Pulses Sector- Domestic Highlights:

With the revival of the monsoon across India, sowing activities have gained momentum and recovered significantly during the past week. In the given context, Kharif Urad sowing continued to gain momentum in all States including Madhya Pradesh. Farmers have covered 3.455 lakh ha under Urad, down by mere 9% from 3.793 lakh hectare as on 1st July, 2022. However, AgriWatch expects that farmers may reduce Urad sowing area by 5 to 8 % and may shift toward more lucrative crops like Maize, Cotton and Soybean as realization from Urad is lower than these crops.

As per official data, farmers have covered 10.765 lakh ha under kharif Moong as on 1st July, 2022, up by around 32% from 8.167 lakh ha same time last year. Rajasthan is a major growing state, where sowing area was reported at 6.234 lakh ha followed by Karnataka at 3.02 lakh hectare. Other major producing States are Maharashtra, MP.

With the recent showers in main Tur producing belts including Karnataka and Maharashtra, Kharif Tur sowing activities have also gained in all States. Farmers have covered 10.574 lakh ha as on 1st July, 2022. It is down by only around 14% from 12.266 lakh hectare same time last year. Other major growing States are MP, UP and Telangana. In Karnataka, Tur has been sown in 3.62 lakh hectare while in Maharashtra it has been sown at 4.72 lakh hectare.

Except Jaipur where prices inched up by 1.52%, all other cash Moong markets traded down by 1.5 to 6% last week as market is still waiting for procurement in MP. MP govt. has requested the Central Govt. for granting permit to procure 4 lakh MT Moong against the early permission of 2.25 lakh MT. Procurement process in MP is expected from the first week of July. On the other hand, in Punjab Moong procurement is on but with slow pace and only 4000 MT has been procured so far. Price of Moong may recover by Rs 200-300 with the start of procurement in MP. As per AgriWatch preliminary estimate, Moong Kharif area is expected to decline by 10 to 15%, as farmers have hinted that they may shift towards more profitable crops than Moong this Kharif season. Moong is being traded at Rs 6100-7000 in various market against MSP of Rs 7275 for the ongoing season.

This week too, Urad physical market traded firm on reports of lower stocks with private trades as well as Govt. agencies. Apart from it, increased quotes in Myanmar have lent support to cash market. Also, restricted arrival from the Summer/Rabi crops, the slow pace of import due to continuous depreciation in the value of Rs against Dollar & increased quotes for import, improved demand, tight supply and the fear of decline in kharif sowing area in the Kharif season have helped to push up market. Import in May declined to 20,400 MT and it may further decline to 10,000 MT in June due to high price in Myanmar. Stocks at Chennai and Mumbai ports are at bottom level right now while the kharif crop would not hit the market before August end and Sep. So, the supply side would remain tight in July and August too. With the revival of monsoon activities and rains, area coverage has improved and the difference for sowing activities have now reduce to only 9%. However, prices of FAQ Urad in Mumbai and Chennai are expected to improve to Rs 7600-7700 in end July-August. SQ may move up to Rs 8400-8500. The long-term outlook depends on sowing progress and volume of rains. The overall inner tone is strong right now.

Increasing fear of low area coverage which is still lower by around 14%, limited and restricted supply from stockists remain supportive to cash Tur market. Tamil Nadu Civil Supplies Corporation has invited Online tender

for the purchase of 40,000 MT of Tur dal which may also be a supportive factor for the market. As per AW points of view, farmers may reduce the sowing area for Tur and may shift towards other lucrative crops like Maize, Cotton, Soybean and Paddy. Maharashtra farmers may incline towards Soybean and Cotton crop at the cost of Tur. In Karnataka, they may prefer to grow more Maize, Cotton and Sunflower at the cost of Tur. Even farmers may shift some Tur area to other crops as the volume of rains is low so far in Gujarat and Uttar Pradesh. Under the prevailing conditions Tur may trade up by 100-200 July-August. African origin Tur would be available from September onwards while there is no parity from Myanmar right now as Myanmar Tur is offering at \$870 per MT. Also, rapidly increasing difference between the value of Rs and Dollar is fuelling air to its prices. Tur in various market is being traded at 6200-6700 per qtl. The long- term future trend of price would depend on rains in July and % usage of highbred seed, that can minimize the expected loss.

Except Delhi, Chana cash market traded almost flat, where Chana prices improved by 0.52% to Rs 4850 per quintal during the previous week amidst easy availability of old stocks in private as well as govt.'s hand, weak demand and the fear of sale from Central Pool below the prevailing market price are restricting market to move up. Mills have restricted buying as demand from retail market is weak. Demand for Besan too is not improving. Higher rains in July and August too may pressurize stockists to release stock as the high moisture level affects quality of Chana. So, range bound movement is expected in Chana market this week too. If other Pulses continue to move up, Chana too may move up by 100-200. Chana is being traded at 4700-4850. Imported (Tanzania) Chana in Mumbai market is being sold at 4300-4350. Supply side seems comfortable for the whole year.

Taking cue from other pulses, Lentil cash market traded mixed. In Kanpur and Ashok Nagar markets, prices improved by 1 to 3.10 %, on an average, in various markets while in Mumbai and Raipur markets, it traded almost flat. It is being traded at 7100-7250. It may move further up by Rs200, if demand improves. Farmers are still selling crop. Once the pressure comes down, recovery in market is expected. Stocks have come down below 1 lakh MT at various ports. However, quotes in the international market is steady at \$945-960 per MT, basis Indian ports. New crop condition in Canada is good so far and it may harvest 25 lakh MT this year given to normal weather conditions. Australian farmers too may maintain similar area as last year. So, availability of Masur is bound to increase August onward. The new Canadian crop may hit Indian market by end Sep -Oct. So, the short to medium term outlook seems firm while long term outlook may depend on supply from Canada and Australia amid price level in the international market at that point of time. The overall global availability of Lentil would increase by 10 to 11 lakh MT. Australian crop may be like last year at 6.5 to 7 lakh MT. Canadian Masur landed cost at Mumbai comes to Rs 7250. In dollar term it comes to \$945 to 960 per MT. Market is expected to move range bound this week in the absence of any strong indication.

CiF quotes in Myanmar for Urad improved to \$975 for FAQ & and \$1085 for SQ during the week under review. Tur quotes too improved to \$870 per MT. Burma Pedisheva Moong quoted at \$1050.

Global Market Updates:

According to the United States Department of Agriculture (USDA) recent report, as on 1st June, 2022, pulses crops including Lentil, Chickpea, Pea stock at various warehouses in US remained down in comparison to same period in 2021. while Lentil stock was 1.05 million cwt, down by 36% and all Chickpea stock was 1.99 million cwt, down by 11%. Under the Chickpea category large and small chickpea stocks were at 401 thousand and 1.59 million cwt, down by 35% and 1% respectively.

Weekly Outlook: - Mixed movement is expected this week too.

Mills have restricted buying as demand from retail market is weak. Demand for Besan too is not improving. Higher rains in July and August too may pressurize stockists to release stock as the high moisture level affects quality of Chana. So, range bound movement is expected in Chana market this week too.
