Commodity-wise Domestic, International Prices and Arrivals at Different Centres

Pulses Sector- Domestic Highlights:

Pulses cash market traded mixed during the week under review. Chana, Tur, Moong traded down by 1 to 5%, on an average, in various markets due to weak demand against improved supply side. Arrivals from summer Moong is improving while Tur and Chana supply side have improved as the stockists have started releasing stocks, sensing weak inner tone in the market. Urad and Lentil markets have improved slightly due to restricted sale by stockists and importers. As the prices have decreased, Moong & Tur farmers may shift 5 to 10% area to other lucrative crops like Maize and Cotton, as per the primary intentions expressed by farmers. Some farmers may shift pulses area to Paddy too if they receive good rainfall in the beginning stages of monsoon. Urad area may remain same as last year as the prices are ruling high. As prices are ruling low, recovery in cash market might be seen in coming weeks.

Lentils availability in global market is bound to increase as crop condition in Canada is good so far while Australian farmers too may grow more Lentil due to lucrative price this year. The overall global availability of Lentil would increase by 8 to 9 lakh MT. Canada may harvest 25 lakh MT (last year 16.06 lakh MT) this year while Australian crop may be similar to last year at 6.5 to 7 lakh MT.

CiF quotes in Myanmar for Urad stayed steady at \$870 for FAQ & while SQ inched up by \$10 to \$970 during the week under review. Tur quotes increased by \$5 to 825 per MT. Moong stayed steady to \$910 despite the absence of Indian importers in Myanmar markets. Importers are active in Myanmar, but for a limited quantity. As the fresh buying volume is low from the Indian importers, CiF quotes may continue to hinge in limited range.

Summer sowing is over now. Farmers have covered 3.65 lakh ha under Urad as on 27th May-2022. It is up by 36% from the last year same time. The normal area under summer Urad is 3.86 lakh ha. Kharif farm preparation is on and it may gain momentum after 20th June, as the advancement of Monsoon is normal so far. The Summer Moong area ended up by 15.6% to 19.15 lakh ha against 16.57 lakh ha last year.

Farmers have covered 19.15 lakh ha under summer Moong so far, up by 15.6% from 16.57 lakh ha last year same time. M.P. is a major growing state, where it has improved by 78.2 % to 8.50 lakh ha. Quality of new crop coming into markets is poor to average. Production of summer Moong has been pegged at 8.53 lakh MT, out of which MP's contribution is likely to be 3.43 Lakh MT this year. The AgriWatch estimate for total Moong production for the country this year, has been pegged at 26.53 lakh MT (Kharif-15.88, Rabi-2.30 & Summer-8.35 lakh MT).

Urad cash market recovered by 1 to 1.5% as sellers restricted sale at the discounted price at Rs 6650-6725 in various markets despite the new arrivals in Andhra Pradesh and Karnataka during the last week, taking cue from the improved quotes in Myanmar. Urad quotes in Myanmar increased by \$5 to \$ 870 for FAQ and \$970 for SQ and its impact was visible in domestic market. Importers have restricted fresh deal on expectation of normal monsoon. If area decreases (likely) in Kharif season due to disturbance in weather pattern and rains, prices may move up more than our normal expectations. Rains in the monsoon season too remains crucial. Farmers may reduce area of Urad by 5% in the Kharif season, as the relative return from Maize, Cotton and Paddy is higher. Old stocks in markets like Chennai and Mumbai are depleting fast. The stocks from imports have already been sold. Arrival from the new crop is over 2 to 3 months away. Under the prevailing market fundamentals, Urad prices may move up by Rs 200-300 in the near term.

As the prices of Tur have decreased by 3 to 10% during last one month and hovering either at MSP or below MSP, farmers may prefer to reduce Tur area by 10 to 15% this year. They may prefer to sow more Cotton, Maize, Paddy and other lucrative crops in the kharif season. They may reduce area under Soybean, while area under Maize, Paddy and Cotton may increase by 10 to 15%. Monsoon rains might be the crucial factor for sowing in States like Maharashtra, Madhya Pradesh and Karnataka. Right now, loss in sown areas seems very much on the card based on farmers pre-sowing intentions. Demand for dal is weak and is unlikely to improve suddenly amid the continuous supply from import and domestic sources. The stock of Tur is sufficient to cater the domestic needs. Tur is being traded at Rs 6000 to 6300. As the prices of Tur are at lower side any improvement in demand may support the market sentiments. Tur market prices are expected to recover by Rs 100-200 per quintal by the 2nd week of June.

Chana cash market continued to trade down as the supply side has increased against the current weak demand despite the ongoing procurement drive at MSP. NAFED and other procurement agencies have already procured 23 LMT against the set target of 29 LMT for the year. As prices are ruling down from MSP, by Rs 500-550, the target is likely to be achieved as the procurement date in MP has been extended till June. Availability of old stocks, arrivals and weak demand for dal are keeping Chana markets under pressure. If the demand improves, likely from mid-June, prices may recover by Rs 100-200 and may move towards the 5000 mark. Right now, range bound movement is expected. Beyond that level market may face resistance as there is ample old stocks and it will continue to enter into markets. Chana in various market is trading at Rs 4500-4700.

Moong cash market, as expected last week, decreased by 1.5 to 3% in various markets and traded in the range of Rs 5800-6800 last week. It may decrease further by Rs 200-300. New arrivals from the summer crop, ample stocks in Central Pool and weak demand helped market to trade low. Pressure on price may continue in coming weeks as arrivals from the summer crop has already started increasing in MP. Summer sowing is over now and is up by 16.60% to 19.15 lakh ha. so far. However, improvement in area may minimize the loss to some extent. Ample availability in the Central pool, increasing arrivals from the summer crop, free distribution of Moong in M.P. may pressurize Moong market by Rs 200-300 from the current level. The medium-term outlook would depend on Kharif area and rains frequency throughout the monsoon season.

Masur markets continued to trade under pressure on the reports of good crop condition in Canada and the better prospects for Australian lentils this year. It traded stable at Rs 7150 in Mumbai market while decreased by 0.36% in Kanpur market to Rs 6825. It traded down by 3.13 % to 6200-6300 in Ashok Nagar. Any spike is unlikely in Masur market at this point of time. If Canadian crop continues to prosper well, prices may move in limited range despite the slow arrival pace. However, the current declining trend may be arrested as stockists may restrict release at lower price. Canada and Australia quotes are steady at \$945-60 per MT. Canadian exporters may prefer to offload old stock before bumper crop hits the market. If prices of other pulses improve, Lentil too may improve to a certain extent. Right now, price seems under pressure as demand is weak. As per the market sources, total stock at various ports is around 1.0 lakh MT. It may decrease below 1 LMT June.

Global Market Updates:

According to the sources, recent rains in major growing areas of North American have eased the worries regarding yields as it helped to enhance the much-needed moisture level for sowing. However, slow pace of

sowing has emerged as a cause of concern. As per the recent data, around 63% sowing has been observed till the week end 27th May, 2022 compared to 72% same period last year. This level is also lower from last five year average of 68%.

Statistics Canada's recent report reveals that Lentil stocks in all positions have also decreased by 34% to 949,000 tonne as of March 2022, from 1.43 million tonne last year. New figure is also below from past five-year average of 1.51 million tonne of all classes of lentils. However, there is no change in commercial inventories but stocks at farms gate have reduced to mere 770,000 tonne, down by 39% from 1.26 million tonne last year. Commercial inventories have been seen at 179,000 tonne.

Weekly Outlook: - Sideways movement is expected this week too.

Pulses-Wise Scenario:

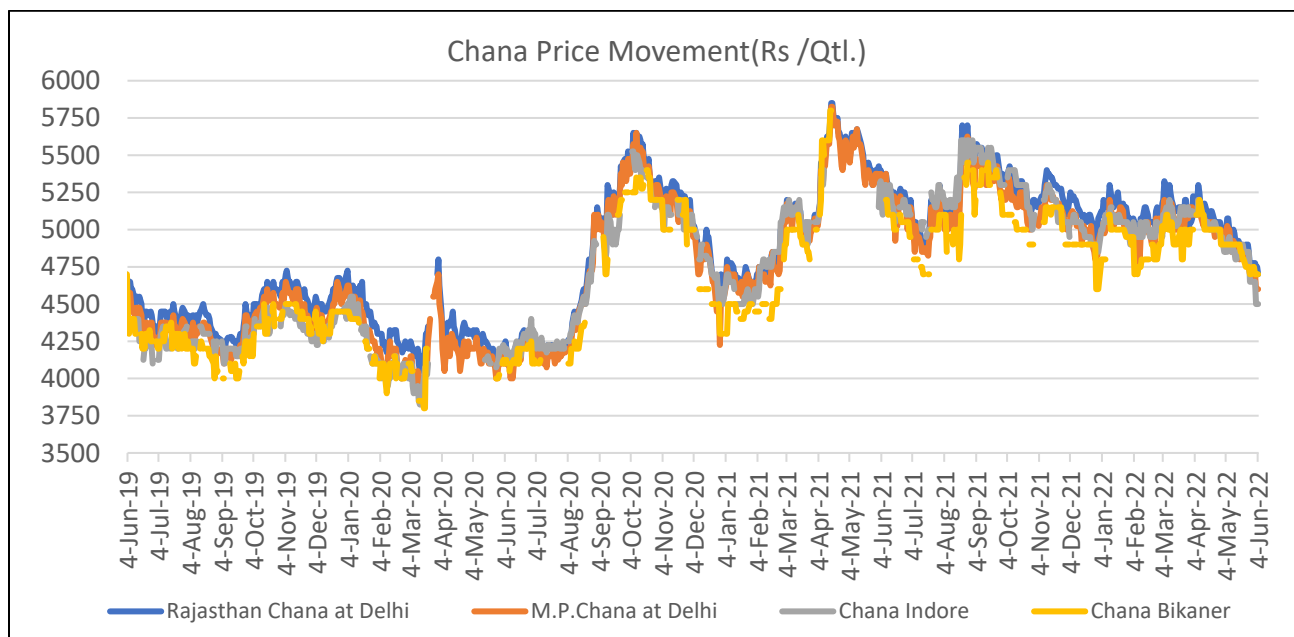

Chana

Current Scenario:

Chana cash market continued to trade down as the supply side has increased against the current weak demand despite the ongoing procurement drive at MSP. NAFED and other procurement agencies have already procured 23 LMT against the set target of 29 LMT for the year. As prices are ruling down from MSP, by Rs 500-550, the target is likely to be achieved as the procurement date in MP has been extended till June. Availability of old stocks, arrivals and weak demand for dal are keeping Chana markets under pressure. Peas (Matar):
Market Recap:

Pea physical market remained range bound and in Kanpur, Desi and White Pea prices traded at previous level of Rs 4450 per quintal and Rs 4350 per quintal respectively due to soft tone in Chana which decreased by 1% in various markets. Sluggish demand by stockists and miller are seen at present in Pea as consumption demand is being diverted to Chana owing to lower levels.

This week too, Pea market to trade range bound due to plenty of stocks and easy availability of Chana at lower prices.

Outlook for the week: Pea market may trade range bound following the Chana trend.

Green Gram (Moong):

Market Recap:

Moong cash market, as expected last week, decreased by 1.5 to 3% in various markets and traded in the range of Rs 5800-6800 last week. It may decrease further by Rs 200-300. New arrivals from the summer crop, ample stocks in Central Pool and weak demand helped market to trade low. Pressure on price may continue in coming weeks as arrivals from the summer crop has already started increasing in MP. Summer sowing is over now and is up by 16.60% to 19.15 lakh ha. so far. However, improvement in area may minimize the loss to some extent.
