Commodity-wise Domestic, International Prices and Arrivals at Different Centres

Pulses Sector- Domestic Highlights:

New crops arrivals of Urad and Moong have started in Bagalkot and adjoining areas of Maharashtra along with Gadag area of Karnataka. These arrivals are fetching lower price by INR 200 to 300 per quintal due to higher moisture level of 17 to 20%. As per sources, heavy rains over M.P. recently in the key Pulses growing areas like Shivpuri, Ashok Nagar, Vidisha and Lalitpur in U.P. is likely to adversely affect the standing Urad and Moong crop which are into flowering to podding stage. Eastern Rajasthan has witnessed intense rainfall activity and districts like Kota, Bundi, Baran, Jhalawar etc. are badly affected due to such intense rains and flooding, consequently the pulses crop like Urad and Moong are likely to get affected in terms of both acreage and yield losses. The low area coverage, abnormal weather conditions have started signaling tight supply side, especially for Tur and Urad, next year.

Due to heavy rains and water logging in Maharashtra, Rajasthan and MP, Urad, Tur and Moong area is already down by 4.66%, 6.79% and 4.24% so far and it may remain down. Even Moong area may decline by 10 to 12% from last year despite good start in the beginning. Weather conditions in Aug and Sep would be very crucial and the fate of kharif crop size would depend on it. The emerging conditions are not favorable for a good crop size.

As per the sources, Tonk, Bundi, Baran and Jhalawad districts in Rajasthan have faced losses due to excess rains. Out of total 2.70 lakh ha. Kharif area for all the crops, Urad, Moong and other crops in around 75,000 ha. have suffered losses while loss % remains between 22 to 28% in Bundi, Baran and Jhalawad district due to water logging & floods after heavy rains.

The overall Kharif pulses sowing is down by 4.95% to 127.70 lakh ha as on 26th August-2022. It was 134.37 lakh ha last year same time. Farmers have covered 44 lakh ha under **Tur**, down by 6.79% from 47.21 lakh ha last year. Sowing coverage is lagging behind by 5.28% to 13.51 lakh ha. in Karnataka and down by 12.20% to 11.57 lakh ha. in Maharashtra. Traders are cautiously participating in trading after the stock declaration order as they fear that Govt. may take some more stringent steps to cool down the pulses rates.

On the behalf of Govt., NAFED will procure total 50,000 tonne imported Urad of 2022 year crop through tender to build up the Central Pool stock. Simultaneously, Chana sale at lower prices by NAFED in Southern state may also have some cooling effect on pulses including Chana. It had accepted the previous bid at INR 4,601 per quintal while new bid is of INR 4,400 per quintal.

This week too, prices of **Tur** in domestic market have decreased by 2.6 to 6.6%, on an average, during the week under review. It may move down slightly from the current level, if additional steps are taken by the Centre. Prices are reeling under pressure currently due to Govt.'s recent decision on stock declaration despite there are reports of crop loss due to water logging, lower coverage area etc. Import volume and price for African crop would be key to direct the price trend in coming weeks. This year crop size may decrease to 33-35 from 37 LMT in 2021-22. Weather condition is very crucial at this point of time. Local crop is being traded at Rs 7300-8000. Lemon Tur in Mumbai is being traded at Rs7250. The short-term outlook seems weak. Myanmar is offering Tur at \$923 per MT, basis Indian port.

Heavy rains over Shivpuri, Ashok Nagar, Vidisha in M.P. and Lalitpur in U.P. is likely to adversely affect the standing **Urad** crop which is into flowering to podding stage. Farmers have covered 36.14 lakh ha so far, down by 4.66% from last year as on 26th August. Bad weather conditions in M.P. and Rajasthan have increased concerns regarding crop loss. Given the prevailing weather conditions, the loss ratio is bound to increase and may push cash market up by Rs 200-300 again despite the current declining trend. Currently, Urad is being traded at Rs7150 in Chennai and Rs 7200 in Mumbai. Myanmar's latest decision of depreciating value of Kyat from 1850 to 2100 per Dollar has decreased the cost of import. Market prices are still feeling heat due to devaluation of Myanmar currency Kyat from 1850 to 2100 against Dollar. C&F quotes have fallen by around \$90-100 till date to \$873 per MT for Faq and \$995 per MT for Sq variety respectively. The volume of import needs to be monitored for August and September.

Urad prices in local markets have decreased by 0.69 to 1%, on an average, and may decline further by Rs100-200 in coming weeks. August & Sep remain crucial for the price direction.

Early sown Kharif **Moong** crop arrivals have started coming into Bagalkot, Solapur and adjoining areas of Maharashtra along with Gadag area of Karnataka which are fetching lower prices by Rs 200 to 300 per quintal due to presence of higher moisture content upto 17 to 18%. Arrival pressure will start to increase after 1st week of September month. Recent weather event over Rajasthan, may remain deleterious for the standing crop which are into flowering to early maturity stage as excess rains and water logging situation may negatively affect the final yield. Farmers have covered around 32.69 lakh ha area, down by 4.24 % from last year. Excessive rains have not only disturbed the sowing activities but also started decaying the root of plants where the fields are inundated. As the stocks of Moong in Central Pool is enough to meet the requirement, upside movement is unlikely to continue. Moong production in Kharif season is expected to be in the range of 15 to 16 LMT as per the preliminary estimates. However, weather conditions in Rajasthan during Aug and Sep would be crucial for the Kharif crop size. Prices of Moong decreased by 2 to 5%, on an average, in local markets. The overall sentiments remain weak for the cash Moong markets. New arrival in Maharashtra may put further pressure on the cash Moong market.

Chana cash markets traded weak by 1 to 2% despite decreasing arrivals in major markets and expectation of higher demand in coming weeks. Ample availability (over 25 LMT) in Central Pool and selling by NAFED from Rabi 2020 & 2021 crop have put a cap on Chana cash market. It traded at Rs4800-5000 in various markets. As demand is likely to improve, slight recovery in market is expected. If demands improve, it may move towards MSP level. Govt.'s selling activities too would be a price driving factor. There is a common view in the markets that govt would not release new crop before Nov in bulk volume, as Chana sowing would start from mid -Oct and if prices remain below MSP, farmers may divert Chana area to other lucrative crops. So, some improvement is expected in Chana market in coming months. If the govt. releases Chana in bulk volume to arrest price hike in Tur, Urad and Lentil, it may restrict the pace of firm momentum. Govt.'s decision remains a crucial factor for price direction for the Chana cash market. Availability is good, so spike in Chana market is unlikely at this point of time. There is a shortage of quality Chana in markets and mills may try to get Chana from Central Pool in the lean season.

Lentil cash market traded down by around 3.6 to 6%, on an average, during the week under review. It traded at Rs 6350 per quintal in Mumbai and Rs 6500 per quintal in Kanpur. Pressure on price might be seen as quotes (FoB) in Canada have decreased to \$750 per MT from \$755 per MT. It may decline further by \$25-30 in end-August ahead of bumper crop (25 LMT) in Canada this year. Good pace of harvesting in Canada amidst conducive weather is keeping global market sentiments under check. Around 10% harvesting has already done in Canada while crop size is likely to be at record 25 lakh tonne this year from 16 lakh tonne last year signaling for easy global supply. Australia too is expected to produce around 7.25 to 7.88 lakh tonne Lentil during year 2022-23. Thus, global market surplus is likely to remain around 9 to 10 lakh tonne after the considering higher crop size in both the countries. On better crop prospects, stockists in local markets too have started releasing stocks at discounted price. Despite the low availability of stocks at ports, sentiment remains weak, as supply from the global market is bound to increase not only from Canada but also from Australia in coming months. Farmers in India too have 10 to 15% stocks, who may prefer to release before Rabi sowing, expected from mid-Oct. The overall tone remains weak.

International Market:

As per the latest report issued by Australian Bureau of Statistics (ABS), the country exported 25,892 tonne Chickpea during June which is lower by 16% from May export. Pakistan emerged as the major importer with buying 10,349 tonne followed by Nepal (3,323 tonne) and Bangladesh (2,420 tonne). Export volume has improved from Canada after last year's drought which had badly impacted its volume.

As per the latest report issued by Australian Bureau of Statistics (ABS), the country exported 74,856 tonne Lentil during the June which is lower by 18% from May export. United Arab Emirates purchased major quantity (27,500 tonne) followed by Pakistan (9,571 tonne). Export volume has improved from Canada after last year's drought which had badly impacted its volume.

Weekly Outlook: - Mixed trend is expected this week.

Pulses-Wise Scenario:

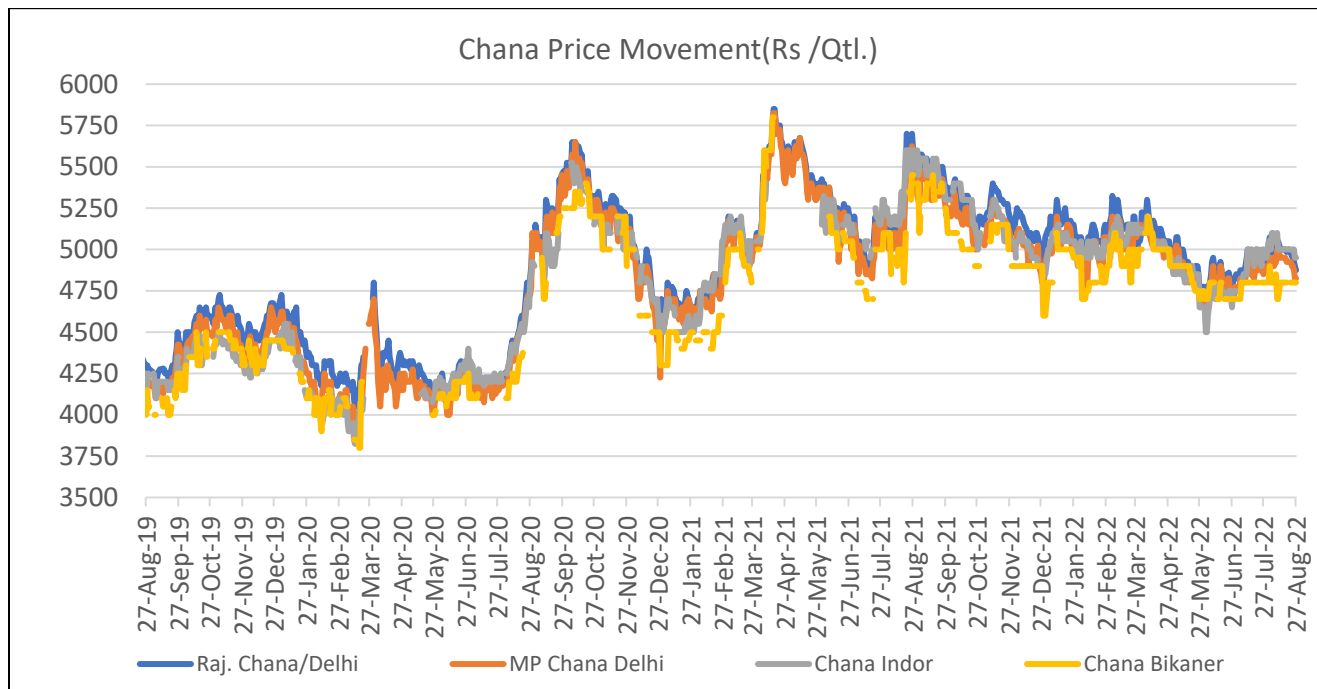

Chana

Current Scenario:

Chana cash markets traded weak by 1 to 2% despite decreasing arrivals in major markets and expectation of higher demand in coming weeks. Ample availability (over 25 LMT) in Central Pool and selling by NAFED from Rabi 2020 & 2021 crop have put a cap on Chana cash market. It traded at Rs 4800-5000 in various markets. As demand is likely to improve, slight recovery in market is expected. If demands improve, it may move towards MSP level. Govt.'s selling activities too would be a price driving factor. There is a common view in the markets that govt would not release new crop before Nov in bulk volume, as Chana sowing would start from mid-Oct and if prices remain below MSP, farmers may divert Chana area to other lucrative crops. So, some improvement is expected in Chana market in coming months. If the govt. releases Chana in bulk volume to arrest price hike in Tur, Urad and Lentil, it may restrict the pace of firm momentum. Govt.'s decision remains a crucial factor for price direction for the Chana cash market. Availability is good, so spike in Chana market is unlikely at this point of time. There is a shortage of quality Chana in markets and mills may try to get Chana from Central Pool in the lean season.

Outlook for the week: Any spike in prices is unlikely at present.

Following graph illustrates Chana price movement in different markets:

Chana Prices per Quintal					
Markets	Current	Week Ago	Month Ago	Year Ago	% Ch. Over
	27.08.22	20.08.22	27.07.22	27.08.21	20.08.22
Delhi Chana(Raj)	4875	5000	4950	5600	-2.50
Bikaner Chana	4800	4800	4800	5450	0.00
Indore Chana	4950	5000	5000	5600	-1.00
Tan.Chana	4550	4675	4625	4920	-2.67
Price Projection For Bikaner During July-2022 (4700-5100)					

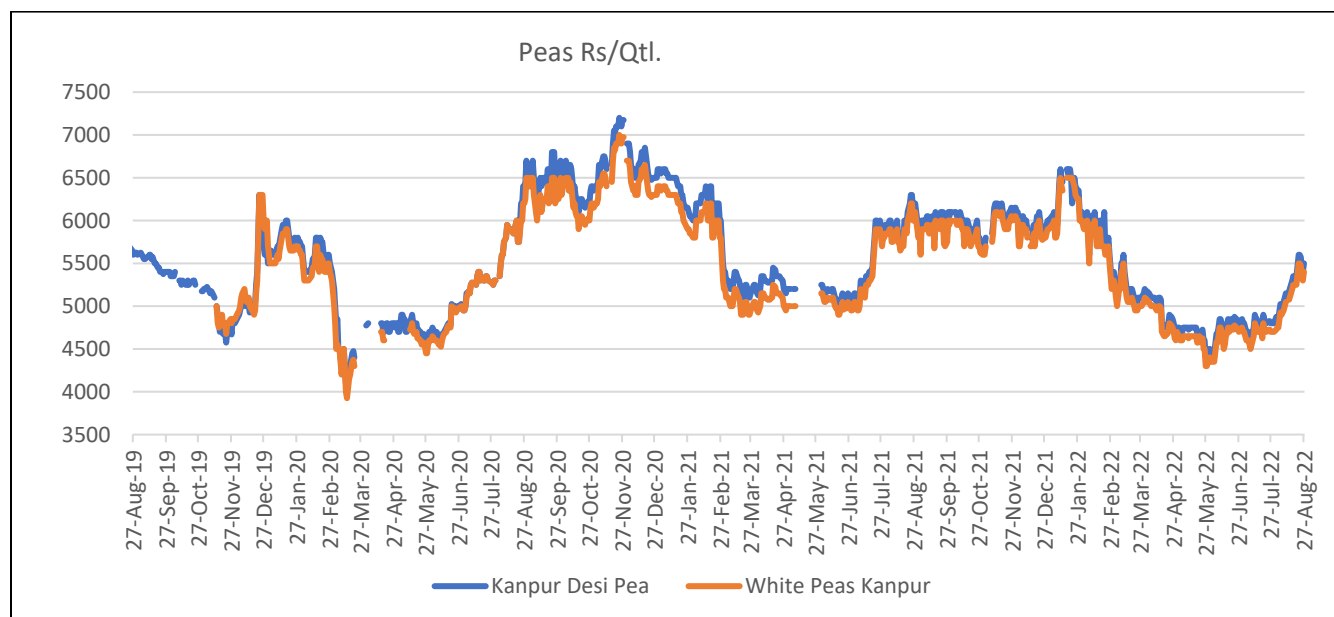

Peas (Matar):

Current Scenario:

Pea traded up by 4% during the week under review on festivity demand from millers as well as stockists amidst tight supply of quality produce. NAFED's bulk Chana selling at lower price may negatively affect the Pea physical market sentiments too and prices may decrease from the current levels. Pea market is likely to trade in a range at present as prices have increased much in recent past. In Kanpur, Desi and White Pea prices traded at INR 5,350 and INR 5,250 per quintal respectively.

Outlook for the week: Pea market may move in a range.

Following graph illustrates Pea price movement in different markets:

Yellow & White Peas % Price Fluctuation Over Previous Month					
Markets	Today	Week Ago	Month Ago	Year Ago	% Ch. Over
	27.08.22	20.08.22	27.07.22	27.08.21	20.08.22
Kanpur Desi Peas	5350	5150	4800	5850	3.88
Kanpur White Peas	5250	5050	4700	5750	3.96
Price Projection For Kanpur Desi During Aug-2022 (4900-5400)					

Lentils (Masoor):

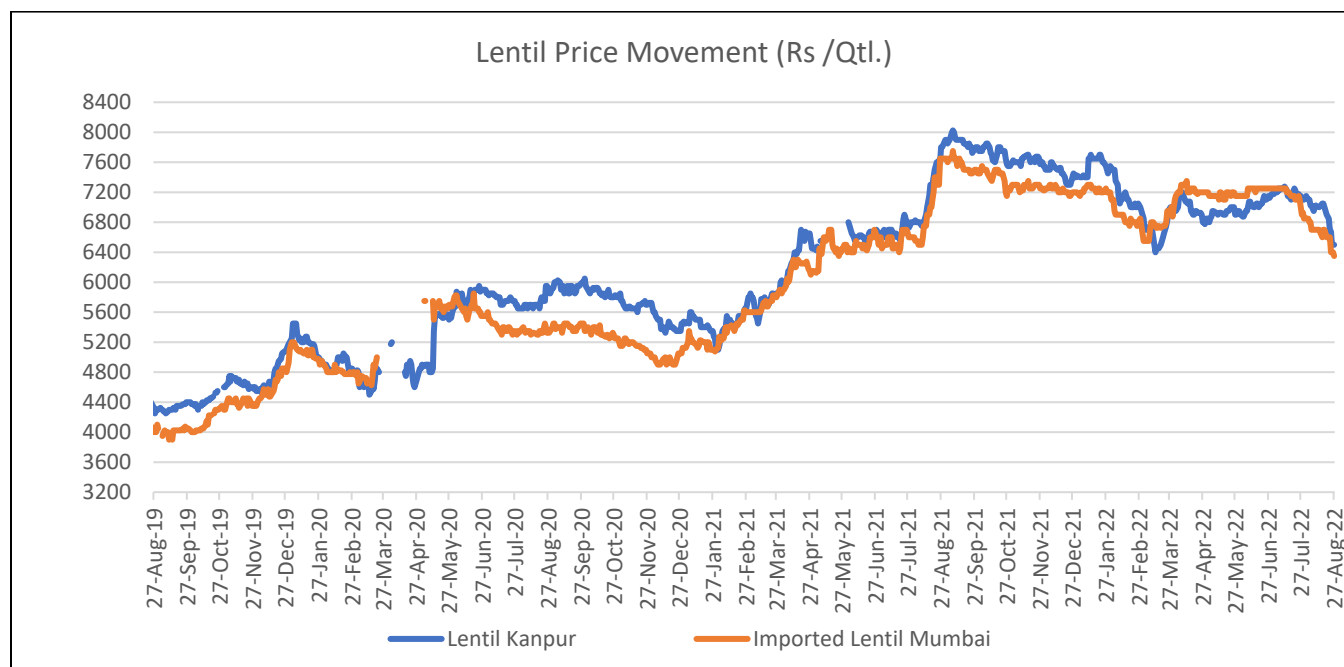

Market Recap:

Lentil cash market traded down by around 3.6 to 6%, on an average, during the week under review. It traded at Rs 6350 per quintal in Mumbai and Rs 6500 per quintal in Kanpur. Pressure on price might be seen as quotes (FoB) in Canada have decreased to \$750 per MT from \$755 per MT. It may decline further by \$25-30 in end-August ahead of bumper crop (25 LMT) in Canada this year. Good pace of harvesting in Canada amidst conducive weather is keeping global market sentiments under check. Around 10% harvesting has already done in Canada while crop size

is likely to be a at record 25 lakh tonne this year from 16 lakh tonne last year signaling for easy global supply. Australia too is expected to produce around 7.25 to 7.88 lakh tonne Lentil during year 2022-23. Thus, global market surplus is likely to remain around 9 to 10 lakh tonne after the considering higher crop size in both the countries. On better crop prospects, stockists in local markets too have started releasing stocks at discounted price. Despite the low availability of stocks at ports, sentiment remains weak, as supply from the global market is bound to increase not only from Canada but also from Australia in coming months. Farmers in India too have 10 to 15% stocks, who may prefer to release before Rabi sowing, expected from mid-Oct. The overall tone remains weak.

Market Outlook: Overall tone seems weak.

Following graph illustrates Lentil price movement in different markets:

Lentil Prices per Quintal					
Markets	Current	Week Ago	Month Ago	Year Ago	% Ch. Over
	27.08.22	20.08.22	27.07.22	27.08.21	20.08.22

Price Projection For Kanpur During Aug-2022 (6400-7500)					

Pigeon Pea (Tur/Toor):

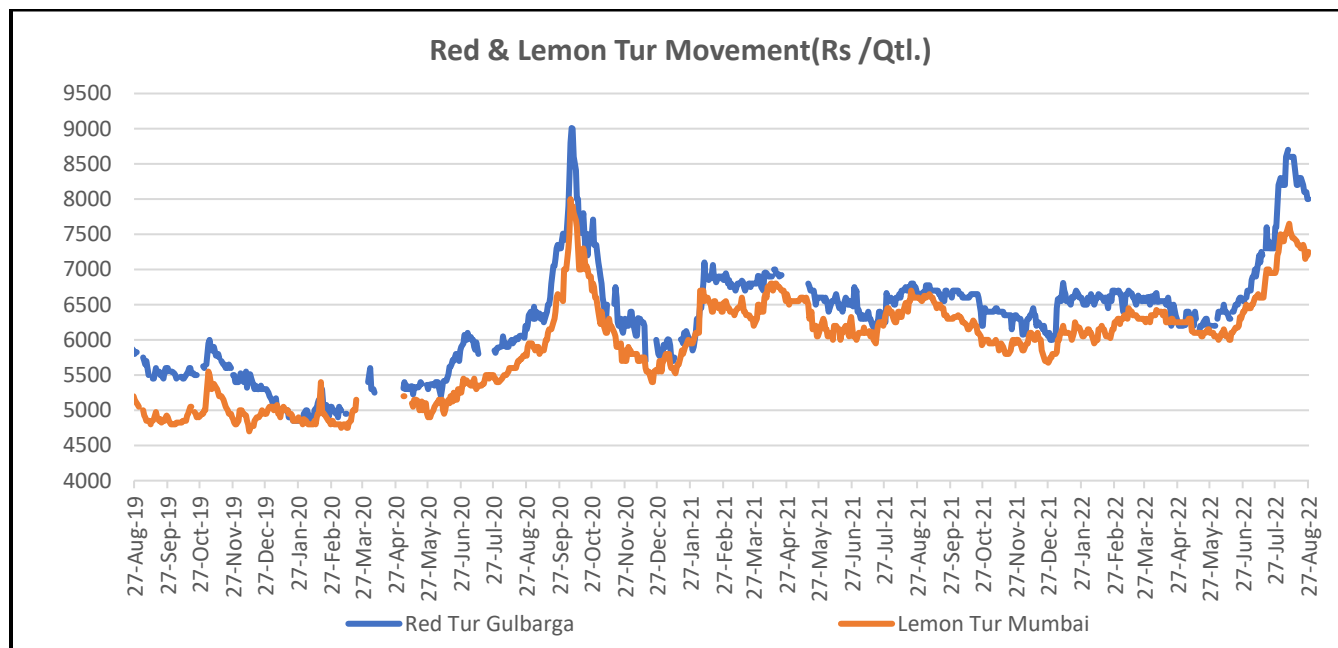

Market Recap:

This week too, prices of **Tur** in domestic market have decreased by 2.6 to 6.6%, on an average, during the week under review. It may move down slightly from the current level, if additional steps are taken by the Centre. Prices are reeling under pressure currently due to Govt.'s recent decision on stock declaration despite there are reports of

crop loss due to water logging, lower coverage area etc. Import volume and price for African crop would be key to direct the price trend in coming weeks. This year crop size may decrease to 33-35 from 37 LMT in 2021-22. Weather condition is very crucial at this point of time. Local crop is being traded at Rs 7300-8000. Lemon Tur in Mumbai is being traded at Rs7250. The short-term outlook seems weak. Myanmar is offering Tur at \$923 per MT, basis Indian port.

Outlook for the week: Mixed trend is likely this week.

Following graph illustrates Tur price movement in different markets:

Tur % Price Fluctuation Over Previous Week					
Markets	Today	Week Ago	Month Ago	Year Ago	% Ch. Over

Black Matpe (Urad):

Market Recap:

Heavy rains over Shivpuri, Ashok Nagar, Vidisha in M.P. and Lalitpur in U.P. is likely to adversely affect the standing **Urad** crop which is into flowering to podding stage. Farmers have covered 36.14 lakh ha so far, down by 4.66% from last year as on 26th August. Bad weather conditions in M.P. and Rajasthan have increased concerns regarding crop loss. Given the prevailing weather conditions, the loss ratio is bound to increase and may push cash market up by Rs 200-300 again despite the current declining trend. Currently, Urad is being traded at Rs7150 in Chennai and Rs 7200 in Mumbai. Myanmar's latest decision of depreciating value of Kyat from 1850 to 2100 per Dollar has decreased the cost of import. Market prices are still feeling heat due to devaluation of Myanmar currency Kyat from 1850 to 2100 against Dollar. C&F quotes have fallen by around \$90-100 till date to \$873 per MT for Faq and \$995 per MT for Sq variety respectively. The volume of import needs to be monitored for August and September.

Outlook for the week: Prices may trade in a mix range.

Green Gram (Moong): Market Recap:

Early sown Kharif **Moong** crop arrivals have started coming into Bagalkot, Solapur and adjoining areas of Maharashtra along with Gadag area of Karnataka which are fetching lower prices by Rs 200 to 300 per quintal due to presence of higher moisture content upto 17 to 18%. Arrival pressure will start to increase after 1st week of September month. Recent weather event over Rajasthan, may remain deleterious for the standing crop which are into flowering to early maturity stage as excess rains and water logging situation may negatively affect the final yield. Farmers have covered around 32.69 lakh ha area, down by 4.24 % from last year. Excessive rains have not only disturbed the sowing activities but also started decaying the root of plants where the fields are inundated. As the stocks of Moong in Central Pool is enough to meet the requirement, upside movement is unlikely to continue. Moong production in Kharif season is expected to be in the range of 15 to 16 LMT as per the preliminary estimates. However, weather conditions in Rajasthan during Aug and Sep would be crucial for the Kharif crop size. Prices of

Moong decreased by 2 to 5%, on an average, in local markets. The overall sentiments remain weak for the cash Moong markets. New arrival in Maharashtra may put further pressure on the cash Moong market.

Outlook for the week: new crop arrivals may put further pressure on the cash Moong market. Following graph illustrates Pea price movement in different markets:

Moong Prices per Quintal
