Commodity-wise Domestic, International Prices and Arrivals at Different Centres

Pulses Sector- Domestic Highlights:

No major changes were seen in fundamentals of cash pulses markets. Most of the markets traded down due to the lack of fresh buying interests from mills and stockists. Expectation of the normal monsoon and timely rains in major kharif growing belts have weakened the inner tone in the market. All pulses except Moong, on an average, traded down by 0.50 to 4.0 % during the week under review. Moong, as expected last week, traded down by 4 to 9% and the pressure continues. Kharif area under Moong, Urad and Tur may decline by 5 to 10%, as the prices are ruling below the market expectation. Farmers may shift pulses area to Maize, Paddy, Soybean and Cotton as the relative return from these crops is higher than Pulses. As prices are ruling low, recovery in cash market is expected from the 2nd week of June.

CiF quotes in Myanmar for Urad has decreased by \$40-45 to \$870 for FAQ & \$960 for SQ during the week under review. Tur quotes decreased by \$20 to 820 per MT. Moong stayed steady to \$910 despite the absence of Indian importers in Myanmar markets. Importers are active in Myanmar, but for a limited quantity.

Summer Urad sowing continued to gain momentum in all states including Madhya Pradesh. Farmers have covered 3.65 lakh ha as on 27th May-2022. It is up by 36% from the last year same time. The normal area under summer Urad is 3.86 lakh ha. The major growing states are Tamil Nadu, M.P. and Uttar Pradesh. Sowing is almost over now.

Farmers have covered 19.15 lakh ha under summer Moong so far, up by 15.6 % from 16.57 lakh ha last year same time. M.P. is a major growing state, where it has improved by 78.2 % to 8.50 lakh ha. Increased acreage may minimize the impact of the rising temperature and loss due to caterpillars spread/infection. Quality of new crop coming into markets is poor to average. Production of summer Moong has been pegged at 8.53 lakh MT, out of which M.P. 's contribution is likely to be 3.43 Lakh MT this year. The AgriWatch estimate for total Moong production for the country this year, has been pegged at 26.53 lakh MT (Kharif-15.88, Rabi-2.30 & Summer-8.35 lakh MT).

Urad cash market continued to trade under pressure and decreased, on an average, by 0.5 to 1.5 % to Rs 6650-7000 in various markets despite the new arrivals in Andhra Pradesh and Karnataka during the last week, taking cue from decreasing quotes in Myanmar. Urad quotes in Myanmar decreased unexpectedly by \$40-45 at \$ 870 for FAQ and \$960 for SQ and its impact is visible in domestic market. Importers have restricted fresh deal on expectation of normal monsoon. If area decreases(likely) in Kharif season due to disturbance in weather pattern and rains, prices may move up again. Old stocks in markets like Chennai and Mumbai are depleting fast. The stocks from imports have already been sold. Arrival from the new crop is over 2 to 3 months away. Under the prevailing market fundamentals, Urad prices may move up by Rs 200-300 in the near term. Rains in the monsoon season too remains crucial. Farmers may reduce area of Urad by 5 to 10 % in the Kharif season, as the relative return from Maize, Cotton, Paddy and Soybean is higher. As the fuel prices has come down, the increase in price would be limited.

As the prices of Tur is hovering in limited range, farmers may prefer to reduce Tur area by 10 to 15% this year. They may prefer to sow more Cotton, Maize, Paddy and other lucrative crops in the summer season. Farmers may maintain similar area in Soybean, while area under Maize, Paddy and Cotton may increase by 10 to 15 %. Monsoon rains might be the crucial factor for sowing in states like Maharashtra, Madhya Pradesh and Karnataka. Right now,

loss in sown areas seems very much on the card based on farmers pre-sowing intentions. Demand for dal is weak and is unlikely to improve suddenly amid the continuous supply from import and domestic sources. Tur cash market traded down by 1 to 1.5 % in various markets except Indore where it moved up by 5% due to a sudden spurt in local demand during last week. Firm momentum is unlikely to continue in Indore. Tur market may continue to trade at the current level this week too. Prices may recover by Rs 200-250 by 1st week of June, by then Monsoon rains in the growing region should start and define the future. Demand for dal is weak. As the processing cost is increasing, price should improve.

Chana cash market continued to trade down as the supply side is normal against the current weak demand despite the ongoing procurement drive at MSP. NAFED and other procurement agencies have already procured 22 LMT against the set target of 29 LMT for the year. As prices are ruling down from MSP, by Rs 450-550, the target is likely to be achieved as the procurement date in M.P. has been extended till June. Availability of old stocks, arrivals and weak demand for dal are keeping Chana markets under pressure. If the demand improves, likely from mid-June, prices may recover by Rs 100-200 and may move towards the 5000 mark. Right now, range bound movement is expected. Beyond that level market may face resistance as there is ample old stocks and it will continue to enter into markets. Chana in various market is trading at Rs 4650-4800. Chana imported from Tanzania is being offered at Rs4100-4200 in Mumbai. As quality of African origin Chana is not good, its demand is limited.

Moong cash market, as expected last week, decreased by 4 to 9% in various markets and traded in the range of Rs 6000-6800 last week. It may decrease further by Rs 200-300. New arrivals from the summer crop, ample stocks in Central pool and weak demand helped market to trade low. Pressure on price may continue in coming weeks as arrivals from the summer crop has already started increasing in M.P. Summer sowing has reached almost at end and is up by 16.60 % to 19.15 lakh ha. so far. The only concern is a rising temperature, the shortage of water and spread of caterpillars. Grain size may be smaller. However, improvement in area may minimize the loss to some extent. Ample availability in the Central pool, increasing arrivals from the summer crop, free distribution of Moong in M.P. may pressurize Moong market by Rs 200-300 from the current level. The medium-term outlook would depend on Kharif area and rains frequency throughout the monsoon season. India imported 1.95 LMT Moong during last financial year against 81,842 MT in 2020-21. Prices of Moong may come down to Rs 5800-6500 in the peak arrival season.

Masur markets continued to trade mixed during the week under review. It traded down by 0.69% to Rs7150 in Mumbai market while increased by 0.72% in Raipur market to Rs 6950. It traded down by 0.72% to Rs 6900 in Kanpur market. As local prices have recovered, price for imported Masur too may trade slightly up next week. Arrival pace is slow and has not increased as expected last week. Farmers are not releasing stocks in bulk volume. The current declining trend may be arrested as the costing of import has gone up. Canada and Australia have already increased quotes to 945-60 per MT. Apart from it, ready stock at Canadian ports has come down close to 1LMT. More downward correction is unlikely this week. Stockists are active again at the current prices. The overall tone seems strong. As soon as other pulses start improving, Masur too would trade up. Maximum stocks from mandis are going to go-downs, so tight supply side seems very much in the cash market. Masur is being traded at in the range of Rs 6900 to 7150 per qtl. As per the market sources, total stock at various ports is around 1.0 lakh MT. It may decrease below 1 LMT June. The overall inner tone seems strong.

Global Market Updates:

According to the sources, recent rains in major growing areas of North American have eased the worries regarding yields as it helped to enhance the much-needed moisture level for sowing. However, slow pace of sowing has emerged as a caused of concern. As per the recent data, around 63% sowing has been observed till the week end 27th May, 2022 compared to 72% same period last year. This level is also lower from last five year average of 68%.

Statistics Canada's recent report reveals that Lentil stocks in all positions have also decreased by 34% to 949,000 tonne as of March 2022, from 1.43 million tonne last year. New figure is also below from past five-year average of 1.51 million tonne of all classes of lentils. However, there is no change in commercial inventories but stocks at farms gate have reduced to mere 770,000 tonne, down by 39% from 1.26 million tonne last year. Commercial inventories have been seen at 179,000 tonne.

As per Statistics Canada recent report, Pea inventories in Canada in all positions has decreased by 35% to 1.22 million tonne, as of March 31 2022, from 1.87 million tonne last year. New inventory level is also below the last five-year average of 1.924 million tonne. Commercial inventories have also reduced to 322,000 tonne, down by 21% from 405,000 tonne. Besides, all classes pea stocks at farms have reportedly reduced by 36% to mere 902,000 tonne from 1.47 million tonne.

As per the recent data released by Australia Bureau of Statistics, Australian Lentils export has increased by 38% to 102,182 MT in March 2022 compared to 74,163 MT in February 2022. Australia has exported totalled 404,329 MT Lentils so far compared to 432,757 MT in previous Marketing Year. Bangladesh emerged as biggest buyer with buying 51,879 MT Lentils followed by Egypt and India with buying 19,476 MT and 13,318 MT.

According to the Australia Bureau of Statistics recent report, Australian chickpea export has decreased by 65% to 35,563 MT in March from 102,259 MT in February. However, total export volume remained at 324,633 MT during the current Marketing Year down by 35.61% from 511,363 MT in previous Marketing Year. Bangladesh emerged as main buyer with buying around 17,804 MT followed by Nepal and Pakistan with buying 7,337 MT and 2,937 MT respectively.

Weekly Outlook: - Sideways movement is expected this week too.

Pulses-Wise Scenario:

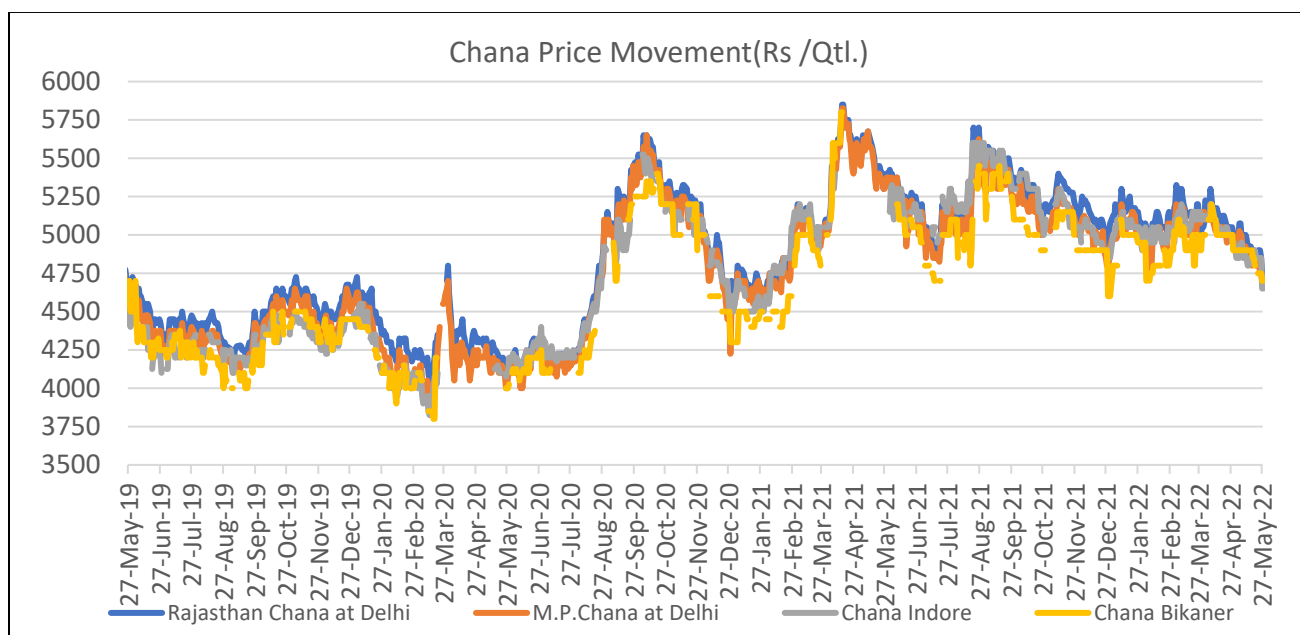

Chana

Current Scenario:

Chana cash market continued to trade down as the supply side is normal against the current weak demand despite the ongoing procurement drive at MSP. NAFED and other procurement agencies have already procured 22 LMT against the set target of 29 LMT for the year. As prices are ruling down from MSP, by Rs 450-550, the target is likely to be achieved as the procurement date in MP has been extended till June. Availability of old stocks, arrivals and weak demand for dal are keeping Chana markets under pressure. If the demand improves, likely from mid-June, prices may recover by Rs 100-200 and may move towards the 5000 mark. Right now, range bound movement is expected. Beyond that level market may face resistance as there is ample old stocks and it will continue to enter into markets. Chana in various market is trading at Rs 4650-4800. Chana imported from Tanzania is being offered at Rs 4100-4200 in Mumbai. As quality of African origin Chana is not good, its demand is limited.

Outlook for the week: range bound movement is expected.

Following graph illustrates Chana price movement in different markets:

Chana % Price Fluctuation Over Previous Week					
Markets	Today	Week Ago	Month Ago	Year Ago	% Ch. Over
	28.05.22	21.05.22	28.04.22	28.05.21	21.05.22
Delhi Chana(Raj)	4750	4850	5050	5375	-2.06

Indore Chana	4650	4850	4950	NA	-4.12
Tan.Chana	4150	4300	4525	NA	-3.49
Price Projection For Bikaner During May-2022 (4700-5250)					

Peas (Matar):

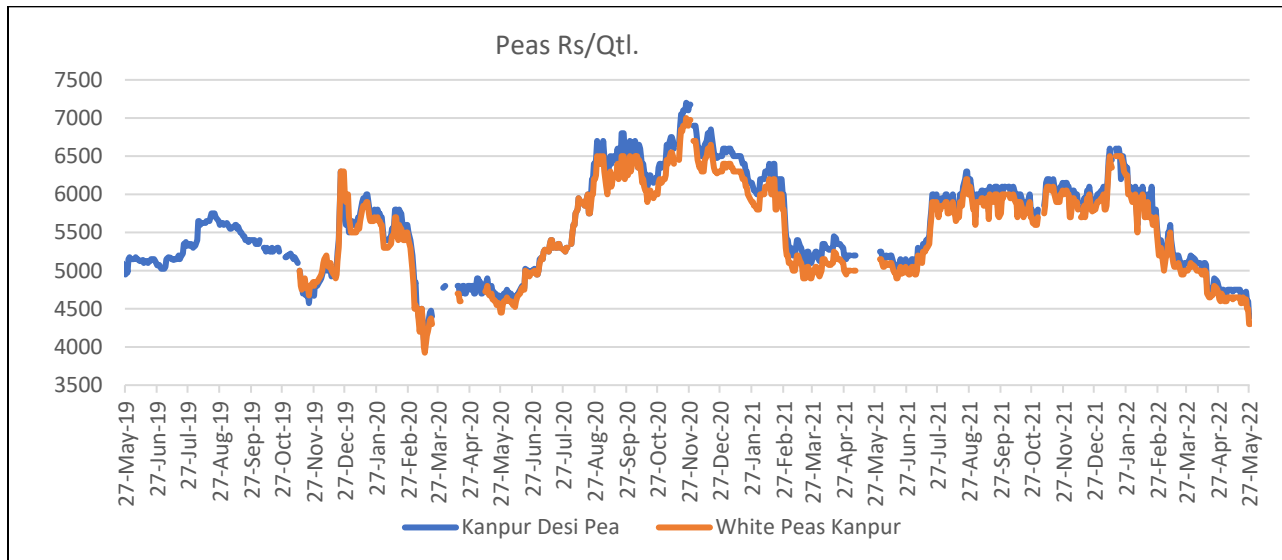

Market Recap:

Pea physical market continue to trade down and prices decreased by 6 to 7% due to easy supply of Chana at lower prices with sluggish demand by stockists and miller as consumption demand is being diverted to Chana owing to lower levels. Prices for both Desi and White Pea in Kanpur traded down at Rs 4400 per quintal from Rs 4700 per quintal and Rs 4300 per quintal from Rs 4650 per quintal respectively during the week in review.

This week too, Pea market to trade range bound due to plenty of stocks and easy availability of Chana at lower prices. not let the market to move up upper side.

Outlook for the week: Pea market may trade range bound following the Chana trend.

Following graph illustrates Pea price movement in different markets:

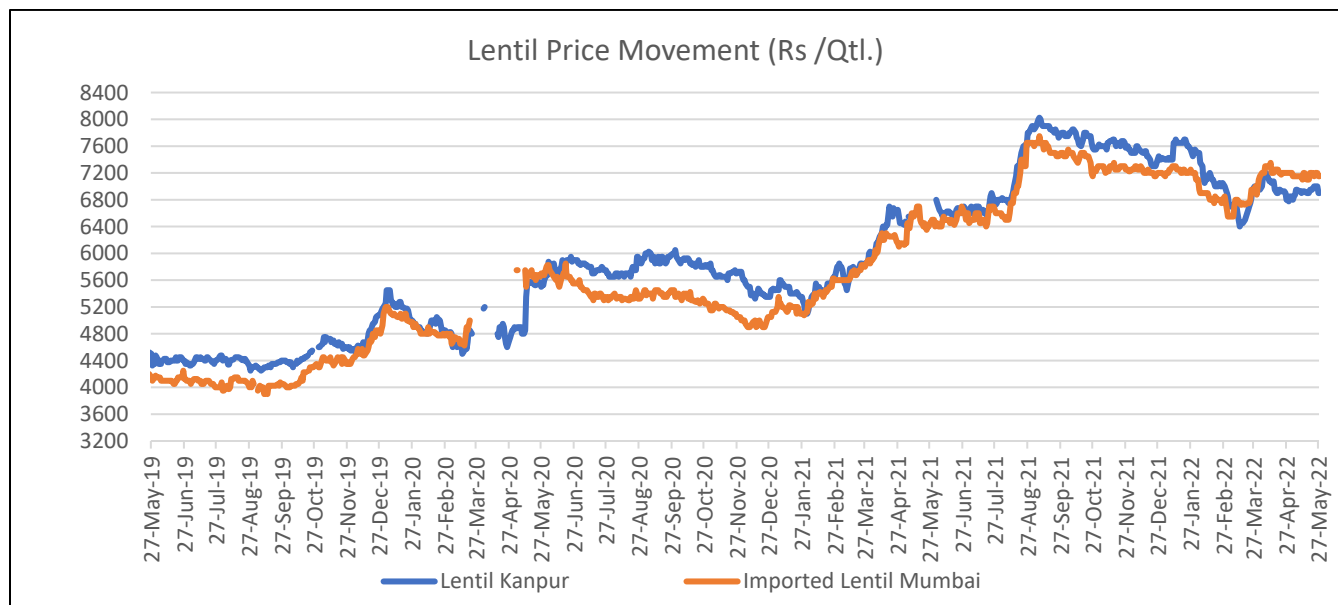

Yellow & White Peas % Price Fluctuation Over Previous Month					
Markets	Today	Week Ago	Month Ago	Year Ago	% Ch. Over
	28.05.22	21.05.22	28.04.22	28.05.21	21.05.22

Pigeon Pea (Tur/Toor):

Market Recap:

As the prices of Tur is hovering in limited range, farmers may prefer to reduce Tur area by 10 to 15% this year. They may prefer to sow more Cotton, Maize, Paddy and other lucrative crops in the summer season. Farmers may maintain similar area in Soybean, while area under Maize, Paddy and Cotton may increase by 10 to 15 %. Monsoon rains might be the crucial factor for sowing in states like Maharashtra, Madhya Pradesh and Karnataka. Right now, loss in sown areas seems very much on the card based on farmers pre-sowing intentions. Demand for dal is weak and is unlikely to improve suddenly amid the continuous supply from import and domestic sources. Tur cash market traded down by 1 to 1. % in various markets except Indore where it moved up by 5% due to a sudden spurt in local demand during last week. Firm momentum is unlikely to continue in Indore. Tur market may continue to trade at the current level this week too. Prices may recover by Rs 200-250 by 1st week of June, by then Monsoon rains in the growing region should start and define the future. Demand for dal is weak. As the processing cost is increasing, price should improve.

Outlook for the week: Prices may continue to trade at this level this week too.

Following graph illustrates Pea price movement in different markets:

Tur % Price Fluctuation Over Previous Week					
Markets	Today	Week Ago	Month Ago	Year Ago	% Ch. Over
	28.05.22	21.05.22	28.04.22	28.05 21	21.05.22
