Commodity-wise Domestic, International Prices and Arrivals at Different Centres

Pulses Sector- Domestic Highlights:

New Kharif Moong and Urad crops arrivals also witnessed in Latur on last Friday and around 50 bags of Urad and 200 bags of Moong arrivals noted there, however, higher moisture content remains the cause of concern. Kalgi mandi of Gulbarga district and Pipariya market of MP too witnessed new Urad crop arrivals however, in a very small quantity. New Moong and Urad crop arrivals are expected to increase from 1st week of September, which may keep the Moong and Urad market sentiments slightly down till the arrivals pressure get over.

Cabinet nod for disposal of Chana at discounted rate is also expected to keep the whole market sentiments little down not only for Chana but for other pulses too despite the fact that Kharif pulses (Tur, Moong and Urad) production is expected to be negatively affected due to excess rains in major producing states.

Recent rains in Rajasthan have reportedly badly impacted the Urad in Jhalawad, Kota, Bundi, Baran area. Crop loss percentage is likely to increase between 20 to 35% for Kharif pulses as prediction for above normal rainfall throughout the September is also there. As per IMD, more than normal rains are predicted over Central and North-West India including MP, East-Rajasthan, Western-Gujarat, Maharashtra, North-Karnataka during September month. These States are important from point of production of pulses. Assessment regarding crop or area loss is underway yet.

Heavy rains over MP in recent past in the key Pulses growing areas like Shivpuri, Ashok Nagar, Vidisha and Lalitpur in UP is likely to adversely affect the standing Urad and Moong crop which are into flowering to podding stage. Eastern Rajasthan has witnessed intense rainfall activity and districts like Kota, Bundi, Baran, Jhalawar etc. are badly affected (by 20 to 30%, as per estimate) due to such intense rains and flooding, consequently the pulses crop like Urad and Moong are likely to get affected in terms of both acreage and yield losses. The low area coverage, abnormal weather conditions have started signaling tight supply side, especially for Tur and Urad, next year amidst the prospects of increasing Lentil import from Canada as well as Australia.

All India Pulses area recorded at 129.55 lakh as on 2nd September, 2022, down by around 4.36% from 135.46 lakh hectare, Urad acreage at 36.62 lakh ha, down by 4% from 38.18 lakh ha., Moong acreage at 32.97 lakh ha., down by 4% from 34.38 lakh ha and Tur sowing at 44.86 lakh ha., down by around 5.67% from 47.56 lakh ha.

Due to heavy rains and water logging in Maharashtra, Rajasthan and MP, Urad, Tur and Moong area is already down by 4%, 5.67% and 4% so far and it may remain down. Even Moong area may decline by 10 to 12% from last year despite good start in the beginning. Weather conditions in September would be very crucial and the fate of kharif crop size would depend on it. The emerging conditions are not favorable for a good crop size.

Tur traded mixed during the week under review and it traded up by 2.7% at INR 7,500 per quintal in Kadapa market while Tur prices traded down by 5% at INR 7,600 per quintal in Gulbarga market. Reports of crop loss due to excess rains over major producing state namely Karnataka and IMD's prediction of more rains in September month also supporting the sentiments but simultaneously, Centre's decision to dispose off around 15 lakh tonne of Chana at discounted prices taking toll on the whole pulses sentiments after its strict decision on stock declaration. If, crop and area loss reports remain coming in coming days too, prices may recover from current level despite the fact that import volume and price for African crop would be key to direct the price trend in coming weeks. This year crop size may decrease to 33-35 from 37 LMT in 2021-22. Weather condition is very crucial at this point of time. The short-term outlook seems weak as of now. Myanmar is offering Tur at \$910 per MT, basis Indian port.

Despite the fact that heavy rains in August have affected the **Urad** crop negatively in MP and some parts of UP and Rajasthan, Urad prices traded down by 1 to 2% during the week under review as it traded down at INR 7,100 per quintal in Mumbai while it also traded down at INR 7,025 per quintal in Chennai too. IMD's prediction of more rains in September may take toll on Urad crop which are at flowering to podding stage at present. If, IMD's prediction comes true, it may affect the crop health negatively which can take the prices as well as sentiments slightly firm side. Right now, Centre's recent decision of Chana selling at discounted rate is keeping the prices down and it may remain slightly down for more some-time on the back of Govt. decision. Otherwise, market tone seems firm on the background of crop

and area loss due to heavy and excess rains. Negative impact of devaluation of Myanmar currency Kyat from 1850 to 2100 against Dollar has now over as C&F quotes have already fallen by around \$90-100 till date to \$880 per MT for Faq and \$1010 per MT for Sq variety respectively. The volume of import needs to be monitored for August and September.

New Kharif Moong crops arrivals have also started in Latur on last Friday and around 200 bags of Moong arrivals noted there, however, higher moisture content remains the cause of concern. New arrivals are fetching lower prices due to higher moisture content. Volume of rains will remain in focus during September as any incident of heavy rains Moong crop pods will have shattering effect resulting in fall in yield as well as crop size amidst the fact that coverage area too is running shorter by 4% to 32.97 lakh ha. besides quality deterioration. As the stocks of Moong in Central Pool is enough to meet the requirement, upside movement is unlikely to continue specially when Centre has allowed to sell Chana at discounted prices in the various markets to check the pulses inflation rate. Moong production in Kharif season is expected to be in the range of 15 to 16 LMT as per the preliminary estimates. However, weather conditions in Rajasthan during Sep would be crucial for the Kharif crop size. The overall sentiments remain weak for the cash Moong markets. New arrival in Maharashtra may put further pressure on the cash Moong market.

Chana cash markets too traded down by 1 to 3% during the week under review as Centre's decision to sell 15 LMT Chana under PDS schemes put more pressure on the sentiments. Ample availability (over 25 LMT) in Central Pool and selling by NAFED from Rabi 2020 & 2021 crop is not letting the tone to move upside. Due to dispose of huge volume of Chana market prices are not likely to improve as recent decision would eat up the actual demand from the market. Now, there are apprehensions that if Chana prices remains below than its MSP, farmers may divert Chana area to other lucrative crops while the Chana sowing is scheduled to start from mid-October. Govt.'s decision remains a crucial factor for price direction for the Chana cash market. Availability is good, so spike in Chana market is unlikely at this point of time. There is a shortage of quality Chana in markets and mills may try to get Chana from Central Pool in the lean season.

Lentil cash market traded down by around 1 to 4%, on an average, during the week under review. It traded at INR 6,200 per quintal in Mumbai and INR 6,450 per quintal in Kanpur. Pressure on price might be seen as quotes (FoB) in Canada have decreased to \$750 per MT. It may decline further by \$25-30 by mid-September ahead of bumper crop (29.4 LMT, Canada Statistics) in Canada this year. Good pace of harvesting in Canada amidst conducive weather is keeping global market sentiments under check. Around 12% harvesting has already done in Canada while crop size is now likely to be at record 29.4 lakh tonne this year from 16 lakh tonne last year signaling for easy global supply. Australia too is expected to produce around 7.25 to 7.88 lakh tonne Lentil during year 2022-23. Thus, global market surplus is likely to inch up by 14-15 lakh tonne from 9 to 10 lakh tonne (previous estimate of different consultant) after the considering higher crop size in both the countries. On better crop prospects, stockists in local markets too have started releasing stocks at discounted price. Despite the low availability of stocks at ports, sentiment remains weak, as supply from the global market is bound to increase not only from Canada but also from Australia in coming months. Farmers in India too have 10 to 15% stocks, who may prefer to release before Rabi sowing, expected from mid-Oct. The overall tone remains weak as cheaper availability of Chana has potential to divert the actual demand from Indian market where the consumers the price sensitive.

International News:

New data released by Statistics Canada recently reveals that Chickpea production in Canada is expected to be around 1.33 lakh tonne, up by 75% from 76,000 tonne same time last year.

As per the recent report by Statistics Canada, Dry Pea production in the country is expected to swell well by around 60% to 36.1 lakh tonne during Marketing Year 2022-23 from 22.57 lakh tonne same time last year. Agency's previous estimate was of 34 to 34.5 lakh tonne. Two major producing states like- Saskatchewan and Alberta are expected to produce 18.10 lakh tonne and 15.40 lakh tonne Dry Pea respectively.

Massive rise has been projected for Lentil production in Canada for 2022-23. Around 81 % increase from last year is considered a hefty increase and it would make global supply at comfortable level. This year Canada is going to harvest 25 to 29 LMT crop. Dry Peas production too has been pegged at 36 LMT, up by around 60% from last year. We see a significant rise in Chickpeas production, but quantity of the crop is insignificant and it does not affect the global supply.

According to the recent report by Statistics Canada, country is expected to produce around 29.06 lakh tonne Lentil during 2022, up by around 80% from last year same time. Agency's new estimate is far up from AAFC estimate which was of 24.60 lakh tonne. It means, global Lentil supply would increase by around 14 to 15 lakh tonne from previous estimate of 9-10 lakh tonne. It will keep in check the global prices for Lentil in coming months.

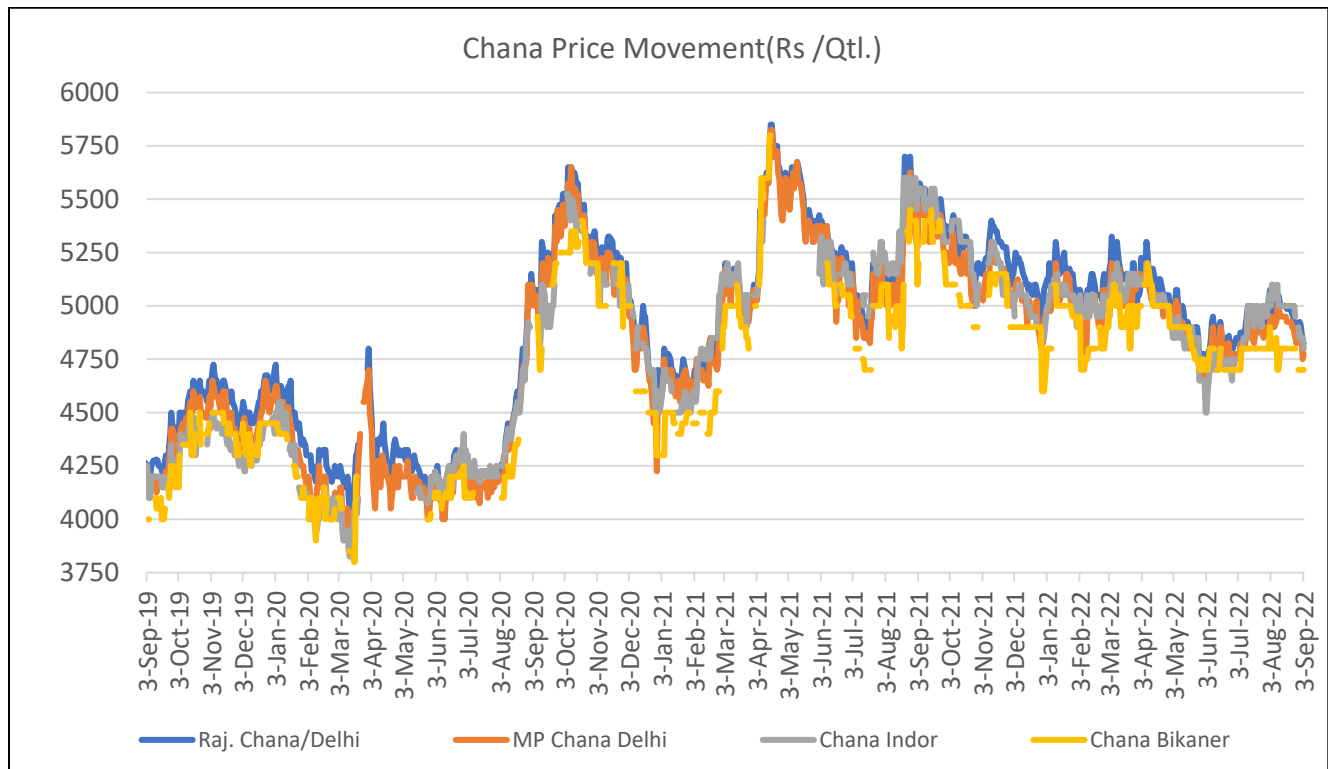

Weekly Outlook: - Slightly weak trend is expected this week.

Pulses-Wise Scenario:
Chana
Current Scenario:

Chana cash markets too traded down by 1 to 3% during the week under review as Centre's decision to sell 15 LMT Chana under PDS schemes put more pressure on the sentiments. Ample availability (over 25 LMT) in Central Pool and selling by NAFED from Rabi 2020 & 2021 crop is not letting the tone to move upside. Due to dispose of huge volume of Chana market prices are not likely to improve as recent decision would eat up the actual demand from the market. Now, there are apprehensions that if Chana prices remains below than its MSP, farmers may divert Chana area to other lucrative crops while the Chana sowing is scheduled to start from mid-October. Govt.'s decision remains a crucial factor for price direction for the Chana cash market. Availability is good, so spike in Chana market is unlikely at this point of time. There is a shortage of quality Chana in markets and mills may try to get Chana from Central Pool in the lean season.

Outlook for the week: Any spike in prices is unlikely.

Following graph illustrates Chana price movement in different markets:

Chana Prices per Quintal					
Markets	Current	Week Ago	Month Ago	Year Ago	% Ch. Over
	03.09.22	27.08.22	03.08.22	03.09.21	27.08.22

Price Projection For Bikaner During September-2022 (4700-5100)					

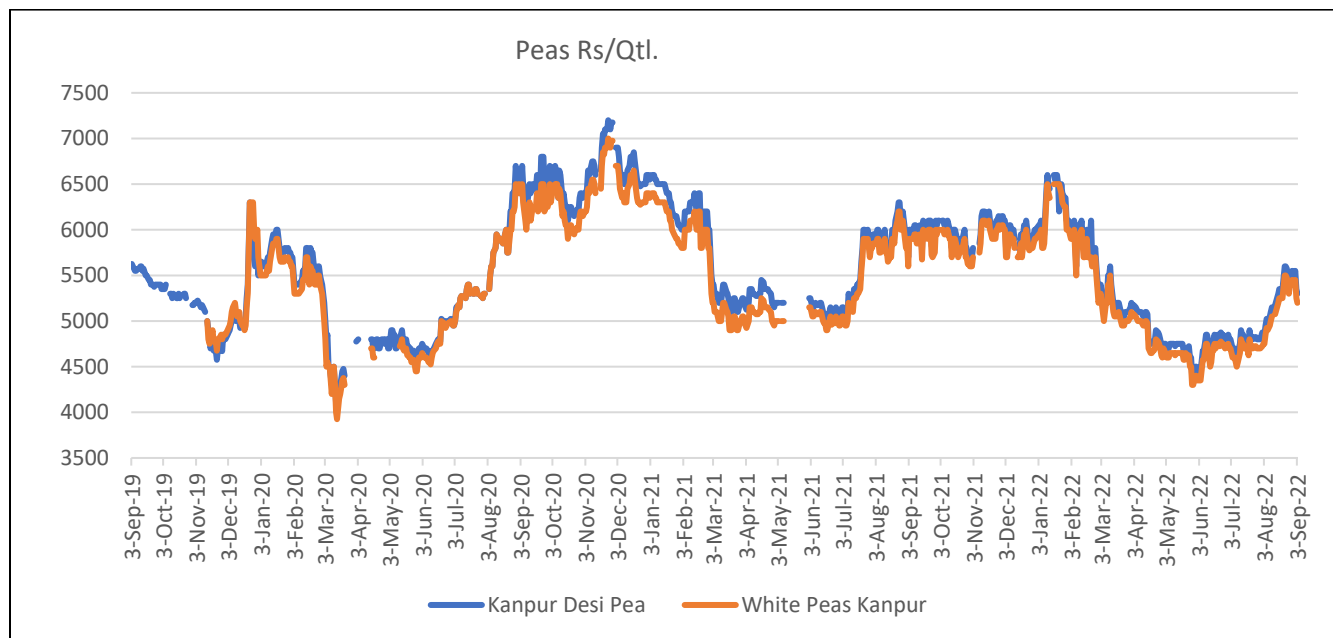

Peas (Matar):

Current Scenario:

Pea physical market too remained down and fall by around 3 to 4% during the week under review after Centre's decision to dispose off 15 lakh tonne Chana at discounted prices in various markets. Market prices are likely to remain weak for some more time as easy availability of cheaper Chana would eat up the actual demand for Peas too besides Chana. In Kanpur, Desi Peas traded down by 3.67% at INR 5,300 per quintal and White Pea prices traded down by 3.70% at INR 5,200 per quintal respectively.

Outlook for the week: Pea market may trade bearish.

Following graph illustrates Pea price movement in different markets:

Yellow & White Peas % Price Fluctuation Over Previous Month					
Markets	Today	Week Ago	Month Ago	Year Ago	% Ch. Over

Kanpur White Peas	5200	5400	4750	5900	-3.70
Price Projection For Kanpur Desi During September-2022 (4900-5400)					

Lentils (Masoor):

Market Recap:

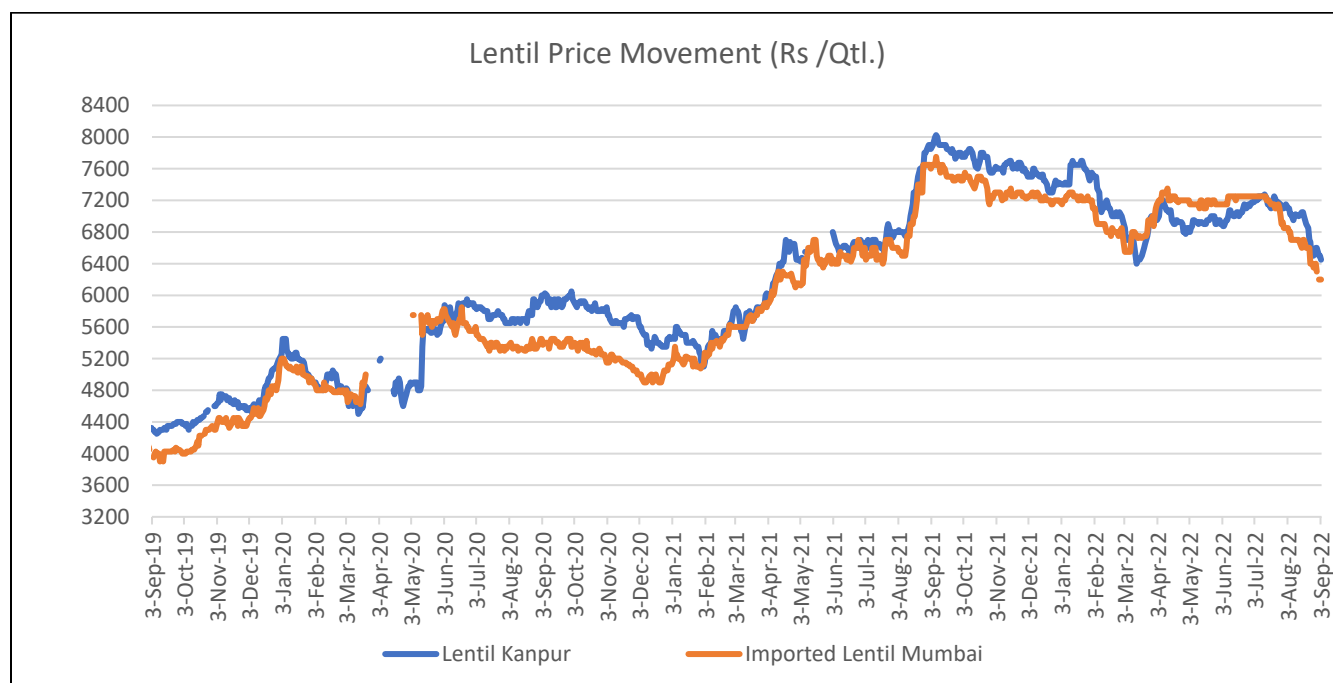

Lentil cash market traded down by around 1 to 4%, on an average, during the week under review. It traded at INR 6,200 per quintal in Mumbai and INR 6,450 per quintal in Kanpur. Pressure on price might be seen as quotes (FoB)

in Canada have decreased to \$750 per MT. It may decline further by \$25-30 by mid-September ahead of bumper crop (29.4 LMT, Canada Statistics) in Canada this year. Good pace of harvesting in Canada amidst conducive weather is keeping global market sentiments under check. Around 12% harvesting has already done in Canada while crop size is now likely to be at record 29.4 lakh tonne this year from 16 lakh tonne last year signaling for easy global supply. Australia too is expected to produce around 7.25 to 7.88 lakh tonne Lentil during year 2022-23. Thus, global market surplus is likely to inch up by 14-15 lakh tonne from 9 to 10 lakh tonne (previous estimate of different consultant) after the considering higher crop size in both the countries.

On better crop prospects, stockists in local markets too have started releasing stocks at discounted price. Despite the low availability of stocks at ports, sentiment remains weak, as supply from the global market is bound to increase not only from Canada but also from Australia in coming months. Farmers in India too have 10 to 15% stocks, who may prefer to release before Rabi sowing, expected from mid-Oct. The overall tone remains weak as cheaper availability of Chana has potential to divert the actual demand from Indian market where the consumers the price sensitive.

Market Outlook: Overall tone seems slightly weak to steady.

Following graph illustrates Lentil price movement in different markets:

Lentil Prices per Quintal					
Markets	Current	Week Ago	Month Ago	Year Ago	% Ch. Over
	03.09.22	27.08.22	03.08.22	03.09.21	27.08.22

Pigeon Pea (Tur/Toor):

Market Recap:

Tur traded mixed during the week under review and it traded up by 2.7% at INR 7,500 per quintal in Kadapa market while Tur prices traded down by 5% at INR 7,600 per quintal in Gulbarga market. Reports of crop loss due to excess rains over major producing state namely Karnataka and IMD's prediction of more rains in September month also supporting the sentiments but simultaneously, Centre's decision to dispose off around 15 lakh tonne of Chana at discounted prices taking toll on the whole pulses sentiments after its strict decision on stock declaration. If, crop and area loss reports remain coming in coming days too, prices may recover from current level despite the fact that import volume and price for African crop would be key to direct the price trend in coming weeks. This year crop size may decrease to 33-35 from 37 LMT in 2021-22. Weather condition is very crucial at this point of time. The short-term outlook seems weak as of now. Myanmar is offering Tur at \$910 per MT, basis Indian port.

Outlook for the week: Mixed trend is likely this week.

Following graph illustrates Tur price movement in different markets:

Tur % Price Fluctuation Over Previous Week					
Markets	Today	Week Ago	Month Ago	Year Ago	% Ch. Over

Black Matpe (Urad):
Market Recap:

Despite the fact that heavy rains in August have affected the Urad crop negatively in MP and some parts of UP and Rajasthan, Urad prices traded down by 1 to 2% during the week under review as it traded down at INR 7,100 per quintal in Mumbai while it also traded down at INR 7,025 per quintal in Chennai too. IMD's prediction of more rains in September may take toll on Urad crop which are at flowering to podding stage at present. If, IMD's prediction comes true, it may affect the crop health negatively which can take the prices as well as sentiments slightly firm side. Right now, Centre's recent decision of Chana selling at discounted rate is keeping the prices down and it may remain slightly down for more some-time on the back of Govt. decision. Otherwise, market tone

seems firm on the background of crop and area loss due to heavy and excess rains. Negative impact of devaluation of Myanmar currency Kyat from 1850 to 2100 against Dollar has now over as C&F quotes have already fallen by around \$90-100 till date to \$880 per MT for Faq and \$1010 per MT for Sq variety respectively. The volume of import needs to be monitored for August and September.

Outlook for the week: Prices may trade in a mix range.

Green Gram (Moong):

Market Recap:

New Kharif Moong crops arrivals have also started in Latur on last Friday and around 200 bags of Moong arrivals noted there, however, higher moisture content remains the cause of concern. New arrivals are fetching lower prices due to higher moisture content. Volume of rains will remain in focus during September as any incident of heavy rains Moong crop pods will have shattering effect resulting in fall in yield as well as crop size amidst the fact that coverage area too is running shorter by 4% to 32.97 lakh ha. besides quality deterioration. As the stocks of Moong in Central Pool is enough to meet the requirement, upside movement is unlikely to continue specially when Centre has allowed to sell Chana at discounted prices in the various markets to check the pulses inflation rate. Moong production in Kharif season is expected to be in the range of 15 to 16 LMT as per the preliminary estimates. However, weather conditions in Rajasthan during Sep would be crucial for the Kharif crop size. The overall

sentiments remain weak for the cash Moong markets. New arrival in Maharashtra may put further pressure on the cash Moong market.

Outlook for the week: new crop arrivals may put further pressure on the cash Moong market. Following graph illustrates Pea price movement in different markets:
