Commodity-wise Domestic, International Prices and Arrivals at Different Centres

Pulses Sector- Domestic Highlights:

Pulses cash market traded mixed during the week under review except Urad which inched up by 2.5 to 4% in various markets on higher CiF quotes in Myanmar. Arrivals from summer Moong is higher than normal, while the arrival of Tur and Chana has started decreasing. Stockists have restricted sales sensing improved inner tonne in the market. There is an apprehension that farmers may reduce the Moong & Tur sowing acreage by 5 to 8 % to other lucrative crops like Maize and Cotton due to low returns. Some farmers may shift pulses area to Paddy too if they receive good rainfall in the beginning stages of monsoon. Urad area may remain same as last year as the prices are ruling high. Firm momentum may be capped on the normal advancement of monsoon and the increasing availability of green vegetables.

Lentil traded mixed in the range of INR 7000 to 7200 per quintal as the offtake from mills is limited while the stockists/traders have started to lighten their stocks burden. They are aware of the fact that crop conditions are good in Canada and the crop would be ready in August end. The sowing in Australia is about to start and the pre-sowing intension is good and farmers may use similar area as last year. Production might be 6.5 to 6.5 lakh Mt this year. Lentils availability in global market is bound to increase. The overall global availability of Lentil would increase by 10 to 11 lakh MT. Canada may harvest 25 lakh MT (last year 16.06 lakh MT) this year while Australian crop may be like last year at 6.5 to 7 lakh MT. Canadian Masur landed cost at Mumbai comes to Rs 7250. In dollar term it comes to 945 to 960 per MT. Market is expected to move range bound this week too.

CiF quotes in Myanmar for Urad moved up by \$25 to \$910 for FAQ & while SQ inched up to \$1000 during the week under review. Tur quotes also inched up by \$10 to \$810 per MT. Moong stayed steady to \$910 despite the absence of Indian importers in Myanmar markets. Importers are active in Myanmar, but for a limited quantity. As the fresh buying volume is low from the Indian importers, CiF quotes may continue to hinge in limited range.

Kharif Urad sowing continued to gain momentum in all States including Madhya Pradesh. Farmers have covered 0.529 lakh ha as on 17th June-2022. It is down by 28% from the same time last year. Farmers have covered 1.896 lakh ha under kharif Moong as on 17th June-2022, down by 6.88% from 2.036 lakh ha last year same time. Rajasthan is a major growing state, where sowing area was reported at 0.014 lakh ha. Other major producing States are Maharashtra, MP and Karnataka.

Kharif Tur sowing continued to gain momentum in all States including Maharashtra. Farmers have covered 1.059 lakh ha as on 17th June-2022. It is down by 8.55% from the same time last year. As the monsoon is progressing well, sowing activities too would increase in coming weeks.

This week too, Urad traded up by 2.50 to 4%, on an average, to INR 7200-7400 per quintal on increased buying interest and higher CiF quotes in Myanmar. CiF quotes in Myanmar for Urad moved up by \$25 to \$910 for FAQ & while SQ inched up to \$1000 during the week under review. Moreover, uncertainty over distribution of rains is also pushing up prices right now. As monsoon is likely to revive soon, prices may decrease once again. Importers have restricted fresh deal on expectation of normal monsoon and higher CiF quotes by Burmese traders. If area decreases (likely) in Kharif season due to disturbance in weather pattern and rains, prices may move up beyond our normal expectations. Old stocks in markets like Chennai and Mumbai have exhausted to some extent. The stocks from imports have already been sold. Arrival from the new crop is about 2 to 3 months away. Under the

prevailing market fundamentals, more increase may be seen if monsoon gets delayed by a week. Farmers may reduce area of Urad by 5-10 % in the Kharif season, as the relative return from Maize, Cotton and Paddy is higher.

Tur physical markets traded mixed in the range of INR 6050 to 6400 per quintal. In Indore market, prices traded up by 0.83% to INR 6050 per quintal while in Kadapa it remained slightly down by 1.60% at INR 6100 per quintal. Sentiment is bearish as the conditions are conducive for monsoon revival and sowing activities are likely to pick up. As per the preliminary intension, farmers may reduce Tur area by 5 to 8 % this year and they may attract towards Cotton, Maize, Paddy and other lucrative crops in the kharif season owing to lower realization in Tur. Right now, loss in sown areas seems very much on the card based on farmers pre-sowing intentions. Monsoon rains might be the crucial factor for sowing in states like Maharashtra, Madhya Pradesh and Karnataka. Demand for dal is weak and is unlikely to improve suddenly amid the continuous supply from import and domestic sources. The stock of Tur is sufficient to cater the domestic needs. Market may trade range bound this week too.

Taking cue from other pulses, Chana cash market too traded mixed in the range of INR 4600 to 4800 per quintal. In Delhi, Rajasthan origin Chana traded at INR 4800 per quintal, down by 0.50% while in Indore market, it traded at INR 4750 per quintal, up by 1%. Rabi crop arrivals in markets have started decreasing. At the procurement front, NAFED and other procurement agencies have already procured 25 LMT against the set target of 29 LMT for the year. As prices are ruling down from MSP, by Rs 400-450, the target is likely to be achieved as the procurement date in M.P. has been extended till June. Improvement in Chana price is likely to continue in coming weeks. As per the market sources, around to 30 to 40% stocks have been sold out at the low price while mills are active in Maharashtra and Madhya Pradesh. Chana price is likely to move up by 150-200 if buying activities by mills continues.

Moong too traded mixed in the range of INR 6700 to 7400 per quintal, up and down by 4 to 2.86%. In Jalgaon, it traded at INR 7400, up by 4% while in Jaipur, it traded down by 2.86% to at INR 6800 per quintal. Farmers have covered 1.896 lakh ha under kharif Moong as on 17th June-2022, down by 6.88% from 2.036 lakh ha last year same time. With the procurement target of 4,555 MT for Moong, Punjab Govt. has started the summer Moong procurement at the MSP of Rs 7,275 per quintal for the first time and 15th June, 2022 and it will continue till 90 days of the commencement of procurement. Higher summer Moong arrivals amidst weak demand, sufficient stocks in Central Pool and lower procurement target in Punjab may keep the moong slightly bearish as Moong production during this Summer is expected to increase to around 8 Lakh tonne, up by 3.5 Lakh tonnes from 4.5 to 5 Lakh tonne last year. Moreover, with the normalize monsoon showers, kharif sowing is set to pick up in coming days. The medium-term outlook would depend on Kharif area and rains frequency throughout the monsoon season. Prices of Moong may come down to Rs6000-6500 in the peak arrival season.

Thus, the export has touched at 5,05,500 tonne during the current Marketing Year, lower by 38% from 8,15,600 tonne same time last year.

Weekly Outlook: - Sideways movement is expected this week too.

Peas (Matar):

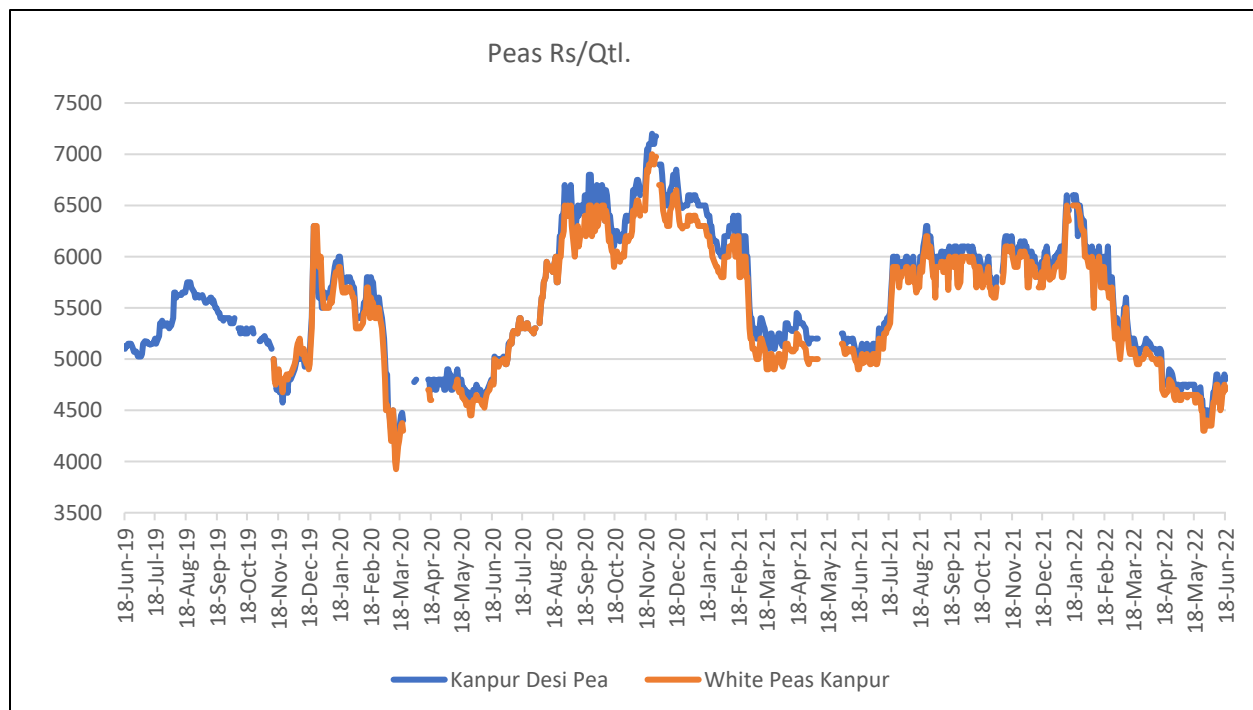

Current Scenario:
