Pulses Sector- Domestic Highlights:

Heavy rains in South India, Karnataka, Maharashtra and other eastern states have not only started affecting the sowing activities but also the standing crop's health. Water logging, continuous rains and the excess moisture level in upper land remain a cause for concern. If rains continue for a week (likely), the growth of the standing pulses crops like Moong, Urad and Tur may be affected adversely and it may ultimately result into low yield. Urad and Tur area is already down by 6 and 10.42 % so far. Even Moong area may decline by 10 to 12 % from last year despite good start in the beginning. Weather conditions in Aug and Sep would be very crucial and the fate of kharif crop size would depend on it. The emerging conditions are not favorable for a good crop size and it may drive markets further up by 5 to 10 % in coming months.

The overall Kharif pulses sowing is down by 3% to 116.4 lakh ha as on 5th August-2022. It was 119.43 lakh ha last year same time. Farmers have covered 39.80 lakh ha under **Tur**, down by 10.42% from 44.44 lakh ha last year. The weather conditions in two major states-Karnataka and Maharashtra are not congenial to the standing crops. Tur area in Karnataka has recovered and almost matched to last year, it is still lagging in Maharashtra by 11.50%. At present weather in both the states, including South India, is not good and the concerns over the crop size have started surfacing its head once again. In Karnataka, districts like Gulbarga, Bidar, Bijapur, Raichur, Bagalkot Gadag and Koppal are receiving heavy rains. Here crop growth seems to be in danger now. Prices of Tur in domestic market have increased by 4 to 8%, on an average, during the week under review. It may move up by INR 200-300 more from the current level. Preliminary estimate shows that crop size may decrease to 35 to 37 LMT in 2022-23, if weather opens up and plant receives good sunshine. Local crop is being traded at INR 8000-8500 while lemon is being traded at INR 7500.

Report of crop loss for **Urad** crop is coming from Maharashtra, South Indian states and Madhya Pradesh. Farmers have covered 31.83 lakh ha so far, down by 6% from last year. As the sowing activities are almost halted due to rains, the % decrease may go up to 10%, as expected earlier by AgriWatch. Crop conditions are good so far in Madhya Pradesh, Rajasthan and Uttar Pradesh. But continuous rains have increased concerns in these states too. Reports of crop damage are coming from South India, Maharashtra and Gujarat. Given the prevailing weather conditions, the loss ratio is bound to increase and may push cash market up by INR 300-400 from the current level. Currently, Urad is being traded at INR 7600 in Chennai and Mumbai markets decision. Myanmar's latest decision of depreciating value of Kyat from 1850 to 2100 per Dollar has decreased the cost of import. But the impact would be negated by higher import demand from India soon.

The Central Bank of Myanmar's decision to revised down its reference exchange rate from 1,850 Kyat to 2,100 Kyat per Dollar impacted Urad and Tur quotes there also. Myanmar quotes decreased by \$20 to \$1065 per MT for SQ and by \$25 to \$935 per MT for FAQ and by \$20 to \$720 for Leman Tur. Market would adjust this change by the end of Aug.

Despite the good pace of sowing of Kharif **Moong** at the start of the season, growth margin of sowing activities has decreased considerably during last two-three weeks. In coming weeks, it may decrease further and may be less than 8 to 10% at the end of the sowing season. Farmers have covered around 31 lakh Ha area, up by only 2.5% from last year. Excessive rains have not only disturbed the sowing activities but also started decaying the root of plants where the fields are inundated. As the stocks of Moong in Central Pool is enough to meet the requirement, upside movement is unlikely to continue. Procurement of Moong in M.P. is on and some support is expected in local markets at current level. Moong production in Kharif season is expected to be in the range of 16 to 17 LMT as per the preliminary estimates. However, weather conditions in Rajasthan during Aug and Sep would be crucial for the Kharif crop size. Prices of Moong decreased by 4 to 6%, on an average, in local markets. Out of 31 Lakh Ha, Rajasthan has contributed 20.24 Lakh Ha, up by 12% from last year. The overall sentiments remain weak for the cash Moong markets.

Chana cash markets traded in limited range despite decreasing arrivals in major markets and expectation of higher demand in coming weeks. Ample availability (over 25 LMT) in Central Pool and selling by NAFED from Rabi 2020 & 2021 crop have put a cap on Chana cash market. It traded at INR 4600-4900 in various markets. As demand is likely to improve, recovery in market is expected. If demands improve, it may move towards MSP level. Govt.'s selling activities too would be a price driving factor. There is a common view in the markets that govt would not release new crop before Nov, as Chana sowing would start from mid-Oct and if prices remain below MSP, farmers may divert Chana area to other crops. So, some improvement is expected in Chana market in coming months.

Lentil cash market traded down by 1 to 2%, on an average, during the week under review. It traded at INR 6700 in Mumbai and INR 7025 in Kanpur. Pressure on price might be seen as quotes (FoB) in Canada have decreased to \$790 per MT. It may decline further by \$50 in end-August ahead of bumper crop (25 LMT) in Canada this year. Harvesting is expected from mid Aug-2022. Crop condition is good so far. On better crop prospects, stockists in local markets too have started releasing stocks at discounted price. Despite the low availability of stocks at ports, sentiment remains weak, as supply from the global market is bound to increase not only from Canada but also from Australia in coming months. Farmers in India too have 10 to 15% stocks, who may prefer to release before Rabi sowing, expected from mid-Oct. The overall tone remains weak.

Global Market Updates:

Australia can harvest 7.88 LMT in 2022-23 crop. It would be available for India in Dec. Apart from it, demand in domestic market is normal and farmers still have 20% stocks. So, cash market may trade steady to slightly weak this week too. It may come down to Rs 6700-6800 by end Aug.

Supply from the Black Sea Region is still uncertain due to Ukraine -Russia conflict.

Lentil Prices in Canada continued to soften as export volume declined in June as compare to May-2022. It exported 186376 MT in June, down by 25% to 248,547 MT in May-2022. Total export sales till June recorded at 14.85 LMT against 21.83 LMT last year till June-2021. Turkey brought 74000 MT while India purchased 39609 MT in June. UAE brought around 14500 MT.

Total export sales for the month reached 186,376 metric tons (MT), down 25% from the previous month's total of 248,547. So far movement has reached 1,485,608 MT, down from 2,183,398 during the last marketing year.

Weekly Outlook: - Mixed trend is expected this week.

Pulses-Wise Scenario:

Chana

Current Scenario:

Chana cash markets traded in limited range despite decreasing arrivals in major markets and expectation of higher demand in coming weeks. Ample availability (over 25 LMT) in Central Pool and selling by NAFED from Rabi 2020 & 2021 crop have put a cap on Chana cash market. It traded at INR 4600-4900 in various markets. As demand is likely to improve, recovery in market is expected. If demands improve, it may move towards MSP level. Govt.'s selling activities too would be a price driving factor.

There is a common view in the markets that govt would not release new crop before Nov, as Chana sowing would start from mid -Oct and if prices remain below MSP, farmers may divert Chana area to other crops. So, some improvement is expected in Chana market in coming months.

Outlook for the week: some improvement is expected in Chana in coming weeks.

Following graph illustrates Chana price movement in different markets:

Chana % Price Fluctuation Over Previous Week					
Markets	Today	Week Ago	Month Ago	Year Ago	% Ch. Over
	06.08.22	30.07.22	06.07.22	06.08.21	30.07.22
Delhi Chana(MP)	4950	4950	4875	5100	0.00
Bikaner Chana	4800	4800	4800	4850	0.00
Indore Chana	5050	4950	4800	5150	2.02
Tan.Chana	4700	4650	4550	4420	1.08
Price Projection For Bikaner During July-2022 (4500-4900)					

Peas (Matar):

Current Scenario:

Contrary to Chana, Pea prices moved up by 4% during the week under review on good stockists and millers' demand. Price may move in ranged in the wake of plenty of stocks of Chana with various agencies. In Kanpur, Desi and White Pea prices traded at INR 5000 and INR 4900 per quintal respectively.

Under the present scenario, market may move in range bound on the back of plenty of stocks and easy availability of Chana.

Outlook for the week: Pea market may move in ranged.

Following graph illustrates Pea price movement in different markets:

Yellow & White Peas % Price Fluctuation Over Previous Month					
Markets	Today	Week Ago	Month Ago	Year Ago	% Ch. Over MSP

Green Gram (Moong):

Market Recap:

Despite the good pace of sowing of Kharif **Moong** at the start of the season, growth margin of sowing activities has decreased considerably during last two-three weeks. In coming weeks, it may decrease further and may be less than 8 to 10% at the end of the sowing season. Farmers have covered around 31 lakh Ha area, up by only 2.5% from last year. Excessive rains have not only disturbed the sowing activities but also started decaying the root of plants where the fields are inundated. As the stocks of Moong in Central Pool is enough to meet the requirement, upside movement is unlikely to continue. Procurement of Moong in M.P. is on and some support is expected in local markets at current level. Moong production in Kharif season is expected to be in the range of 16 to 17 LMT as per the preliminary estimates. However, weather conditions in Rajasthan during Aug and Sep would be crucial for the Kharif crop size. Prices of Moong decreased by 4 to 6%, on an average, in local markets. Out of 31 Lakh Ha, Rajasthan has contributed 20.24 Lakh Ha, up by 12% from last year. The overall sentiments remain weak for the cash Moong markets.

Outlook for the week: Market sentiments may remain weak.

Following graph illustrates Pea price movement in different markets:
