Pulses Sector- Domestic Highlights:

Delayed monsoon rains in Kharif pulses growing regions have delayed sowing of Moong, Urad and Tur at least by 10 days. Area under major kharif pulses crops like Moong, Urad and Tur has decreased by 34, 52 and 55% respectively so far. Next 10 days are very crucial at sowing front. Rains are expected this week and it may push up sowing activities. July is very crucial and above normal rains are expected. There is a concern on Kharif pulses area this year and it may decline by 5 to 10% on an average. Decline in Moong and Urad area may be even higher as farmers may shift to Maize, Cotton and Paddy as the relative return is higher.

Farmers have covered 2.35 lakh ha under Tur against 5.20 lakh ha last year till last week. It is down by 55%. Similarly, Urad area coverage is down by 52% to 0.93 lakh ha against 1.94 lakh ha last year same time. At Moong sowing front, situation seems worry some as the farmers have covered only 3.38 lakh ha, down by 38 lakh ha against 5.12 lakh ha last year as on 24th June-2022. Farmers may cover the gap if volume and distribution of rains remain balanced in the major growing regions.

Cash Moong markets traded down by 1.5 to 3% last week and the pressure continues as the procurement is not taking place in M.P. In Punjab Moong procurement is on but with slow pace and only 3500 MT has been procured so far. MP govt. has requested Centre for granting permission for procurement of 4 lakh MT Moong against the early permission of 2.25 lakh MT. However, market is considering even this volume insufficient, given the summer crop size of the crop this year. Procurement in MP is expected from the first week of July. Price of Moong may recover by Rs 200-300 with the start of procurement in MP. Kharif area of Moong may decline by 10 to 15%, as farmers now prefer to grow more Moong in summer season. Moong is being traded between the range of Rs 6200-6800 in various market against MSP of Rs 7275 currently.

As expected, Urad cash markets continued to trade up due to restricted arrival from the Summer/Rabi crops, the slow pace of import, improved demand, tight supply side, almost nil stock in govt's hand and the fear of less area coverage in the Kharif season. Import in May decline to 20,400 MT and it may decline to 10,000 MT in June due to high price in Myanmar. Stocks at Chennai and Mumbai ports are at bottom level right now while the kharif crop would not hit the market before August end and Sep. So, the supply side would remain tight in July and August too. Area coverage too is down by 52%. So, prices of FAQ Urad in Mumbai and Chennai may increase from 7200 to 7600-7700 in end July-August. SQ may move up to 8400-8500 from 8000. The long-term future depends on sowing progress and volume of rains. The overall inner tone is strong.

Increasing fear of low area coverage, delayed monsoon rains, limited and restricted supply from stockists remain supportive to cash Tur market. Farmers may prefer to grow other lucrative crops like Maize, Cotton, Soybean and Paddy. Farmers in Maharashtra may increase area under Soybean and Cotton at the cost of Tur. In Karnataka, they may prefer to grow more Maize, Cotton and Sunflower at the cost of Tur. Even farmers may shift some Tur area to other crops as the volume of rains is low so far in Gujarat and Uttar Pradesh. Under the prevailing conditions Tur may trade up by Rs 200-300 July-August. Tur from Africa is expected not before September while there is no parity from Myanmar right now. Myanmar is offering Tur at \$820 per MT. Tur in various market is being traded at 6200-6600 per qtl. The long-term future trend of price would depend on rains in July and % usage of highbred seed, that can minimize the expected loss.

Chana cash market traded flat at the previous week's level despite firm tone in other pulses. Ample availability of old stock in private as well as govt.'s hand, weak demand and the fear of sale from Central Pool at market price are restricting market to move up. Mills have restricted buying as demand from retail market is weak. Demand for Besan too is not improving. Higher rains in July and August too may pressurize stockists to release stock as the high moisture level affects quality of Chana. So, range bound movement is expected in Chana market. If other Pulses continues to move up, Chana too may move up by 100-200. Chana is being traded at 4700-4850. Imported (Tanzania) Chana in Mumbai market is being sold at 4300-4350. Supply side seems comfortable throughout the year.

Taking cue from other pulses, Lentil cash market too improved by 0.70 to 1.60% on an average in various markets except Kanpur where it declined by 0.36 % to 7000. It is being traded at 7000-7100. It may move further up by Rs 200, if demand improves. Farmers are selling crop. Once the pressure comes down, recovery in market is expected. Stocks have come down below 1 lakh MT at various ports. However, quotes in the international market is steady at \$945-960 per MT, basis Indian ports. New crop condition in Canada is good so far and it may harvest 25 lakh MT this year given to normal weather conditions. Australian farmers too may maintain similar area as last year. So, availability of Masur is bound to increase from August onward. The new Canadian crop may hit Indian market by end Sep-Oct. So, the short- and medium-term outlook seems firm while long term outlook is weak. The overall global availability of Lentil would increase by 10 to 11 lakh MT. Australian crop may be like last year at 6.5 to 7 lakh MT. Canadian Masur landed cost at Mumbai comes to Rs 7250. In dollar term it comes to \$945 to 960 per MT. Market is expected to move range bound this week in the absence of any strong clue.

CiF quotes in Myanmar for Urad quoted at \$945 for FAQ & and \$1045 for SQ during the week under review. However, Tur quotes stayed steady at \$820 per MT. Moong stayed steady to \$910 despite the absence of Indian importers in Myanmar markets.

Global Market Updates:

- **According to the recent report by Australian Bureau of Agricultural and Resource Economics and Sciences (ABARES), Chickpea production in Australia is expected to decrease to 6.06 lakh tonne, down by around 4.6% in 2022-23 from 10.62 lakh tonne last Year. Reason for this decline in production is mainly attributed to fall in sowing area to only 4,43,000 hectare, down by 28% from 616,000 hectares.**
- **Australian Bureau of Agricultural and Resource Economics and Sciences (ABARES) recent report reveals that Pea production in Australia is expected to decrease to 2.38 lakh tonne, down by around 0.23% in 2022-23 from 2.38 lakh tonne last Year. Fall in yield is the main cause behind lower output estimate. However, Pea sowing area has increased to 2.05 lakh hectare, up by 6.7% from 1.92 lakh hectare.**
- **Australian Bureau of Agricultural and Resource Economics and Sciences (ABARES) recent report reveals that Australia is expected to witness slightly lower Lentil production to 7.88 lakh tonne, down by 0.51% in 2022-23 from 8.39 lakh tonne last year. Even though, sowing acreage has increased for Lentil here to 5.46 lakh hectare, up by % from 4.95 lakh hectare, but production is likely to remain slightly short due to fall in yield.**

Weekly Outlook: - Mixed movement is expected this week.

Cash Moong markets traded down by 1.5 to 3% last week and the pressure continues as the procurement is not taking place in M.P. In Punjab Moong procurement is on but with slow pace and only 3500 MT has been procured so far.
