Pulses Sector- Domestic Highlights:

Even though, Urad area recovered smartly to 28 lakh ha. as on 29th July- 2022, conditions are not favorable due to excess rains in major growing states like Maharashtra, Madhya Pradesh and Rajasthan. States like UP and Bihar are still deficit and Paddy cultivation in these states are lagging behind. Area under pulses is normal in both the states, as it requires less water. However, sowing pace of Moong has slowed down and farmers have been able to cover 29.26 lakh Ha so far, despite a good start. Excess rains, water logging and the shortage of hybrid seed remain a cause of concern at this point of time. If the wet condition continues, it may reduce the crop size this year. Tur area coverage is running behind by 13.50% to 36.11 lakh Ha. Urad and Tur both the crops are facing tough time due to the wet conditions in major growing states like Karnataka and Maharashtra. If rains continue, quality of crop, plant growth and sowing are bound to be affected. Prevailing conditions may drive prices of Urad and Tur further up.

At sowing front, Kharif Pulses sowing continued to increase, despite the slow pace, in major states including Maharashtra, Karnataka, MP and Rajasthan. Farmers have covered 106.179 lakh ha as on 29th July, 2022. It is now down by around 5% from 103.231 lakh hectare same time last year. Under the Pulses, Urad acreage has reached at 28.007 Lakh ha, up only 0.23% from 27.944 lakh ha. same time last year while Moong acreage is pegged at 29.26 lakh ha., up by 15.68% from 25.293 lakh ha and Tur sowing is pegged at 36.111 lakh ha., down by 13.51% from 41.751 lakh ha. as on aforesaid date.

Despite the fact that **Lemon Tur CiF Quotes** moved down by 7% to \$835 per MT during the week under review, Tur prices in domestic market traded up by 4 to 6%, on an average. The low area coverage, bad weather conditions and restricted sales by stockists are pushing price up. Weather conditions in Aug, import volume from African countries and stockists' release mechanism would remain major price driving forces in Aug-Sep. The overall sentiment remains firm. New crop from African countries would not be available before Sep. Area is already down by 13.5% so far.

Burma Urad quotes increased by \$20 to \$970 and \$1095 per MT for FAQ and SQ variety respectively on reports of crop loss in major producing state of Maharashtra and minor losses in parts of Gujarat and Madhya Pradesh. Apart from it, lower import volume from Myanmar is lending support to Urad cash market. Import volume from Myanmar is expected to increase to 30,000 tonne in August as traders have already completed the process to enroll themselves as exporter. It traded up by 3 to 4% to INR 7500 in Mumbai and INR 7750 Chennai respectively. Sentiment remains firm right now. Prices may move further up by INR 300, if loss from rains increases.

Cash Moong market continues to reel under pressure on ample availability of old stock, bumper production in summer season (8.5 lakh MT) and the need-based buying by mills. The higher area coverage in the ongoing Kharif season may continue to put a cap on price rise. Private trades are not buying Moong in bulk quantity as they are well aware of the hefty govt.'s stocks. Some support at the current price might be seen if procurement agencies speed up procurement drive in M.P. Procurement target has been fixed at 2.5 lakh MT in M.P. But it is considered low in comparison to summer production. The overall supply side is comfortable. If rains continue in August like the 2nd half of July in major growing states, especially Rajasthan, Maharashtra & Karnataka, it may affect not only the crop size but also quality and market sentiments. August would be very crucial for all Kharif Pulses. Moong is being traded in the range of INR 6400-7000 in various market. Steady to slightly weak tone may prevail this week.

Chana cash markets continue to move in limited range of 4800-4950. Good production size, over 25 LMT new stocks in Central Pool and weak demand in Monsoon season are capping market to move up. If demand improves, prices may move up to MSP level of INR 5230. Beyond that level, private stockists may start selling as they are

well aware of huge stock in Central Pool. AgriWatch expects stable market this week too. Supply size is likely to remain comfortable throughout the year. Demand for besan is yet to pick up while availability of green vegetables is increasing. If Tur and Urad prices continue to move up, demand for Chana dal may improve. Continuous sale by govt. from old stock and cheaper import would cap uptrend in Chana markets.

Lentil cash market traded down by 1 to 4.5%, on an average, during the week under review. It traded at INR 6850 in Mumbai and INR 7100 in Kanpur. Pressure on price might be seen as quotes in Canada have decreased to \$860-865 per MT. It may decline further by \$50 in August ahead of bumper crop (25 LMT) in Canada this year. Harvesting is expected from mid Aug-2022. Crop condition is good so far. On better crop prospects, stockists in local markets too have started releasing stocks at discounted price. Despite the low availability of stocks at ports, sentiment remains weak, as supply from the global market is bound to increase not only from Canada but also from Australia in coming months.

Australia can harvest 7.88 LMT in 2022-23 crop. It would be available for India in Dec. Apart from it, demand in domestic market is normal and farmers still have 20 % stocks. So, cash market may trade steady to slightly weak this week too. It may come down to INR 6700-6800 by end Aug.

Supply from the Black Sea Region is still uncertain due to Ukraine-Russia conflict.

Global Market Updates:

As per the ABARE forecast Chickpeas production in Australia in 2022-23 may decline to 6.06 LMT against last year's estimate of 10.62 LMT. This year area declined to 4.42 lakh ha against 6.16 lakh ha last year. Average of 5 years is 5.60 lakh ha. Weather conditions are congenial to Chickpeas crop so far. Area declined due to low price realization in the global market and no demand from India due to high tariff rate and good local production.

Lentils area is likely to increase by 10.22% to 5.46 lakh ha in Australia in 2022-23. As per the latest updates by ABARES production may decrease slightly to 7.88 LMT, down from 8.40 LMT last year. The reason for the low production is mainly attributed to low yield realization. However, it is higher than 5 years. average production of 6.09 LMT.

Weekly Outlook: - Slightly firm trend is expected this week.
