Pulses Sector- Domestic Highlights:

Chana and Tur cash markets traded down by 1 to 4 % during the week under review. However, Moong, Urad and Masur markets recovered slightly. New arrivals of Moong have started increasing in Harda market. The crop is in good condition. In Raisen, the summer Moong area has increased by 25 to 30 %. Around 30 to 35 % farmers have sown summer Moong first time, mostly in irrigated region. Temperature is not a big issue right now. However, caterpillars have affected 5 to 7% crop in Raisen district. Farmers have sprayed pesticides thrice so far. It has increased the cost of production. The normal yield in this season is 500 to 600 kg in irrigated area while 300 to 350 kg in non-irrigated area. Arrival is likely to increase from June.

Arrival in all major markets have come down. Offtake is weak and mills are buying based on need only. Indian importers have struck some fresh deal in Myanmar. Urad FAQ &SQ were traded at \$ 870 and 970 per MT respectively and Tur at \$850 per MT, basis Indian ports. Moong traded up by \$10 at \$910.

Summer Urad sowing continued to gain momentum in all states including Madhya Pradesh. Farmers have covered 3.687 lakh ha as on 13th May-2022. It is up by 40 % from the last year same time. The normal area under summer Urad is 3.86 lakh ha. The major growing states are Tamil Nadu, M.P. and Uttar Pradesh.

Farmers have covered 17.48 lakh ha under summer Moong so far, up by 21.2 % from 14.43 lakh ha last year same time. M.P. is a major growing state, where it has improved smartly by 74.6 % to 8.33 lakh ha. Recovery in area may minimize the impact of the rising temperature and loss due to caterpillars spread. Quality of new crop coming into markets is good.

Chana traded down by 1.5 to 3% in various markets due to weak demand from mills and stockists. Prices of Chana are expected to improve now as demand is bound to go up with the beginning of marriage season and the ongoing smooth procurement drive. State agencies, including NAFED have procured around 17 LMT Chana so far. Under the prevailing market fundamentals Chana may move towards MSP level of Rs 5230 by end May. Beyond that level market may face resistance as there is ample old stocks and it will continue to enter into markets. Chana in various market is trading at Rs 4900-5050. It may move up by Rs100-150 in the coming weeks. Chana imported from Tanzania is being offered at Rs4300-4400 in Mumbai. As quality of African origin Chana is not good, its demand is limited.

Tur cash market too traded down by 1.5 to 4.50 % last week due to sale by importers at discounted price. Sentiment remains weak as the other pulses too are trading under pressure. It may trade range bound this week as availability of imported stock in the market is good. India imported around 8.4 LMT Tur during last financial year while the old stock is still available in plenty. Import volume was recorded at 60,000 MT in the last four weeks of April, the first month of the new financial year. Notably, the extended timeline for Tur import for a year up-to 31st March -2023 has capped the upward movement in cash market. Regular supply from the overseas markets is expected now as per requirement throughout the year. With this changed import policy, stockists of Tur may not hold their Tur stocks for a longer time. It would ensure a regular supply from the overseas and local stockists. So, any spike is unlikely. Normal trade is expected, at a range of Rs 100- 150 up or down from current prices, in the coming weeks. The other price driving forces would be the sowing area and Monsoon rains. If farmers shift some area to Soybean and other lucrative crops, price rise may be higher. The normal Monsoon is expected this year too and area may decrease by 5 to 8 % this year if prices trade below MSP level at the time of sowing.

The cash Urad markets recovered by 1.5 to 2% last week despite the quotes in Myanmar stayed at the previous level. Urad FAQ offered at \$870 and 970 per MT. Availability in Myanmar is ample and the better supply is expected in the coming weeks. So, recovery in cash Urad is unlikely to continue. Apart from it, new arrival started in some parts of M.P. in limited quantity. Summer area is already up by 40%. Supply from Myanmar has already started. Sensing the short supply and increasing prices of Urad in the local markets, govt. had extended the import timeline for Urad to 31st March-2023. It would ensure a regular supply as per the requirement from Myanmar and help to cap upward momentum. The medium-term outlook would depend on sowing area under Kharif season and the monsoon rains. If farmers shift area to other lucrative crops, price may move beyond our expected level of Rs 6600-7200. It may increase by Rs 100-200 more and should stabilize. New trade was reported in Myanmar last week at \$870 & 970 for FAQ and SQ. India imported around 6.11 lakh T Urad during last financial year against 3.34 lakh MT in 2020-21. Range bound movement is expected this week too.

Moong cash market stayed steady to slightly firm in various markets. Prices traded in the range of Rs 6800 to 7150. New arrivals, ample stocks in Central pool and weak demand helped market to trade range bound. Summer sowing is running smoothly and is up by 21.2 % to 17.48 lakh ha. so far. The only concern is a rising temperature and spread of caterpillar, specially in Raisen district, where it has affected 5 to 7% crop so far. Grain size may be smaller. However, improvement in area may minimize the loss to some extent. Ample availability in the Central pool, the arrival from Rabi crop and the smooth sowing in summer season would continue to pressurize the Moong cash market. The medium-term outlook would depend on Kharif area and rains frequency throughout the monsoon season. The short-term outlook seems steady to slightly weak after Rabi arrival, summer crop is expected from this week. Import volume remains restricted due to ban. India imported 1.95 LMT Moong during last financial year against 81,842 MT in 2020-21. In April-2022(first fortnight) India imported around 4500 MT Moong.

Masur market traded mixed during the week under review. It traded up by 0.70 % to Rs7150-7200 in Mumbai market while it traded down in Kanpur and Raipur market by 0.36 and 1% respectively. As local prices have recovered, price for imported Masur too may trade up next week. Arrival pace is slow and not increased as expected last week. Farmers are not releasing stock in bulk volume. The current declining trend may be arrested as the costing of import has gone up. Stockists are active again at the current price. Canada and Australia have already increased quotes to 965-70 per MT. Apart from it, ready stock at Canadian ports has come down close to 1LMT. More downward correction is unlikely this week. The overall tone seems strong. Maximum stocks from mandis are going to go-downs, so tight supply side seems very much in the cash market. Masur is being traded at in the range of Rs6900 to7200 per qtl. As per the market source total stock at various ports is around 1.0 lakh MT. It may decrease below 1 LMT in end May.

Tur cash market too traded down by 1.5 to 4.50% last week due to sale by importers at discounted price. Sentiment remains weak as the other pulses too are trading under pressure. With this changed import policy, stockists would prefer to release their stocks time to time and may not hold their Tur stocks for a longer time. It would ensure a regular supply from the overseas and local stockists. So, any spike in prices is unlikely. Green Gram (Moong):

Market Recap:

Moong cash market stayed steady to slightly firm in various markets. Prices traded in the range of Rs 6800 to 7150. New arrivals, ample stocks in Central pool and weak demand helped market to trade range bound. Summer sowing is running smoothly and is up by 21.2% to 17.48 lakh ha. so far. The only concern is a rising temperature and spread of caterpillar, particularly in Raisen district, where it has affected 5 to 7 % crop so far. Grain size may be smaller. However, improvement in area may minimize the loss to some extent. Ample availability in the Central Pool, the arrival from Rabi crop and the smooth sowing in summer season would continue to pressurize the Moong cash market. The medium-term outlook would depend on Kharif area and rains frequency throughout the monsoon season. The short-term outlook seems steady to slightly weak after Rabi arrival, summer crop is expected from this week.
