Commodity-wise Domestic, International Prices and Arrivals at Different Centres

Pulses Sector- Domestic Highlights:

Mostly pulses markets, except Moong, recovered by 1 to 3% during the last week. Mills and private trades are actively buying. New arrivals of Moong and Urad have started in Jabalpur region. New Urad (Summer) traded at Rs 8000. Quality of crop is good and arrival is expected to increase by third week of May. Smooth procurement drive, fresh buying support and the upcountry demand have lent support to cash pulses market. Steady to slightly firm tone may prevail this week. Moong may trade stable or slightly weak as arrivals from Bihar, U.P. and Odisha is expected to increase now.

The harvesting of Rabi pulses is over now while arrival of summer Moong and Urad are expected to increase. The major concern is rising temperature as it may affect the summer Moong quality which may translate into lower yield. The size of grains may shrink and resultantly the crop size too. Marriage season demand is yet to pick up.

New trade has been heard at the previous level in Myanmar. Urad FAQ & SQ were traded at \$ 870 and 970 per MT respectively and Tur at \$840 per MT, basis Indian ports. Moong traded up by \$100 at \$900.

Summer Urad sowing continued to gain momentum in all states including Madhya Pradesh. Farmers have covered 3.66 lakh ha as on 06th May-2022. It is up by 40 % from the last year same time. The normal area under summer Urad is 3.86 lakh ha. The major growing states are Tamil Nadu, M.P. and Uttar Pradesh.

Farmers have covered 16.25 lakh ha under summer Moong so far, up by 14 % from 14.23 lakh ha last year same time. M.P. is a major growing state, where it has improved smartly by 74.61 % to 8.33 lakh ha. Recovery in area may minimize the impact of the rising temperature and the fear of small grain size. Quality of new crop coming into markets is good.

Chana cash market traded stable in various markets except Delhi, where it increased by 1.50 % to 5000. Mills are active in Delhi. Prices of Chana are expected to improve now as demand is bound to go up with the beginning of marriage season and the ongoing smooth procurement drive. State agencies, including NAFED have procured around 14 LMT Chana so far. Under the prevailing market fundamentals Chana may move towards MSP level of Rs 5230 by end May. Beyond that level market may face resistance as there is ample old stocks and it will continue to enter into markets. Chana in various market is trading at Rs 4900-5050. It may move up by Rs100-150 in the coming weeks.

Tur cash market too recovered by 1 to 3.25% last week on fresh buying interest and the low pace of arrivals in cash markets. It may trade range bound this week as availability of imported stock in the market is good. India imported around 8.4 LMT import during last financial year while the old stock is still available. Import volume was recorded at 60,000 MT in the last four weeks of April, the first month of the new financial year. Notably, the extended timeline for Tur import for a year up-to 31st March -2023 has capped the upward movement in cash market. Regular supply from the overseas markets is expected now as per requirement throughout the year. With this changed import policy, stockists of Tur may not hold their Tur stocks for a longer time. It would ensure a regular supply from the overseas and local stockists. So, any spike is unlikely. Normal trade is expected, at a range of Rs 100- 150 up or down from current prices, in the coming weeks. The other price driving forces would be the

sowing area and Monsoon rains. If farmers shift some area to Soybean, price rise may be higher. The normal Monsoon is expected this year too.

The cash Urad markets too recovered by 1.5 to 2% last week as the quotes in Myanmar stayed at the previous level. Urad FAQ offered at \$870 and 970 per MT last week. Availability in Myanmar is ample and the better supply is expected in the coming weeks. More recover is unlikely this week as the new arrival started in M.P. region. Summer area is already up by 40%. Supply from Myanmar has already started. Sensing the short supply and increasing prices of Urad in the local markets, govt. had extended the import timeline for Urad to 31st March-2023. It would ensure a regular supply as per the requirement from Myanmar and help to cap upward momentum. The medium-term outlook would depend on sowing area under Kharif season and the monsoon rains. If farmers shift area to other lucrative crops, price may move beyond our expected level of Rs 6600-7200. It may increase by Rs 100-200 more and should stabilize. New trade was reported in Myanmar last week at \$870 & 970 for FAQ and SQ. India imported around 6.11 lakh T Urad during last financial year against 3.34 lakh MT in 2020-21. Range bound movement is expected this week.

Moong cash market traded stable in various markets, as expected last week. Prices stayed steady at Rs 6800 to 7000. New arrivals, ample stocks in Central pool and weak demand helped market to trade down or stayed steady. Summer sowing is running smoothly and is up by 14 % to 16.24 lakh ha. so far. The only concern is a rising temperature, which may affect yield of the summer crop, grain size may be small. However, improvement in area may minimize the loss to some extent. Ample availability in the Central pool, the arrival from Rabi crop and the smooth sowing in summer season would continue to pressurize the Moong cash market. The medium-term outlook would depend on Kharif area and rains frequency throughout the monsoon season. The short-term outlook seems steady to slightly weak after Rabi arrival, summer crop is expected from this week. Import volume remains restricted due to ban. India imported 1.95 LMT Moong during last financial year against 81,842 MT in 2020-21. In April-2022(first fortnight) India imported around 4500 MT Moong.

Masur market recovered slightly during the week under review. It traded up by 1 to 1.5 % to Rs 6950-7150. However imported Masur decreased by Rs 50. As local prices have recovered, price for imported Masur too may trade up next week. Arrival pace is slow and not increased as expected last week. Farmers are not releasing stock in bulk volume. The current declining trend may be arrested as the costing of import has gone up. Stockists are active again at the current price. Canada and Australia have already increased quotes to 980 per MT. Apart from it, ready stock at Canadian ports has come down. More downward correction is unlikely this week. The overall tone seems strong. Maximum stocks from mandis are going to go-downs, so tight supply side seems very much in the cash market. Masur is being traded at in the range of Rs6800 to7200 per qtl. As per the market source total stock at various ports is around 1.25 lakh MT. It may decrease to 1 LMT in May.

Global Market Updates:

As per the recent data released by Australia Bureau of Statistics, Australian Lentils export has increased by 38% to 102,182 MT in March 2022 compared to 74,163 MT in February 2022. Australia has exported totalled 404,329 MT Lentils so far compared to 432,757 MT in previous Marketing Year. Bangladesh emerged as biggest buyer with buying 51,879 MT Lentils followed by Egypt and India with buying 19,476 MT and 13,318 MT.

According to the Australia Bureau of Statistics recent report, Australian chickpea export has decreased by 65% to 35,563 MT in March from 102,259 MT in February. However, total export volume remained at 324,633 MT during the current Marketing Year down by 35.61% from 511,363 MT in previous Marketing Year. Bangladesh emerged as main buyer with buying around 17,804 MT followed by Nepal and Pakistan with buying 7,337 MT and 2,937 MT respectively.

As per recent report by Statistics Canada, farmers are likely to seed less Chickpea area this year to mere 175,200 acre down by 5.55% from 185,500 acre. Though, Chickpea area is estimated to be down, production (mainly Kabuli) is expected to increase by 33.65% to 110,000 tonne from 82,300 tonne on higher yield. Moreover, carry-over stock in Canada is estimated to decrease from 306,300 tonne to 187,000 during 2022-23 as local consumption and export demand during the Marketing Year 2020-21 remained same when yield was impacted heavily by drought.

According to 'Agriculture and Agri-Food Canada (AAFC)' recent report, area seeded for Pea in Canada for the period of 2022-23, is expected to increase by 6.30% to 16.50 lakh hectare from previous year (2021-22) area of 15.46 lakh hectare. New figure is down from 2020-21 seeded area of 17.22 lakh hectare. It means Pea production in Canada to surge marginally from its previous production but overall output could not surpass the 2020-21 production volume.

As per the 'Agriculture and Agri-Food Canada (AAFC)' recent report, Lentils output in Canada is estimated to surge by 35.76% to 25 lakh tonne in 2022-23 much higher from its last year (2021-22) production of 16.06 lakh tonne. However, it is still lower from 2020-21 crop by 14% when the production was 28.68 lakh tonne. Good return, hope of better realisation has helped the sown area to increase.

'Agriculture and Agri-Food Canada (AAFC)' recent report reveals, Pea output in Canada is expected to increase by 40% to 38 lakh tonne in 2022-23 from previous year (2021-22) output of 22.58 lakh tonne. However, the production is still lower from 2020-21 output of 45.94 lakh tonne. Better realisation and hope of good return than other cash crop, helped in increasing seeded area.

Canadian Grain Commission data indicates that international field Peas markets ended the week's trading on a relatively firm note on the back of improved export figure from key origins like Canada. According to the data, during the February, 65,797 metric tonne Peas exported from the country and at least 30,000 MT Peas have been **exported through rail, truck or in containers.** However, March-end data reveals that 164,400 MT of peas were loaded for bulk export during the month. Part of that will be counted as exports in April because official exports are based on the bill of lading date.

U.S. Department of Agriculture (USDA) in its recent report, has estimated that growers are likely to sow around 788,000 acres area under the Lentils, as per the preliminary sowing intension, up by 11 percent from 708,000 acres last year and also well above from 523,000 acres from 2020. With 580,000 acres estimated sown area, Montana remaining the most important producing region where sowing was noticed in 530,000 acres last year followed by North Dakota where sowing intension would increase from 120,000 acres to 140,000 acres.

Recent report from U.S. Department of Agriculture (USDA) reveals that Chickpea area is likely to fall by 18 percent to 303,600 acres as growers are not less interest to sow Chickpea in a big way. However, small Chickpea area is estimated to increase from 2021 by 5 percent to 62,100 acres. Area under the large Chickpea in 2022 is estimated to be at 241,500 acres down by 22 percent from previous year.

According to latest update from Australian Bureau of Agricultural and Resource Economics and Sciences (ABARES) Chickpea production in Australia is estimated as 10.04 lakh tonnes for 2021-22 as compared to last year's production of 7.33 lakh tonnes. Area under Chickpea has been increased this year in Australia from 5.07 lakh ha to 6.33 lakh ha.

According to latest update from Australian Bureau of Agricultural and Resource Economics and Sciences (ABARES) lentils production in Australia is estimated as 6.56 lakh tonne for 2021-22 as compared to last year's production of 6.34 lakh tonnes. Area under lentils this year stands at 3.9 lakh ha as compared to last year's acreage of 3.68 lakh ha.

Weekly Outlook: - Sideways movement is expected this week too.

Pulses-Wise Scenario:

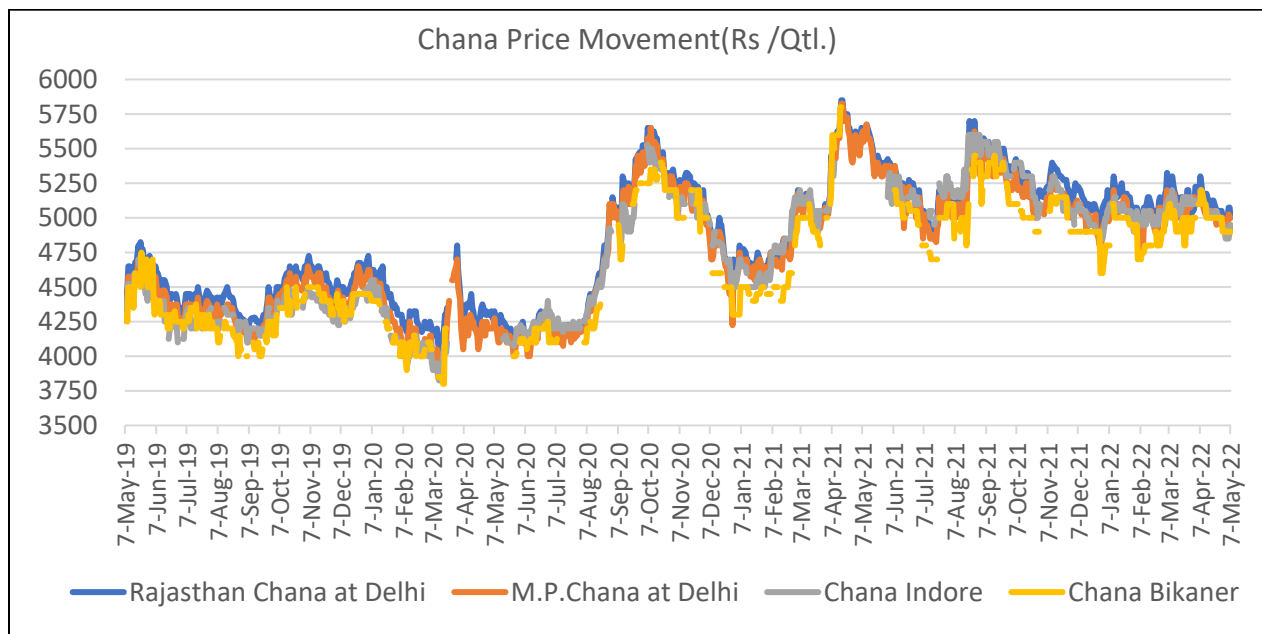

Chana

Current Scenario:

Chana physical market mostly remained stable in various markets last week except Delhi, where it increased by 1.50 % to INR 5000 per quintal. Mills are reportedly actively buying in Delhi. Prices of Chana are expected to improve now as demand is bound to go up with the beginning of marriage season and the ongoing smooth procurement drive. Chana prices are expected to inch up by Rs 100-150 per quintal. State agencies, including NAFED have procured around 14 Lakh MT Chana so far. Under the prevailing market fundamentals Chana may move towards MSP level of Rs 5230 by end May. Beyond that level market may face resistance as there is ample old stocks and it will continue to enter into markets.

Outlook for the week: Chana prices are expected to improve by Rs 100-150 from current levels in coming week.

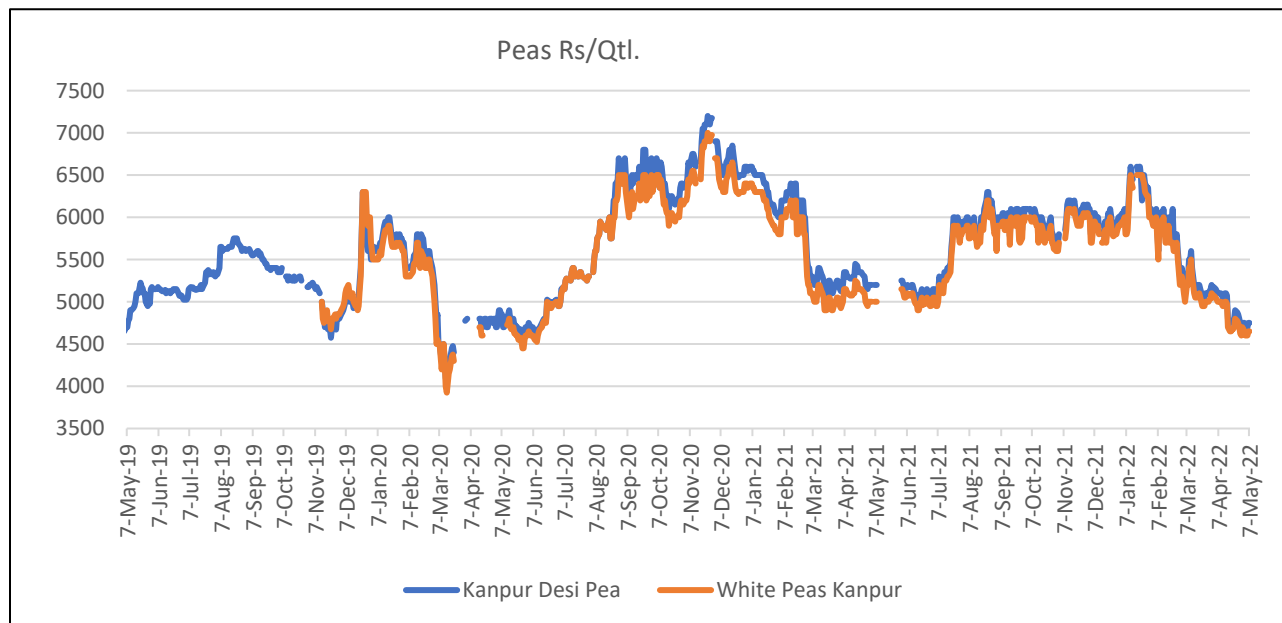

Following graph illustrates chana price movement in different markets:

Chana % Price Fluctuation Over Previous Week					
Markets	Today	Week Ago	Month Ago	Year Ago	% Ch. Over
	07.05.22	30.04.22	07.04.22	07.05.21	30-Apr-22
Delhi Chana(Raj)	5000	4925	5300	5625	1.52
Bikaner Chana	4900	4900	5100	5550	0.00
Indore Chana	4950	4950	5100	NA	0.00
Tan.Chana	4450	4525	4525	5200	-1.66
Price Projection For Bikaner During May-2022 (4900-5250)					

Peas (Matar):
Market Recap:

Pea cash market traded stable in Kanpur last week except white Pea which traded down by 1% to Rs 4650 per quintal from 4700 per quintal previous week. In Kanpur mandi, Desi Peas remained at INR 4750 per quintal similar to last week prices. As gap between the price of Chana and Pea has risen during the last few days, Pea prices are also likely to improve by Rs 100-150 per quintal in coming week due to rising millers and stockists demand. Firm trend in Chana will also support the Pea prices too.

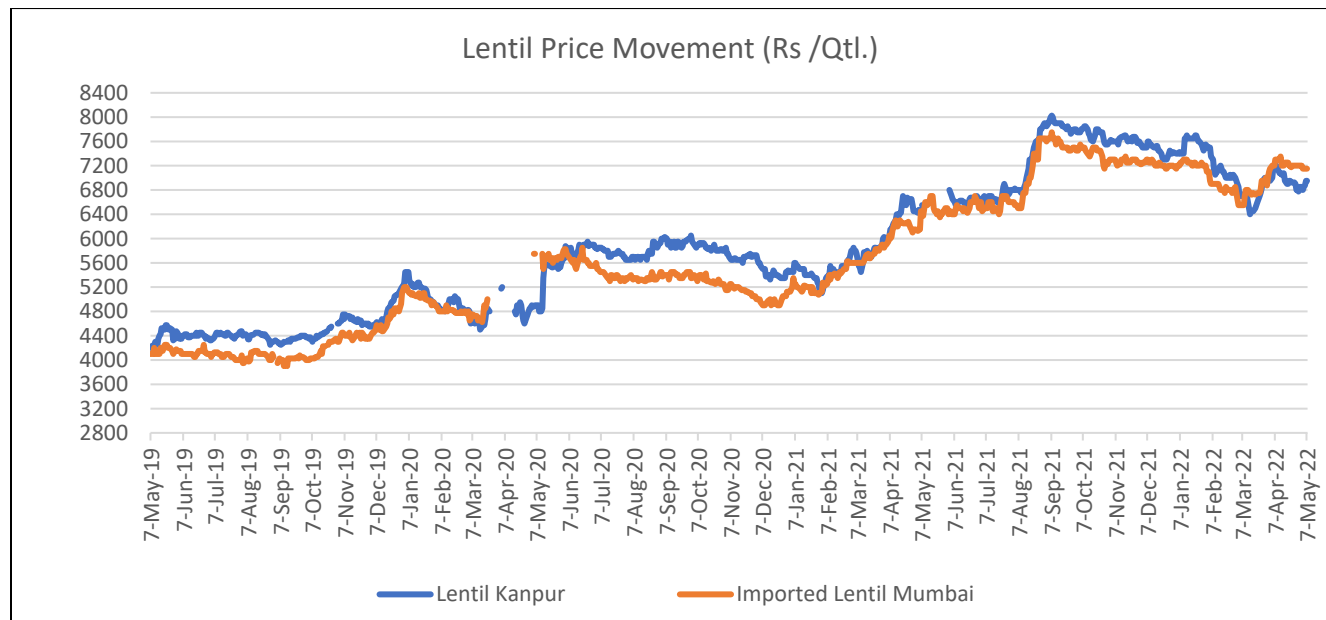

Yellow & White Peas % Price Fluctuation Over Previous Month					
Markets	Today	Week Ago	Month Ago	Year Ago	% Ch. Over
	07.05.22	30.04.22	07.04.22	07.05.21	30.04.22
Kanpur Desi Peas	4750	4750	5100	5200	0.00
Kanpur White Peas	4650	4700	5000	5000	-1.06
Price Projection For Kanpur Desi During May-2022 (4700-5050)					

Current Market Dynamics & Outlook: Pea may trade slightly up in coming week.

Lentils (Masoor):
Market Recap:

Masur market recovered slightly during the week under review. It traded up by 1 to 1.5 % to Rs 6950-7150. However imported Masur decreased by Rs 50. As local prices have recovered, price for imported Masur too may

trade up next week. Arrival pace is slow and not increased as expected last week. Farmers are not releasing stock in bulk volume. The current declining trend may be arrested as the costing of import has gone up. Stockists are active again at the current price. Canada and Australia have already increased quotes to 980 per MT. Apart from it, ready stock at Canadian ports has come down. More downward correction is unlikely this week. The overall tone seems strong. Maximum stocks from mandis are going to go-downs, so tight supply side seems very much in the cash market. Masur is being traded at in the range of Rs 6800 to 7200 per quintal.

Market Outlook: The overall tone seems strong.

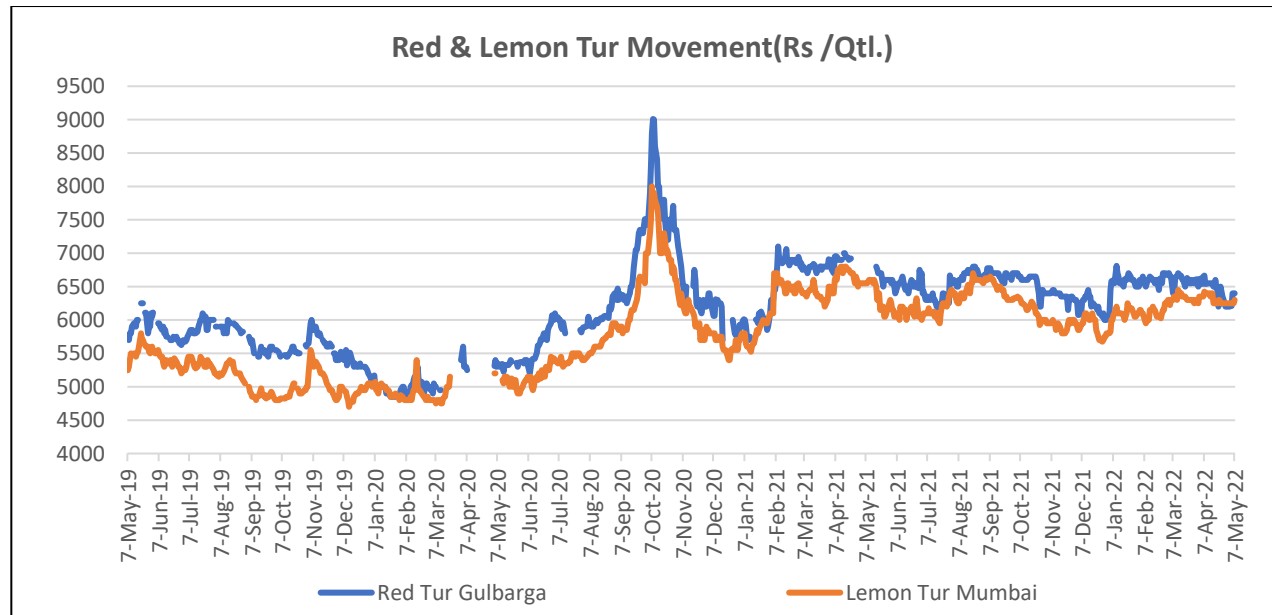

Lentil % Price Fluctuation Over Previous Week					
Markets	Today	Week Ago	Month Ago	Year Ago	% Ch. Over
	07.05.22	30.04.22	07.04.22	07.05.21	30-Apr-22
Kanpur	6950	6850	7200	6550	1.46

Raipur	7000	6900	7150	6550	1.45
Ashok Nagar	6250	6200	6450	6400	0.81
Price Projection For Kanpur During May-2022 (6700-7400)					

Pigeon Pea (Tur/Toor):

Market Recap:

Tur cash market too recovered by 1 to 3.25% last week on fresh buying interest and the low pace of arrivals in cash markets. It may trade range bound this week as availability of imported stock in the market is good. India imported around 8.4 LMT during last Financial Year while the old stock is still available. Import volume was

recorded at 60,000 MT in the last four weeks of April, the first month of the new Financial Year. With the modification of the timeframe for Tur import, supply side is likely to remain at comfortable level and will continue to cap upward movement in prices. With this changed import policy, stockists would prefer to release their stocks time to time and may not hold their Tur stocks for a longer time. It would ensure a regular supply from the overseas and local stockists. So, any spike in prices is unlikely. Normal trade is expected, at a range of Rs 100- 150 up or down from current prices, in the coming weeks. The other price driving forces would be the sowing area and Monsoon rains. If farmers shift some area to Soybean or Cotton, price rise may move up. The normal Monsoon is expected this year too.

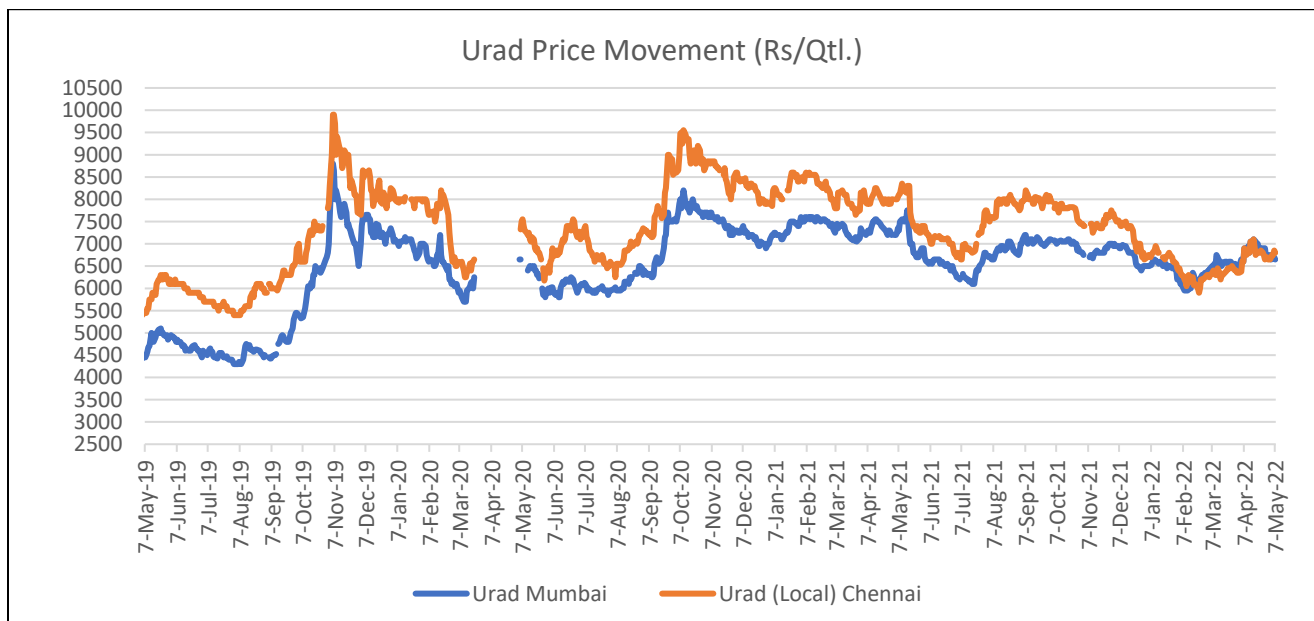

Outlook For the week: Prices may trade between the range of Rs 100- 150 up or down from current prices, in the coming week.

Tur % Price Fluctuation Over Previous Week					
Markets	Today	Week Ago	Month Ago	Year Ago	% Ch. Over

Mumbai	6300	6250	6425	6550	0.80
Price Projection For Gulbarga During May-2022 (6150-6650)					

Black Matpe (Urad):

Market Recap:

Urad physical market too recovered by 1.5 to 2% last week as the quotes in Myanmar stayed at the previous level. Urad FAQ and SQ offered at \$870 and 970 per MT last week. Availability in Myanmar is ample and the better supply is expected in the coming weeks. More recovery is unlikely this week as the new arrival started in M.P. region. In Jabalpur mandi of MP, new Urad arrivals of 3 bags reported on last Saturday and traded at Rs 8,121 per quintal as Muhurat trading. Usually, the crop size of summer urad is very small in size but this season the area has increased by 40% from last year so, it is likely that markets may witness some good summer urad arrivals in days to come. On the other hand, prices would take cues from the pace of arrivals and move accordingly. Supply from Myanmar has already started. Extension in time frame for Urad, would keep the supply side regular as per the requirement from Myanmar and help to cap upward momentum. The medium-term outlook would depend on sowing area under Kharif season and the monsoon rains. Range bound movement is expected this week.

Outlook For the Week: Range bound movement is expected this week.

Green Gram (Moong):

Market Recap:

Moong cash market traded stable in various markets, as expected last week. Prices stayed steady at Rs 6800 to 7000. New arrivals, ample stocks in Central pool and weak demand helped market to trade down or stayed steady. Summer sowing is running smoothly and is up by 14 % to 16.24 lakh ha. so far. The only concern is a rising temperature, which may affect yield of the summer crop, grain size may be small. However, improvement in area may minimize the loss to some extent. Ample availability in the Central pool, the arrival from Rabi crop and the smooth sowing in summer season would continue to pressurize the Moong cash market. The medium-term outlook would depend on Kharif area and rains frequency throughout the monsoon season. The short-term outlook seems steady to slightly weak after Rabi arrival, summer crop is expected from this week.

Outlook for the week: The short-term outlook seems steady to slightly weak.
