Commodity-wise Domestic, International Prices and Arrivals at Different Centres

Pulses Sector- Domestic Highlights:

Arrivals from Kharif Moong and Urad crops started in Solapur district of Maharashtra. The pressure of new arrivals may be felt from the first week of Sep. There is a report of crop and quality loss from Maharashtra, Karnataka and South India. Crop condition is normal to good in Madhya Pradesh, Rajasthan and Gujarat so far. This year excess rains in West and South India and deficient rains in Bihar, Uttar Pradesh, West Bengal, Chhattisgarh and Odisha have increased fear of low production prospects. The low area coverage, abnormal weather conditions have started signaling tight supply side, especially for Tur and Urad, next year. Tur & Urad outlook now depends on supply from Myanmar and South African countries. Chana, Moong and Lentil may trade in a limited range with slightly firm bias due to festive demand. Stocks availability in Central Pool is ample for Moong and Chana while for Lentil supply side seems comfortable this year in the global markets. So, spike in Chana, Moong and Lentil is unlikely at this point of time.

If rains continue for a week (likely), the growth of the standing pulses crops like Moong, Urad and Tur may be affected adversely and it may ultimately result into low yield. Urad and Tur area is already down by 6 and 10.67% so far and it may go up further. Even Moong area may decline by 10 to 12% from last year despite good start in the beginning. Weather conditions in Aug and Sep would be very crucial and the fate of kharif crop size would depend on it. The emerging conditions are not favorable for a good crop size.

The overall Kharif pulses sowing is down by 5.34 % to 125.56 lakh ha as on 19th August-2022. It was 132.64 lakh ha last year same time. Farmers have covered 43.37 lakh ha under **Tur**, down by 7.19% from 46.74 lakh ha last year. The weather conditions in two major states-Karnataka and Maharashtra are not congenial to the standing crops. It is down by 5.17% in Karnataka and down by 11.24% in Maharashtra. In Karnataka, districts like Gulbarga, Bidar, Bijapur, Raichur, Bagalkot Gadag and Koppal are receiving heavy rains. Here crop growth seems to be in danger and turning yellow. Stocks declaration order may have some cooling impact on price. If rains continue and area loss increases, more steps like stocks limit, release of Chana, Moong in bulk volume and efforts to increase Tur, Urad and Lentil import volume should be considered.

Prices of Tur in domestic market have decreased by 2.5 to 4.5%, on an average, during the week under review. It may move down further by INR100-200 more from the current level, if additional steps are taken. Import volume and price for African crop would be key to direct the price trend in coming weeks. This year crop size may decrease to 33-35 from 37 LMT in 2021-22. Weather condition is very crucial at this point of time. Local crop is being traded at INR 7500-8200. Lemon Tur in Mumbai is being traded at INR 7350. The short term outlook seems weak. From mid-Sep, we expect new shipment from African countries. Myanmar is offering Tur at \$ 960 per MT, basis Indian port.

Report of loss for **Urad** crop is coming from Maharashtra, South Indian states and Madhya Pradesh amid new arrivals in Solapur region. Farmers have covered 35.20 lakh ha so far, down by 5.11% from last year. As the sowing activities are almost halted due to rains, the % decrease may go up to 10%, as expected earlier by AgriWatch. Crop conditions are good so far in Madhya Pradesh, Rajasthan and Uttar Pradesh. But bad weather conditions have increased concerns in these states too. Reports of crop damage are coming from South India, Maharashtra and Gujarat. Given the prevailing weather conditions, the loss ratio is bound to increase and may push cash market up by INR 200-300 again despite the current declining trend. Currently, Urad is being traded at INR 7000 in Chennai and INR 7150 in Mumbai. Myanmar's latest decision of depreciating value of Kyat from 1850 to 2100 per Dollar has decreased the cost of import. But the impact would be negated by higher import demand from India soon. The volume of import needs to be monitored for August and September. Urad prices in local markets have decreased by 3 to 4.5%, on an average, and may decline further by INR 100-200 in coming weeks. August & Sep remain crucial for the price direction.

Despite the good pace of sowing of Kharif **Moong** at the start of the season, growth margin of sowing activities has decreased considerably during last two-three weeks. In coming weeks, it may decrease further and may be less than 8 to 10% at the end of the sowing season. Farmers have covered around 32.40 lakh Ha area, down by 4.60% from

last year. Excessive rains have not only disturbed the sowing activities but also started decaying the root of plants where the fields are inundated. As the stocks of Moong in Central Pool is enough to meet the requirement, upside movement is unlikely to continue. Moong production in Kharif season is expected to be in the range of 15 to 16 LMT as per the preliminary estimates. However, weather conditions in Rajasthan during Aug and Sep would be crucial for the Kharif crop size. Prices of Moong decreased by 1 to 4%, on an average, in local markets. Out of 32.40 Lakh Ha, Rajasthan has contributed 20.54 Lakh Ha, down by 1.47% from last year. The overall sentiments remain weak for the cash Moong markets. New arrival in Maharashtra may put further pressure on the cash Moong market.

Chana cash markets traded mixed despite decreasing arrivals in major markets and expectation of higher demand in coming weeks. Ample availability (over 25 LMT) in Central Pool and selling by NAFED from Rabi 2020 & 2021 crop have put a cap on Chana cash market. It traded at INR 4800-5000 in various markets. As demand is likely to improve, slight recovery in market is expected. If demands improve, it may move towards MSP level. Govt.'s selling activities too would be a price driving factor. There is a common view in the markets that govt would not release new crop before Nov in bulk volume, as Chana sowing would start from mid -Oct and if prices remain below MSP, farmers may divert Chana area to other lucrative crops. So, some improvement is expected in Chana market in coming months. If the govt. releases Chana in bulk volume to arrest price hike in Tur, Urad and Lentil, it may restrict the pace of firm momentum. Govt.'s decision remains a crucial factor for price direction for the Chana cash market. Availability is good, so spike in Chana market is unlikely at this point of time. There is a shortage of quality Chana in markets and mills may try to get Chana from Central Pool in the lean season.

Lentil cash market traded slightly up by 0.36 to 1%, on an average, during the week under review. It traded at Rs 6700 in Mumbai and Rs 7050 in Kanpur. Pressure on price might be seen as quotes (FoB) in Canada have decreased to \$755-60 per MT from \$770 per MT. It may decline further by \$30-35 in end-August ahead of bumper crop (25 LMT) in Canada this year. Harvesting has already started in Canada. Crop condition is good so far. On better crop prospects, stockists in local markets too have started releasing stocks at discounted price. Despite the low availability of stocks at ports, sentiment remains weak, as supply from the global market is bound to increase not only from Canada but also from Australia in coming months. Farmers in India too have 10 to 15% stocks, who may prefer to release before Rabi sowing, expected from mid-Oct. The overall tone remains weak.

Australia can harvest 7.88 LMT in 2022-23 crop. It would be available for India in Dec. Apart from it, demand in domestic market is normal and farmers still have 20% stocks. So, cash market may trade steady to slightly weak this week too. It may come down to INR 6500-6600 by end Aug.

Supply from the Black Sea Region is still uncertain due to Ukraine -Russia conflict.

Lentil Prices in Canada continued to soften as export volume declined in June as compare to May-2022. It exported 186376 MT in June, down by 25% to 248,547 MT in May-2022. Total export sales till June recorded at 14.85 LMT against 21.83 LMT last year till June-2021. Turkey brought 74000 MT while India purchased 39609 MT in June. UAE brought around 14500 MT.

Total export sales for the month reached 186,376 metric tons (MT), down 25% from the previous month's total of 248,547 MT. So far movement has reached 1,485,608 MT, down from 2,183,398 during the last Marketing Year.

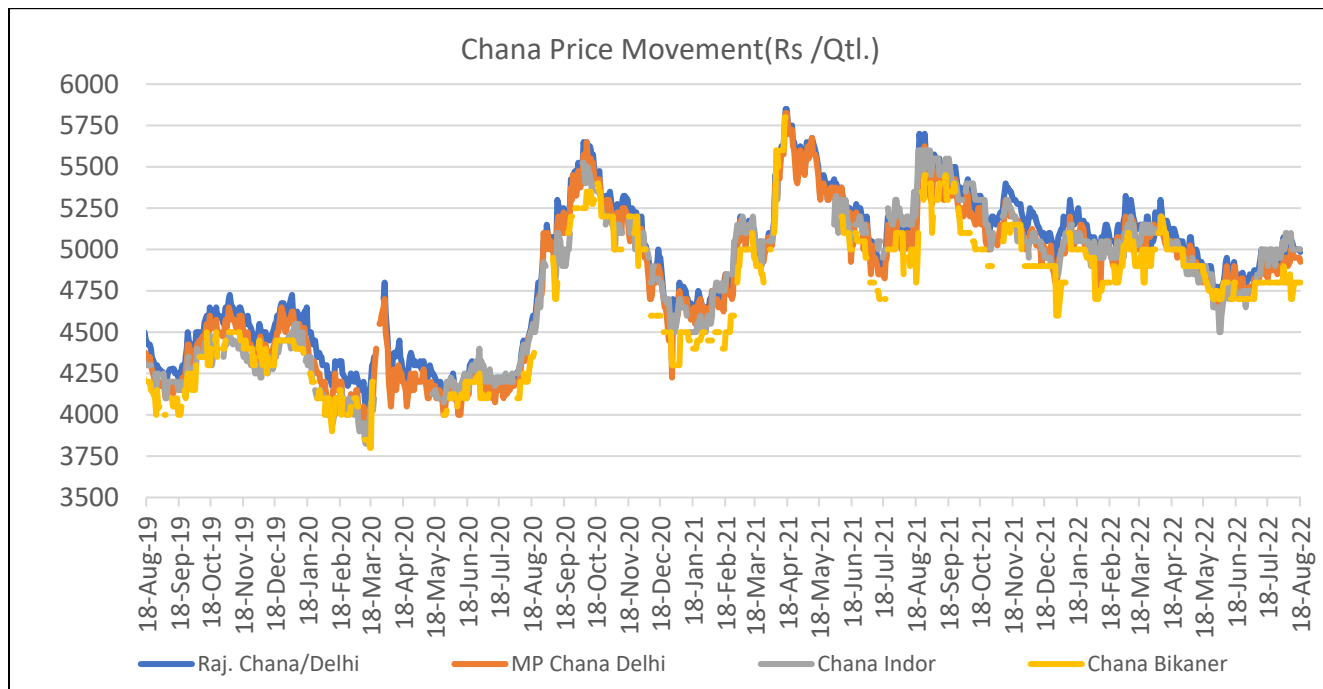

Weekly Outlook: - Slightly weak trend is expected this week.

Pulses-Wise Scenario:
Chana
Current Scenario:

Chana cash markets traded mixed despite decreasing arrivals in major markets and expectation of higher demand in coming weeks. Ample availability (over 25 LMT) in Central Pool and selling by NAFED from Rabi 2020 & 2021 crop have put a cap on Chana cash market. It traded at INR 4800-5000 in various markets. As demand is likely to improve, slight recovery in market is expected. If demands improve, it may move towards MSP level. Govt.'s selling activities too would be a price driving factor. There is a common view in the markets that govt would not release new crop before Nov in bulk volume, as Chana sowing would start from mid -Oct and if prices remain below MSP, farmers may divert Chana area to other lucrative crops. So, some improvement is expected in Chana market in coming months. If the govt. releases Chana in bulk volume to arrest price hike in Tur, Urad and Lentil, it may restrict the pace of firm momentum. Govt.'s decision remains a crucial factor for price direction for the Chana cash market. Availability is good, so spike in Chana market is unlikely at this point of time. There is a shortage of quality Chana in markets and mills may try to get Chana from Central Pool in the lean season.

Outlook for the week: some improvement is expected in Chana in coming weeks.

Following graph illustrates Chana price movement in different markets:

Chana Prices per Quintal					
Markets	Current	Week Ago	Month Ago	Year Ago	% Ch. Over
	18.08.22	11.08.22	18.07.22	18.08.21	11.08.22
Delhi Chana(Raj)	4985	5050	4925	5200	-1.29
Bikaner Chana	4800	4700	4800	5000	2.13
Indore Chana	5000	5000	5000	5200	0.00
Tan.Chana	4675	4600	4650	4700	1.63
Price Projection For Bikaner During July-2022 (4700-5100)					

Peas (Matar):

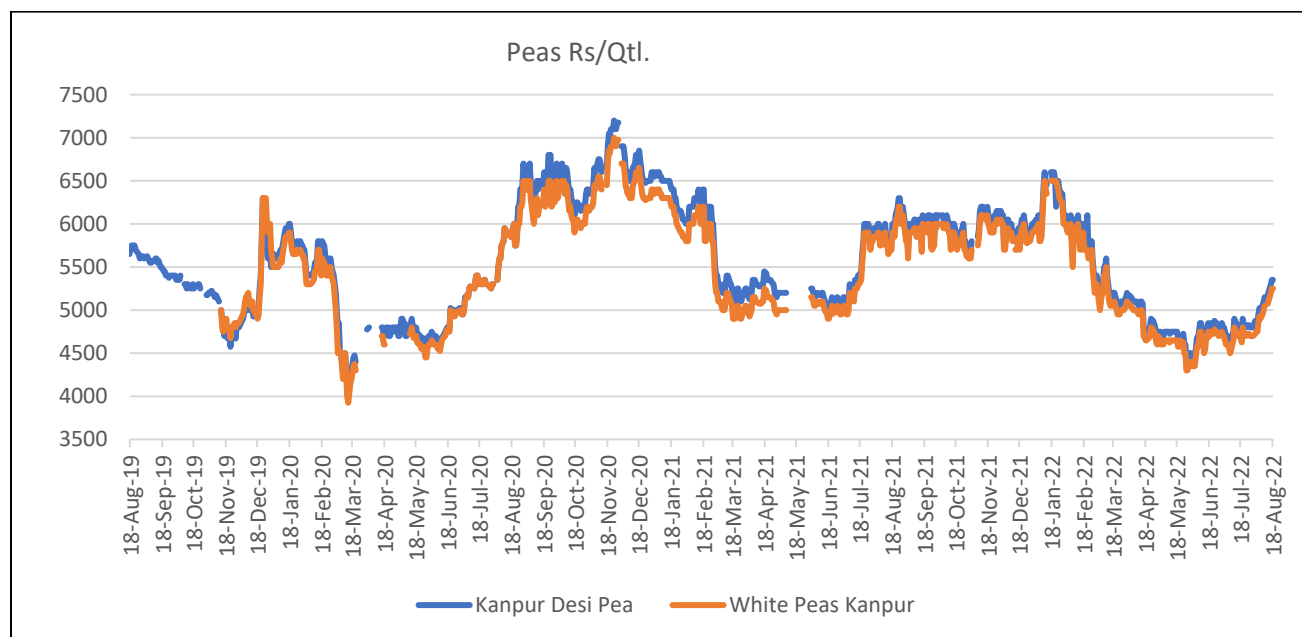

Current Scenario:

This week too, Pea moved upwardly by 4% on good stockists and millers' demand. In Kanpur, Desi and White Pea prices increased to INR 5350 and INR 5250 per quintal respectively. Tight supply side for quality produce at producing areas is supporting the sentiments as arrivals have reduced.

Market may move in a range on the back of recent hike in prices as demand would distract at higher levels. Moreover, plenty of Chana and Moong stocks would keep the sentiments under pressure.

Outlook for the week: Pea market may move in a range.

Following graph illustrates Pea price movement in different markets:

Yellow & White Peas % Price Fluctuation Over Previous Month					
Markets	Today	Week Ago	Month Ago	Year Ago	% Ch. Over
	18.08.22	11.08.22	18.07.22	18.08.21	11.08.22
Kanpur Desi Peas	5350	5150	4800	5850	3.88
Kanpur White Peas	5250	5050	4700	5750	3.96
Price Projection For Kanpur Desi During Aug-2022 (4900-5400)					

Lentils (Masoor):

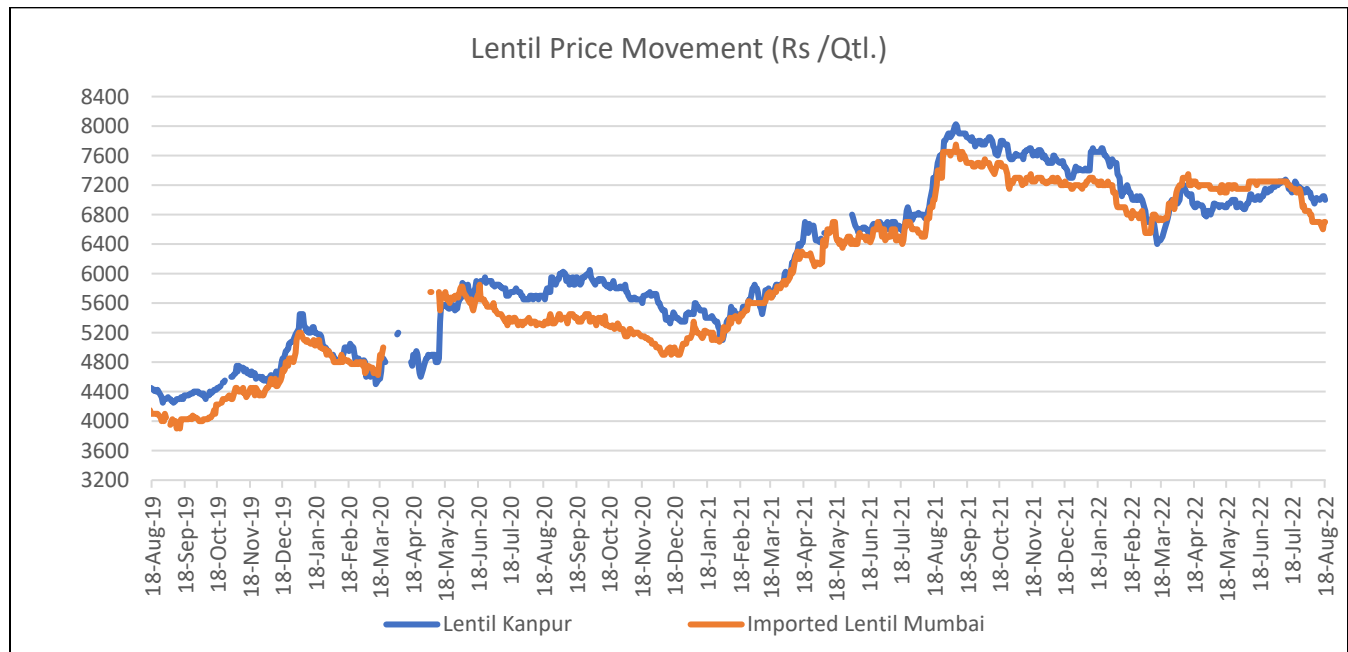

Market Recap:

Lentil cash market traded slightly up by 0.36 to 1%, on an average, during the week under review. It traded at Rs 6700 in Mumbai and Rs 7050 in Kanpur. Pressure on price might be seen as quotes (FoB) in Canada have decreased to \$755-60 per MT from \$770 per MT. It may decline further by \$30-35 in end-August ahead of bumper crop (25 LMT) in Canada this year. Harvesting has already started in Canada. Crop condition is good so far. On better crop

prospects, stockists in local markets too have started releasing stocks at discounted price. Despite the low availability of stocks at ports, sentiment remains weak, as supply from the global market is bound to increase not only from Canada but also from Australia in coming months. Farmers in India too have 10 to 15% stocks, who may prefer to release before Rabi sowing, expected from mid-Oct. The overall tone remains weak.

Market Outlook: Overall tone seems weak.

Following graph illustrates Lentil price movement in different markets:

Lentil Prices per Quintal					
Markets	Current	Week Ago	Month Ago	Year Ago	% Ch. Over
	18.08.22	11.08.22	18.07.22	18.08.21	11.08.22

Price Projection For Kanpur During Aug-2022 (6900-7500)					

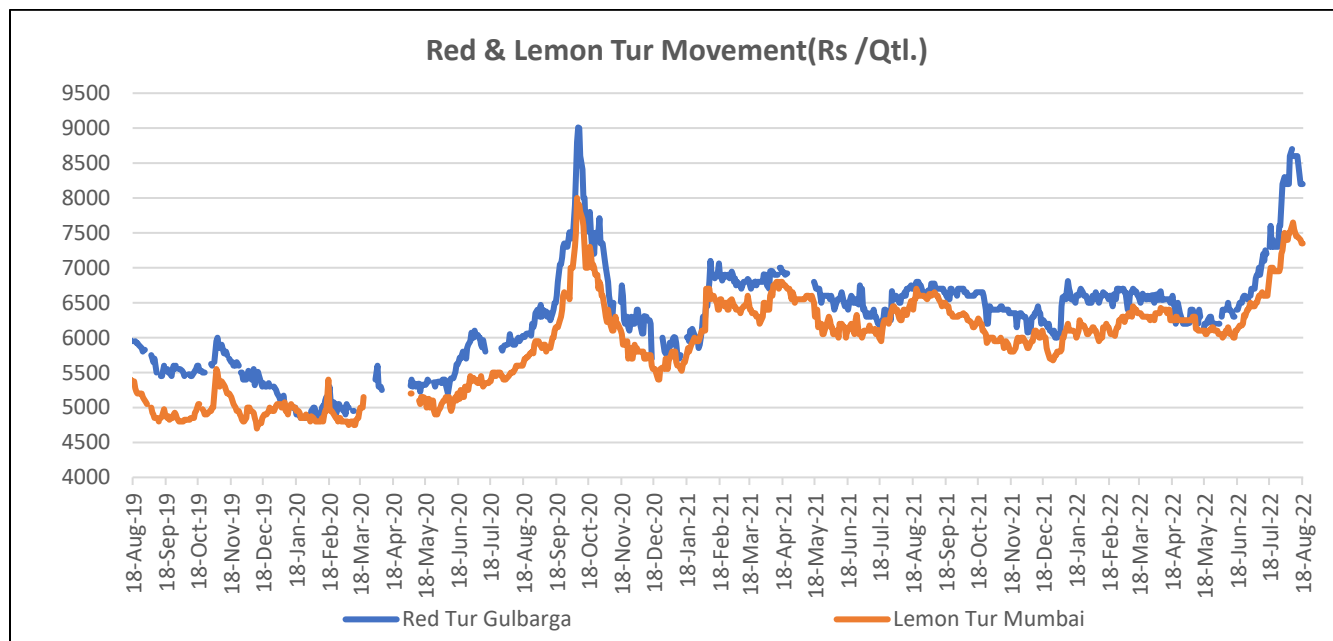

Pigeon Pea (Tur/Toor):

Market Recap:

Prices of Tur in domestic market have decreased by 2.5 to 4.5%, on an average, during the week under review. It may move down further by INR100-200 more from the current level, if additional steps are taken. Import volume and price for African crop would be key to direct the price trend in coming weeks. This year crop size may decrease to 33-35 from 37 LMT in 2021-22. Weather condition is very crucial at this point of time. Local crop is being traded at INR 7500-8200. Lemon Tur in Mumbai is being traded at INR 7350. The short term outlook seems weak. From mid-Sep, we expect new shipment from African countries. Myanmar is offering Tur at \$ 960 per MT, basis Indian port.

Outlook for the week: Prices may move down by INR 100-200 from current levels.

Following graph illustrates Tur price movement in different markets:

Tur % Price Fluctuation Over Previous Week					
Markets	Today	Week Ago	Month Ago	Year Ago	% Ch. Over

Green Gram (Moong): Market Recap:

Despite the good pace of sowing of Kharif **Moong** at the start of the season, growth margin of sowing activities has decreased considerably during last two-three weeks. In coming weeks, it may decrease further and may be less than 8 to 10% at the end of the sowing season. Farmers have covered around 32.40 lakh Ha area, down by 4.60% from last year. Excessive rains have not only disturbed the sowing activities but also started decaying the root of plants where the fields are inundated. As the stocks of Moong in Central Pool is enough to meet the requirement, upside movement is unlikely to continue. Moong production in Kharif season is expected to be in the range of 15 to 16 LMT as per the preliminary estimates. However, weather conditions in Rajasthan during Aug and Sep would be crucial for the Kharif crop size. Prices of Moong decreased by 1 to 4%, on an average, in local markets. Out of 32.40 Lakh Ha, Rajasthan has contributed 20.54 Lakh Ha, down by 1.47% from last year. The overall sentiments remain weak for the cash Moong markets. New arrival in Maharashtra may put further pressure on the cash Moong market.

Outlook for the week: new crop arrivals may put further pressure on the cash Moong market. Following graph illustrates Pea price movement in different markets:

Moong Prices per Quintal					
Markets	Current	Week Ago	Month Ago	Year Ago	% Ch. Over
