australia Bureau of Statistics recently reveals that Chickpea export from the country registered a robust jump of 64 percent in February-2022 than January. Total export in February from Australia jumped to 116,796 metric tonne from 71,334 metric tonne in January. During the period till February of current Marketing Year, export sales remained 303,607 metric tonne in comparison of 432,167 metric tonne in the same period the previous marketing year. With the buying 81,389 metric tonne in February, Bangladesh remained the top buying followed by Pakistan and Nepal buying 23,180 metric tonne and 4,496 metric tonne respectively.

Canadian Grain Commission data indicates that international field Peas markets ended the week's trading on a relatively firm note on the back of improved export figure from key origins like Canada. According to the data, during the February, 65,797 metric tonne Peas exported from the county and at least 30,000 MT Peas have been exported through rail, truck or in containers. However, March-end data reveals that 164,400 MT of peas were loaded for bulk export during the month. Part of that will be counted as exports in April because official exports are based on the bill of lading date.

U.S. Department of Agriculture (USDA) in its recent report, has estimated that growers are likely to sow around 788,000 acres area under the Lentils, as per the preliminary sowing intension, up by 11 percent from 708,000 acres last year and also well above from 523,000 acres from 2020. With 580,000 acres estimated sown area, Montana remaining the most important producing region where sowing was noticed in 530,000 acres last year followed by North Dakota where sowing intension would increase from 120,000 acres to 140,000 acres.

Recent report from U.S. Department of Agriculture (USDA) reveals that Chickpea area is likely to fall by 18 percent to 303,600 acres as growers are not less interest to sow Chickpea in a big way. However, small Chickpea area is estimated to increase from 2021 by 5 percent to 62,100 acres. Area under the large Chickpea in 2022 is estimated to be at 241,500 acres down by 22 percent from previous year.

According to latest update from Australian Bureau of Agricultural and Resource Economics and Sciences (ABARES) Chickpea production in Australia is estimated as 10.04 lakh tonnes for 2021-22 as compared to last year's production of 7.33 lakh tonnes. Area under Chickpea has been increased this year in Australia from 5.07 lakh ha to 6.33 lakh ha.

According to latest update from Australian Bureau of Agricultural and Resource Economics and Sciences (ABARES) lentils production in Australia is estimated as 6.56 lakh tonne for 2021-22 as compared to last year's production of 6.34 lakh tonnes. Area under lentils this year stands at 3.9 lakh ha as compared to last year's acreage of 3.68 lakh ha.

Weekly Outlook: - Sideways movement is expected this week too.

Pulses-Wise Scenario:

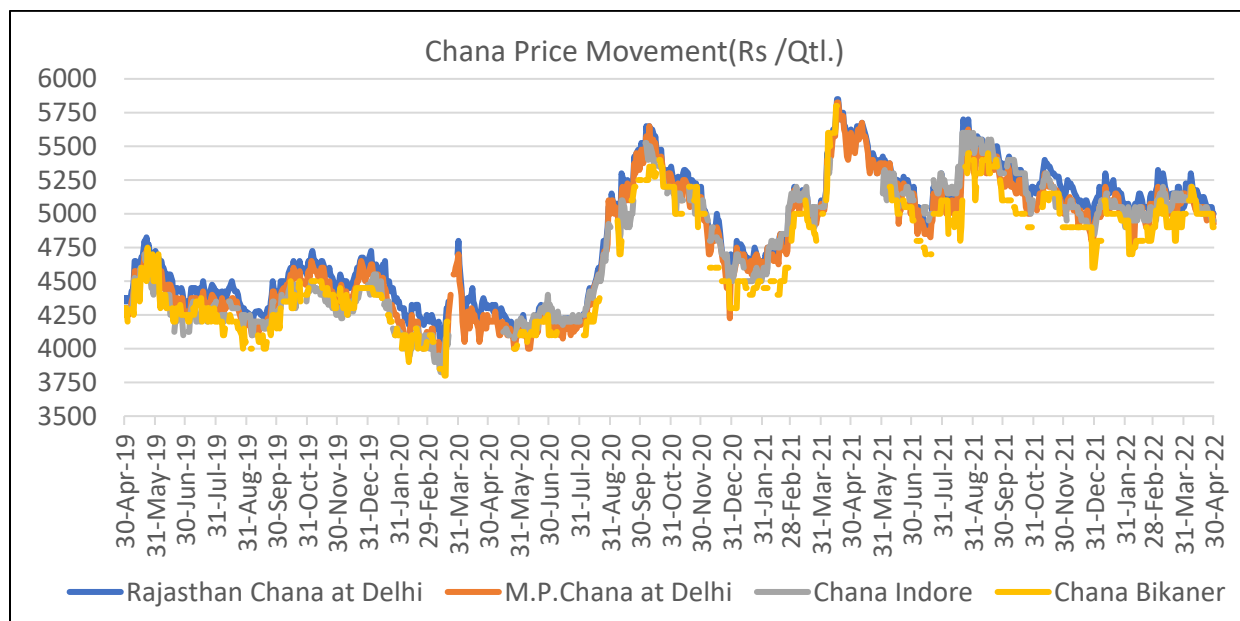

Chana

Current Scenario:

This week too Chana physical market traded down 1% to 2% in different markets due to lower offtake by mills and stockists. Now, the demand for Ramdan has ended. The reason behind weak momentum was the weak buying interest and poor offtake by mills during last week too. However, prices of Chana are expected to improve now on expected increase in demand with the beginning of marriage season and the ongoing smooth procurement drive. State agencies, including NAFED have procured around 11 LMT Chana so far. Under the prevailing market fundamentals Chana may move towards MSP level of Rs 5230 by end May. Beyond that level market may face resistance as there is ample old stocks and it will continue to enter into markets. Chana in various market is trading at Rs 4850-5100. It may move up by Rs100-150 in the coming weeks.

Outlook for the week: Market prices are likely to improve slightly in coming week.

Following graph illustrates chana price movement in different markets:

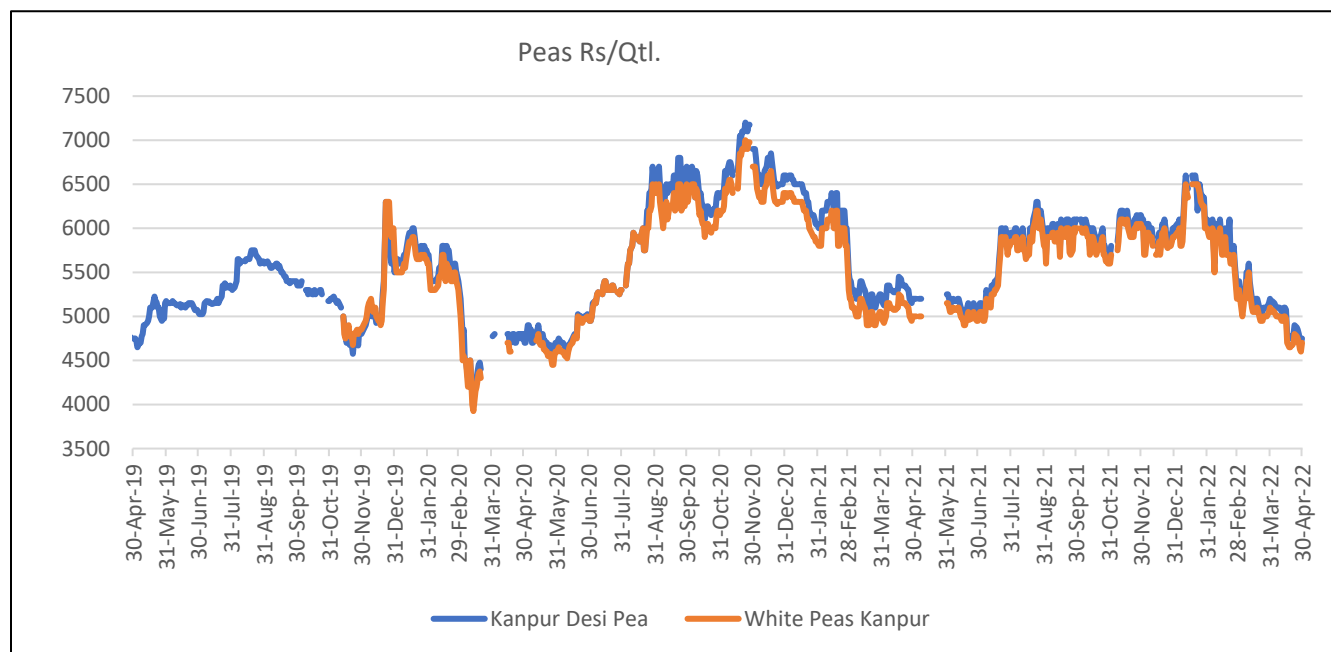

Chana % Price Fluctuation Over Previous Week					
Markets	Today	Week Ago	Month Ago	Year Ago	% Ch. Over
	30.04.22	23.04.22	30.03.22	30.04.21	23-Apr-22

Indore Chana	4950	5050	5100	NA	-1.98
Tan.Chana	4525	4525	4500	5150	0.00
Price Projection For Bikaner During May-2022 (4900-5250)					

Peas (Matar):

Market Recap:

Peas market could not emerged from its sluggish inner tone and prices fall down during last week too under lower stockists and millers demand. Stockists and millers demand were reportedly shifting to Chana dal instead of Pea dal. At present, gap between the prices of Chana dal and Pea dal prices have reduced so, consumers are shifting towards Chana dal from mater dal. Rate of Desi Pea in UP inched down by almost 3.06% to Rs 4750 per quintal from Rs 4900 per quintal. Any firm trend in Chana may push up the Pea prices too.

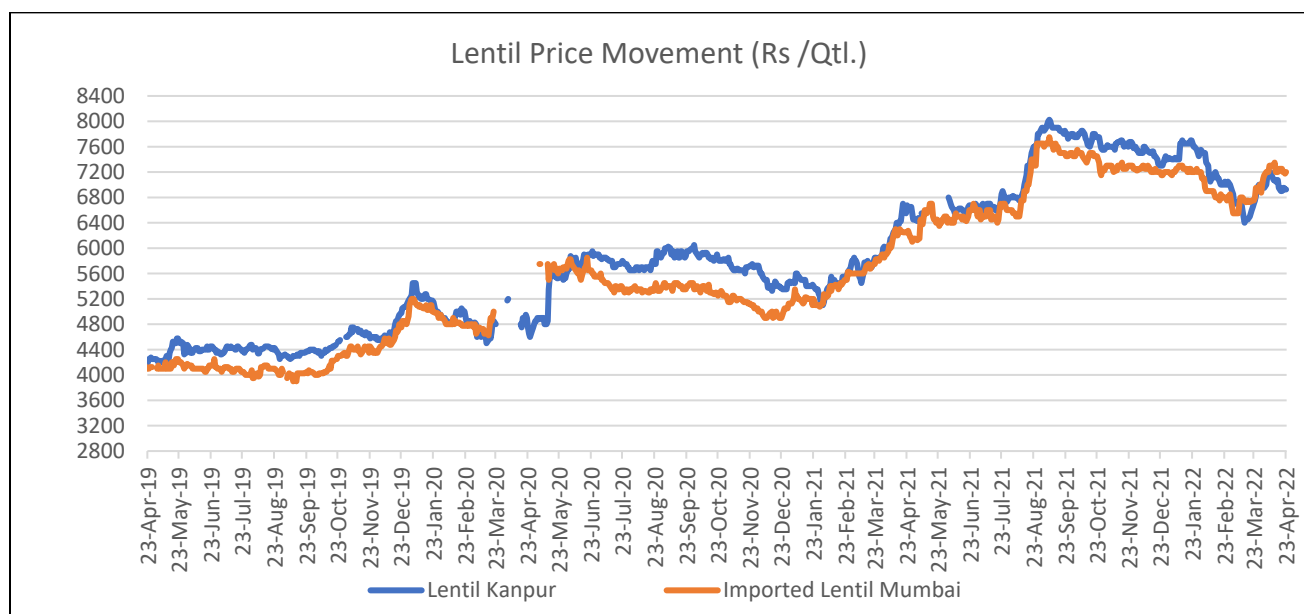

Yellow & White Peas % Price Fluctuation Over Previous Week					
Markets	Today	Week Ago	Month Ago	Year Ago	% Ch. Over
	30-Apr-22	23-Apr-22	30-Mar-22	30-Apr-21	23-Apr-22

Kanpur White Peas	4700	4800	5050	5000	-2.08
Price Projection For Kanpur Desi During April-2022 (4800-5200)					

Current Market Dynamics & Outlook: Peas may trade slightly up in coming week.

Lentils (Masoor):
Market Recap:

Masur physical market too traded mostly down side last week following fall in other pulses. It traded down by 1% to 3% to Rs 6850 per quintal and Rs 6250 per quintal in Kanpur and Ashok Nagar respectively. Masur prices quoted in the range of Rs 6800-7200. It may decrease further by Rs 100-150 as arrivals are expected to increase from this week with the opening of the markets. The current declining trend may be arrested as the costing of import has gone up and stockists might be active again at decreased price. Canada and Australia have already increased quotes from \$960 to 980 per MT. Apart from it, ready stock at Canadian ports has come down. Wheat harvesting is over so farmers have started selling Masur again. Local arrival is expected to improve and a downward correction of Rs 100-200 is expected by mid-May. However, the overall tone seems strong as stocks from mandis are going to go-downs.

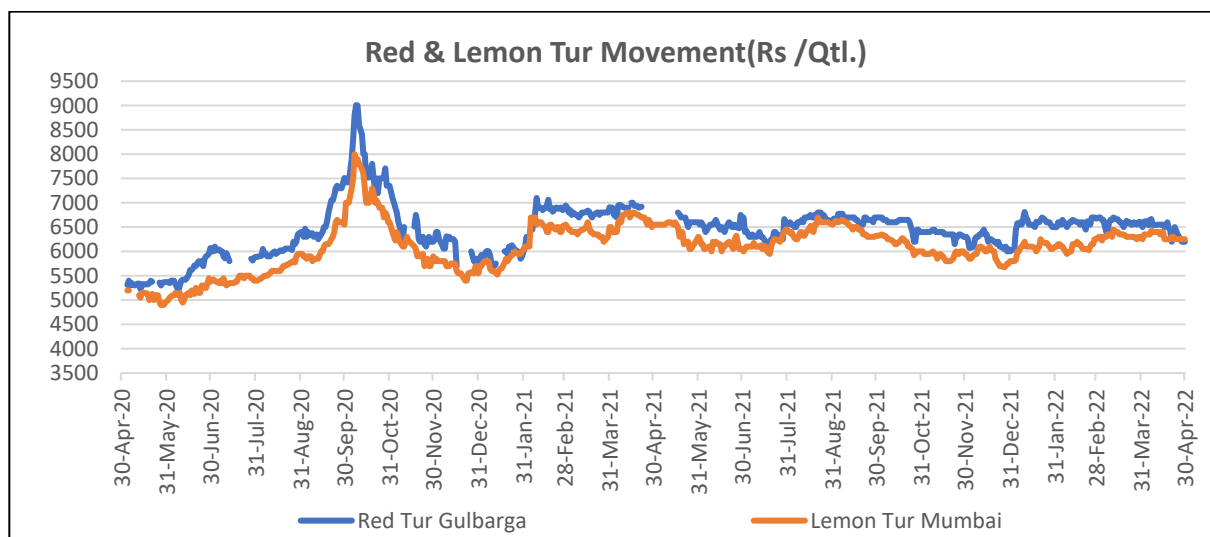

Market Outlook: Prices expected to decrease from the current level.

Ashok Nagar	6250	6450	6750	6300	-3.10
Price Projection For Kanpur During May-2022 (6700-7400)					

Pigeon Pea (Tur/Toor):

Market Recap:

As expected, Tur cash market continued to trade weak during the week in review. Pressure on prices is likely to continue. The low offtake and around 8.4 LMT import during last Financial Year pressurized Tur markets. Import volume was recorded at 55,000 MT in the last three weeks of April, the first three weeks of the new financial year. Availability is good and the prices may decrease further as the import flow would continue. Notably, the extended timeline for Tur import for a year up-to 31st March -2023 has capped the upward movement in cash market. Regular supply from the overseas markets is expected now as per requirement throughout the year. With this changed import policy, stockists of Tur may not hold their Tur stocks for a longer time. It would ensure a regular supply from the overseas and local stockists. So, any spike is unlikely. Normal trade is expected, at a range of Rs 100- 150 up or down from current prices, in the coming weeks. The other price driving forces would be the sowing area and Monsoon rains. If farmers shift some area to Soybean, price rise may be higher. The normal Monsoon is expected this year too.

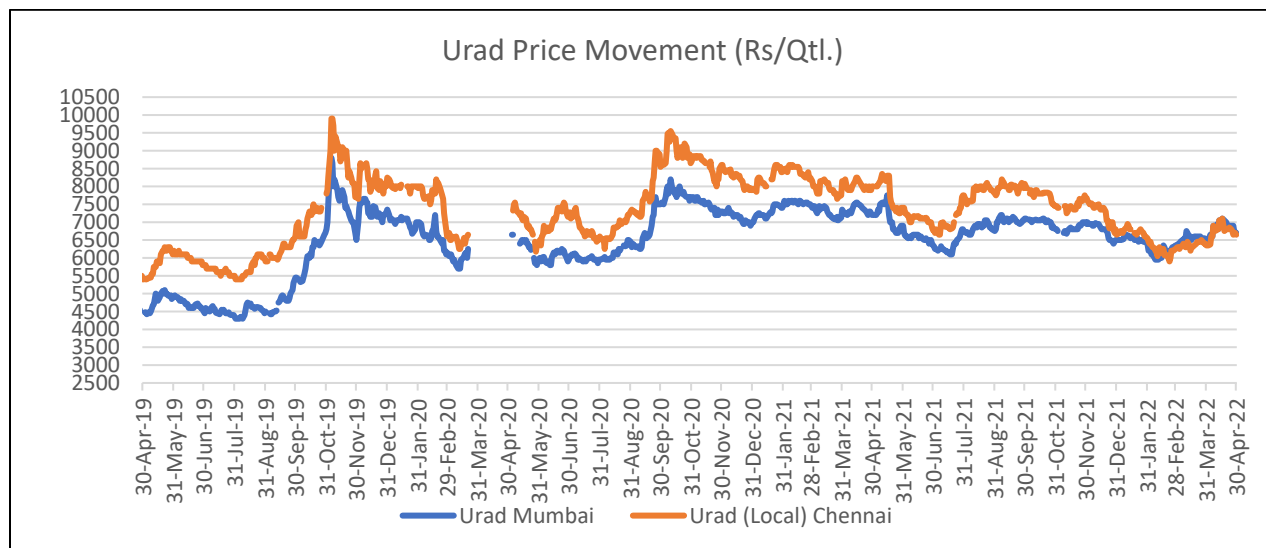

Outlook For the week: Market may trade between the range of Rs 100- 150 up or down from current prices, in the coming week.

Price Projection For Gulbarga During May-2022 (6150-6650)					

Black Matpe (Urad):
Market Recap:

The cash Urad markets continued to trade low as the quotes in Myanmar continued to decrease. Urad FAQ offered at discount of \$10 while SQ at the discount of \$35 last week. Availability in Myanmar is ample and the better supply is expected in the coming weeks. Cash markets traded down by 2% to 3% and it may decline further by Rs100-200. The main reasons of decline are mainly attributed to decreased quotes in Myanmar due to buyer's unwillingness to buy at higher price, release by importers at discounted prices in domestic markets and the increasing summer area. Sensing the short supply and increase in prices of Urad in the local markets, govt. had extended the import timeline for Urad to 31st March-2023. This step would ensure a regular supply as per the requirement from Myanmar and help to cap upward momentum. The medium-term outlook would depend on sowing area under Kharif season and the monsoon rains. If farmers shift area to other lucrative crops, price may move beyond our expected level of Rs 6600-7200. It may increase by Rs 100-200 more and should stabilize.

Outlook For the Week: The short-term outlook seems slightly weak.

Green Gram (Moong):

Market Recap:

Moong cash market traded down by 2.0 To 3 % in various markets, as expected last week. Prices decreased in the range of Rs100-200 to Rs 6800 to 7000. New arrivals, ample stocks in Central pool and weak demand helped market to trade down. Summer sowing is running smoothly and is up by 37.41 % to 15.11 lakh ha. so far. The only concern is a rising temperature, which may affect yield of the summer crop, grain size may be small. However, improvement in area may minimize the loss to some extent. Ample availability in the Central pool, the arrival from Rabi crop and the smooth sowing in summer season would continue to pressurize the Moong cash market. The medium-term outlook would depend on Kharif area and rains frequency throughout the monsoon season. The short-term outlook seems steady to slightly weak after Rabi arrival, summer crop is expected from this week. Import volume remains restricted due to ban. India imported 1.95 LMT Moong during last financial year against 81,842 MT in 2020-21. In April-2022(first fortnight) India imported around 4500 MT Moong.

Outlook for the week: The short-term outlook seems steady to slightly weak.
