Commodity-wise Domestic, International Prices and Arrivals at Different Centres

Pulses Sector- Domestic Highlights:

Pulses cash market traded firm during the week under review, taking cue from MSP hike and improving demand. All pulses traded up by 1.5 to 5.5%, on an average, in various markets. Arrivals from summer Moong is higher than normal, while the arrival of Tur and Chana has started decreasing. Stockists have restricted sales sensing improved inner tonne in the market. Urad and Lentil markets moved up by 2 to 3% & 1.5 to 4% respectively. As the prices are ruling below the MSP, Moong & Tur farmers may shift 5 to 8 % area to other lucrative crops like Maize and Cotton, as per the primary intentions expressed by farmers. Some farmers may shift pulses area to Paddy too if they receive good rainfall in the beginning stages of monsoon. Urad area may remain same as last year as the prices are ruling high. Firm momentum is unlikely to continue as the sale at the increased level might be seen.

Lentil moved up as prices of Kharif pulses moved up on reaction of MSP hike. It may decrease again Lentils availability in global market is bound to increase as crop condition in Canada is good so far while Australian farmers too may grow more Lentil due to lucrative price this year. The overall global availability of Lentil would increase by 9 to 10 lakh MT. Canada may harvest 25 lakh MT (last year 16.06 lakh MT) this year while Australian crop may be like last year at 6.5 to 7 lakh MT.

CiF quotes in Myanmar for Urad moved up by \$15 to \$885 for FAQ & while SQ inched up to \$985 during the week under review. Tur quotes stayed steady at 810 per MT. Moong stayed steady to \$910 despite the absence of Indian importers in Myanmar markets. Importers are active in Myanmar, but for a limited quantity. As the fresh buying volume is low from the Indian importers, CiF quotes may continue to hinge in limited range.

Summer sowing is over now. Farmers have covered 3.65 lakh ha under Urad as on 27th May-2022. It is up by 36% from the last year same time. The normal area under summer Urad is 3.86 lakh ha. Kharif farm preparation is on and farmers have covered 0.41 lakh ha area 27th June, down. The Summer Moong area ended up by 15.6% to 19.15 lakh ha against 16.57 lakh ha last year. Kharif Moong area recorded at 0.60 lakh ha down by 47.13 %

The recent hike in MSP by Rs 300 to 6600 for Urad and an increase of \$15 per MT in CiF quotes in Myanmar pushed up Urad price in domestic market by 2 to 3 percent last week. The normal demand and the news of monsoon delay too have helped market to recover. It traded up by Rs 200 at 6900-6925 in Chennai market. As monsoon is likely to revive soon, prices may decrease once again. Importers have restricted fresh deal on expectation of normal monsoon. If area decreases (likely) in Kharif season due to disturbance in weather pattern and rains, prices may move up more than our normal expectations. Old stocks in markets like Chennai and Mumbai are depleting fast. The stocks from imports have already been sold. Arrival from the new crop is over 2 to 3 months away. Under the prevailing market fundamentals, more increase may be seen if monsoon gets delayed by a week. Farmers may reduce area of Urad by 5-10 % in the Kharif season, as the relative return from Maize, Cotton and Paddy is higher.

The latest increase of MSP for Kharif Pulses and the upward momentum in other pulses have lent support to Tur market too to some extent. It traded up by 1 to 3%, on an average, last week. It may move up a little bit more and decrease as the conditions are conducive for monsoon revival and sowing activities are likely to pick up as normal. Despite an increase of Rs 300 to Rs 6600, farmers may prefer to reduce Tur area by 5 to 8 % this year. They

may prefer to sow more Cotton, Maize, Paddy and other lucrative crops in the kharif season. They may reduce area under Soybean, while area under Maize, Paddy and Cotton may increase by 10 to 15 %. Monsoon rains might be the crucial factor for sowing in states like Maharashtra, Madhya Pradesh and Karnataka. Right now, loss in sown areas seems very much on the card based on farmers pre-sowing intentions. Demand for dal is weak and is unlikely to improve suddenly amid the continuous supply from import and domestic sources. The stock of Tur is sufficient to cater the domestic needs. Tur is being traded at Rs 6200 to 6400. Prices may recover by Rs 100-150 by 3rd week of June, by then Monsoon rains in the growing region should start and define the future.

Taking cue from other pulses, Chana cash market traded firm by 1 to 2%, on an average, and may move up by Rs100 more this week as demand too remains supportive to the cash market fundamentals. Arrival in markets have started decreasing. Chana is being traded at Rs 4800. At the procurement front, NAFED and other procurement agencies have already procured 24 LMT against the set target of 29 LMT for the year. As prices are ruling down from MSP, by Rs 400-450, the target is likely to be achieved as the procurement date in MP has been extended till June. Availability of old stocks, arrivals and the normal demand for dal are restricting Chana markets. If the demand improves, likely from mid-June, prices may recover by Rs 100-200 and may move towards the 5000 mark. Beyond that level market may face resistance as there is ample old stocks and it will continue to enter-into markets. Chana in various market is trading at Rs 4600-4800. Chana imported from Tanzania is being offered at Rs4300-4350 in Mumbai. As quality of African origin Chana is not good, its demand is limited.

For Moong, MSP has been hiked by Rs 480 to Rs 7,755 per quintal from Rs 7,275 per quintal. It has given cash markets the much-needed support. Moong cash markets moved up by 3.5 to 4.5%, on an average last week despite weak demand and ample availability of stocks in Central Pool. Moong market is being traded at 6700-7200 in various markets and may move slightly up by Rs100-200 in coming week. As stock is higher, prices of Moong may decrease further. Farmers have already started Kharif sowing and have covered 0.60 Lakh ha, down by 47% as on 10th June-2022. Delayed monsoon and the low-price realization may encourage farmers to decrease Moong area by 8- 10% this year. The current firm momentum is unlikely to continue as the ample availability in the Central pool, increasing arrivals from the summer crop, free distribution of Moong in M.P. may pressurize Moong market by Rs 200-300 once again. The medium-term outlook would depend on Kharif area and rains frequency throughout the monsoon season. Prices of Moong may come down to Rs6000-6500 in the peak arrival season.

Masur markets cash market too traded firm, taking cue from other pulses and moved up by 1.5 to 3 % last week. It may move further up by Rs100-200 and should stabilize. The crop condition in Canada is good so far and the better prospects of Australian lentils this year, may restrict spikes in Lentil market. It traded up by 1.40% at Rs7250 in Mumbai market while increased by 2.18 % in Kanpur market to Rs 7025. It traded up by 3.17 % to 6300-6500 in Ashok Nagar. Any spike is unlikely in Masur market at this point of time. If Canadian crop continues to prosper well, prices may move in limited range despite the slow arrival pace. Canada and Australia quotes are steady at \$945-60 per MT. Canadian exporters may prefer to offload old stock before bumper crop hits the market. If prices of other pulses improve, Lentil too may improve to a certain extent. As per the market sources, total stock at various ports is around 0.90 lakh MT.

Global Market Updates:

- **Latest data by Australia Bureau of Statistics reveals that Chickpea export from Australia has increased** marginally to 31,499 MT, up by 3.67% in April from 30,383 MT previous month. However, total volume of export during the

Marketing Year has reduced by 38% to mere 3,50,951 MT compared to same period last year. Bangladesh emerged as a major buyer for Chickpea with buying 15,941 MT followed by Nepal (4,933 MT) and United Arab Emirates (2,418 MT).

- **As per the Canadian Grain Commission (CGC) recent report, Canada has exported around 1,23,300 MT** pea, down by 29.9% in April from 1,60,200 MT last month. Data is of only registered locations. It also indicated that Pea export touched the level of 10,44,600 MT during the current Marketing Year, down by 53.88% from 22,65,200 MT seen during the last Marketing Year. Pea export was 171,300 MT in same period previous year.
- **According to the Canadian Grain Commission (CGC) recent reports, Lentil export from Canada has increased to 60,700 tonne**, up by 99% in April from 30,500 tonne in previous month. Export figure is well higher than last year's same month export of 30,500 tonne. Thus, the export has touched at 5,05,500 tonne during the current Marketing Year, lower by 38% from 8,15,600 tonne same time last year.

Weekly Outlook: - Sideways movement is expected this week too.

Pulses-Wise Scenario:

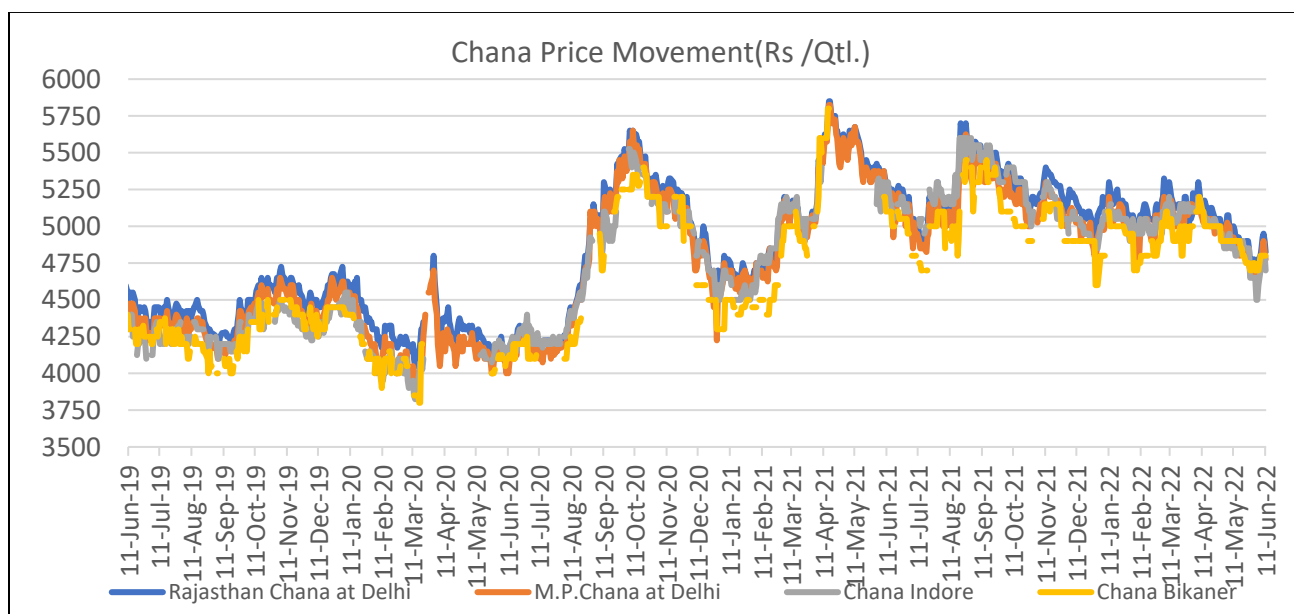

Chana

Current Scenario:

Taking cue from other pulses, Chana cash market traded firm by 1 to 2%, on an average, and may move up by Rs100 more this week as demand too remains supportive to the cash market fundamentals. Arrival in markets have started decreasing. Chana is being traded at Rs 4800. At the procurement front, NAFED and other procurement agencies have already procured 24 LMT against the set target of 29 LMT for the year. As prices are ruling down from MSP, by Rs 400-450, the target is likely to be achieved as the procurement date in MP has been extended till June. Peas (Matar):
Current Scenario:

Pea cash market also recovered during the week in review getting cues from firm trend in Chana market. In Kanpur, Desi and White Pea prices recovered by almost 8% to Rs 4800 per quintal and Rs 4700 per quintal respectively. Improved demand by stockists and miller witnessed on lower levels as Pas cash prices are reeling under lower tone since long.

Given the current market scenario, Pea market is likely to trade range bound on the back of plenty of stocks and easy availability of Chana.

Outlook for the week: Pea market may trade range bound following the Chana trend.

Green Gram (Moong):
Market Recap:

For Moong, MSP has been hiked by Rs 480 to Rs 7,755 per quintal from Rs 7,275 per quintal. It has given cash markets the much-needed support. Moong cash markets moved up by 3.5 to 4.5%, on an average last week despite weak demand and ample availability of stocks in Central Pool. Moong market is being traded at 6700-7200 in various markets and may move slightly up by Rs100-200 in coming week. As stock is higher, prices of Moong may decrease further. Farmers have already started Kharif sowing and have covered 0.60 Lakh ha, down by 47% as on 10th June-2022. Delayed monsoon and the low-price realization may encourage farmers to decrease Moong area by 8- 10% this year.
